Abstract

Looking back over the course of Taiwan's economic development during the almost 60 years from the late 1940s to 2005, its per capita GDP has climbed from less than US\$100 to US\$16,000, its export value has grown from under US\$100 million to nearly US\$200 billion, and it has developed from a recipient of US Aid into a major provider of outward FDI.

Over the same period, Taiwan's growth model has shifted from one mainly driven by inputs of labor and capital to one mainly led by inputs of innovation and R&D, while industrial development has gradually shifted from emphasis on capital accumulation to emphasis on heightening added value. These along with progress in political democratization and the enhancement of social justice have been the main ingredients in the success of the "Taiwan experience."

壹、前言

回顧台灣經濟發展歷程，從1940年代後期到2005年的近六十年間，台灣從每人GDP不到100美元增加到16,000美元；出口金額從不到1億美元，成長至接近2,000億美元；從美援接受國，發展成為對外投資大國。同期間，台灣經濟成長的動力也從勞動、資本投入為主，轉型為以創新、研發投入主導的發展模式；產業發展亦逐漸由重視資本累積，轉為重視附加價值的提升；再加上政治民主化、社會公義化的開展，締造了成功的「台灣經驗」。

貳、台灣經濟發展成果

台灣在經濟發展初期，政府扮演強勢主導政策的角色，從1950年代的「進口替代」、1960年代的「出口擴張」，到1970年代「第二次進口替代」時期，一方面採行「獎勵投資條例」等優惠措施，另一方面也嚴格管制，包括：高進口關稅、金融及外匯管制等，民間活力未盡充分發揮。

到了1980年代中期，順應國內外經濟環境的大幅轉變，政府採取一連串開放投資、金融、貿易的措施，台灣經濟自由化的腳步才大幅邁開，政府角色逐漸從「主導者」轉變為「監督者」。第二次石油危機之後，更積極調整產業發展方向，大力推動新興工業和金融、證券等服務業，並逐漸朝向區域化、國際化轉型發展。

2000年政黨輪替以來，政府本著「穩定中求改革，延續中求創新」的施政理念，提出「綠色矽島」的國家願景，相繼在2002年推出「挑戰2008：國家發展重點計畫」、2004年推動「服務業發展綱領及行動方案」等政策配套措施，並積極「投資台灣、布局全球」，因應知識

化、全球化時代的來臨。然而新政府成立以來，由於朝小野大，政治紛擾持續不斷，導致預算、法規立法延宕，政經環境與威權時期迥然不同，大大影響台灣經濟成長動能。所幸民間活力充沛、台商網絡遍及全球；政府也一直以企業為師，極力推動除弊、改革、興利措施。在全民的共同努力下，六年來的經濟發展成果仍然可觀。簡述如下：

一、經濟穩健成長

- 穩定中持續成長：經濟成長率在去（2005）年達4.09%，今年預估可達4.31%。另在國際原油及重要原物料暴漲聲中，國內物價仍然維持穩定。自2003年擺脫通貨緊縮陰霾後，國內物價大致持平；今年1-5月，消費者物價平均上漲1.37%。
- 外匯存底續增：台灣外匯存底五年多來增加1,542億美元，今年5月底已超過2,600億美元，僅次於日本、中國，排名全球第3名。
- 失業率回降：政府積極辦理各項促進就業措施，促使失業率平穩下降，2005年平均為4.13%；今年1至5月平均更降至3.84%。

二、產業升級

- 自1991年至2005年，高技術人力密集產業的產值比重從24.8%升至50.8%，出口比重則自27.3%升至48.7%。
- 至2005年，兩兆雙星產業中，半導體產值達1.11兆元，影像顯示產值達9,550億元，數位內容產值達2,900億元，生物技術產值達1,585億元。
- 至2005年，我國寬頻上網用戶數成長23%，達460萬戶，普及率達57.5%，需求面及基礎面的建置，有利於帶動通訊媒體業的發展。
- 至2005年，已吸引跨國企業在台設立30個研發中心，國內企業設立89個研發中心。

—排名世界第1的產品維持12項，第2名14項，第3名8項。

三、國際評比優異

—根據世界經濟論壇WEF的「成長競爭力」排名，我國從2000年全球第11名，亞洲第2名，提升至2004、2005年全球第4、5名，亞洲第1名。

—基於美元強勢，台灣以美元計算每人GDP成長有限，但根據國際貨幣基金（IMF）按購買力平價（PPP）計算之數據，2005年每人GDP達27,572美元，接近日本的30,615美元，領先韓國20,591美元近7,000美元。

—根據美國商業環境風險評估公司（BERI）的評估報告，2006年台灣投資環境排名全球第6，僅次於瑞士、新加坡、日本、荷蘭、挪威，在亞洲居第3位。

—根據英國「經濟學人」（EIU）的全球經商環境排名，未來五年（2006—2010）全球最佳經商地點，台灣排名第19，在亞洲僅次於新加坡、香港，排名第3。

參、挑戰與因應

不可諱言，政黨輪替以來，執政團隊除概括承受許多長期積弊與問題外，更面臨經社結構調整、國內外環境變遷等重大挑戰。其牽犖大者有四：

一、全球化與區域整合之因應

經濟全球化和區域整合的趨勢，雖有助台灣突破資源不足及市場規模的限制，但亦帶來日益增加的國際競爭壓力。尤其中國大陸經濟崛起，在投資與貿易領域帶來的競爭挑戰，隨著時間而增加。台灣除

必須致力維繫核心競爭力和經濟主體性外，更要在全球市場與中國市場間尋求動態平衡。

二、經濟發展與環境保護之調和

京都議定書生效之後，開啟了溫室氣體減量的新紀元；而我國產值與出口仍相當程度依賴高溫室氣體排放產業，亟須妥善因應。又國際能源價格居高不下，尤應推動能源價格合理化、節約能源，提升能源效率，以及發展再生能源，以謀求經濟、環境和能源三者間的調和與平衡。

三、社會結構轉變之新問題

近年來，台灣人口結構快速高齡化、少子女化，對教育、勞動力、稅收及世代間負擔都將帶來深遠影響，也同時衍生社會安全網維繫和未來人力供給不足等問題。又國內所得分配雖已轉趨平均，但民間對貧富落差的縮減、低所得家庭與弱勢族群生活水準的提高等，仍然殷切期待。

四、政府效能之提升

依瑞士國際管理學院（IMD）在今年5月發布的2006年世界競爭力報告，台灣在「政府效能」的國際排名滑落5名，成為第24名。其中政治不穩定、社會凝聚力欠缺，是導致排名退步的重要原因。我們除致力謀求朝野的和諧、合作外，亦應強化公共服務的創新與革新，鬆綁財經法規，增進政府效能，以提升整體國家競爭力。

為了因應這些課題與挑戰，政府持續推動各項政策措施。舉如：積極籌設自由貿易港區，活絡港口、機場之營運效益；促進國內外企業在台灣設立營運總部與研發中心；積極推動洽簽自由貿易協定，協

