Profile of Science and Technology in India

Sung-Bin Wang (王松賓)*

1. Introduction
2. Philosophy and S&T System
3. Organizational Framework and Government Policy
4. Operations and Achievements
5. Conclusion

Abstract

The success of S&T development in India can be largely attributed to the great efforts made by the government in planning the modernization and upgrading of infrastructural facilities, adjusting industrial policy in accordance with the needs of the times, mobilizing resources, providing effective institutional supports, and improving the quality of technical and management education. The political leadership's wholehearted commitment to promoting S&T development, and state managers' ability to harness a leading segment of S&T to the development agenda, have also played a vital role in ensuring the country's success on this front. India offers valuable lessons to Taiwan in demonstrating how S&T development can be harnessed as a powerful engine of economic development.

* Former Director, Science and Technology Division, Taipei Representative Office in the U.K., and Former Executive Secretary, Science and Technology Advisory Group, Executive Yuan (the Cabinet), R.O.C. (Taiwan).

1. Introduction

With an area of about 3,187,260 square kilometers, India is the seventh largest country in the world, and is the second most populous, with 1.1 billion people at the end of 2005. The country has vast natural resources and an industrial base that, by the standard of the South, is fairly broad and advanced. It also possesses bureaucratic and administrative institutions that are quite sound compared with other members of the developing world. But why has the Indian state failed to build what we now call a developmental state?

Researchers have put forward a wide spectrum of views in seeking to attribute this failure to various combinations of cultural, institutional, social, geographical and other factors. Amid the enormous diversity of postulation, some scholars contend that it is mainly because India has stagnated and is resistant to profit, science and technology¹. But this is a very misleading contention.

As a matter of fact, in common with the rest of the Euro-Asia land mass, India has had very long experience in the movement of people and science and technology, which generate different kinds of polity and economy. Moreover, India realized after independence that science and technology are suitable instruments for accelerating economic development, promoting social equality, and propelling India into the mainstream of the world community. Successive government five-year plans have recognized the worldwide impact of S&T and the need to incorporate its cultivation and

¹ Robb, Peter, 2002, *A History of India*, Chapter 1, Palgrave, Houndsill, Basingstoke, Hampshire, U.K.

application as a core element of economic planning in the agricultural, industrial and service sectors². The results are conspicuous in several areas.

India's experience in this regard offers valuable lessons to Taiwan. While recognizing that there has been significant advancement of national capabilities in some science and technology areas in Taiwan, the government now needs to encourage new initiatives and programs. It needs not only to plan for S&T per se but to integrate it effectively into national economic planning. India offers a very good example of this.

2. Philosophy and S&T System

The Indian philosophy of science and technology stems from the vision of Jawaharlal Nehru, India's first Prime Minister after independence. Nehru considered that a scientific temper, combined with socialism and secularism, could overcome the country's developmental challenges. His views were enshrined in two basic policy statements, the Scientific Policy Resolution (SPR) adopted by India's Parliament in March 1958 and the Technology Policy Statement (TPS) published in 1983.

The SPR emphasizes the government's responsibility to foster, promote and sustain, by all appropriate means, the cultivation of sciences and scientific research in the country, in all aspects - pure, applied and educational. It also underscores the need to secure for the people of the country all the benefits that can accrue from the acquisition and application of scientific knowledge. And the policy envisages a coordinated and well-articulated effort for promoting and encouraging the growth of S&T personnel on a scale adequate to fulfill the country's needs in the areas of education, agriculture, industry and defense.

² Chibber, Vivek, 2003, *Locked in Place*, Chapter 2, Princeton University Press, N. J., U.S.A.

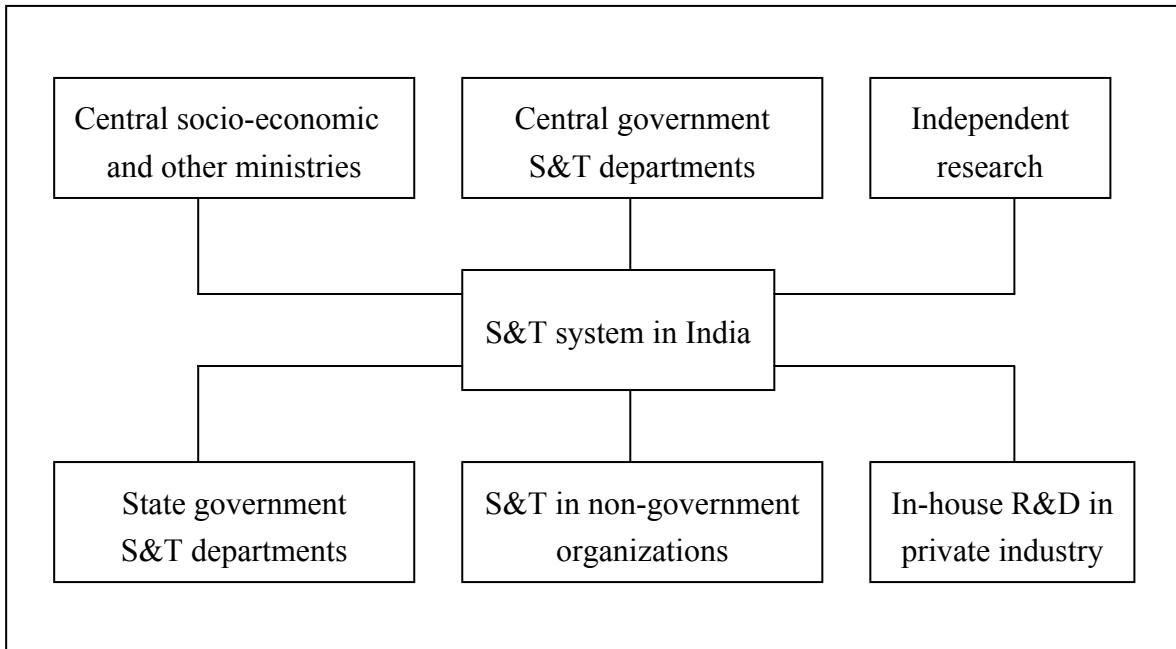

The TPS states as its basic objectives the development of indigenous technology and evolving a mechanism for ensuring efficient absorption and adaptation of imported technology, keeping in view national priorities and availability of resources. Since the economic development of the country in the early 1980s had not reached a stage where the private sector could play a leading role in S&T development, the initial momentum was provided by the government, which established a broad-based and extensive network of S&T agencies to cater for various identified objectives. The operational philosophy, however, is currently undergoing a major change, with the government and the public sector expecting the private sector to become an equal if not dominant partner in the development of technology to a level at which it becomes globally competitive.

The salient features of the New Industrial Policy (NIP), announced by the government in July 1991, threw considerable light on emerging technology policy perspectives. The NIP emphasizes the pursuit of technological efficiency and surplus generating capabilities in the public sector; greater entrepreneurial and managerial freedom for both the domestic private sector and foreign investors, more open access to technology, and greater reliance on the capital market for raising resources.

The broad outline of India's current S&T system is shown in Figure 1. As a consequence of over five decades of economic planning and the application of the SPR and TPS initiatives through the various agencies concerned, India has now acquired an extensive and active scientific and technological base with high-quality scientific manpower resources. Moreover, the NIP welcomes foreign investment with its attendant advantages of technology transfer, market expertise, introduction of modern managerial techniques and export promotion. Approval will now be

accorded by the Reserve Bank of India for direct investment up to a specified percentage in selected high-priority industries including metallurgy, electrical equipment, transport, food processing, software, and tourism.

Figure 1. Science and Technology System in India

3. Organizational Framework and Government Policy

S&T issues are the primary concern of the Ministry of Science and Technology, with specific responsibilities allotted to its subsidiary agencies, the Department of Science and Technology, the Department of Scientific and Industrial Research, and the Department of Biotechnology. Other major central government departments with a large S&T element are the Department of Atomic Energy, the Department of Space (DOS), and the Department of Ocean Development. The Indian Space Research Organization (ISRO) conducts space research under DOS.

The planning process for S&T involves over thirty socio-economic and other ministries and departments, including organizations such as the Indian Council of Medical Research, the Indian Council of Agricultural Research, and the Council for Scientific and Industrial Research, each enjoying a high degree of autonomy in the planning of their activities.

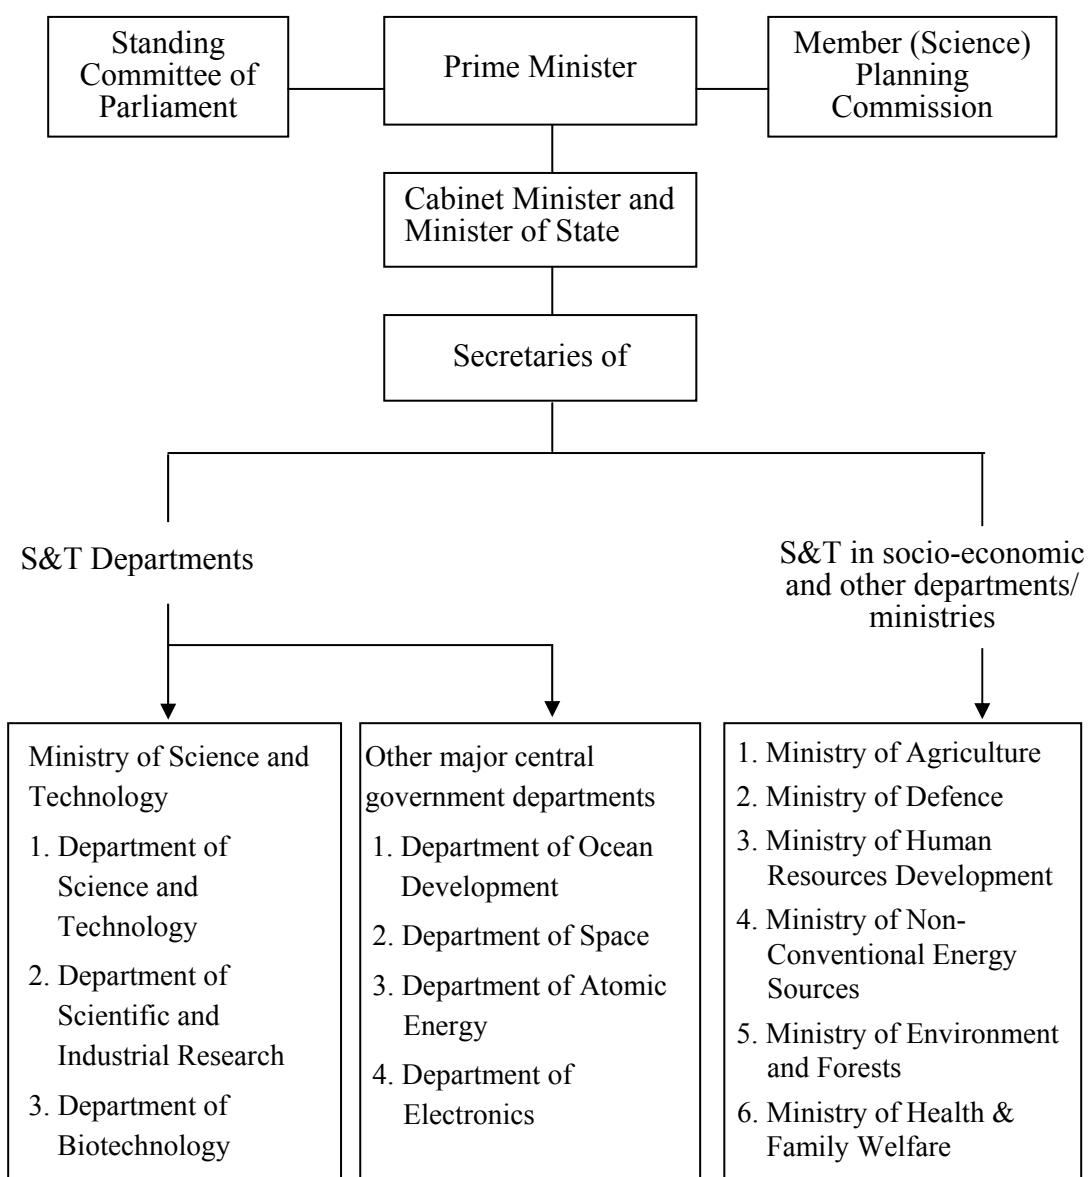

Figure 2 illustrates broadly the institutional set-up for S&T decision-making in the central government's S&T departments, including the major socio-economic and other ministries. The Prime Minister is in overall charge of S&T policy and development. He is assisted by various cabinet ministers and ministers of state who oversee day-to-day business in accordance with the specific portfolios allotted to them. The secretaries of various departments and ministries constitute the chief executives in their respective areas of operation. The fine-tuning of S&T policy guidelines at higher levels is provided by the Planning Commission, which has a member for S&T, and a Standing Committee comprising Members of Parliament.

The policy framework is oriented towards gearing up S&T-related measures in each successive national five-year plan to more effectively and efficiently meet changing global and national priorities. Government policy nevertheless continues to lay the same degree of emphasis on encouraging entrepreneurship, development of indigenous technology through increased investment in R&D, and importing new technology when needed.

