TAIWAN'S ECONOMIC SITUATION AND OUTLOOK

Council for Economic Planning and Development Executive Yuan

March 2008

CONTENTS

I. CURRENT DOMESTIC SITUATION

- Economic Growth
- Foreign Trade
- Domestic Investment
- Industrial Production
- Employment
- Prices
- Money and Interest Rates
- Business Cyclical Conditions

II. PROSPECTS

III. POLICY INITIATIVES

Economic Growth

 \Rightarrow In 2007, the economy is preliminarily estimated to have grown 5.7%.

⇒Thanks to the brilliant performance in exports, industrial production and corporate profits, the Taiwan's economy grew 6.4% in the fourth quarter of 2007, much faster than previously forecasted.

Domestic Investment

- ⇒ In the fourth quarter of 2007, the 2.4% fall in private investment is attributable to a 2.0% decline in imports of capital equipment and a decrease in construction work, despite a 4.0% growth in manufacturing investment goods.
- ⇒ For 2007 as a whole, gross fixed capital formation rose 2.4%, including a 3.4% rise in private investment.

Foreign Trade

- ⇒ In January 2008, exports expanded 11.9% from a year ago, while imports rose 14.8% and generated a US\$1.5 billion trade surplus.
- ⇒ Exports and imports expanded 10.1% and 8.2%, respectively, in 2007.

Major trade partners

China (including Hong Kong) and ASEAN have become increasingly important trade partners to Taiwan since 2000, though trade with these two regions has grown more slowly in the last four years. Japan has remained Taiwan's largest supplier of imports, despite a narrowing share.

⇒ Export shares of the United States, Europe and Japan have narrowed as those of China (including Hong Kong), and ASEAN have increased.

Prices

⇒In January 2008, CPI rose 3.0% from a year ago, with increases in food, oils, taxi fees, and Chinese herbal medicines, offsetting continued decreases in electronic products. Core prices (excluding fresh food and energy prices) climbed 2.7%.
⇒WPI were pushed up by 10.2% ,reflecting the rising prices of crude petroleum and natural gas, petroleum & coal products, basic metal, and chemical material.
⇒In 2007, CPI and WPI increased 1.8% and 6.5%, respectively.

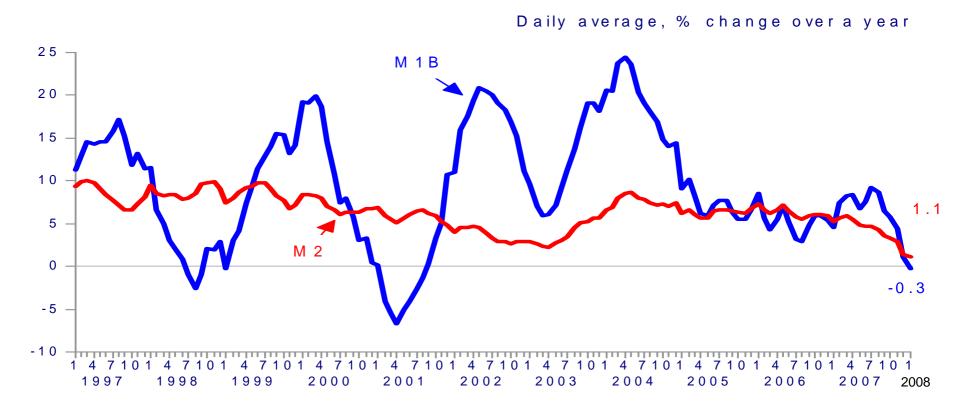

Source: Directorate General of Budget, Accounting, and Statistics.

Money Supply

⇒In January 2008, M1B decreased 0.3% from a year ago, while M2 grew 1.1%.

 \Rightarrow For 2007 as a whole, M1B and M2 expanded 6.4% and 4.3%, respectively.