助企業開展全球策略聯盟布局；積極推動清潔生產技術，發展再生能源，研擬「溫室氣體減量法草案」、「能源稅條例草案」；健全社會保險和救濟制度，加強低所得者的技能培訓；推動法規鬆綁，包括「自由貿易港區設置管理條例」、「公司重整破產法草案」、「融資公司法草案」之立法等。

今年3月，蘇院長更宣布召開一次全國性的「經濟永續發展會議」。經籌備多時，預備會議已於6月16日順利召開，針對台灣經濟長期性、結構性、爭議性的問題，重新檢視、凝聚共識，並研議因應策略，貫徹執行。現在各分組正積極召開會議，整合各界具體建議，預計在7月27、28日舉行正式大會，屆時可展現具體成果。

肆、結語—展望與期許

近六年來，歷任行政團隊殫精竭慮、兢兢業業，拼經濟、護民生，也獲得民間企業莫大的鼓勵與支持。欣逢台灣省商業會成立60週年，謹此敬表祝賀與感謝之意，並提出兩點期許，與企業先進共勉。

第一，全力促進研發與創新。研發創新有助於改善技術、生產效率和發展潛能。近年來R&D占GDP比重雖有提高，但2004年仍僅及2.54%，與歐美國家、甚至韓國仍有相當距離。希望民間企業未來能積極投資研發創新；尤應體認優質人才是R&D的主要憑藉，重視企業人才培育，提升人才的質與量，順應全球化、國際化及知識經濟的發展潮流。

第二，善盡社會責任。最近看到美國富商巴菲特慷慨捐贈370億美元，提供慈善機構從事醫療研究和教育工作，令人非常感動。台灣一向也是充滿愛心與人情味的社會，許許多多非政府組織（NGO）長

期投入社福工作，協助政府照顧弱勢族群；其中，民間企業的捐輸也扮演重要角色。展望未來，舉凡環保、社福、社會安全等層面，都有賴企業的大力支持，衷心期待企業界熱烈參與，一方面善盡社會責任，造福人群，另一方面營造更良好的企業社會形象與聲譽。

今年6、7月，「經濟永續發展會議」積極進行，經由該會議結論共識的形成，政府將積極推動各項改善經濟體質的法案與政策。在經濟會辦理期間，國內經濟智庫提出「三蘭」經驗，以荷蘭、芬蘭、愛爾蘭小型開放經濟「改革」與「創新」的典範，做為效法對象，發展台灣成為全球增值服務中心。個人以為，歐洲另有一「蘭」，就是「瑞士蘭」（Switzerland）也值得我們作為標竿。期盼經由政府與民間的攜手合作，台灣有一天以嶄新的面貌躍登國際舞台，成為東方的「瑞士」！大家共勉之。

Abstract

Although Taiwan's economy has entered a more-mature stage in recent years, growth momentum has been maintained. In the latest evaluation announced by the World Economic Forum (WEF) in 2005, Taiwan's growth competitiveness was ranked 5th in the world and number one in Asia.

In 2005, key real-side macroeconomic indicators showed that Taiwan's economy achieved steady growth, expanding at a pace of 4.09%. But while foreign demand contributed more than 60% of economic growth, private consumption grew only 3.0% and private investment decreased 1.3%. Hence, Taiwan's primary tasks for ensuring economic growth are to give further stimulus to private investment and private consumption. Furthermore, to counterbalance the falling profitability of high-tech industries and emigration of traditional industries, Taiwan also needs to improve the innovative capacity of its industry. On this basis, the five main strategies for improving Taiwan's economic development are: (1) pursuing sustainable economic growth; (2) promoting innovation-oriented industries; (3) establishing sound financial and fiscal systems; (4) developing a favorable investment environment; and (5) extending the reach of global logistics operations.

1. Introduction

At the start of the 21st century, Taiwan's economy was hit by a succession of external shocks. The bursting of the global technology bubble was followed by the 9/11 terrorist attacks, the SARS epidemic, and the oil-price surge. Also, the challenge presented by the rise of China and other emerging economies forced Taiwan's economy into a phase of structural adjustment, upgrading and transition such as it had never experienced before. It was little wonder, then, that Taiwan's economic performance could hardly maintain all its shine of the past. Nevertheless, the government's vigorous efforts to carry out wide-ranging reforms and put key revitalizing measures in place ensured that the economy remained fundamentally sound.

In 2005, the four main features of Taiwan's economic performance were as follows: First, strong exports provided the key driving force of economic growth. Second, with the creation of 156,000 new jobs, unemployment fell steadily through the year. Third, technology and innovation gave added momentum to economic development. And fourth, Taiwan's international competitiveness ranked among the best in the world.

2. Taiwan's Current Economic Situation

2.1. Global Competitiveness

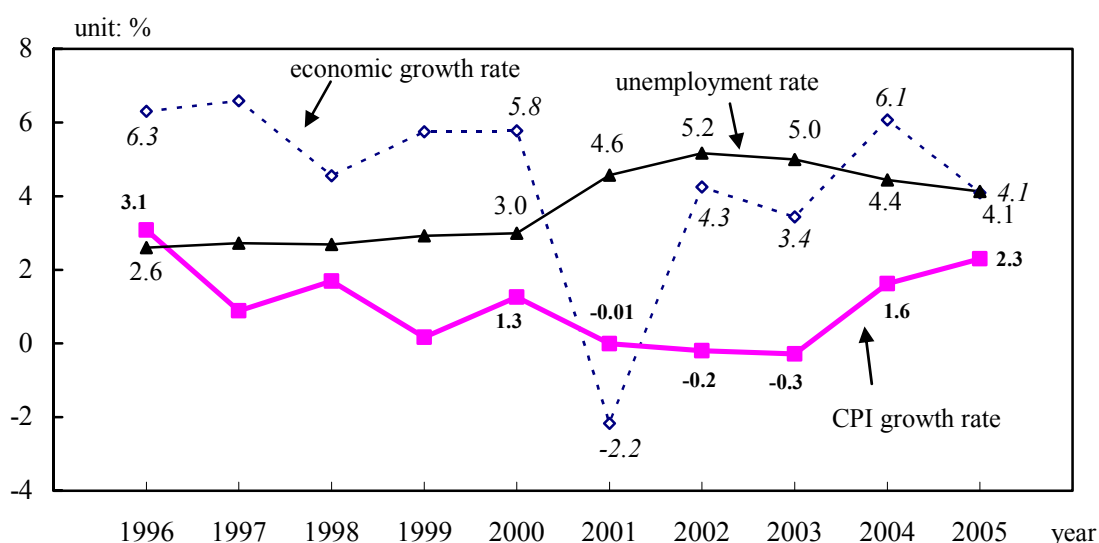

In the latest evaluation announced by the World Economic Forum (WEF) in 2005, Taiwan's growth competitiveness was ranked 5th in the world and number one in Asia. And in the world competitiveness rankings compiled by the International Institute for Management Development (IMD) in 2006, Taiwan was placed 18th worldwide and 4th in Asia.