At present, the government is focusing on nuclear and space S&T, and electronics/software and defense R&D. It is encouraging new initiatives and programs that will ensure growth in vital and strategic sectors, the scaling up of successful demonstration projects, and the transfer of technology to other sectors, particularly in the broader production sector. Further impetus is being provided in the development of emerging key areas of

microelectronics, new materials, renewable energy resources, ocean science, and several areas of basic research. Conservation measures, ranging from energy to forest resources, are accorded high priority.

Figure 2. S&T Organizational Framework and Planning Process

A large base has already been created in the areas of biological and industrial research, which are now being consolidated, expanded and utilized. Consistent with the need for capacity building, there has been a corresponding increase in government S&T expenditure, excluding defense, in successive economic plan periods. Total S&T spending presently forms about 2.60 percent of total public expenditure.

In order to maximize return from the investment in S&T, policies covering S&T, industry, finance and agriculture have been meaningfully intermeshed. The S&T agencies are therefore seeking to develop capabilities not only in their own specialized areas but also in interacting with industries, agricultural institutions and various other developmental and service sectors, with the purpose of promoting greater utilization of their expertise.

4. Operations and Achievements

The principal S&T organizations created by the government have played funding and implementing agency roles in promoting R&D activities in the country. An overview of the multi-dimensional activities of those agencies provides a valuable insight into the rapid advancement in the S&T sector. The electronics/software sector serves as a prime example of the role played by S&T activities in economic development.

4.1. R&D Funding Agencies

The Department of Science and Technology (DST) was established in May 1971 to promote new areas of S&T and to be the central department for coordinating areas of S&T in which a number of institutions and departments have interests and capabilities. The DST also assists in formulating policy statements and guidelines for S&T and acts as a secretariat for the bodies that advise the government on S&T policy.

One of the major activities of the DST has been to identify and promote priority areas of R&D in the various S&T disciplines. A Science and

Engineering Research Council (SERC) was established under the auspices of the DST in 1975, with the objective of promoting cutting-edge research in emerging areas of science and engineering. The SERC consists of eminent scientists drawn from universities, R&D laboratories and industry. It identifies new and interdisciplinary areas for support where concerted national efforts are to be made. National laboratories, institutes of technology, universities and specialized agencies constitute the executive agencies of the sponsored research programs.

The DST also provides grants-in-aid to autonomous scientific research institutions, such as the Jawaharlal Nehru Center for Advanced Scientific Research, and the S. N. Bose National Center for Basic Sciences, which are engaged in frontier areas of research in basic and applied science. Professional bodies such as the India National Science Academy and the India Academy of Science also receive financial support from the DST.

The DST periodically carries out S&T resources studies through its National Science and Technology Management Information System division. Of the total national R&D expenditure in the Eighth Five-Year Plan (1992-1997), about 64.3% was met from central government institutions, 15% by private-sector industry, 11.4% by public-sector industry, and 9.3% by state governments³.

The Department of Scientific and Industrial Research (DSIR) oversees the activities of the Council of Scientific and Industrial Research (CSIR) in technology promotion, development, utilization and transfer, the National Information System for Science and Technology, and two public enterprises – the National Research Development Corporation, and Central Electronics Ltd – which are engaged in the commercialization of indigenously-developed technologies.

³ British Council, 2000, *India: a Science Profile*, dti, U.K.

The major programs cover R&D in industry, the pursuit of technological self-reliance, and enhancement of the efficacy of technology transfer. The Transfer and Trading in Technology (TATT) has prepared technology profiles of selected countries and carries out technological capability studies of selected industrial sectors. It is involved in the demonstration and commercialization of exportable technologies, such as computer software. A Consultancy Development Center (CDC) has concentrated mainly on the development of human resources, providing computerized data and information services and strengthening technological and managerial consultancy capabilities through a scheme known as the Consultancy Development Promotion Association Scheme. It has developed links with international organizations such as the World Bank, the Asian Development Bank, and the Economic and Social Council for Asia and the Pacific.

The National Information System for Science and Technology is another important program under the DSIR. It is designed to link existing centers, systems and services into a network and facilitate the effective transfer of the latest and most relevant information to users in various part of the country. The thrust has been to promote resource sharing among libraries and information centers through library networks, consultative committee mechanisms, and a union catalogue.

The Department of Electronics (DOE) was established in 1971 to support and fund technology development through its councils set up in different fields. For example, the Technology Development Council focuses on components, computer applications and instrumentation; the National Microelectronics Council on LSI/VLSI and ASIC design and production

technology; and the Photonics Council on photonic-related areas covering optoelectronic devices, optical-data storage, switching, imaging, and vision informatics. Many of the projects organized through these Councils have had a definite impact on the R&D capabilities of the country.

Time-bound projects in specific areas are being implemented through organizations such as the Center for Development of Advanced Computing, which has developed a 256-node PARAM parallel supercomputer, and the Center for Materials for Electronics Technology, which has established technology for a range of electronics materials. Other funded projects include fiber-optic systems development, knowledge-based computer systems, and the Advanced Technology Program on Computer Networking.

The Department has also launched a Standardization, Testing and Quality Control (STQC) program for disciplined growth of the industry. The STQC laboratories have all the requisite infrastructure, controlled environment, test facilities, and sophisticated instruments to carry out product tests in accordance with national and international standards, as well as with manufacturers' specifications. The STQC laboratory system has been approved by Underwriters Laboratories (UL) of USA and Technischer Uberwachungsverein (TUG) of Germany for giving the UL and Geprufte Sicherheit (GS) safety mark to Indian products.

Lastly, the Department has three public sector corporations under its administrative control, namely CMC Ltd, Electronics Trade and Technology Corporation (ET&T), and Semiconductor Complex Ltd. CMC Ltd is committed to the creative use of computers and information technology in core sectors of the economy. ET&T was established with the main objective of exploring overseas markets for electronics and undertaking technology

development in key areas. Semiconductor Complex Ltd has the mission of designing, developing and manufacturing large-scale and very large-scale integrated circuits.

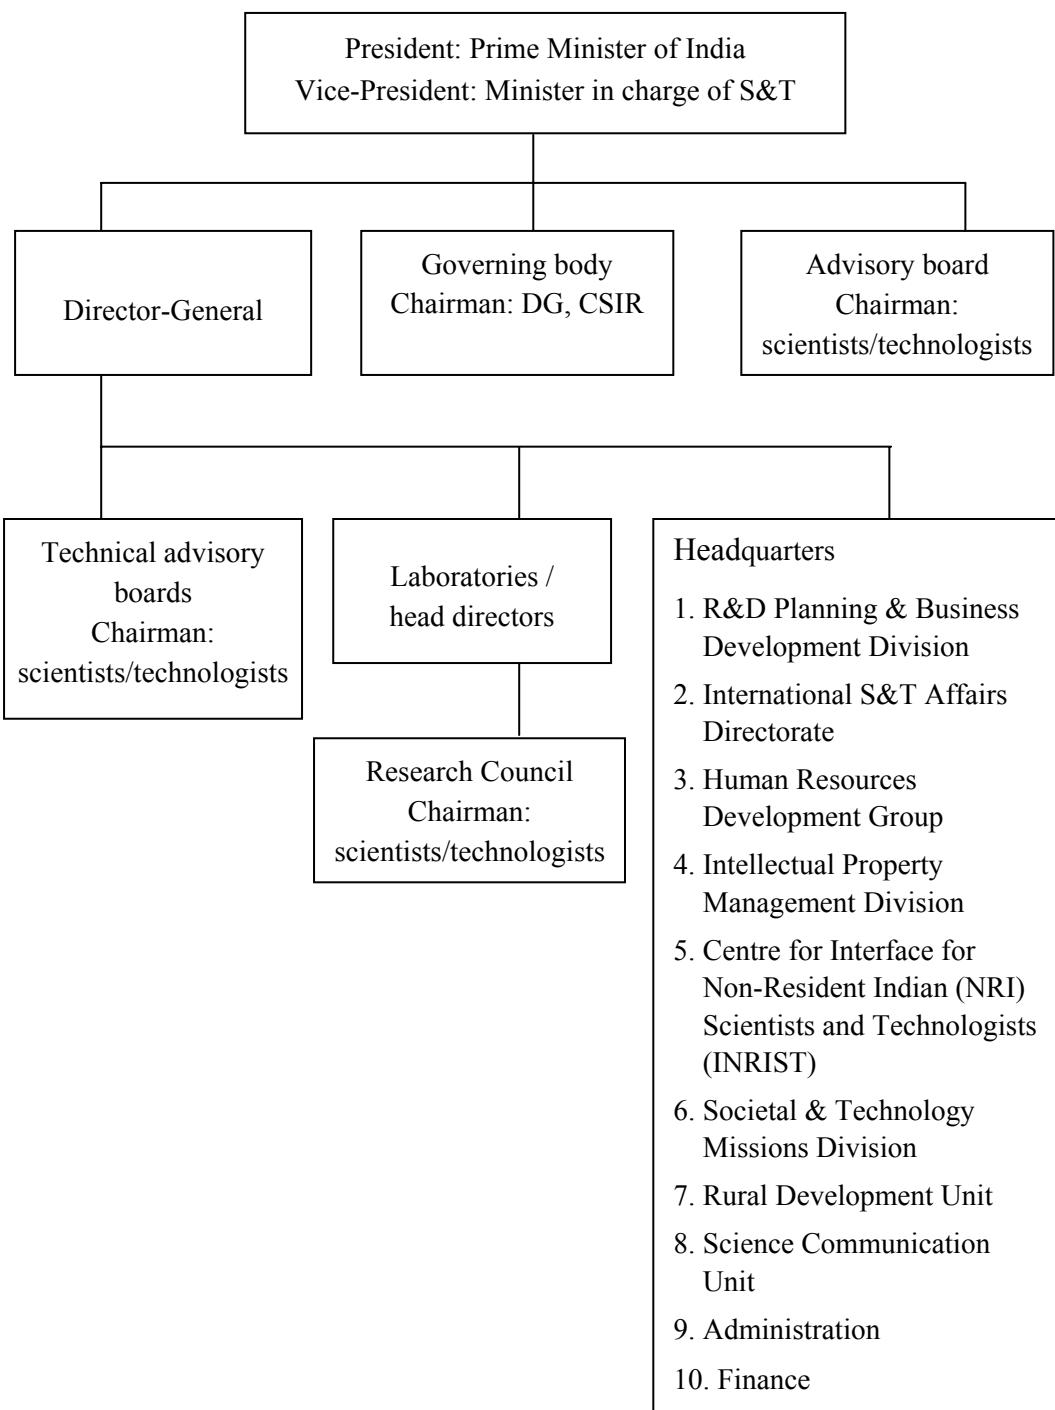

4.2. Implementing Agencies

Established in 1942, the Council of Scientific and Industrial Research (CSIR) is a large multidisciplinary and multidimensional organization with a network of forty national laboratories, institutes and regional centers. It also operates a total of eighty-one survey laboratories, service and maintenance centers, zonal laboratories, polytechnology-transfer centers, field stations, experimental farms and field units. The Department of Scientific and Industrial Research in the Ministry of Science and Technology provides the administrative link between the government and CSIR.

The main thrust of CSIR activities is towards the development of indigenous technologies and effective use of indigenous resources. Figure 3 illustrates the organizational structure of the Council and the broad framework of its operations. The Prime Minister serves as its President, and the Minister of State in charge of S&T serves as the Vice-President. S&T input is provided by a high-level advisory board, which also oversees the Council's R&D programs.

One of the key entities belonging to CSIR is the Central Electronics Engineering Research Institute, which plays a leading role in the field of electronic engineering. The Institute's major R&D programs concentrate on the three main areas of microwave tubes, semiconductor devices and electronics systems. Its electronics systems R&D work focuses on digital systems, agri-electronics, industrial electronics, and instrumentation systems.

Figure 3. Organization and Structure of the Council of Scientific & Industrial Research

The Indian National Scientific Documentation Center (INDOC) plays a key role in information science and in collating S&T information in India. INDOC has identified several major R&D programs as key areas. They include acquiring foreign periodicals in specific disciplines, network-based on-line service, turnkey projects in library automation and information database, and R&D in information S&T.

CSIR has bilateral cooperation arrangements with about forty organizations in twenty-five countries. It represents India's government in the Commonwealth Science Council and the Association for Science Cooperation in Asia. For the advancement of S&T in India, CSIR has enlisted the cooperation of Indian professionals working abroad through a program called TOKTEN (Transfer of Knowledge Know-how Through Expatriate Nationals) organized by the Centre for Interface for Non-Resident Indian Scientists and Technologists.

In-house R&D in private industry also plays an important role in the electronics sphere. The central government with its extensive network of S&T agencies has been the pacesetter and main sponsor of R&D activities. Moreover, consequent to the increase in the number of in-house industrial R&D units, the investment in R&D in this sector has also witnessed a proportionate increase. Among the sectors of industry playing the most important roles in India's economic development, the electrical and electronic equipment industry is the biggest investor in terms of number of R&D units and R&D expenditure.