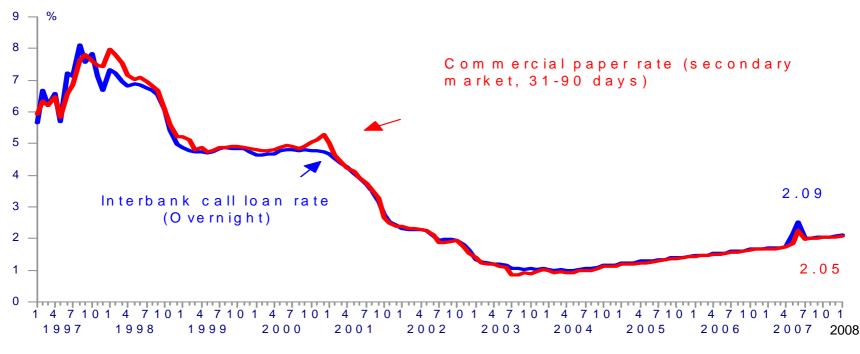

Source: Central Bank of China (Taiwan).

Short-term Interest Rates

- ⇒Since late May 2007, both long-term and short-term market interest rates have trended up, as tight funding conditions prompted banks to adopt a cautious attitude towards funds operations. Commercial paper rate and interbank rate recorded 2.05% and 2.09%, respectively, in January 2008.
- ⇒In 2007, Commercial paper rate and interbank rate increased 1.9% and 2.0%, respectively.

⇒The rediscount rate was raised to 3.375% in December 2007, from 3.25%.

Source: Central Bank of China (Taiwan).

Stock Price

⇒In January 2008, stock exchange index rose 1.4% from a year ago.
 ⇒In 2007, stock exchange index stood at 8,510 points, increasing 24% from the previous year.

Source: Taiwan Stock Exchange.

Monitoring Indicators

In January 2008, the total scores of monitoring indicators decreased to 27, and the light signaled "green" for the third consecutive month.

II. PROSPECTS - 2008

- Although the turbulence in the international financial markets has only very limited direct impact on Taiwan's financial markets, the tightening effect remains a source of threat to the overall economy.
- ⇒ Taiwan's economy is forecasted to grow 4.32% in 2008, with GNP amounting to US\$428.1 billion and per capita GDP reaching US\$18,042.
- Because global economic prospects are becoming less buoyant, exports will be anticipated to mildly increase in 2008, growing 6.1%, supported by sound economic situation in emerging markets. Induced by export expansion, imports will be able to increase 6.3%.
- Several factors will continue to help sustain private consumption growth at the rate of 2.9% in 2008: the continued improvement in the job market, a further increase in social welfare transfers, and the increasing cash dividends provided by prosperous corporate profits.

II. PROSPECTS - 2008

- Despite the completion of aircraft replacement by private airlines and a switch to more cautious investment approach by foundry manufacturers, private investment is expected to increase 3.3% in 2008, thanks to the newly constructed investment plan from some flat panel display manufacturers, the accelerated implementation of government-led urban renewal and rural reconstruction projects. Limited growth is foreseen in government investment, while positive growth is anticipated in investment by public enterprises.
- ⇒ Inflation pressures from international oil and commodity markets are forecasted to subside in 2008. As a result, WPI is estimated to be between 2.4% and 7.4% yoy by major research institutions. Since rising cost of raw materials have added to consumer price inflation pressure gradually, CPI inflation will not be below 2% until the second half of 2008. However, with stable prices of durable consumer goods and services, CPI is likely to see a moderate increase of 2.0% for the whole year. The government will keep alerting about price risks to achieve the target of below 2% inflation.

FORECASTS FOR TAIWAN'S ECONOMIC GROWTH

Macroeconomic Targets for 2008

- ⇒ The government set out a target of 4.8% growth for the economy in 2008, with CPI increasing no more than 2.0%. Efforts will be made to keep unemployment rate around 3.8%, with employment increasing 1.7% and labor participation rate standing at 58.5%.
- ⇒ Domestic demand will be expanded, while export momentum will be kept.