2.2. Economic Growth

Although Taiwan's economy has entered a more-mature stage in recent

years, growth momentum has been maintained. In 2005, key real-side macroeconomic indicators showed that Taiwan's economy achieved steady growth, expanding at a pace of 4.09%. Foreign demand contributed more than 60% of economic growth, and per capita GNP rose to US\$15,676.

Figure 1. Taiwan's Major Economic Indicators

Source: DGBAS, *Quarterly National Economic Trends, Taiwan Area, R.O.C.*, No. 112, Feb. 2006.

The equitability of income distribution, for which Taiwan has long been noted but which had slipped away from its highest attainment, has settled back into an improving trend in the current stage of economic development. The latest available figures show that the ratio of the income received by the most-affluent one-fifth of Taiwan's households to that received by the least-affluent one-fifth shrank from 6.07 in 2003 to 6.03 in 2004.

2.2.1 Domestic Demand

In the domestic sphere, the growth rates of private consumption and

investment both weakened in 2005, despite the lowering of the unemployment rate and improvement in the stock market.

Domestic demand increased 1.7%, contributing 1.56 percentage points to the overall economic growth rate of 4.09%. Private consumption grew 3.0%, but private investment decreased 1.3%. Private investment had expanded at a rate above 9% in the first half of the year, due largely to contributions from the airline and high-speed railway sectors, but fell in the second half following the exodus of some manufacturing capacity. Government investment increased at a modest 0.3% in 2005 with the implementation of the New Ten Projects.

In recent years, as a result of higher income and the opening of domestic markets, consumer tastes and preferences have become more sophisticated, and household saving relative to income has fallen. At the same time, rising costs of land, labor, and environmental protection have shaved profits and reduced internal savings by business enterprises. Meanwhile, because of slower growth in current revenue and rising expenditures for social welfare, the current account surplus in the government's budget has declined sharply. For all these reasons, national savings fell markedly to 25.0% of GNP in 2005 from an all-time high of 38.5% in 1987.

2.2.2. Industry

Industrial restructuring and upgrading have continued, resulting in a steeper smile curve. In 2005, industrial production accounted for 24.6% of GDP and agriculture for only 1.8%. Continuing its strong-growth trend, the service sector's share of nominal GDP rose to an all-time high of 73.6% in 2005, making services the epicenter of economic expansion and a key stabilizer of economic growth.

Industrial production has rebounded smartly, with manufacturing quickening the pace of its restructuring and transformation. As a result, the manufacturing sector has acted as a major driving force of the economy's expansion, contributing 1.41 percentage points to overall economic growth in 2005. Moreover, the government has been stepping up implementation of the Two-Trillion, Two-Star Industries program, inducing large-scale investment that added more than NT\$2.5 trillion to these industries' production value in 2005 for a growth rate of 14.98%.

2.2.3 Foreign Trade

In the international sphere, the steady recovery of the global economy

and the pepping up of the global consumer electronics market worldwide have had a significant impact on Taiwan's export-led production. Exports of goods and services climbed 6.9% in 2005, largely due to surging demand for electrical machinery and precision instruments. Imports of goods and services grew 3.2% on the back of rising export-induced and domestic demand. Exports and imports translated into a 2.52 percentage-point contribution by net foreign demand.

Merchandise exports expanded by 8.8% in 2005, while imports increased 8.2%. Taiwan's trade surplus grew to US\$15.8 billion, from US\$13.6 billion in 2004. The composition of Taiwan's merchandise trade has changed substantially over the years, reflecting the restructuring and upgrading of its industry as well as progress in the liberalization and globalization of its economy. Industrial products have steadily increased their share of Taiwan exports, accounting for 98.8% in 2005. Within this category, exports of capital- and technology-intensive goods have shown impressive growth, raising their share of total exports to 79.1%. Meanwhile, because Taiwan has few natural resources, the import of agricultural and industrial raw materials constituted 71.6% of total imports in 2005.

Table 3 Composition of Exports and Imports (Percentage Distribution)

	2001	2002	2003	2004	2005

Due to the continuing shift of the center of world economic gravity from West to East, and the increasing trend towards regional integration, Taiwan's trade with countries of the Asia-Pacific region has been steadily increasing, and its trade and economic ties with those countries have been strengthening. In 2005, Taiwan shipped 39.2% of its exports to China and Hong Kong, making them its largest export markets worldwide. Because of industrial complementarity, Japan has long been the major supplier of Taiwan's imports, accounting for 25.2% thereof in 2005.

2.3. Inflation

Despite intensifying competition in the domestic market, the consumer price index (CPI) rose 2.3% in 2005, mainly owing to the rising international prices of oil, raw materials, and steel products, and the damage wreaked by typhoons and other extreme weather conditions on fruit and vegetable production. The core CPI, excluding fresh food and energy prices, increased by 0.7%, and the wholesale price index rose by 0.6%.

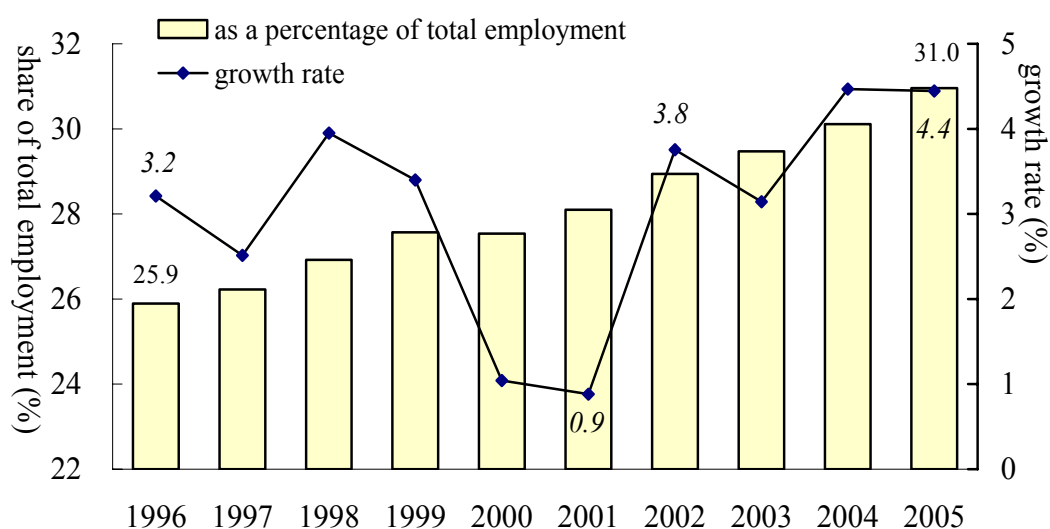

2.4. Employment

Starting from the second half of 2000, short-term slack in the economy and labor-market rigidity caused unemployment to turn upward. At the same time, a higher level of structural unemployment resulting from the ongoing transformation of Taiwan's domestic economic structure and exacerbated after 2001 by sluggish world economic growth contributed to the rise in the jobless. However, as economic conditions have taken a turn for the better, the labor market situation has also steadily improved. During 2005, 156,000 new jobs were created in Taiwan, raising the employment growth rate to 1.6%, and lowering the unemployment rate to 4.1% from 4.4% in the preceding year. Among the unemployed, 30.7% had lost their jobs due to

business closures or downscaling. The average monthly earnings of labor in manufacturing increased 2.8%.