4.3. Achievements

The sequential implementation of eight five-year plans has helped substantially enhance India's national capabilities in several high-technology

areas such as nuclear and space S&T and electronics/software and defense R&D. One outstanding example of the progress achieved is the DSIR's Central Electronics Ltd, which now enjoys the status of being the world's fourth-largest producer of single-crystal silicon solar cells.

Table 1 provides data on the performance and operating scale of five Indian companies ranked in *BusinessWeek*'s Info Tech 100, which lists the information industry's one hundred top performers in 2006. These five flag-bearers of India's information industry give direct employment to over 300,000 people and provide numerous subcontracting and indirect employment opportunities. Their combined revenues amounted to some US\$10.7 billion in 2005, with most of their products being exported to overseas.

In a report this year by Boston Consulting Group naming 100 companies from "rapidly developing economies" that appear positioned to "radically transform industries and markets around the world," six out of the top twenty-five are Indian companies (Table 2). They have grown at an average annual clip of 24% in the past four years, and had combined earnings of US\$17 billion in 2005.

The Indian companies that have earned inclusion in both these lists have proved themselves as innovative and expertly run as any in business, astutely applying global consumer trends and S&T bases and getting new products to market faster than their rivals. They also tap the same managerial talent, information, and capital as Western companies through CSIR programs as well as their in-house R&D projects. Ranbaxy Laboratories presents a fine example, with its R&D team of 1,100 scientists working on the development of generic and new pharmaceuticals at its 17-acre campus outside New Delhi.

Table 1. Indian Companies Listed in the Info Tech Top 100⁴

Unit: US\$ millions

Ranking	Company	Revenue	Revenue Growth (%)	Return on Equity (%)	Shareholder Return (%)	Profit
10	Bharti Airtel	2,519.8	46	24.6	63.3	487.9
34	Tata Consultancy Services	2,796.1	23	49.4	34.7	623.0
42	Infosys Technologies	2,057.0	34	35.3	31.6	531.0
48	Satyam Computer Services	1,035.4	36	26.4	54.0	246.7
57	Wipo	2,290.7	30	31.4	26.4	448.6

Table 2. Indian Companies Listed in the Top 25 Companies of Rapidly Developing Economies⁵

Unit: US\$ billions

Company	Industry	Revenues	Growth Strategy
Infosys Technologies	IT services	2.1	Engineering to innovation
Mahindra & Mahindra	Autos, tractors	2.9	Take brands global
Ranbaxy Laboratories	Pharmaceuticals	1.2	Engineering to innovation
Tata Consultancy Services	IT services	2.8	Take brands global
Tata Motors	Autos	5.8	Engineering to innovation
Wipo	IT services	2.3	Engineering to innovation

India's space S&T and defense R&D efforts have also been achieving notable success. The country's great market potential and solid aerospace and defense competencies have earned it selection as a top target of investment by the European Aerospace and Defense Group (EADS), Europe's leading aerospace and defense group. EADS plans to invest US\$2

⁴ *BusinessWeek*, The Info Tech 100, July 3, 2006, N. Y., U.S.A.

⁵ *BusinessWeek*, The New Contenders, July 31, 2006, N. Y., U.S.A.

billion in India over the next 15 years, setting up a technology center to house Engineering Centre Airbus India, a new subsidiary of Airbus that will focus on high-end engineering design and analysis. This will create up to 2,000 local jobs. Also, EADS Defense Electronics has signed a contract with the Indian Defense Avionics Research Establishment to develop a missile warning system for the Indian Air Force. And EADS Astrium has reached an agreement with ANTRIX, the commercial arm of the Indian Space Research Organization, to jointly develop communication satellites for the international market. All of these activities will give a strong boost to India's economic development.

5. Conclusion

India has had long experience in the development of S&T, despite the stifling effects of colonial rule and European dominance of trade. Before the CSIR was established in 1942, industrial development was minimal. But after independence in 1948, India's government realized that support for S&T was vital to the country's economic development, and actively set about providing this in collaboration with all related sectors of domestic society.

As a consequence of over five decades of economic planning and application of the SPR, TPS and NIP initiatives, India has now acquired an extensive and active scientific and technological base with high-quality scientific manpower resources. Central S&T agencies have been providing necessary technical and financial assistance in developing R&D programs. The chains of Indian Institutes of Technology contribute trained technologists and undertake international quality research specific to practical applications. Excellent results have already been achieved,

particularly in nuclear and space S&T, and electronics/software and defense R&D.

All of India's States and Union Territories have now established state-level S&T structures under the central government's drive to promote R&D projects relevant to local problems. In-house R&D in private industry and Independent Research Institutions have also made effective contributions to the development of S&T initiatives in the country.

The success of S&T development in India can be largely attributed to the great efforts made by the government in planning the modernization and upgrading of infrastructural facilities, adjusting industrial policy in accordance with the needs of the times, mobilizing resources, providing effective institutional supports, and improving the quality of technical and management education. The political leadership's wholehearted commitment to promoting S&T development, and state managers' ability to harness a leading segment of S&T to the development agenda, have also played a vital role in ensuring the country's success on this front. India offers valuable lessons to Taiwan in demonstrating how S&T development can be harnessed as a powerful engine of economic development.

■ Premier Su: Carry Through with Conclusions of COSTED

As an expression of the government's determination to strengthen Taiwan's economic performance, on Aug. 2 Premier Su Tseng-Chang instructed relevant ministries and commissions to come up with implementation plans that come under the authority of the executive branch for the 516 "consensuses" reached at the recent Conference on Sustaining Taiwan's Economic Development (COSTED). Those implementation plans are to be submitted within one month to the Executive Yuan, which, upon approving the plans, will supervise that they are thoroughly carried out in a spirit of "seeking truth from facts."

Premier Su also directed the ministries and commissions to come up with the needed law revisions and new bills for deliberation at the next session of the Legislative Yuan. Even certain issues on which the conference reached no "consensus," such as raising the ceiling on investment in mainland China, will be taken as key items for future consideration as well.

The Conference on Sustaining Taiwan's Economic Development (COSTED) was the

biggest economic meeting being organized by the government within the past five years, and the first major one since Su was named premier. Its purpose was to gather ideas from all quarters on long-term, structural, and contentious administrative issues, and to that end 175 representatives from the executive and legislative branches of government as well as from all areas of the private sector were invited to participate. Premier Su directed his administrative team to follow the core values of "prosperity, fairness, and sustainability" in creating a barrier-free investment environment, a high-quality living environment, and a harmonious social foundation that will boost the willingness of more domestic and foreign enterprises to invest in Taiwan.

In accordance with the conclusions reached at the COSTED, the government will reinforce Taiwan's economic environment by establishing a complete social security system, enhancing industrial competitiveness, strengthening financial reform, improving global deployment and cross-strait economic relations, and upgrading government efficiency. The following are some of the key "consensuses" resulting from the COSTED:

- Regulations governing labor contracts, wages, and working times (including part-time working hours) should be reviewed.
- A favorable environment for the attraction of high-level overseas professionals should be built up, and better conditions should be offered to attract foreign students to study and do research in Taiwan.
- Legal restrictions on the recruitment of high-level foreign professionals should be relaxed and “Regulations Governing the Government and Corporate Recruitment of High-level International Technological Research Personnel” should be enacted as quickly as possible; in addition, an administrative and supervisory committee for recruitment should be established to set annual recruiting quotas for three years, with follow-up review every six months. The initial targets should be software, communications, and optoelectronic specialists.
- A “Renewable Energy Development Act” should be passed as soon as possible.
- A fair environment favorable to financial consolidation should be established, and the relaxation of restrictions on the establishment of new financial holding companies and bank branches should be considered.
- The relaxation of restrictions on mainland Chinese coming to Taiwan for business activities should be considered, and the promotion of tourism in Taiwan by people from the mainland should be continued.
- Implementation of the mainland Chinese investment policy should be continued under the precondition of effective risk management.
- The orderly implementation of cross-strait financial dealings should be carried out under the preconditions of assured national sovereignty and security as well as the establishment of a financial supervisory mechanism.
- Direct cross-strait transportation links should be pursued, under the preconditions of assured national sovereignty and security, in an orderly fashion.
- An independent anti-corruption agency should be established to carry through with the clean-government policy.
- To enhance government efficiency, the legislative process for the “Organic Law of the Executive Yuan” revision should be completed and a “Total Personnel Quota for Central Government Agencies Act” should be enacted as soon as possible.
- Participation in the regulatory process by

those subject to regulation should be reinforced, and they should be encompassed, to an appropriate extent, in the regulatory impact analysis (RIA) mechanism.

- A strategy for the development of non-bank financial institutions should be formulated, and promotion of the enactment of a “Financing Company Act” should be accelerated.
- The legislation of a “Limited Partnership Act” should be accelerated and the establishment of a legal environment for diversified corporate organizations should be promoted.

- Laws related to the “Employment Services Act” should be revised so as to relax the hiring conditions and simplify entry, exit, and residence requirements for foreign professionals, and unnecessary documentation should be eliminated.

Preliminary estimates indicate that, of the 516 “consensuses” reached at the COSTED, 54 necessitate the enactment or revision of relevant laws and regulations. This work will be accomplished by the relevant ministries and commissions as quickly as possible.

Table 1 Enactment and Revision of Laws Required by the COSTED

Conference Consensus	Law to be Enacted or Revised	Competent Authority	Status
Review of regulations governing labor contracts, wages, and working hours (including part-time work)	“Labor Standards Act” revision	Council of Labor Affairs	In formulation
Relaxation of restrictions on the recruitment of high-level overseas professionals	1. “Employment Services Act” revision 2. “Immigration Law” revision	1.Council of Labor Affairs 2.Ministry of the Interior	1.In formulation 2.In formulation
Increased use of renewable energy	“Renewable Energy Development Act”	Ministry of Economic Affairs	Sent to Legislative Yuan for deliberation on June 14, 2005

Table 1 Enactment and Revision of Laws Required by the COSTED

Conference Consensus	Law to be Enacted or Revised	Competent Authority	Status
Establishment of a fair environment for financial consolidation	1. “Financial Holding Company Act” revision 2. “Financial Institutions Mergers & Acquisitions Act” revision 3. “Banking Act” revision	Financial Supervisory Commission	1. In formulation 2. Sent to Legislative Yuan for deliberation on Oct. 31, 2005 3. In formulation
Accelerated development of non-banking financial businesses	Enactment of “Financing Company Act”	Financial Supervisory Commission	In formulation
Establishment of a legal environment for a diversity of corporate organizations	Enactment of “Limited Partnership Act”	Financial Supervisory Commission	In formulation
Establishment of independent anti-corruption agency	Enactment of “Organic Act for the Clean Government Bureau of Ministry of Justice”	Ministry of Justice	Sent to Legislative Yuan for deliberation on Oct. 27, 2005
Restructuring of the government organization to enhance administrative efficiency	Enactment of “Organic Act of the Executive Yuan”	Research, Development and Evaluation Commission	Sent to Legislative Yuan for deliberation on Feb. 24, 2005

Policy Updates

■ Government Working on New Five-year “Barrier-free Customs Clearance” Plan

The Council for Economic Planning and Development (CEPD) is coordinating with relevant government agencies regarding the formulation of a new five-year (2007-2011) “Barrier-free Customs Clearance” plan designed to further reinforce Taiwan’s barrier-free customs-clearance services. The plan will center on facilitation, security, internationalization, and intelligent operation in the establishment of a ubiquitous “one-time sign-in” customs clearance service.

The CEPD notes that a new plan for constructing a high-quality economic and trade environment and network will introduce an advanced wireless communications technology and call for the use of its ubiquitous nature to build a quality supply-chain infrastructure for Taiwan. It will also call for the linkage of domestic and overseas economic and trade, logistics, and funds-flow platforms, thereby helping the island become a world-class logistics services hub. Furthermore, in response to the “Framework of Standards to Secure and Facilitate Global Trade” as announced by the World Customs Organization (WCO) on June of 2005,

Kaohsiung Harbor will be designated as the pilot port for promotion of a secure global supply chain.

The CEPD also points out that the government has been working to build up an barrier-free customs-clearance environment since 2002. This effort has already resulted in the establishment of an integrated “Trade Facilitation e-Network” and achievement of the staged target of the APEC’s 2005 paperless trading program; establishment of an Internet ASP sea and air shipment customs declaration system, and provision of diversified customs declaration channels through Internet verification services together with natural person and industrial/commercial certification; and establishment of an MTNet single-window service platform for ports as well as integration of reporting operations for Keelung, Taichung, Kaohsiung, and Hualien harbors, enabling users to carry out reporting, inquiry, and implementation of business at different harbors with a single sign-in mechanism.

Statistics show that since the Trade Facilitation e-Network went online, import inspection applications have taken an average of less than six minutes and import/export inspection and quarantine applications have brought a reply in under three minutes, all with 95% accuracy. This allows importers to

pick up their goods and exporters to get their shipments on the way quickly, saving them a total of about NT\$100 million every month. In addition, import customs-clearance efficiency as broadly defined has been enhanced from an average of 7 days to 4 days, and the broadly defined export customs-clearance efficiency has been improved from an average of 4 days to just one day. This has made the operation of domestic and overseas supply chains much more efficient.