	Target for 2008
GDP growth (%)	4.8
Per capita GDP (US\$)	18,000
Consumer price increase (%)	< 2.0
Unemployment rate (%)	3.8
Employment increase (%)	1.7
Labor participation (%)	58.5
Demand components (Percent of GDP)	
National consumption	71.2
Domestic investment	21.5
Goods-and-services trade balance	7.0

III. POLICY INITIATIVES

- The socio-economic environments at home and abroad have changed rapidly in recent years, with globalization intensifying international competition, and the problems of population aging and a low birth rate emerging in Taiwan. To address these challenges and act upon the conclusions of the "Conference on Sustaining Taiwan's Economic Development" (COSTED), the Executive Yuan has formulated the "Economic Development Vision for 2015" and mapped out its "First-Stage Three-Year Sprint Program" for 2007~2009.
- This initiative involves the re-examination and adjustment of socioeconomic systems and development directions, with the aim of advancing toward a "prosperous, just, sustainable and beautiful Taiwan" in 2015 as the new vision and target of efforts for national development. It will be implemented in stages under three sequential "Three-Year Sprint Programs."

Taiwan's Image for 2015: a Beautiful Land of Prosperity, Justice, and Sustainability

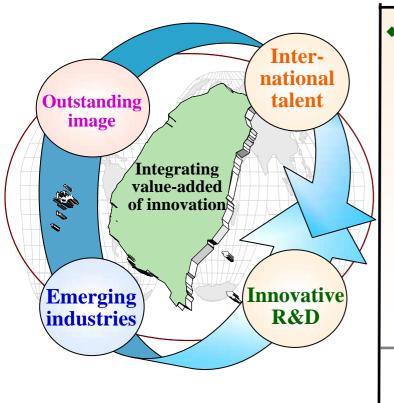

quality of life and congenial eco-

environment on Taiwan.

A Prosperous Economy

- Leading-edge innovation ability
- Top-notch manpower resources
- Outstanding Taiwan image
- Booming emerging industries

1996~2005

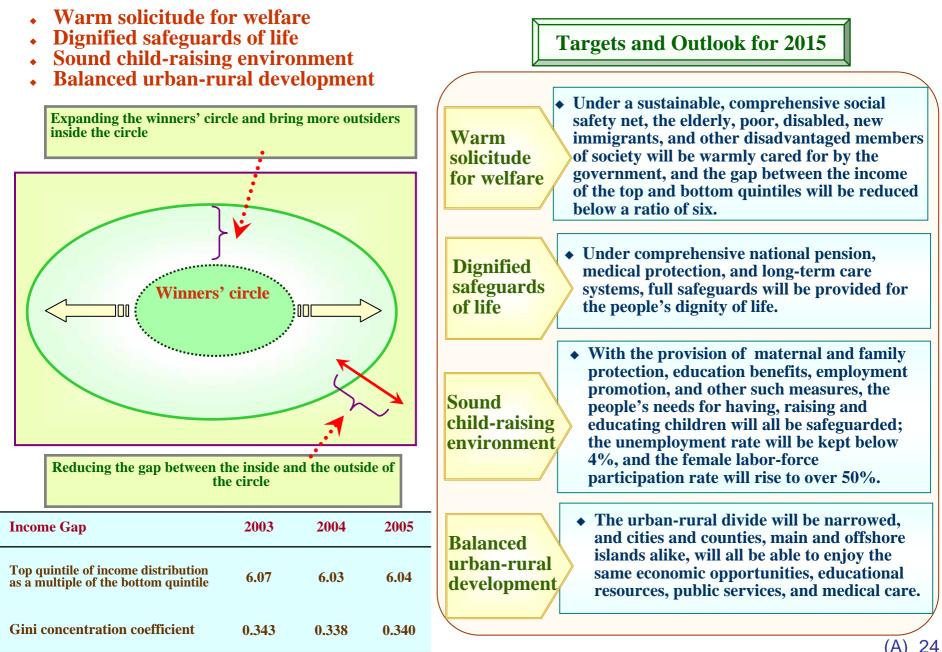

- Average annual GDP growth of 4.5%, derived from:
- Labor input contribution 13.3%
- Capital input contribution 53.3%
- Technical progress contribution 33.4%