As Taiwan has developed from an agricultural into a service economy, dramatic changes have taken place in its employment structure. The service sector has increased its share of total employment from 56.5% in 2001 to 58.3% in 2005. Meanwhile, knowledge-based employment has been growing in line with the development of the knowledge-based economy, with its ratio of total employment rising from 30.1% in 2004 to 31.0% in 2005.

Figure 2. Knowledge-based Employment

Note: Knowledge-based employment includes legislators, government administrators, business executives and managers, professionals, technicians, and associate professionals.

2.5. Public Finance

In recent years, the government has implemented various tax-exemption measures aimed at stimulating economic development. This caused the ratio of tax revenue to GDP to decline year by year a low of

12.1% in 2003. Since then, as Taiwan's economy has recovered, it has moved back up, climbing 1.2 percentage points to 14.1% in 2005 from 12.9% in 2004.

To improve the fiscal situation, the government has been taking measures to tap new sources of revenue and cut unnecessary expenditure. Moreover, with the steadying and continued recovery of the domestic economy, the government tax revenue as realized in 2005 exceeded the estimated figure by NT\$184.6 billion, the second successive year in which such a budget goal had been attained. Nevertheless, the government still recorded a fiscal deficit in 2005 (excluding local government), with the ratios of fiscal deficit to GDP and accumulated fiscal deficit to GDP at 3.2% and 32.1%, respectively. At present, Taiwan is placing emphasis on tax reform to properly adjust the tax structure and achieve tax equality and efficiency.

2.6. Money and Banking

In the wake of sustained economic expansion, rising prices and negative real interest rates, the Central Bank changed its low interest rate policy, adopted since the end of 2000, into a neutral monetary stance in October 2004. By the end of March 2006, the Central Bank had raised the discount rate to 2.375%, guiding market rates gradually upward.

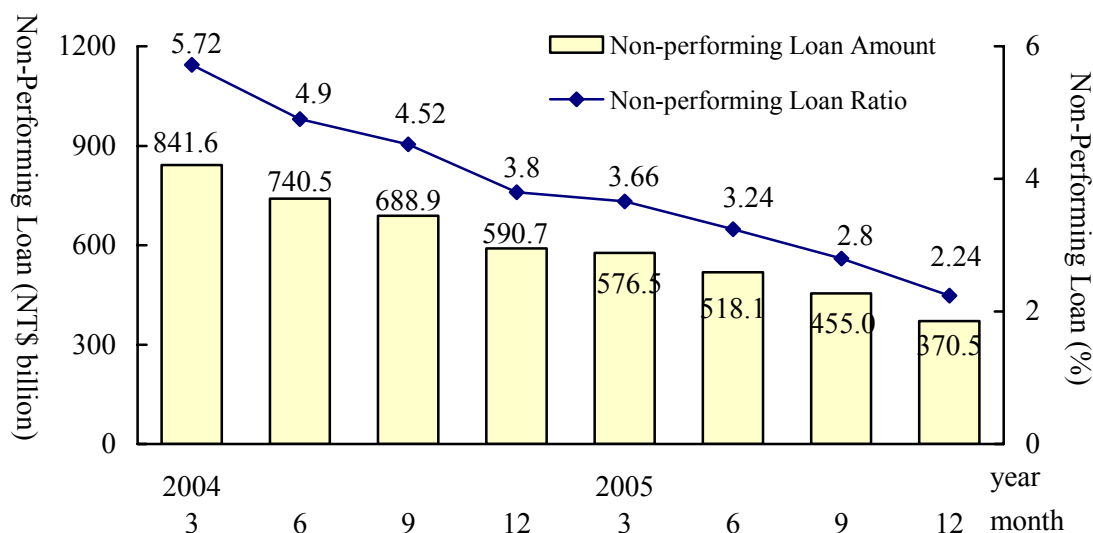

Furthermore, since the broadly defined non-performing loan (NPL) ratio of domestic banks peaked at 11.27% at the end of 2001, a continuing program of financial reforms has slashed it dramatically to just 2.24% in December 2005. Meanwhile, given a combination of the increase in demand for funds driven by economic expansion and banks' active promotion of consumer finance business, loans and investments by major financial

institutions grew by 7.7% in 2005. The expansion of bank credit, together with net capital inflows, led to an annual increase of 6.2% in the M₂ monetary aggregate in 2005.

2.7. Research and Development (R&D)

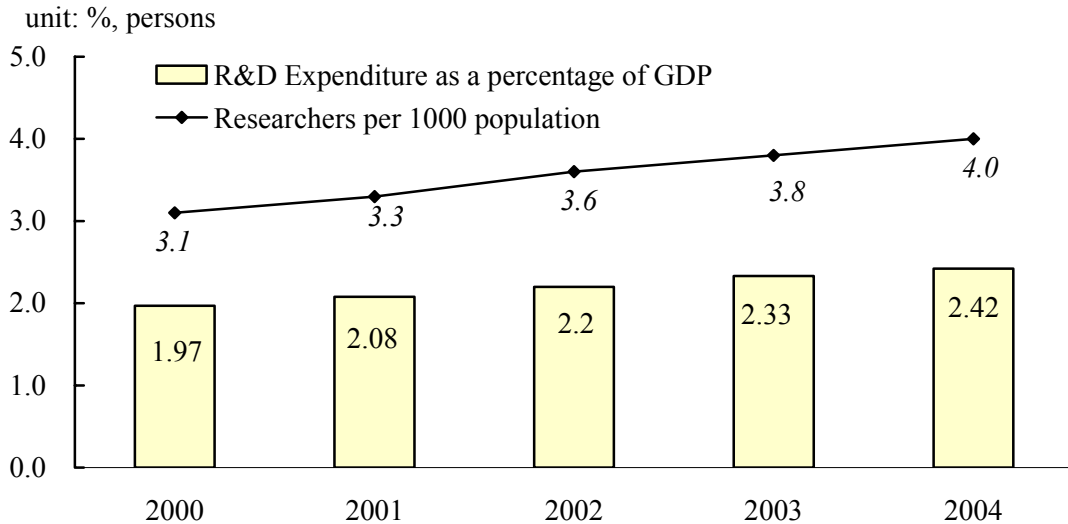

Thanks to a concerted effort by the government, research institutions, and the business community, Taiwan's total R&D spending rose from 2.08% of GDP in 2001 to 2.42% in 2004. It is, however, still lower than the R&D spending level in Korea, and the government has set the goal of raising it to 3% by 2006. The private sector overtook the public sector in R&D spending for the first time in 1993, and since then, private sector R&D expenditure has grown much more rapidly than that of the public sector. The number of researchers per 1,000 population has also risen significantly, up from 3.3 persons in 2001 to 4.0 persons in 2004.