Regulatory Progress

■ CPA Internships in Taiwan Opened to Foreign Students

On May 25, the Ministry of Economic Affairs began allowing corporations and juridical persons to apply for foreign students to take up internships in Taiwan (see Issue 65 of this publication). On Aug. 4, the Financial Supervisory Commission furthered this liberalization by promulgating the "Regulations for Inviting Foreign Students to Come to the Republic of China for Internships in CPA Offices." Students at the level of junior college and above are eligible for this program. The new measure will allow foreigners undertaking accounting-related studies to obtain practical experience,

and will help Taiwan's enterprises and CPA offices with their future personnel development and recruitment.

Once an application for a foreign intern is submitted by a legally established CPA office and approved by the Financial Supervisory Commission, the relevant overseas representative office will issue a foreign-student certification for the student to come to Taiwan. During the period of internship the foreign student may not change the content of his or her internship plan. The period of internship is six months; if necessary, application may be made for a one-time extension.

For the content of the regulations, please visit this website: http://www.fscey.gov.tw/text/news_detail.aspx?icuitem=1824206.

■ Types of Investment Capital for Overseas Chinese and Foreign Investors

At a meeting with relevant government agencies called by the Investment Commission of the Ministry of Economic Affairs in late July, a decision was made to allow foreign and overseas Chinese investors to put up capital in the form of secured New Taiwan Dollar loans from domestic banks. The new relaxation, which will be imple-

mented as soon as the necessary administrative measures are worked out, will help encourage foreign investors to bring in industrial technology and management methods, and thus spur economic development.

The Investment Commission notes that, according to Article 6 of the Statute for Investment by Overseas Chinese and Statute for Investment by Foreign Nationals, foreign and overseas Chinese investors are allowed to provide investment capital in the form of foreign currency or New Taiwan Dollars obtained within Taiwan (including wages, stock dividends, cash received as the result of a reduction of capital by a domestically invested enterprise, the sale of domestic assets, gifts, employee bonuses, etc.). Investment in the form of secured NT Dollar loans from domestic banks is still not permitted.

After collating the opinions of the different agencies, the Investment Commission agreed to add secured NT Dollar loans extended by domestic banks to the types of NT Dollar investment capital allowed, and revised the relevant application procedures. The key points of the change are as follows:

1. Secured New Taiwan Dollar loans from domestic banks are added to the types of

capital contribution included in NT Dollar investments. The documents that must accompany the investment application include the CPA-certified operating plan of the invested enterprise, and a draft loan contract.

2. If the investor is a foreign juridical person, a statement must be included to the effect that the investor is a company with actual business activities or a multinational company.
3. If the amount of NT Dollar investment is excessively large, follow-up management will be strengthened by requiring the investor to submit regular CPA-certified financial reports on the invested enterprise to the Investment Commission.

For more related information, please go online and visit http://www.moeaic.gov.tw/system_external/ctlr?PRO=NewsLoad&id=479.

■ New Open Platform Strengthens Transparency of Insurance Information

The Financial Supervisory Commission has moved to strengthen the openness of insurance information by commissioning the Taiwan Insurance Institute (TII) to set up an Open Platform for Insurance In-

dustry Information. The new platform, which began operating on July 31, can be accessed at this website: <http://www.tii.org.tw/fcontent/information/information01.asp>.

The TII points out that the Open Platform uses information from the insurance annual as well as the information that is publicly disclosed on the websites of the different insurance companies in accordance with the stipulations of the “Regulations Governing Public Disclosure of Information by Enterprises Engaging in Insurance of the Person” and “Regulations Governing Public Disclosure of Information by Non-life Insurance Companies.” The TII selects the information of most concern to consumers and divides it into two categories, financial information and business information; it also excerpts financial and business statistical information frequently used in the insurance industry, such as balance sheets and profit statements.

In addition, the TII has set up Taiwan’s first inquiry system containing complete information on insurance law, dubbed the Insurance Laws and Regulations Database (website: <http://law.tii.org.tw/fn/onews.asp>). The TII is also working to realize the goal of

providing bilingual insurance laws and regulations by installing an English version of the insurance law inquiry system.

■ Term Extended for Non-inspection Customs Clearance by Approved Companies

On July 28, the Bureau of Standards, Metrology and Inspection, a unit of the Ministry of Economic Affairs, announced a further lengthening of the validity of the inspection-exempt customs-clearance code for approved companies. The new rules extend the period of inspection-free customs clearance authorization from one year to two years, with implementation retroactive to Jan. 2006. The measure is expected to benefit 30 electronic and information companies, thus strengthening their competitiveness.

The Bureau of Standards, Metrology and Inspection notes that since the non-inspection program was first implemented in 2002, it has greatly reduced the time that preferred companies need to carry out customs clearance for imported IT and electronic products used as commercial samples, exhibition products, and products for R&D and testing or for re-export. The Bureau has

instituted this new liberalization to encourage companies to apply for the status of an “approved company” and take advantage of the preferential customs procedures available to such companies. For more related information, please visit this website: http://www.bsmi.gov.tw/page/pagetype6_sub.jsp?pageno=659&groupid=5&no=1227&type_no=1.

Industry Updates

■ DuPont Sets Up Semiconductor Materials R&D Center in Taiwan

DuPont has responded to the bright future of Taiwan's semiconductor industry by announcing, on July 24, the establishment of a Semiconductor Materials R&D Center in Taiwan. This is the company's fourth laboratory related to the development of semiconductor materials, following earlier ones in the United States, the United Kingdom, and Japan, and its third laboratory in Taiwan. The earlier two Taiwan labs are in Taoyuan and Guanyin, where they engage in the development of printed circuit board and microcircuit materials, and flat-panel display technology and green energy (solar battery

and fuel cell) technology, respectively.

DuPont stresses that it highly regards its cooperating partners and the market in Taiwan, and strives to introduce the most advanced technology to the island to help with industrial upgrading and transformation. The new facility, which was two years in planning and cost NT\$300 million to build, will concentrate on the development of post-etch residue remover applications. For more related information, please consult <http://www.dupont.com.tw/060724.htm>.

Statistics

■ Taiwan's Online Population Reaches 42%

According to a survey carried out by the Institute for Information Industry on commission by the Department of Industrial Technology of the Ministry of Economic Affairs, at the end of March 2006 Taiwan's online population reached 9.36 million, for a ratio of 42%. The number of mobile online users had also seen a large increase, to 8.21 million, and the mobile phone penetration stood at 99%. Table 2 gives Taiwan's Internet use indicators.

Table 2 Internet Use Indicators for Taiwan

Indicator	Date of Data	Numbers	Content
Online Population	March 2006	9.63 (9.59) million	Online penetration up to 42% (41.7%)
No. of Broadband Subscribers	March 2006	4.20 (4.12) million	xDSL subscribers reached 3.78 million, accounting for 90% of broadband subscribers
No. of Commercial Internet Accounts	March 2006	14.15 (14.01) million	Mobile Internet: 58% xDSL: 27% Dial-up: 12% Cable modem: 3%
Household Online Penetration	Oct. 2005	66.6% (60.7%)	88% (78%) are broadband users
Corporate Online Penetration	Dec. 2005	82.8% (81.8%)	Penetration over 90% for the banking and insurance; cultural, sports, and leisure services; and professional sci-tech services industries
No. of Mobile Online Subscribers	March 2006	8.21 (8.07) million	Over 25% growth in PHS and 3G subscribers for three continuous quarters, providing the major force for online growth
Mobile Phone Penetration	March 2006	99% (97%)	
Total External Bandwidth	March 2006	114,896 (108,950) Mbps	Major linked countries are the U.S., Japan, Hong Kong, China, Holland, Singapore, and South Korea

Sources: ACI-IDEA-FIND, Institute for Information Industry; Department of Industrial Technology, MOEA

Notes: 1. Figures in parentheses are for the same period a year earlier.

2. For more information on basic Internet indicators, please visit <http://www.find.org.tw>.

■ M&A Value Tops NT\$260 billion

According to the Commerce Department of the Ministry of Economic Affairs, a total of 616 corporate readjustments including mergers, acquisitions, and splits have been carried out since Feb. 6, 2002, helping to realize horizontal and vertical integration and upgrading international competitiveness as well as operating efficiency. All of these M&As had a total value of NT\$268.38 billion.

The Commerce Department's data show that the majority of these M&As were carried by small and medium-sized enterprises (with a capitalization of no more than NT\$500 million), which accounted for 54.2% of the total number. M&As executed by companies with capitalization of up to NT\$2 billion came next, with 14.4%. Of all M&A cases completed in the first half of 2006, 9.6% were in the electrical machinery

industry, 8.4% in the electronics industry, another 8.4% in the foodstuffs industry, and 7.2% in the communications industry.

In transnational activity during the period, there were 7 mergers, 2 corporate splits, 2 acquisitions, and one share conversion, with a total value of US\$318,890,000 (about NT\$10.36 billion at NT\$32.5:US\$1).

These figures show that the Corporate Mergers & Acquisitions Act has been effective, and its success is now recognized. The Commerce Department will continue promoting M&As by revising relevant laws and reviewing the liberalization of M&As methods and conditions with the aim of enhancing the effectiveness of M&As activity and upgrading the international competitiveness of Taiwan's enterprises.

For more related information, please go online and visit <http://gcis.nat.gov.tw/dispatch.jsp?type=2&sno=2026>.

Special Issue on Free Trade Zones in Taiwan

Special Report

■ Free Trade Zone Project Builds Competitiveness

When a shipping container passes through Taiwan, the simple processing of its contents before transshipment increases its value to the island three-fold; and, if the contents undergo deep processing, the value skyrockets 11-fold. Taiwan is perfectly positioned to develop this kind of value-added transshipment, since it is separated from seven major cities of the Western Pacific by an average flying time of just two hours and 55 minutes, and from five major Asia-Pacific harbors by an average sailing time of only 53 hours.

When the liberalization of the world economy led production and marketing to transcend national borders, mainland China, located just across the Strait from Taiwan, used its cheap labor and massive consumer market to develop into the world's factory and a global market, striking a blow at the international deployment of low-cost manufacturing. In response the government of Taiwan decided, after careful evaluation, to promote the establishment of free trade

zones that can bring together overseas low-level manufacturing with the island's own development of key parts and components, thereby reinforcing the strategic planning power of domestic enterprises and creating new competitiveness for them in global operations.

Free trade zones take advantage of the "within physical territory, but outside the customs territory" concept to carry out the liberalization of trade administration and use logistics to power manufacturing via the simplification of customs procedures, the provision of tax incentives, and the convenient inward and outward flow of personnel and funds. The goal is to create a better operating environment and pursue greater trade opportunities for manufacturers.

With simplified customs procedures, goods must be reported but need not clear customs. This saves time and reduces the amount of inventory, eliminates the need for customs bonding and rebates, and provides greater flexibility in the use of funds. At the Port of Taipei, for example, the Tonglit Logistics Co. carries out deep processing that combines cheap parts and components from neighboring countries with high-quality parts and components from Taiwan and, using the convenience provided by the free trade zone, exports the resulting assembled

automobiles immediately to markets all over the world. In addition to preserving opportunities for Taiwan's auto parts industry to develop, this also strengthens the global competitiveness of the island's auto industry.

Other reasons for companies to move into free trade zones, in addition to convenient customs procedures, include flexible sources of goods and an alien-worker quota up to four times that outside the FTZs. Yet another attraction is that, with the exception of illegal and prohibited items, goods from mainland China may be brought into the zones freely and without tariff. If such goods are processed into products that may be imported into Taiwan, they can even be passed through customs and sold on the domestic market. This is what enticed appliance-maker Great Yen Electric Food Grinder Co., which had subcontracted production to mainland China because of cost considerations, and the I-Mei Foods Co., which had set up a factory in the mainland, to return to Taiwan.

FTZs can also serve as powerful market-development tools for international enterprises. The Taoyuan Air Cargo Park/Free Trade Zone has broken through the restrictions of the aviation control area, offering the convenient flow of personnel

and funds as well as the advantage of streamlined procedures. This makes it the perfect choice for companies dealing in electronics and other high-value-added products, for which speed is of the essence, as well as for express parcel companies.

In the future, Taiwan's industries will be transformed in the direction of R&D, logistics, and high value, and the government hopes that its FTZ plan will help facilitate this transformation by creating win-win opportunities for enterprises and the economy as they work together to create industry clusters and boost the island's economy to new heights of achievement.

Taiwan's Free Trade Zones

■ Keelung Free Trade Zone

Abundant Sources of Goods Favor International Logistics

• Locational Advantages

Keelung is located in the northernmost corner of Taiwan and is the largest natural harbor in that part of the island, facing the Pacific Ocean to the north and protected by Keelung and Heping islands. Situated at the hub of trans-Pacific and Asian navigation routes, it serves as a major port of call for coastal shipping and an important entrepot port for oceanic routes. The harbor boasts

seven access roads, some of which connect to Freeways 1 and 3 (the Sun Yat-sen and the Second Freeways) to provide convenient transportation to Taipei and points south, as well as a convenient network of roads for intra-harbor transport. The harbor is about 60 kilometers an hour or so by highway—from the Taiwan Taoyuan International Airport.