2006~2015

- Average annual GDP growth of 5.0%, derived from:
- Labor input contribution 12.0%
- Capital input contribution 36.0%
- Technical progress contribution 52.0%

Innovation and value-added become the main driving forces of economic growth

Caring and Just Society

Sustainable Green Environment

- Closeness to water
- Rapid and convenient transport

• High quality of life

Targets and Outlook for 2015

TAL 25

to vater	 Flood control measures will achieve conspicuous results in effectively protecting 600 square kilometers of flood-prone land. A safe water supply will be assured, homes and industry will have ample water to use, and the tap-water connection rate will be 94%, the same level as in advanced countries. Sewerage systems will be extensively in place, and the wastewater treatment rate will reach 50%. Green infrastructure will be prevalent, with the development of 47 river systems, and every county and city having at least two waterside living environments, to provide nearby residents with high-quality scenic ecological waterside space.
y Rapid and and ansport	 Everyone will be able to enjoy fast and convenient transport services. The high-speed railway, MRT systems, and regional road networks will mean that all of Taiwan is just a day trip from home. International seaports and airports and major science parks will be just ten minutes away from expressways. Main cities will be just one to two and a half hours apart, and it will take only 30 to 60 minutes to reach regional centers from within metropolitan areas and country towns.
High uality of life	 There will be ample amenities such as cultural centers, sports stadiums, parks, green footpaths, and bicycle trails, and people will be able to fully enjoy the same level of high-quality living facilities as in advanced countries. International-standard performance venues and national games or competitive sports arenas will be built island-wide, with 90% of them reachable within one hour. The island-wide information super-highway will be complete, with broadband coverage reaching 90%. People will be able to enjoy economic and high-quality e-living. Successful land restoration will reduce deaths and injuries from
	andslides to almost zero.

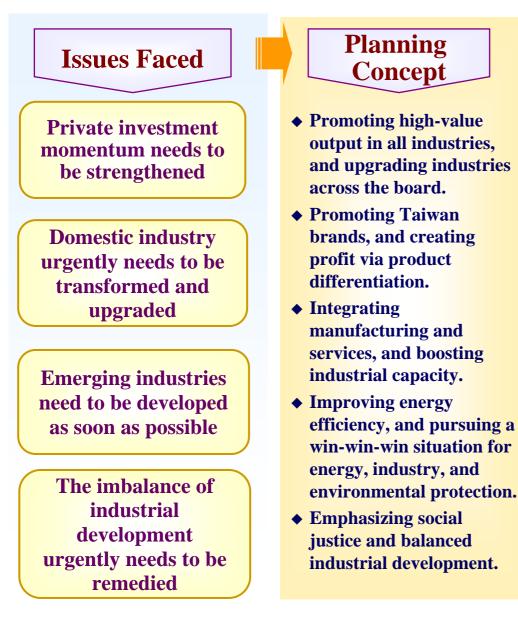

Targets up to 2015

To give concrete manifestation to the policy implementation theme of "big investment and big warmth" and realize the national development vision of "a prosperous economy, a just society and a sustainable environment," after giving consideration to the external and internal conditions previously described, the government has set the following macro-development targets for 2015, which it will seek to forge into a broad public consensus and spare no effort to achieve:

- Taiwan to be a unitary "living circle" in which no place is more than a day trip away.
- The CPI to rise by no more than 2% a year.
- Per capita GDP to reach US\$30,000 (US\$20,000 in 2009).
- The unemployment rate to be kept below 4%.
- The economic growth rate to be sustained at an average of 5%.
- The gap between the top and bottom quintiles of income to fall below a ratio of six.

Targets

2005

2009

2015

2. Financial Markets Package

(A)

2. Industrial Manpower Package

Issues Faced

Imbalance of supply and demand in labor market

Educational mechanisms out of synch with industry's needs

Cooperation between industry and academia still needs to be strengthened

Lack of flexibility in competing for international talent

Planning Concept

- Integrating manpower supply and demand data, and making timely adjustments to manpower resources strategy.
- Strengthening job skills training and cultivation, to supply industry with supplemental technical manpower as and when needed.
- Developing a flexible education system, to cater to industry's changing needs.
- Deregulating personnel systems, to add value to the synergies of industrialacademic (research institute) cooperation.