3. The Strategies of Economic Development

3.1. Current Economic Challenges

3.1.1 Challenges from global trends

Taiwan faces the challenges presented by globalization, the economic rise of China and India, and the coming of the so-called “Asian era,” with their deep and far-reaching impact on the global division of industrial operations. At the same time, the gradual expansion of the EU and the formation of large free trade groupings in the Americas and East Asia is putting pressure on a country that depends on trade as much as Taiwan does.

3.1.2 Challenges from internal needs

On the domestic front, Taiwan still needs to boost domestic demand and give further stimulus to private consumption and investment growth. Meanwhile, to address the problem of relatively high unemployment among disadvantaged groups, the government needs to strengthen occupational

training and job-placement mechanisms. Also, the rapid aging of the population and the structural change of the labor market necessitate the building of a comprehensive social security system. To counteract the falling profits of high-tech industries and emigration of traditional industries, Taiwan needs to focus on improving industrial innovation. And to rectify fiscal imbalances and financial weaknesses, the government needs to push forward vigorously with fiscal and financial reforms.

3.2. Economic Development Strategies

3.2.1. Ensuring sustainable economic growth

Taiwan's primary tasks for ensuring economic growth are to keep the economy pepped up and to maintain effective risk management.

- To keep the economy pepped up, Taiwan needs to step up efforts to implement major construction projects to the best possible effect, and do the utmost to remove any obstacles in the way of their implementation, so that it can achieve national development hand-in-hand with sustaining sound economic growth.
- On the risk management side, the government needs to closely monitor the domestic impact of international oil prices, as well as other internal and external factors of uncertainty such as natural disasters and epidemics, in order to maintain economic stability.

3.2.2. Promoting innovation-oriented industries

Knowledge-based economic development is the prevailing global trend. To compete more successfully in the international trade arena, Taiwan needs to emphasize the enhancement of R&D, branding, and core advantages as the three-pronged approach to heightening industrial added value.

- To strengthen their competitiveness, Taiwanese enterprises need to improve their innovative capabilities, and develop high-value-added

creative, cultural, and special-feature industries to turn Taiwan into an “island of creativity.”

- Taiwan needs to promote the development of “globally competitive” and “local feature” twin-axial profit niche industries to strengthen its industrial competitiveness. From the global industrial value-chain perspective, it means building up “globally competitive” industries by strengthening their distinctiveness and differentiation, and heightening their international competitive advantage through industrial clustering, science-and-technology R&D, and strengthened marketing.
- At the same time, Taiwan needs to deeply cultivate brand value through such measures as establishing a brand venture capital fund and setting up a brand-appraisal system. On this front, the government plans to establish a brand institute to implement the “Brand Taiwan Development Project.”
- In addition, Taiwan needs to stimulate the building of industrial clusters to make the best combined use of local resources. Projects in this sphere include the “Hsinchu Biomedical Science Park,” the “Agricultural Biotech Park” in Pingtung County, the “National Flower Park” in Changhua County, the “Taiwan Orchid Biotech Park” in Tainan County, the “Marine Biotech Park” in Ilan County, the “Spice and Medicinal Herb Biotech Park” in Chiayi County, and the “Kaohsiung Biotechnology Park,” which are all under active operation or construction.

3.3.3. Establishing sound financial and fiscal systems

To ensure social equity and justice and to strengthen the financial system, Taiwan needs to accelerate reform of the tax and financial systems.

- Besides putting an alternative minimum tax system into effect from this year, continuing to push for elimination of the tax exemption for teachers

and military personnel, and reviewing incentive measures under the Statute for Promoting Industry, Taiwan is also actively deliberating on tax system reforms and ancillary measures for underpinning sustainable growth.

- Taiwan has already completed the first stage of financial reform, successfully achieving and even surpassing its target for slashing the NPL ratio for domestic banks. To raise the international competitiveness of its financial institutions, Taiwan now is following up with the second stage of financial reform, aimed at developing itself into a regional financial services center, building up the asset management business, and promoting financial industry consolidation.

3.3.4. Developing a favorable investment environment

- In continuation of its efforts to create a favorable investment environment, especially in respect of land acquisition, capital funding, and manpower supply, Taiwan's government is accelerating implementation of the New Ten Projects and the Challenge 2008 National Development Plan, while further reducing the rental costs of businesses moving into industrial zones.
- To induce more local and foreign firms to invest in Taiwan, the government needs to speed up improving investment information transparency and internationalizing laws and regulations, including those concerning service industry development, corporate governance, tourism development and land use, and human resources cultivation.
- In addition, the government is planning to convene a major conference on the sustainable growth of Taiwan's economy in June of this year, to focus on promoting industrial development and to forge consensus on creating an optimum investment environment for a new stage of economic development.

3.3.5. Extending global logistics operations

- The government is continuing to actively pursue the signing of free trade agreements (FTAs) or other forms of economic and trade cooperation with the United States and other friendly countries, with the expectation of this year concluding an FTA pact with Nicaragua and making plans to negotiate FTAs with other Central and South American countries.
- The government has already approved the “four sea and one air” free trade zones (the Kaohsiung Port, Taichung Port, Keelung Port, Taipei Port, and Taoyuan Air Cargo Park FTZs), all of which were fully operational by the end of 2005, and in the future will focus on strengthening the inducement of businesses to move into the zones and enhancing the zones’ operations management functions.

4. Prospects for Taiwan’s Economy

4.1. International Economic Outlook

According to the IMF’s latest forecasts issued in April 2006, global GDP growth is projected to reach 4.9% in 2006, 0.6 of a percentage point higher than expected last September. Among industrial countries, GDP growth in the United States is expected to moderate to 3.4% in 2006, still the highest among the G7. In Japan, economic activity picked up strongly in the fourth quarter of 2005 while deflationary pressure continues to ease, so the forecast for its growth rate this year has been hiked to 2.8%. Meanwhile, activity in emerging markets and developing countries remains very strong, with forecasts revised upward for most countries and regions.

Looking ahead, notwithstanding the greater-than-expected momentum in the global economy, a number of uncertainties remain. There are four main concerns, as follows: (1) High and volatile oil prices. First, the full

effects of the recent shock may not yet have been felt, especially if producers and consumers are still treating it as temporary rather than largely permanent in nature. Second, with excess capacity still very low, the market remains vulnerable to shocks. Third, with pricing increasingly driven by supply-side concerns, the adverse impact is likely to be greater than in the past, especially if feed-through to core inflation increases. (2) A tightening in financial market conditions. (3) Rising global imbalance. (4) An avian flu pandemic.¹

4.2. Forecasts for Taiwan's Economy

The consensus among major domestic and international research institutes is that, propelled by the rising global economic recovery, Taiwan's GDP growth rate should top 4% in 2006. Two-way trade is expected to expand at about the same pace as in 2005, while private consumption will be boosted by the improving job market. Private investment is expected to grow more moderately while, in the public sector, government investment maintains positive growth and public enterprise investment contracts.

According to the WEF's 2005 *Global Competitiveness Report*, Taiwan's economy now is shifting from the efficiency-driven stage into the innovation-driven stage. If Taiwan can raise the ratio of factors of innovation and sophistication in the determination of competitiveness to 20%, it will successfully achieve this transition.