- Industrial Development and Special Features

Keelung Port is situated close to the political, economic, and consumption center of northern Taiwan, where more than half of the entire island's supplies of goods are concentrated. It is also in near proximity to container terminals as well as the large industrial zones at Dawulun, Rueifang, and Lioudu, making it a perfect location for the development of international logistics.

- Prospects

West Wharfs 2 through 4 will be planned, in the long term, as a special zone for direct shipping across the Taiwan Strait in line with the opening of direct cross-strait links and with the development of Keelung City's harbor commercial district project. The docks at West Wharfs 27 through 33 will maintain their present function of handling bulk cargo and petroleum, while their shore areas will be developed for international lo-

gistics and container terminal functions. Most of the companies currently operating in the area are shipping, freight forwarding, and logistics firms, and the Yang Ming Corp., Yes Logistics Corp., Evermore Logistic Co., United Logistics International Corp., Wan Hai Lines Ltd., Ever Rainbow Co., Ltd., Ever Fortune Information Co., Ltd. and Bel Air Motors Limited have applied to set themselves up within the FTZ. In the future, companies operating in the FTZ will be encouraged to bring their strategic partners in as well, so as to build up industry clusters.

- Contact Information

Keelung Free Trade Zone Service Center
Tel: +886-2-2420-6284,
+886-2-2420-6285
Fax: +886-2-2429-5826
E-mail: kel_ftz@klhb.gov.tw

- **Taipei Free Trade Zone**

- Building an Automobile Logistics Center**

- Locational Advantages

The Taipei FTZ is located just south of the Danshuei River estuary on Taiwan's north coast, adjacent to the Taiwan Strait. It is 34 nautical miles from Keelung Port to the east, 87 nautical miles from Taichung Port to the south, and 134 nautical miles from Fuzhou Harbor on the coast of mainland China to the west. The port encompasses a

total area of 3,102 hectares, making it five times the size of Keelung Port. It features a vast hinterland, an adequate water depth, proximity to the Taipei metropolitan area, abundant supplies of cargo, and a closeness to the Taiwan Taoyuan International Airport (just 20 kilometers) that makes joint sea-air shipping highly convenient. The port still has land for lease in its first, second, and third bulk cargo centers.

- Industrial Development and Special Features

The Port of Taipei is located near to four large industrial zones at Tucheng, Wugu, Linkou, and Shulin, where industrial developments are focused on machinery, metal manufacturing, plastic products, power generation, and electronics.

- Prospects

The Tonglit Logistics Co. has applied to set up operations in the Port of Taipei, where it will provide warehousing for imported automobiles and serve as a depot for the final preparation and transshipping of new automobiles. Tonglit will hopefully attract other related enterprises into the FTZ, turning the Port of Taipei into Taiwan's biggest import and export depot for the automobile industry.

Fax: +886-2-2429-5826
E-mail: kel_ftz@klhb.gov.tw

- **Taoyuan Air Cargo Park Free Trade Zone Adding Value to High-Value-Added Industries**

- Locational Advantages

The Taiwan Taoyuan International Airport in Taoyuan is the gateway to Taiwan. It is situated at the crossroads of Northeast and Southeast Asian flight routes, and offers an average flying time to seven major Asia-Pacific cities of just two hours and 55 minutes. The Taoyuan Air Cargo Park Free Trade Zone covers an area of approximately 45 hectares at the eastern edge of the airport. One of its most notable features is a dedicated linking roadway to the aircraft aprons, crossing over Nankan Stream and Provincial Highway 4 to connect to the apron control area. In the future, this road will be like an umbilical cord that makes the air cargo park a virtual extension of the airport control area and heighten its overall land-use value. Enterprises that move into the park will be able to make use of its advantageous positioning to save land shipping time and shorten processing time for import, export, and transshipped goods. It will also allow interna-

tional express parcel companies to deliver goods to other destinations quickly.

- Industrial Development and Special Features

The Taoyuan Air Cargo Park Free Trade Zone is one of the largest projects involving private investment in infrastructure that are being carried out in Taiwan today. This staged project covers a very large area of land and calls for an investment of more than NT\$20 billion. The first stage was completed at the end of 2005, with formal operation beginning on Jan. 1, 2006. The entire air cargo park is to be completed by Dec. 31, 2018. The park is divided into two parts, a general cargo park and a free trade zone, and will have a cargo terminal, warehouse and office building, value-added park, and distribution and logistics centers. Access by a dedicated linking roadway will greatly reduce the time required for goods to clear customs.

The Taoyuan Air Cargo Park FTZ is near to the Hsinchu Science Park, Linkou Industrial Zone, Jhongli Industrial Zone, Guanyin Industrial Zone, and Wugu Industrial Zone, and will offer services to handle the import and export of raw materials and finished products for the different industrial zones as well as related logistics and value-added services.

- Prospects

In the future, the Taoyuan Air Cargo Park FTZ will work with the Keelung FTZ and Taipei FTZ to make full use of its geographic advantage through the sea/air joint-shipping supply-chain operating model, and will attract high-value-added parts and IT-linked industries. It will become one of the few FTZs in the world that are able to integrate the five functions of air cargo, distribution, adding of value, logistics, and warehousing; and, in this way, it will be able to manifest the key logistical role that Taiwan plays in East Asia. When the FTZ is fully operational, it will be able to handle 1.2 million tons of cargo annually; its value-added park will provide 25,000 jobs, and will generate a production value of NT\$800 billion a year.

Fax: +886-3-393-3456

- **Taichung Free Trade Zone**

Cargo Handling, Warehousing & Transshipment, Processing—“Three in One”

- Locational Advantages

Taichung Port is situated in the middle of Taiwan and is connected with Cing-cyuang International Airport by an expressway, making it highly convenient for sea/air joint shipment. It is also situated at the midway point on the Shanghai-Hong Kong shipping route, and is close to all the harbors on mainland China's southeastern coast. This puts Taichung Port in an excellent position to serve direct shipping between Taiwan and China, once such shipping is instituted. The harbor covers a total of 3,760 hectares, giving it vast sea and land areas as well as a powerful potential for development as a regional re-export processing and logistics center.

- Industrial Development and Special Features

The Taichung FTZ, which began operating on Oct. 31, 2005, is close to the Taichung Harbor Export Processing Zone, Taichung Harbor Industrial Zone, Changhua Coastal Industrial Zone, Central Taiwan Science Park, Taichung Industrial Park, Machinery Technology Industrial Park, and Tanzih Export Processing Zone, which together produce a regional cluster effect. The Taichung FTZ offers storage, reassembly,

and simple processing, making it a repackaging and distribution center, regional re-export processing center, and logistics support center that can greatly add to the value of goods.

- Prospects

The Taichung FTZ will use the advantageous industrial positioning of Taichung Harbor and the tax preferences, "within physical territory, but outside the customs territory" status, free flow of capital, and business activities of the FTZ to develop in-depth value-added operations that will help enterprises within the harbor area to upgrade from domestic to international logistics with three integrated functions: cargo handling, warehousing and transshipment, and processing.

■ Kaohsiung Free Trade Zone

Mature Industrial Clusters, Strong Supporting Industries

• Locational Advantages

Kaohsiung Port is Taiwan's biggest international harbor, with a large surface area and a vast hinterland, moderate weather, and a long, narrow sandbank just offshore to serve as a natural breakwater. This fine natural harbor enjoys a geographic position at the hub of shipping routes through the Taiwan Strait and the Bashi Channel. It is also an essential point on American, European, and Asian navigation routes—unparalleled conditions that make Kaohsiung the foremost gateway and cargo hub for Taiwan's imports and exports.

Kaohsiung Port's container terminals 1 through 5 are within the scope of the 397.69-hectare FTZ, which began operating in January 2005. On its eastern side, the Siaogang International Airport provides an international link for both passengers and air cargo. The container terminals of the FTZ are just two kilometers from the freeway and three from the airport. Convenient land transportation links are provided by Provin-

cial Highway 17, the Sun Yat-sen Freeway, National Expressway 10, and Freeway 3.

• Industrial Development and Special Features

The Kaohsiung FTZ offers the following advantages:

1. Vast areas of adjoining land, providing opportunities for achieving a multiplier effect through cooperation.
2. Repackaging, processing, and other value-added functions can be expanded in combination with the offshore shipping center and logistics center mechanisms.
3. With privatization, dock operations offer high-efficiency, low-cost, and high-quality services.

The industrial areas of southern Taiwan that are close to Kaohsiung Port include those of Kaohsiung County, Tainan County, Tainan City, Pingtung County, and Taitung County. The areas around Kaohsiung City encompass the export processing zone of the MOEA, the Southern Taiwan Science Park, Yes Logistics Corp. of the Yang Ming Group, and inland container terminals. Large areas of surrounding land are available for development, which would attract large numbers

of residents and would together produce a multiplier effect.

Nearby industrial clusters include the steel industry centered around China Steel; the petrochemical industry centered around Chinese Petroleum; the shipbuilding industry centered around China Shipbuilding; seven export processing zones including Kaohsiung, Nanzih, Chenggong, Kaohsiung Air Cargo, Linguang, Kaohsiung Software Technology, and Pingtung; and the semiconductor, opto-electronics technology, and biotechnology clusters in the Southern Taiwan Science Park.

• Prospects

Following the establishment of the Kaohsiung FTZ, the volume of cargo handled in the harbor area is steadily increasing, and eleven enterprises have already moved

in: Kaochun Stevedoring, Eastern Media International, Cargo Distribution International Taiwan, Lien Hai Terminal & Stevedoring, Hanjin Taiwan Logistics, Wan Hai Lines, American President Lines, Trade-Van Information Services, APL Logistics Taiwan, Ltd., Yang Ming Marine Transport Corp., and OOCL Co., Ltd. Because they can carry out two-level deep processing there, linked industries are able to upgrade their industrial structure; and, by taking advantage of Kaohsiung Port's advantageous position, enterprises can also strengthen the competitiveness of their business operations.

Competitive Advantages

■ To Win Markets, First Grasp Opportunities

In early October of 2005, just as northern Taiwan was entering the autumn season, an automotive logistics center established at a cost of NT\$400 million by the Tonglit Logistics Co. began operating in the Taipei FTZ—the first FTZ enterprise at the Port of Taipei. Tonglit's employees were not able to

let up on the work at hand despite the blazing sun; they quickly assembled auto parts into components, and then loaded them in special metal crates for shipment abroad.

After becoming an FTZ enterprise, Tonglit Logistics operates under the “within physical territory, but outside the customs territory” system and needs only to submit reports but not clear customs, allowing it to assemble auto parts and components immediately and deliver them at once. This opera-

tion is not only fast, but also reduces inventory risk. Automotive companies can contract with Tonglit to import auto parts and components and then re-export them without having to bother with customs clearance. Before the advent of FTZs, companies engaged in this type of operation had to carry out customs bonding and tariff rebate procedures; and customs would not rebate tariffs of 5% or lower, resulting in higher costs in terms of both time and money. China Motor, for instance, recorded parts exports amounting to NT\$15.8 billion in 2004; if it had been able to contract processing out to FTZ enterprises, the company would have saved substantial amounts of time and customs bonding costs, and thus strengthened its competitiveness.

A lot of companies will benefit from the privilege of reporting without clearing customs. Because an airport is a control area, importers of perishable goods in the past had to hire trucks to transport the goods to the nearest bonded warehouse, have the necessary label attached, and then ship the goods back to clear customs. In the future, the Taoyuan Air Cargo Park FTZ's refrigerated warehouses will be able to affix the labels; besides saving transportation costs, this will also alleviate worries about the spoilage of perishable goods that reach the store shelves

only 3-5 days after arrival. And it will no longer be unthinkable for yogurt that arrives from Paris today to be consumed today!

By the same token, a well-known express parcel delivery company has found favor with the centralization of administrative agencies in FTZs, which allows the on-the-spot handling of goods and the one-stop completion of all procedures, and has quietly begun operating in the Taoyuan Air Cargo Park FTZ. What this company is after is the lifeblood of the express parcel industry—time.

Compared with mainland China and Southeast Asia, which offer the advantages of low labor and materials costs, Taiwan's FTZs offer flexibility of goods sources and the highest quota of foreign workers. The I-Mei Foods Co. has taken note of the possibility of importing materials from mainland China for processing and of having a foreign-worker quota four times that outside the FTZs (that is, up to 40% of the total work force), and has decided, in consideration of its own market base, to move into the Taichung FTZ in the near future. Thomas M.F. Yeh, vice chairperson of the Council for Economic Planning and Development, notes that when I-Mei imports goods from mainland China in the future, "If those goods can be processed into goods that are

allowed to be imported into Taiwan, they can be sold on the domestic market.”

Besides I-Mei, the Great Yen Electric Food Grinder Co., which is well known for the production of “Pineapple” brand vacuum machines and juicing machines, has decided to import parts for assembly in the Taoyuan Air Cargo Park FTZ because of Taiwan’s internationally acclaimed quality control and potential for multiple-double-digit value-added profit. This not only allows the company to assure its quality, but also alleviates concerns about the outflow of technology. Furthermore, once the location of production becomes Taiwan, product prices can be increased.