Targets

Unemployment of university graduates to be close to the general average unemployment rate in 2009.

The number of researchers to reach 8.7 per 1,000 employed persons in 2009.

The share of the higher education sector's R&D spending provided by industry to double to 9.1% in 2009.

Making higher and technical/vocational education more market oriented, to raise educational quality.

Deregulating personnel systems, to promote the flow and utilization of manpower resources among industry, academia and the research sector.

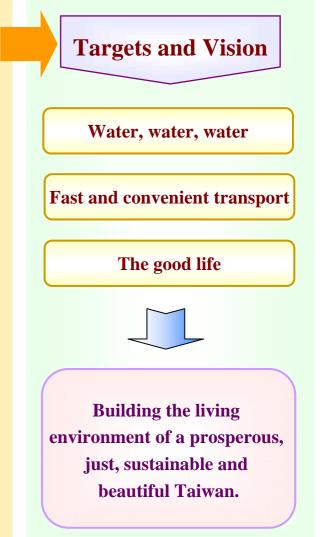

4. Public Construction Package

Issues Faced

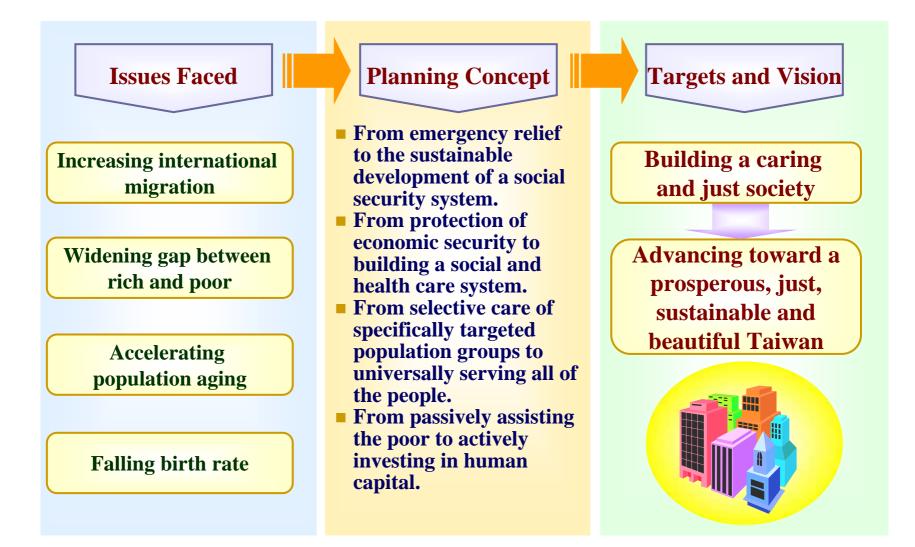

- 1. Shortage of water resources, frequent flooding, and serious pollution of rivers
- 2. Transport networks still need strengthening, and old bridges need reinforcement
- 3. Recreational facilities are inadequate, and the quality of residential environments still needs improvement
- 4. Cultural facilities are old, and there is still an urban-rural digital divide

Planning Concept

- 1. Building high-quality public infrastructure that is based on the people's needs, delivers innovalue and balanced development, maintains consistency of policy, and embodies humanistic sustainability.
- 2. Planning for people to live free from water shortages or floods and able to get close to water, in a society that offers fast and convenient travel, rapid distribution of goods, seamless transportation, and barrier-free passage, and in a greenified, highquality environment where high importance is attached to conservation.

5. Social Welfare Package

Funding Requirements of the Five Packages (2007-2009)

Unit: US\$ million

Five Packages	2007	2008	2009	2007~2009 Total
Industrial Development	1,785.0	2,298.6	2,764.3	6,847.9
Financial Markets	1.0	1.0	1.0	3.0