The government's main targets for Taiwan's economy in 2006 include a GDP growth rate of 4.5%, the CPI to rise no more than 2%, and the unemployment rate to stay below 4%. Private consumption and exports will be expected furnish the main sources of the targeted growth.²

In the medium term, Taiwan's economy is forecast to improve steadily in line with the favorable outlook for the global economy. To prepare Taiwan to meet the needs of economic development in the new century, in 2002 the government unveiled the *Challenge 2008* Six-Year National Development Plan, which sets out programs for political, financial, and fiscal reform together with ten key individual development plans. And in 2005, to gear Taiwan toward more knowledge-based, equitable and sustainable socio-economic development, the government drafted the "Second-Term Plan for National Development in the New Century: Four-Year Plan for 2005-2008 and Outlook for 2015." This plan features three main macroeconomic goals: First, utilizing domestic and foreign resources and innovative strengths to nurture economic growth and narrow the difference between potential and actual GDP; second, accelerating ecological development and slowing the depletion of ecological and environmental resources to strengthen green competitiveness and reduce the sustainability gap; and third, stressing humanistic and life values, and emphasizing institutional and social trust to reduce the national welfare gap. During 2005~2008, Taiwan's potential average growth rate of GDP is estimated at 4.9%, with its nominal per capita GDP projected to increase to US\$18,000 in 2008.³

5. Conclusion

In the 21st century, Taiwan has committed itself to accelerating progress in continuous pursuit of economic globalization and liberalization, with the aim of strengthening the competitiveness of its increasing knowledge-driven economy. We will continue to build upon our economic

and industrial achievements, enhancing our capacity for innovation and developing a society noted not only for its material prosperity but also for its cultural diversity and high quality of life. Looking to the future, we are confident that, through R&D and innovation, Taiwan can harness knowledge and brainpower as the main driving forces of its economic growth, while safeguarding our homeland and ensuring its sustainable development.

Policy Updates

■ National Communications Commission Announces Four Goals for 2006

On May 30, the National Communications Commission (NCC) announced its administrative plan for 2006, listing four major goals aimed at building up a communications environment characterized by digital convergence, fair competition, healthy development, and quality content. The four goals are promotion of competition in digital convergence, a healthy communications oversight system, protection of the interests of citizens and consumers, and enhancement of a cultural diversity with respect for disadvantaged groups.

The key points of these goals are given below:

Goal	Key Points of Administration
Promotion of competition in digital convergence	<ol style="list-style-type: none"> 1. Review of applications for the lease of international marine cable circuits 2. Beginning in 2007 applications for fixed-network licenses will be accepted each quarter, and regulations governing entry into the fixed-network local, long-distance, international, and consolidated markets will be continuously reviewed; in 2008 the times for acceptance of applications for fixed-network licenses will be relaxed, so that applications will be accepted at any time. 3. The public hearing process will be instituted to oblige Chunghwa Telecom to rent its last-mile network assets to alternative operators, based on infrastructure construction cost, so as to lower the cost of circuit-leasing by private operators and promote market competition. Fixed-network operators will be assisted in acquiring circuit rights, and negotiations will be carried out with the Ministry of Transportation and Communications to lower circuit usage costs. 4. To meet the needs of digital convergence, overall revision of the Telecommunications Act, Radio and Television Act, Cable Radio and Television Act, and Satellite Broadcasting Act will be carried out. 5. Regulations governing the reception of wireless broadband spectrum is planned to be instituted prior to Dec. 31, 2006. 6. The development of a platform for digital video transmission will be promoted. 7. Information transmission security technology and controls will be established. 8. International interchange in communications transmission, and international mutual recognition of telecommunications verification will be promoted.

A healthy communications oversight system	<ol style="list-style-type: none"> 1. The process for the renewal of broadcasting licenses will be simplified. 2. Internet voice interconnection will be promoted. 3. Rationalization of telecommunications fee and cable TV fee rates will be promoted. 4. The crackdown on illegal radio stations will be continued, with a reduction of more than 50% in the 130 existing illegal stations carried out by the end of 2006.
Protection of the interests of citizens and consumers	<ol style="list-style-type: none"> 1. The withdrawal of political party, government, and military media will be carried out. 2. Deregulation Progress

■ FSC Definition of “Material Information” Helps Prevent Insider Trading

The Financial Supervisory Commis-

sion (FSC) moved to provide judicial agencies with more precise criteria and strengthen the prevention of insider trading by promulgating, on May 30, Regulations Governing the Scope of Material Informa-

tion as Included in Article 157-1, Paragraph 4 of the Securities and Exchange Act and Means of Its Disclosure. The new Regulations stipulate that information that involves a company's financial or business affairs, or that will have an impact on changes in the supply of shares, is within the scope of "material information."

The scope of "material information" as defined by the FSC includes the following:

1. Information concerning a company's financial or business affairs:

- (1) Matters that have a significant impact on shareholder rights or the price of shares, as stipulated in Article 7 of the Securities and Exchange Act Enforcement Rules.
- (2) Major public issuance or private placement of securities that have the nature of equity, reduction of capital, merger, or major changes in items listed above.
- (3) Corporate reorganization, bankruptcy, dissolution, application for delisting of stock, or halting of dealing at the place of business of securities brokerages, or major changes in the items listed above.
- (4) The board of directors is unable to carry out its duties normally due to directors being subjected to provisional measures or the dismissal of all independent directors.
- (5) Major damage caused to the company by disaster, strike, or other major event, or stoppage of work or business, or cancellation of permits, by government order.
- (6) Dishonoring of checks by the company's concerned party or major debtor, or declaration of bankruptcy; or the inability of a major debtor to pay off a mature debt for which the company has co-signed or served as guarantor.
- (7) Occurrence of internal controls fraud or similar event; or cessation of business, in whole or in part, with a major customer or supplier.
- (8) The company's financial reports have not been submitted in accordance with regulations, or contain errors or omissions that require restatement; or for which auditors present auditing or verification reports other than reports

without reservation or amended without reservation.

- (9) Major differences exist between financial forecasts and actual performance, or between revised financial forecasts and original forecasts.
- (10) The repurchase by the company of its own shares, institution or cessation of public purchasing, or acquisition or disposal of important assets.
- (11) Issuance by the company of overseas securities and occurrence of significant events which, under the laws and securities transaction regulations of the country where the securities are listed, must be immediately announced or reported.

2. Material information involving the supply of securities in the market:

- (1) Institution or cessation of public purchasing of securities issued by the company.
- (2) Major changes in the equity of a subsidiary company under the company's control.
- (3) Occurrence of public bidding, auctioning, or significant breach of settlement contract of securities issued by the company.

The new Regulations also stipulate that the date that the facts actually occurred or the date of the agreement will be deemed as the date of such information. However, the earlier date rules if any discrepancy.

Under the provisions of Article 171 of the Securities and Exchange Act, insider trading is punishable by imprisonment of 3 to 10 years plus a fine of NT\$10 million to NT\$200 million.