Frequently Asked Questions

Q. Is it necessary to get the approval of the Customs to transport goods between free trade zones?

A. 1. Goods that are brought into an FTZ from overseas and are then shipped from the FTZ to an overseas destination or to another FTZ should first be reported to the Customs and shipped

into or out of the FTZ after being filed in the Customs computer system. (Article 17, Act for the Establishment and Management of Free Trade Zones)

2. Containers (or goods) that are shipped between FTZs or between FTZs and the control areas of seaports or airports should have their status monitored by technological means or other monitoring mechanisms.
 3. For port areas that have not yet set up monitoring mechanisms, customs-clearance procedures must be followed. (Article 6, Act for the Establishment and Management of Free Trade Zones)
- Q. Can “monthly collective reporting” be used for the flow of goods into and out of FTZs?
- A. 1. For goods shipped between FTZs and bonded areas, or from tariff-liable areas into FTZs, an FTZ enterprise may use “monthly collective reporting” after receiving permission from the Customs.
 2. For goods shipped from FTZs to tariff-liable areas, “monthly collective re-

porting" may be used only if the goods conform to the relevant qualifications.

Q. Can FTZ enterprises contract processing work out?

- A. 1. According to Article 23 of the Act for Establishment and Management of Free Trade Zones, FTZ enterprises may, after applying to and receiving permission from the Customs, ship tax-exempt goods, machinery, or equipment to tariff-liable areas for repair, testing, or inspection without providing a tariff guarantee for such contracted processing.
2. At the current time, in addition to manufacturers, FTZ enterprises engaging in logistics industry may apply to contract companies in tax-liable areas to carry out simple processing. In addition, those who receive special approval from the Free Trade Zone Coordinating Committee may also contract processing out.
3. Regulatory provisions for contracting between FTZ enterprises and for FTZ enterprises to take processing contracts

from enterprises outside the zones are currently under planning.

Q. Are goods from mainland China allowed to be brought into FTZs?

- A. With the exception of products that are prohibited or that arouse suspicion of violating safety, environmental protection, or the national image, which require prior approval from the agency in charge of the target industry, goods may be brought into FTZs without restriction from other laws or export/import regulations. (Article 16 of the Act for Establishment and Management of Free Trade Zones) In other words, according to this regulation mainland Chinese goods may enter FTZs.

Q. What convenience is provided for business people entering and exiting FTZs?

- A. 1. International business people (not including those from mainland China) may enter in accordance with regulations governing ordinary (visitor or resident) visas, visa-free entry, or landing visas.
2. In cases of emergency, the FTZ man-

agement agency may relay an application to the agency in charge for entry on a “selective landing visa” within seven working days.

(Refer to Article 32 of the Act for Establishment and Management of Free Trade Zones.)

Key Laws and Regulations

■ Laws and Regulations Governing Free Trade Zones

Concrete Measure	Pertinent Article	Law or Regulation	Enacting Agency	Date of Promulgation/ Revision
Enabling Act		Act for the Establishment and Management of Free Trade Zones	Legislative Yuan	July 23, 2003

Key Resolutions

■ Key Resolutions by the Free Trade Zone Coordinating Committee, Executive Yuan

Date	Name of Meeting	Key Resolutions
Feb. 18, 2004	First meeting of the FTZ Coordinating Committee	Passed revision of the Guidelines for the Establishment of the Free Trade Zone Coordinating Committee, Executive Yuan
March 8, 2004	Second meeting of the FTZ Coordinating Committee	Approved establishment of Kaohsiung and Keelung FTZs

Date	Name of Meeting	Key Resolutions
Jan. 13, 2005	Third meeting of the FTZ Coordinating Committee	<p>1. Asked CEPD for following interpretations regarding the Act for the Establishment and Management of Free Trade Zones: disciplinary agency in Chapter 7 and applicability of cargo “provided for operations” in Article 21, and legal basis for documentary reporting rules for shipment overseas of goods by FTZ enterprises.</p> <p>2. Approved establishment of Taichung FTZ</p> <p>3. Asked Ministry of Transportation and Communications to carry out planning and establishment of common FTZ cargo tracking information platform. Prior to the establishment of the platform, the “Container Status Checking System” will be linked with the harbor information system (MTNet) that is being set up by the MOTC and the dedicated vehicle fleet system to serve as a provisional monitoring mechanism for inter-FTZ cargo/container transport.</p>
May 5, 2005	Fourth meeting of the FTZ Coordinating Committee	<p>1. For applications by shippers to become FTZ enterprises and engage in transshipping operations, their pure transshipment business should be handled in accordance with the provisions of the Customs Act. Transshipment trade operations should be handled by FTZ enterprises in accordance with regulations governing FTZ operations.</p> <p>2. According to the provisions of the Employment Service Act and the Act Governing Relations between Peoples of the Taiwan Area and the Mainland Area, foreign and mainland Chinese spouses (including those approved for long-term residence and residence with spouses) who have received approval to live and work in Taiwan are encompassed within the scope of “domestic labor” as defined in Article 11 of the Act.</p> <p>3. Approved establishment of Taipei and Taoyuan FTZs.</p>

Date	Name of Meeting	Key Resolutions
Aug. 23, 2005	Fifth meeting of the FTZ Coordinating Committee	<p>1. Asked the Council of Indigenous People together with the Ministry of Transportation and Communications to establish a job-seekers databank for enterprises to use; also asked the Council of Indigenous People to map out a Program for the Promotion of Employment among Indigenous People. After these measures are adopted, enterprises that are unable to employ the legal quota of indigenous people may report to the Executive Yuan for approval to delay payment of the differential subsidy.</p> <p>2. The Council of Labor Affairs is to set up a one-stop window for the resolving of worker-shortages in FTZs on a case-by-case basis.</p> <p>3. In addition to giving permission to FTZ processing and manufacturing enterprises to subcontract processing work outside the FTZs, FTZ enterprises engaged in distribution are also allowed to subcontract simple processing and, with the approval of the FTZ Coordinating Committee, to subcontract processing as well.</p> <p>4. Agreed to monthly reporting system for customs declarations by FTZs; asked the Ministry of Finance to establish the relevant reporting system, and to adopt temporary measures prior to completion of the system.</p> <p>5. FTZ enterprises that import mainland Chinese goods that are banned from import but are allowed to be imported after processing may ship the goods into tariff-liable areas following the payment of customs tariffs in accordance with the Act for the Establishment and Management of Free Trade Zones and other relevant regulations.</p>

Date	Name of Meeting	Key Resolutions
May. 11, 2005	Sixth meeting of the FTZ Coordinating Committee	<p>1. Goods for operational purposes of FTZ enterprises in accordance with Paragraph 1, Article 21 of the Act for the Establishment and Management of Free Trade Zones refers to the goods being transported overseas into FTZs by FTZ enterprises to engage in operations in accordance with Subparagraph 2, Article 3 of the Act for the Establishment and Management of Free Trade Zone, as well as the goods report to the Customs for storages in accordance with Paragraph 1, Article 17 of the Act for the Establishment and Management of Free Trade Zones.</p> <p>2. Taxation on goods that are shipped by FTZ enterprises into tax-liable areas:</p> <p>(1) Article 22, Paragraph 1 of the Act for the Establishment and Management of Free Trade Zone stipulates that when goods are shipped from FTZs into tax-liable areas, customs duties should be levied on them according to the regulations on imported goods. For goods that undergo processing or production in FTZs, however, the value added in the FTZ should be deducted before duties are levied.</p> <p>(2) The customs value for goods that are shipped into tax-liable areas after being processed, manufactured, sorted, and simple processed by FTZ enterprises is calculated according to the Regulations Governing Customs Clearance for Goods in Free Trade Zones, and relevant regulations stipulated by Ministry of Finance.</p> <p>(3) Goods that are shipped back to tax-liable areas from FTZs in their original form:</p>

Date	Name of Meeting	Key Resolutions
		<p>a. Taxed goods, including imported goods on which duties have been paid and non-bonded domestically produced goods, that are shipped into FTZs and then shipped back to tax-liable areas in their original form within three years will be exempt from customs duties.</p> <p>b. Goods that have enjoyed tax deduction, tax exemption, or tax rebate before being shipped by FTZ enterprises into FTZs, is required to pay customs duties, commodity tax, tobacco & alcoholic tax, and tobacco health & welfare tax, if the goods are shipped back to tax-liable areas in their original form.</p> <p>3. As the FTZs are treated as “within the physical territory, but outside the customs territory” of Taiwan, goods, machinery, and equipments shipped from tax-liable areas into FTZs by FTZ enterprises for operational purposes will be viewed the same as export goods for which tax reductions, exemptions, or rebates may be applied in accordance with the relevant laws and regulations.</p> <p>4. The FTZ Coordinating Committee agreed to revise Article 4, Paragraph 3 of the “Operation Guidelines for FTZ Coordinating Committee’s Special Approval on Application for Processing Subcontracting.” The Working Group of the FTZ Coordinating Committee is authorized to screen and approve such applications. The FTZ Coordinating Committee, however, is responsible for making official reply.</p>

■ 蘇院長：加速貫徹執行經續會共同意見

為展現政府強化經濟表現的決心，行政院蘇院長於8月2日指示相關部會，在1個月內將台灣經濟永續發展會議（以下簡稱經續會）所達成的516項「共同意見」，屬於行政權責可以辦理部分，提出具體執行計畫或方案，提報行政院核定，行政院將會秉持「實事求是」的精神，劍及履及，貫徹執行。

蘇院長並指示相關部會，儘速提出相關的應增、修法律，以期於立法院下會期中審議；至於未被列為經續會「共同意見」議題，也將做為未來施政的重要參考，這些議題包括檢討調整企業赴中國大陸投資上限等。

經續會是行政院近5年以來所舉行最盛大的全國性財經會議，也是蘇院長接任閣揆以來首度召集的重要財經論壇，針對台灣長期性、結構性、爭議性經濟施政課題，徵詢各界意見，共計邀請175位行政、立法及各界代表參與討論。蘇院長期許行政團隊要從「繁榮、公義、永續」核心價值的實踐，創造無障礙的投資環境、優質的生活環境及和諧的社會基礎，讓更多的國內外企業有更高意願投資台灣。

根據經續會所作決議，政府未來將從建立完善社會安全體系、提升產業競爭力、強化財政金融改革、健全全球佈局與兩岸經貿、以及

提升政府效能等5個面向，強化台灣經貿環境，部分重要共同意見包括：

- 檢討勞動契約、工資、工時(包括部分工時)相關規定。
- 建構吸引海外高級專業人才工作之有利環境；加強提供吸引外籍學生來台留學及研究。
- 放寬延攬海外高級專業人才之相關法令限制，儘速制訂「政府及企業延聘國際中高級科技研發人才辦法」，並成立延攬執行與督導小組，訂出每年計畫引進人才名額，連續進行3年，每半年追蹤考核檢討1次；初期以軟體人才、通訊高頻人才、光電人才為引進之目標。
- 儘速通過「再生能源發展條例」立法。
- 建立金融整併公平環境，檢討開放金控及銀行分行新設。
- 檢討放寬中國大陸人士來台從事商務活動；持續推動中國大陸人民來台觀光。
- 在有效管控風險下，持續進行中國大陸投資政策。
- 在確保國家主權及安全並建立金融監理機制下，循序推動兩岸金融往來。
- 在確保國家主權及安全前提下，循序漸進推動直航。
- 建構專責獨立肅貪機關，落實肅貪廉政。

- 為提升政府效率，加速推動「行政院組織法」修正草案完成立法；儘速完成「中央政府機關總員額法」草案立法。
 - 強化法制作業過程中受規範者之參與，並適度納入「法規影響評估」(RIA)機制。
 - 研訂非銀行金融業務之發展策略，並加速推動「融資公司法」立法。
 - 加速推動「有限合夥法」(草案)立法，積極推動建置多元企業組織的法制環境。
 - 積極研修「就業服務法」相關法規，放寬外國專業人士聘僱條件與簡化相關入出境簽證、居留，以及免除必要之各項文書驗證。
- 據初步統計，經續會所達成516項「共同意見」，其中涉及應增、修法案達54項，相關部會將儘速進行研擬並完成立法。部分應增、修法案內容及推動進度詳附表1。

附表1：落實經續會共同意見應增修法律案

經續會共同意見	應增修法案	主管機關	現況
檢討勞動契約、工資、工時(包括部分工時)相關規定	修正「勞動基準法」	勞委會	研擬中
放寬延攬海外高級專業人才相關限制	1.修正「就業服務法」 2.修正「入出國及移民法」	勞委會 內政部	1.研擬中 2.研擬中
增加使用再生能源	制定「再生能源發展條例」	經濟部	2005.6.14送請立法院審議
建立金融整併公平環境	1.修正「金融控股公司法」 2.修正「金融機構合併法」 3.修正「銀行法」	金管會	1.研擬中 2.2005.10.31送請立法院審議 3.研擬中
加速非銀行金融業務之發展	制定「融資公司法」	金管會	研擬中
建置多元企業組織法制環境	制定「有限合夥法」	經濟部	研擬中
建構專責獨立肅貪機關	制定「法務部廉政局組織法」	法務部	2005.10.27送請立法院審議
重組政府組織，提升行政效能	制定「行政院組織法」	研考會	2005.2.24送請立法院審議

資料來源：行政院經濟建設委員會，95年8月2日。

最新政策

■ 經建會積極研擬「無障礙通關」新期5年計畫

為進一步強化台灣無障礙通關服務，行政院經濟建設委員會正協調相關機關擬定新一期「無障礙通關」5年(2007-2011年)計畫，將以「便捷化」、「安全化」、「國際化」、及「智慧化」為主軸，建立「一次輸出、全程使用」的無間隙通關簽審服務。

經建會表示，這項初步命名為「建構優質經貿環境與網絡」的新期5年計畫，將致力導入先進無線通訊科技，運用其無所不在的功能，建構台灣優質供應鏈基礎建設。此外，將推動與國內外經貿、物流及金流平台串接，建構台灣成為國際級運籌服務平台。另因應世界關務組織於2005年6月發表的全球貿易安全化之標準架構，將以高雄港區為先導對象，推動全球安全供應鏈。

經建會指出，政府自2002年起積極推動建立無障礙通關環境，達成多項具體成果，包括完成建置整合簽審、通關服務的「便捷貿e網」，達成亞太經濟合作會議(APEC)「2005年貿易無紙化」階段性目標；完成建置「海、空運網際網路報關ASP系統」，透過網路認證服務結合自然人憑證與工商憑證，提供多元化報關

管道；及完成建置「航港單一窗口作業服務平臺」(MTNet)，整合基隆、台中、高雄、花蓮4個國際商港線上申辦作業，使用者利用單一簽入機制，得以跨港區進行申辦、查詢、執行業務等作業，大幅提升效率。

據統計，「便捷貿e網」上線實施後，進口報驗申請作業平均在6分鐘之內、進出口檢疫申請作業可在3分鐘之內收到回覆受理情形，正確率達95%，使企業及廠商得及時提貨及出口，企業每月降低成本總值約新台幣1億元。此外，廣義進口通關效率由平均7天降至4天，廣義出口通關效率由平均4天降至1天，使得國內外供應鏈之運作更具效率。

法規鬆綁

■ 外籍生來台會計師事務所實習開放

繼經濟部於5月25日開放企業及法人申請外國籍學生來台實習之後(詳本刊第65期)，行政院金融監督管理委員會於8月4日發布訂定「會計師事務所申請外國籍學生來中華民國實習要點」，開放外國籍大專以上學生於求學階段申請來我國會計師事務所實習。這項開放措施將有助外籍會計相關科系學生獲取實務經驗，同時增進我企業及會計師事務所未來人才培育及延攬。

根據這項要點，凡依「會計師法」設立的

九十五年九月

會計師事務所，均得依該要點向金管會提出申請外籍學生來我國會計師事務所實習，金管會將依該要點給予核准，俾利我國駐外館處依其權責核發外籍學生簽證。該要點並規定外籍學生來我國會計師事務所實習期間不得變更實習計畫內容，且實習期間最長為6個月，期滿有實際需要者，得申請展延1次。查詢要點內容，請上網：http://www.fscey.gov.tw/text/news_detail.aspx?icuitem=1824206。

■ 僑外出資種類放寬

經濟部投資審議委員會於7月下旬協調相關機關舉行會議後決議，開放僑外人以國內銀行新台幣擔保融資方式作為出資種類。這項開放措施將在短期內完成相關行政作業後正式實施，將有助鼓勵僑外投資人引進產業技術或經營管理技術，促進經濟發展。

投審會表示，按現行「華僑回國投資條例」及「外國人投資條例」第6條，僑外投資人得以外匯或在我國所得之新台幣（包括薪資、受配之股利、投資國內事業減資退回之現金、出售之國內資產、贈與、員工紅利等）等作為出資種類，惟尚未包括以國內銀行新台幣擔保融資。

經濟部投資審議委員會綜合各相關機關意見，同意將新台幣出資方式加列「國內銀行新台幣擔保融資」一項，並配合修正現行申請事項，重點包括：

- 有關原申請書新台幣出資方式增列「國內銀行新台幣擔保融資」，所需檢附文件為經會計師查核簽證之投資事業營運計畫書及融資草約等證明文件。
- 如投資人為外國法人，需加填聲明書聲明其為實際營業活動或跨國企業之公司。
- 新台幣投資金額如過鉅，為加強後續管理，經核准投資後，請投資人定期檢附投資事業經會計師查核簽證之財務報告送投審會備查。

查詢相關訊息請上網：http://www.moeaic.gov.tw/system_external/ctlr?PRO=NewsLoad&id=479。

■ 保發中心建置公開平台，加強保險資訊透明化

為強化保險業資訊公開，行政院金融監督管理委員會委託財團法人保險事業發展中心建置「保險業資訊公開平台」，已於7月31日起啟用，消費者可上網查閱使用(網址：<http://www.tii.org.tw/fcontent/information/information01.asp>)。

保發中心指出，「保險業資訊公開平台」資訊來源為保險年鑑，及各保險公司依據「財產保險業辦理資訊公開管理辦法」以及「人身保險業辦理資訊公開管理辦法」等相關規定於其網站所公開之資訊。保發中心擷取消費者較

為關心之內容，分為財務資訊及業務資訊兩類指標，另外再從保險年鑑中截取較為常用的保險業財務及業務類統計資訊，如資產負債表及損益表等。

除了保險業資訊公開平台，保發中心為推動資訊公開化，以及金管會保險局推動保險網路之目標，建置了國內第一個擁有完整保險法令判解資料的查詢系統－「財團法人保險事業發展中心保險法令判解查詢系統」（網址：<http://law.tii.org.tw/fn/onews.asp>），另為實現保險法規雙語化之目的，協助各界人士便捷掌握保險相關英譯法規，亦建置了保險法令查詢系統英文版，收錄與保險相關之英譯法規資料，有需要的民眾可多加利用。

■ 優良商品免驗通關規定進一步放寬

經濟部標準檢驗局於7月28日宣布，進一步放寬優良商品免驗通關規定，將優良廠商免驗通關證號效期，由1年放寬為2年，並溯自95年1月起實施，預期有30家電子資訊優良廠商因此受惠，提升產業競爭力。

標檢局表示，自91年實施優良廠商得以免驗通關證號通關放行措施以來，已大幅縮短優良廠商進口商業樣品、展覽品、研發測試用或再復運出口等電子資訊產品之通關時間。標檢局為鼓勵業者申請成為優良廠商，以享有更便

捷通關作業，特別進一步放寬將該證號有效期限，符合之優良廠商，其進口之商品可憑該證號於有效期限內不限次數及數量通關逕放。查詢相關資訊請上網：http://www.bsmi.gov.tw/page/pagetype6_sub.jsp?pageno=659&groupid=5&no=1227&type_no=1。

業者動態

■ 杜邦在台設立半導體材料研發實驗室

看好台灣半導體產業發展前景，杜邦公司於7月24日宣布，在台成立半導體材料研發實驗室。這是杜邦公司繼其在美國、英國、及日本之後，所成立的第4個半導體材料研發相關實驗室，也是該公司在台成立的第3個實驗室。杜邦公司已在桃園、觀音成立實驗室，分別著力於印刷電路板材料/微電路材料、平面顯示器技術及綠色能源(太陽能電池/燃料電池)科技的開發。

杜邦公司表示，該公司非常重視台灣地區的合作伙伴與市場，致力於將先進技術引進台灣，達成產業升級與轉型。

這座位於新竹科學園區的實驗室，歷時2年規劃、耗資新台幣3億成立，將專注於半導體銅製程蝕刻後殘餘物清洗材料的應用研發工作。查詢相關訊息請上網：<http://www.dupont.com.tw/060724.htm>。

統計資料

■ 資策會：我上網普及率提升為42%

根據經濟部技術處委託資策會進行的調

查顯示，截至2006年3月底止，台灣經常上網人口達963萬人，上網普及率為42%；行動上網用戶數大幅成長，達到821萬戶；行動電話密度高達99%。有關我國際網路運用指標數據內容請詳附表2。

附表2：我國際網路運用指標

指標項目	公布時間 (年/月)	數 據	內 容
經常上網人口	2006/3	963(959)萬人	上網普及率提升為42(41.7)%
寬頻上網用戶	2006/3	420(412)萬戶	xDSL用戶數達378萬戶，占整體寬頻網路用戶90%
商用上網帳號	2006/3	1,415(1,401) 萬戶	行動網路：58% xDSL：27% 撥接上網：12% Cable Modem：3%
家庭上網普及率	2005/10	66.6(60.7) %	其中88(78)%利用寬頻上網
企業上網普及率	2005/12	82.8(81.8) %	「金融及保險業」、「文化、運動及休閒服務業」、「專業科學及技術服務業」連網普及率分別皆超過9成以上，表現最佳
行動上網用戶	2006/3	821(807)萬戶	PHS與3G用戶數成長率連續3季超過25%，成為行動上網用戶成長最重要的動力
行動電話密度	2006/3	99(97) %	
對外連線總頻寬	2006/3	114,896 (108,950) Mbps	美國、日本、香港、中國大陸、荷蘭、新加坡及韓國等為主要連網國家

資料來源：資策會ACI-IDEA-FIND/經濟部技術處創新資訊應用研究計畫

註1：()內為前1年同期數字

註2：查詢更多國際網路應用基礎指標重要調查數據，請上網：<http://www.find.org.tw>。

■ 企業併購金額突破2600億元

根據經濟部商業司統計，「企業併購法」

自91年2月6日實施4年半以來，企業利用「合併」、「收購」或「分割」等方式進行產業調整的案例達616件，併購金額合計約為新台幣

2,683.8億元，有助於企業進行水平垂直整合，提升國際競爭力和經營效率。

商業司資料顯示，中、小型公司(資本額5億元以下)併購案件比例最高，占總件數的54.2%；20億以上公司併購案占總件數比例次之，為14.4%；如以行業別觀察，95年上半年公司併購案中，以電機、電子、食品及通訊業等公司比例較重，分占9.6%、8.4%、8.4%及7.2%。

在跨國併購方面，合併件數7件、新設分割件數2件、收購件數2件、股份轉換件數1件，合計12件，總金額為318,890千美元(以1：32.5折算新台幣約103.6億元)。

商業司表示，根據以上統計資料，顯示「企業併購法」施行的成效已獲得肯定。為利併購執行，商業司將繼續推動修法，檢討放寬併購方式及併購條件，以促進併購效率，提升企業的國際競爭力。查詢相關資訊請上網：<http://gcis.nat.gov.tw/dispatch.jsp?type=2&sno=2026>。

台灣自由貿易港區專刊

特別企劃

■ 打造台灣經濟新競爭力的「自由貿易港區計畫」

一個貨櫃經過台灣，經過簡單加工後轉口，價值就躍升3倍，如果經過深層加工，價

值就攀升為11倍。以航線來看，飛機平均2小時55分可飛抵西太平洋7大城市，船舶53小時可航達亞太5大港岸，台灣關鍵地理位置先天上即有利發展加值轉運。

當生產與市場隨世界經濟自由化跨越出國界，對岸中國大陸憑藉廉價勞動力與龐大消費人口，發展成世界工廠與全球市場，衝擊國際間低價製造市場。我政府審慎評估後，決定推動設置自由貿易港區，以物流結合國外低階製造與台灣研發關鍵零組件，強化企業運籌帷幄實力，打造運籌全球的新競爭力。

自由貿易港區以「境內關外」的特區理念，推行「貿易行政鬆綁、物流帶動製造」，簡化關務行政流程，提供多項稅賦優惠，便利國際商務人士進出與資金流通，希望創造更優質的作業環境，為廠商爭取更多的貿易機會。

關務簡化得以通報不通關，除了增加時效與減少備料，不需保稅退稅，也讓資金運用更具彈性。例如台北港的東立物流將周邊國家較為低廉的零組件與台灣高級零組件結合進行深層加工，裝配完成的汽車可藉港區之便，立即行銷全球，不僅維持台灣汽車零組件業的發展機會，同時也提升汽車業的全球競爭力。

除了關務便捷，貨源彈性與最高相當區外4倍的外勞聘用額度，是進駐自由貿易港區的另一項誘因。事實上，自由貿易港區除了違禁品不得輸入外，對大陸貨品進儲不限制也不課

九十五年九月

稅；貨品加工後如果成為可輸入的型態，甚至還能通關內銷。因此，過去考量成本而委由大陸工廠代工的家電業者「國源國際」，及在大陸設廠的「義美食品」都相繼回台。

自由貿易港區也是國際廠商拓展市場的利器。桃園航空貨運園區/自由貿易港區突破航空管制區，人員與資金流通便利與提供一條龍的優勢，最適合電子等高附加價值產品或快遞等講求速率的產業進駐。