For further details on the new Regulations, please go online and check this website: http://www.sfb.gov.tw/secnews/law/traif/95year/traif-4/95030002519_index.htm.

■ Derivatives Investment Rules Relaxed for Insurance Companies

On June 1, the Financial Supervisory Commission promulgated a new set of "Directions Governing Insurance Industry Engaging in Financial Derivatives Trading," expanding the scope of derivatives trading in which insurance firms are allowed to engage. Based on the total of NT\$6.17 trillion in

insurance capital and the net worth of NT\$346.6 billion for all of Taiwan's insurance companies at the end of 2005, once the new rules are implemented it will add about NT\$400 billion to the amount of investments by the insurance firms.

The new Directions include the following main points:

1. Financial derivatives products highly-correlated with items for risk hedging are added to the four types of derivatives trading currently allowed: forward contracts, futures, options, and swaps. This will strengthen the ability of insurance companies to hedge risk.
2. With the approval of the FSC, insurance companies will be allowed to engage in derivatives trading to increase their investment efficiency, and the accumulated total (nominal) contract value of such investments in domestic and foreign derivatives can reach as high as 40% of owners' equity in the insurance company. This measure will increase investments by insurance companies by an estimated NT\$138.6 billion.
3. The maximum amount of investments in structured financial products will increase from the current 5% of an insurance company's insurance funds to 10%. This is expected to boost investments by insurance companies by around NT\$308.5 billion.

To view the new Directions in detail, please consult this website: http://gazette.nat.gov.tw/EG_FileManager/eguploadpub/eg012102/ch04/type2/gov36/num6/Eg.htm.

■ Government Simplifies Inspection of Imported Alcoholic Beverages

The Ministry of Finance (MOF) has announced that the hygienic inspection of imported alcoholic beverages will be switched from full inspection of three items—methyl alcohol, lead, and sulfur dioxide—to more selective inspection based on the characteristics of the beverages. Imported grape wine, for example, will be inspected only for sulfur dioxide residue, the

ceiling content of which will be increased from the current 0.25 grams per liter to 0.4 grams per liter. This will bring the inspection of alcoholic beverages in Taiwan in line with international standards.

In response to complaints from some importers about the difficulty of obtaining inspection reports or documentation abroad for certain specific types of alcoholic beverages, the MOF indicates that the “Regulations Governing the Inspection of Imported Alcohol” has been revised to allow for the case-by-case documentary inspection of specified alcoholic beverages approved by the MOF, so that bottles need not be opened for inspection.

The MOF also notes that management procedures for alcoholic beverages are being established gradually following the abolishment of the monopoly system in 2002, and that after this new inspection system is in force for some time its details will be reviewed and improved if and when necessary. To view the English version of the “Hygiene Standards for Alcohol,” please go online and consult this website: <http://www.nta.gov.tw/>

dbmode93/ShowAnnouncement.ASP?RecNo=533. For details of the revised Regulations for the Inspection of Imported Alcohol, please visit http://gazette.nat.gov.tw/EG_FileManager/eguploadpub/eg012118/ch04/type1/gov30/num2/Eg.htm.

■ Relaxation Planned for Mainland Chinese Cultural and Educational Professionals Traveling to Taiwan

To accommodate the growing flow of educational and cultural exchange across the Taiwan Strait, on May 29 the Mainland Affairs Council approved a revision, formulated by the Government Information Office, of Category 10 of the “Inviting Units and Required Application Documentation Mainland-Area Professionals to Engage in Professional Activities in Taiwan.” The new revision will permit Chinese mass communication professionals to come to Taiwan for reasonable and necessary publicity activities. Such professionals will also be allowed to hold press conferences and accept interviews with mass media (newspapers, magazines, TV, and radio) in line with the purpose for which their visiting permits are issued. The

revision will be promulgated following its approval by the Executive Yuan. For related information, please visit this website: <http://www.mac.gov.tw/big5/cnews/cnews950529c.htm>.

■ **Government to Abolish Cross-guarantee Requirement for Mainland Chinese Visiting Taiwan**

The Mainland Affairs Council (MAC) decided on May 29 to approve a proposal by the Ministry of the Interior (MOI) to abolish the requirement for mainland Chinese residents wishing to travel to Taiwan to find a guarantor in Taiwan, who must take documentation to the police station at his or her place of residence and carry out cross-guarantee procedures. The relaxed requirement will be implemented after it gets the approval from the Executive Yuan.

The MOI noted that the current requirement adds an extra burden to the basic-level police officers who man Taiwan's local police stations, and it is felt that the interviews of mainland Chinese who come to Taiwan to be with their families or to take up residence, which are carried out by police

and immigration agencies, are sufficient to replace the cross-guarantees that are now required.

In addition, under the present system people from mainland China who are living in Taiwan frequently fail to extend their period of stay because they are busy taking care of their children. Once they leave Taiwan after overstaying their permits, they are banned from returning to the island for a certain period of time. To avoid the separation of families that this causes, and especially the separation of children from their mothers, MAC also decided to revise Article 19 of the Regulations Governing Entry into Taiwan by People from Mainland China to relax restrictions on the length of stay in Taiwan by the mainland Chinese spouses of Taiwan citizens who have children, aged 12 or under, who have established residence in Taiwan. Such spouses who overstay their permits by up to six months will no longer be banned from re-entering the island for a set period of time, currently one year. This relaxation will not apply, however, to those who have lost their rights and obligations regarding their

own children aged 12 and under who have established residence in Taiwan. For more related information, please consult this website: <http://www.mac.gov.tw/big5/cnews/cnews950529a.htm>.

■ Taipei Wins First Prize in 2006 Intelligent Community Awards

Taipei has been named the Intelligent Community of the Year 2006 by the Intelligent Community Forum (ICF), an independent think tank under the World Teleport Association (WTA). This award represents international recognition of the progress that Taipei has made in carrying out its Cyber-City project in recent years.

The runners-up for the 2006 award were Cleveland, Ohio in the United States; the Gangnam District of Seoul, Korea; Ichi-kawa of Japan; Manchester of the United Kingdom; Tianjin of China; and Waterloo of Canada. Taipei was a runner-up in 2003, taking the fourth place.

In Taipei, said ICF Chairman John G.

Jung, "The government's M-Taipei initiative continues to stimulate all-important applications for mobile phones, laptops, and other devices. It has successfully reinforced a 'culture of use' among citizens. The Awards this year also has taken into account areas of human service, where modernized health care, media, and banking systems sustain an increasingly prosperous citizenry."

The ICF also noted that Taiwan is a global computer production base and that more than 90% of the world's wireless access points are manufactured in and around Taipei. In addition, the city has 88 technology incubators which create global businesses, products, and technologies, and which stimulate the growth of small business with over 2,000 businesses having been launched. Taipei is also home to 45 R&D centers, including the Nangang Software Park, where more than 2,000 companies generate sales of US\$47 billion.

The ICF further pointed out that Taipei has successfully crossed the digital divide with humanitarian relief, providing free Internet training and services to 2,000

tsunami-affected students. Taipei has also made great achievements in what the ICF calls “digital democracy,” with a “Mayor’s Mailbox” that provides citizens a direct channel of communication with their city government. The “Mayor’s Mailbox” handles nearly 5,000 cases online every month.

Five “intelligent community indicators” are used to select the award winners: broadband infrastructure, knowledge work-

ers, innovation, digital democracy, and effective marketing. The ICF commissions an international consulting agency to carry out research and analysis for the awards, and finally an independent jury of 36 experts from around the world votes on the winners from among the candidate communities. ■ 保險業投資衍生性金融商品放寬

行政院金融監督管理委員會於6月1日發布訂定「保險業從事衍生性金融商品交易應注意事項」，放寬保險業從事衍生性金融商品交易規定。該注意事項實施之後，以94年底整體保險業資金達新台幣6.17兆元及淨值達3,466億元計算，保險業新增總投資額度將增加約4,000億元。

新訂定注意事項重點包括：

- 1. 除遠期契約、期貨、選擇權及交換等4大衍生性金融商品之契約類型外，增加與避險項目具有高度相關性之避險衍生性金融商品，以強化保險業避險效率。
- 2. 放寬保險業經金管會核准，得從事增加投資效益之衍生性金融商品交易，保險業因增加投資效益所持有之國內或國外衍生性金融商品，其契約總（名目）價值，合計可高達各該保險業業主權益的40%。據估計，這項措施實施後，保險業者投資資金可以增加1,386億元。
- 3. 保險業投資結構型金融商品額度由目前各

保險公司保險資金的5%，提高到10%，保險業者投資金額估計可以因此增加約3,085億元。

■ 進口酒類查驗措施簡化

財政部宣布，進口酒類衛生查驗項目，將由現行甲醇、鉛及二氧化硫等3項全驗之做法，放寬為依酒品特性擇定重點項目查驗。以進口葡萄酒為例，未來僅需檢驗二氧化硫殘留量，且其二氧化硫殘留量上限將由每公升0.25公克，放寬為每公升0.4公克以下，這將使我國進口酒類衛生檢驗標準與國際一致。

另針對部分業者反映有少數特定酒品不易於國外取得檢驗報告或證明文件問題，財政部表示，已發布修正「進口酒類查驗辦法」部分條文，增訂特定酒品經財政部認可，可以專案書面核放，免受開瓶查驗規定限制。

財政部表示，我國甫於91年廢止菸酒專賣制度，有關酒類管理須逐步建立，俟新修正查驗制度實施一段時間後，就執行細節若有需要將適時檢討改進。查詢「酒類衛生標準」中、英文版請上網：<http://www.nta.gov.tw/dbmode93/ShowAnnouncement.ASP?RecNo=53>

■ 大陸文教專業人士來台交流限制將放寬

為因應兩岸文教交流發展需求，行政院大陸委員會委員會議於5月29日討論通過新聞局所提，修正「大陸地區專業人士來臺從事專業活動邀請單位及應備具之申請文件表」第10類，放寬大陸地區大眾傳播專業人士可以來台從事合理且必要宣傳活動，並可依其許可目的性質召開記者會、接受大眾傳播媒體（含報紙、雜誌、電視、廣播）訪問。修正內容將在新聞局依法制作業程序報請行政院核定後發布。查詢修正內容請上網：<http://www.mac.gov.tw/big5/cnews/cnews950529c.htm>。

■ 大陸地區人民在台保人對保手續將取消

行政院大陸委員會委員會議於5月29日討論通過內政部所提，刪除大陸地區人民申請進入台灣地區所覓之保證人，應將出具保證書並送至戶籍地警察機關辦理對保手續之規定。內政部將依法制作業程序，報請行政院核定後發布。

內政部指出，依現行規定，大陸地區人民申請進入台灣地區，應覓台灣地區人民1人為

保證人，並由保證人將保證書送至戶籍地警察機關辦理對保手續，惟此一作法已對基層員警勤務工作增加一定之負荷及壓力，且大陸地區人民申請進入台灣地區團聚、居留或定居，經由警政機關之訪查及境管局面（訪）談之實施，已足以替代警察機關辦理保證書對保之功能，內政部因此檢討修正相關規定。

此外，鑒於大陸地區人民常因養育子女而疏於辦理延期，致在台灣地區逾期停留，而遭管制一定期間不予許可來台。為免骨肉分離，在台子女乏人照顧，基於人道考量，該次會議同時檢討修正「大陸地區人民進入臺灣地區許可辦法」第19條規定，放寬大陸地區配偶在台團聚階段，且在台灣地區育有已設戶籍之12歲以下親生子女者，逾期停留6個月以內，不受管制年限限制之規定（原管制年限為1年）。但喪失對於已設戶籍之12歲以下親生子女權利義務之行使或負擔者，不適用之。查詢相關資訊請上網：<http://www.mac.gov.tw/big5/cnews/cnews950529a.htm>。

台北市於美國時間6月9日獲得美國「世界通訊端協會」所屬獨立智庫「智慧社區論壇」所頒發2006年「年度智慧城市」首獎，顯示台

北市近年來推動無線寬頻網路新都基礎建設，已經獲得國際社會高度肯定。

同時入圍2006年7大智慧社區(城市)包括美國克利夫蘭、韓國首爾江南區、日本市川、英國曼徹斯特、中國天津、加拿大滑鐵盧等6個城市(社區)。台北市曾於2003年入圍7大智慧城市，獲得第4名。

ICF主席John G. Jung指出，台北市政府推動的M-Taipei計畫持續激勵行動電話、膝上型電腦及其他重要無線設備的成長，成功強化民眾使用習慣。他強調，本屆ICF獎評選同時考量人性化服務程度，包括健康照顧、媒體及金融等服務現代化，台北市的人性化寬頻服務不斷豐富民眾的生活。

ICF指出，台灣是全球電腦生產重鎮，全球90%的無線存取產品源自台北市及臨近區域。台北市擁有88個技術育成中心，創造全球性新事業，新產品及新技術，並激勵小型企業不斷成長，發展出超過2,000個新的產業。此外，台北市擁有45個研發中心，包括南港軟體園區，聚集超過2,000家廠商，創造470億元美金的銷售量，並在過去2年內創造將近40萬個工作機會。台北市結合提供低廉的通訊成本、高效率生產數位產品優質人力、及普及的寬頻環境，吸引投資及新事業進駐。

ICF進一步強調，台北市成功跨越數位落差並提供人道協助，提供2,000位海嘯受災學生免費網路訓練。由於寬頻政策的推動，民眾可

以透過市長信箱表達意見，每月計已有近5,000件民眾陳情是透過線上方式處理。ICF認為所謂「數位民主」已經出現在台北市。

ICF評選指標包括寬頻基礎建設、知識型人力、創新、數位民主及有效行銷等5大項，針對入選的7大智慧社區(城市)提供的第2階段

參選文件及詳細嚴謹調查問卷內容，ICF特別委託國際調查顧問機構透過解析層級程序法(AHP)評量，再由36位來自各國的學者專家組成的評審團票選。查詢相關資訊請上網：