未來台灣產業將朝「研發、運籌、高值化」轉型，政府希望藉自由貿易港區計畫為企業與經濟創造雙贏，期待更多企業攜手共創產業聚落，將台灣經濟推向新的高峰。

港區介紹

■ 基隆港 貨源充沛最利國際物流

港區優勢

基隆位於台灣最北端，是北台灣最大的天然良港，北臨太平洋，基隆嶼及和平島屏障於外，地處泛太平洋與亞洲航線交會處，為近洋航線主要靠泊港及遠洋航線轉運港，聯外有7條道路，除東西岸各有聯內道路便利區內交通，兩岸港區聯外道路通往北部第二高速公路，並與中山高速公路相接，往南通往台北與中南部。距中正國際機場約60公里，行車約1個小時內可達。

產業發展與特性

基隆港鄰近全台半數以上貨源集中之北部政經與消費中心、貨櫃集散站與大武崙、瑞芳及六堵三大工業區，有利發展國際物流。

發展願景

基隆港西2至4號碼頭，遠程將配合兩岸直航及基隆市環港商圈計畫開發，規劃為直航專區。西27至33號碼頭，前線碼頭維持現行雜貨及卸油功能，後線部分則配合發展為國際物流與貨櫃集散功能。目前自由貿易港區廠商以船商、貨主、物流業者居多，其中陽明海運、好好物流、永塑國際物流、聯興、萬海航運、彩躍、福騰資訊、標鎰汽車已申設成為港區事業。未來將積極推動承租業者引進其策略廠商，建立群聚效果。

E-mail：kel_ftz@klhb.gov.tw

■ 台北港 構築汽車產業物流中心

港區優勢

台北港自由貿易港區位於台灣北端淡水河口南岸，濱臨台灣海峽，東距基隆港34哩，

南距台中港87浬，西距大陸福州港134浬，海運航線便捷，範圍涵蓋之總面積為3,102公頃，港區範圍約為基隆港5倍。腹地廣大、港池水深足夠，接近大台北都會區，貨源充沛，距中正國際機場僅20公里，海空聯運便捷。目前尚可租用之土地有第一、第二及第三散雜貨中心，均陸續公告招標中。

產業發展與特性

台北自由貿易港區鄰近土城、五股、林口及樹林四大產業工業園區，產業發展以機械、金屬製造、塑膠製品製造、電力及電子業為主。

發展願景

台北港目前已有東立物流申設成為港區事業，主要提供進口車倉儲、新車整備與中轉等業務。東立物流可望吸引相關產業進駐，使台北港成為國內最大汽車產業進出口岸。

■ 桃園港 為高附加價值產業加值

港區優勢

桃園中正國際機場為台灣的門戶，位於東北亞、東南亞航線必經之路，且至西太平洋7大城市的空運平均飛行時間最短，只要2小時55分。桃園航空自由貿易港區/貨運園區佔地約45公頃，位於中正國際機場東側，其中最具規劃特色的是北端設有一座機坪連絡道，跨越南崁溪及台四線後可與中正國際機場機坪管制區銜接，這條類似臍帶性功能的連絡道，將使貨運園區如同機場管制區的延伸，並使貨運園區整體土地利用價值提高，有別於鄰近地區其他類似功能的區域。而未來進駐園區的企業可利用其優勢區位，節省陸路運輸時間，縮短貨物進、出口及轉運處理的作業時間，並透過國際性之快遞物流公司將貨品快速流通至其他國際都市。

產業發展與特性

桃園自由貿易港區/航空貨運園區是國內目前最大規模採民間投資參與興建公共工程之一，不僅佔地幅員廣大，且挹注200億以上資金採分期興建方式完成建設，第一期興建營運計畫於民國94年底完成建設，並於95年1月1日正式營運，整座貨運園區預計將於民國107年12月31日前興建完成並營運。園區共分為一般貨運園區及自由貿易港區兩部分，規劃設有貨運站、倉辦大樓、加值園區、物流中心與運籌中心，出入動線由專橋銜接，大幅簡化貨物通關時間。

本園區鄰近新竹科學園區、林口工業區、

九十五年九月

中壢工業區、觀音工業區、五股工業區等。各園區生產所需原料、成品進出口服務，或相關物流加值服務皆可藉由桃園航空自由貿易港區/貨運園區所提供之各項服務發揮乘數效應。

發展願景

未來該園區將結合基隆港、台北港自由貿易港區，充分運用地理優勢達成海空聯運的供應鏈營運模式，並吸引高附加價值零組件及IT關聯產業進駐，成為全球少數能夠整合航空貨運、物流、加值、運籌、倉辦5大功能的自由貿易港區，發揮台灣在東亞地理位置的關鍵運籌角色。預計本園區全面營運後，將可處理120萬噸貨運量，其中加值園區可提供2.5萬人就業機會，每年創造8,000億元以上產值。

■ 台中港 裝卸儲轉加工「三合一」

港區優勢

台中港地處台灣南北交通的中心，有快速道路聯接清泉崗國際機場，有利海空聯運；更位於上海到香港航線的中點，與大陸東南沿海

各港成輻射狀等距展開，距離最近，在未來兩岸直航具有最佳的優勢。港區總面積達3,760公頃，港區水域及陸地範圍遼闊，具發展區域性加工再出口及物流中心之潛力。

產業發展與特性

台中港自由貿易港區已於94年10月31日正式營運，鄰近加工出口區中港園區、台中港關連工業區、彰濱工業區、中科園區、台中工業區、機械科技工業園區、潭子加工出口區等，可產生區位群聚效應，提供貨主儲存貨物、重新組裝、簡易加工，作為分裝配送中心、區域性加工再出口及物流之後勤網路中心，以提高貨物附加價值。

發展願景

台中港未來可利用產業區位特性，與自由貿易港區賦稅優惠、境內關外、資金流通、商務活動等等優勢，發展深層加值作業，將有助台中港區內業者從「國內物流」升級為「國際物流」，使港口「碼頭裝卸」、「貨物儲轉」、「生產加工」三大機能結合成為一體。

■ 高雄港 產業群聚成熟後援厚實

港區優勢

高雄港是我國最大的國際港埠，且港域遼闊，腹地廣大，氣候溫和，臨海有狹長沙洲，為港灣的天然防波堤，地理條件優良，港灣形勢天成，為一天然深水良港，扼台灣海峽與巴士海峽航道交匯之要衝，亦是歐、美、亞等區航海必經之道，挾此優勢條件，使其成為台灣進出口貨物之首要門戶與集散中心。

目前高雄港第一至第五貨櫃儲運中心均已劃設成為自由貿易港區範圍，並自94年1月開始營運，總面積為397.69公頃，其東側有小港國際機場，提供旅客及貨物與國外接軌。各貨櫃中心距高速公路2公里，距小港國際機場3公里，陸上鄰接台17、中山高、國道10號、國道3號等，串成便捷之交通網。

產業發展與特性

高雄港自由貿易港區具有下列特色：

1. 毗鄰土地遼闊，可相互合作、可發揮乘數效應。
2. 可結合境外航運中心與物流中心機制，擴大重整、加工等附加價值作業功能。

3. 檯埠作業民營化、作業效率高、成本低、服務品質佳。

高雄港鄰近之南部區域包括高雄縣、台南縣、臺南市、台東縣、屏東縣等產業園區。在毗鄰高雄市部分，包括經濟部加工出口區、南部科學工業園區、陽明好好物流中心、內陸貨櫃集散站等，由於毗鄰地區可供開發之土地廣闊，吸引大量勞動人口聚居，相互結合可發揮乘數效應。

其鄰近之產業聚落包括：以中國鋼鐵公司為主的鋼鐵業、以中油公司為中心的石化業、中國造船公司的造船業、加工出口區之高雄、楠梓、成功、高雄航空貨運、臨廣、高雄軟體科技及屏東等7個園區、以及南部科學工業園區之半導體、光電及生物科技等產業群聚。

發展願景

高雄港自由貿易港區設立後，港區貨運量將逐步增加，目前已經有高群裝卸、東森國際、匯展國際物流、連海船舶裝卸、韓進運通、萬海航運、美國總統輪船及關貿網路、世捷集運、陽明海運及東方海外11家廠商進駐。因為可以進行二次深層加工，關聯產業得以提升產業體質，此外，利用高雄港既有的國際優勢地位，企業亦可提升營運競爭能力。

競爭優勢

■ 要贏得市場，就要贏得先機

94年10月初，北台灣剛進入秋季，投資了4億元東立物流汽車物流中心在台北港自由貿易港區正式揭幕，這是台北港第一家自由貿易港區事業。燠熱的太陽並未讓台北港東立物流的工作人員停歇手邊的工作，只見一邊汽車零

組件快速的組裝後裝入特製的鐵箱，接著這批貨就要運往國外。

東立物流成為自由貿易港區事業後，「境內關外」制度運作下，只通報不通關，汽車零組件首先就做到立即組裝立即出貨，除了快速，備料的風險也降低了。汽車業者委託東立進口汽車零組件加工再出口，貨物連帶也同時享有免通關優惠。沒有自由貿易港區之前，企業通關有保稅退稅的手續，而保稅5%以下稅金

九十五年九月

海關不會退還給廠商，時間與金錢的成本不低。例如，中華汽車93年的汽車零組件出口額高達158億，如利用自由貿易港區事業加工後，中華汽車節省的通關時間成本與保稅資金，相當可觀，競爭力也隨著提升。

事實上，通報不通關，不少業者都受惠。進口生鮮業者因為機場屬航空管制區，過去只能僱車將貨品運往最近的保稅倉庫貼標示後再運回通關，未來在桃園自由貿易港區的冷藏倉儲就可以貼標，省了運費，也不用擔心3-5天後才上架的食品出問題，甚至巴黎奶酪今天到貨今天吃，再也不是神話！

同樣的，一家知名的國際快遞業者看上自由貿易港區的行政機關集中，就地打盤處理貨物，一站就能完成所有服務的效益，最近悄悄地在桃園自由貿易港區動起來，這家業者搶的就是快遞業的命脈—時間。

相較大陸或東南亞國家原物料及勞工成本低廉，台灣自由貿易港區也有「貨源彈性」與「最高外勞僱用比例」利基。義美食品就看上可進口大陸原料加工以及最高可達區外4倍（40%）的外勞進用額度，根據本身市場據點，預定近期進駐台中港自由貿易港區。未來義美從大陸進口的貨品，「只要是加工成可輸入台灣的貨品形式，內銷也可以做。」經建會副主委葉明峰指出。

除了義美，以產製鳳梨牌吸塵器及果菜榨汁機聞名的國源國際也因為台灣國際評價較

高的品管，與多倍數的潛在附加值，在桃園港自由貿易港區內設廠進口零組件組裝。如此不僅確保品質，也不需擔心技術會外流。而當產地轉成「台灣製造」，貨品報價也跟著攀升。

業者運籌帷幄，相繼進駐自由貿易港區，掌握了台灣獨特的地理優勢與關務便捷、加工增值相乘的先機，也為企業開展了全球的競爭優勢。

廠商交流道

問：自由貿易港區間的貨物移動是否須經海關核准？

答：1. 貨物由國外進儲自由貿易港區、由自由貿易港區輸往國外或轉運至其他自由貿易港區，應先向海關通報，並於海關電腦回應紀錄有案後，進出自貿易港區（自由貿易港區設置管理條例第17條）。

2. 貨櫃(物)於不同自由貿易港區間或與海空港管制區間運送，應採用科技設施或其他控管機制監督動態。

3. 尚未建立運送控管機制港區，仍須辦理通關（自由貿易港區申請設置辦法第6條）。

問：自由貿易港區貨物流動是否可採「按月彙報」？

答：1. 自由貿易港區與保稅區間及課稅區輸往自由貿易港區之貨物：自由貿易港區事業得事先申請並經海關核准，得採行「按月彙報」。

2.自由貿易港區輸往課稅區之貨物：需符合相關資格條件後，方得申請採行。

問：自由貿易港區事業可否委託加工？

答：1.依據「自由貿易港區設置管理條例」第23條規定，自由貿易港區事業，經向海關申請核准，可將免稅之貨物、機器、設備，輸往課稅區進行修理、測試、檢驗者，該委託加工不需提供稅款擔保。
2.目前除加工製造業可申請從事區外委託加工外，從事物流之港區事業亦得申請委託簡易加工。此外，經自由貿易港區協調委員會專案核准者，亦得辦理委託加工。
3.自由貿易港區事業間互託及接受區外委託加工之法制作業正積極規劃中。

問：大陸貨品可否進入自由貿易港區？

答：進儲自由貿易港區事業之貨品，除違禁品

或有違反安全、環保、國際形象疑慮產品，須先經目的事業主管機關核准外，不受其他法律或輸出入規定限制（「自由貿易港區設置管理條例」第16條）。換言之，大陸地區貨品依其規定，亦得進儲自由貿易港區。

問：商務人士進出自由貿易港區有何便利？

答：1.國際(不含大陸)商務人士入境，得依一般(停留或居留)簽證、免簽證或落地簽證規定辦理。
2.緊急案件得由港區管理機構核轉主管機關，於7個工作天內辦理「選擇性落地簽證」入境。

(請參考「自由貿易港區設置管理條例」第32條。)

重大決議

■ 行政院自由貿易港區協調委員會歷次會議重要決議摘要

日期	會議名稱	重要決議摘要
93.02.18	行政院自由貿易港區協調委員會第一次委員會議	修正通過「行政院自由貿易港區協調委員會設置作業要點」。
93.03.08	行政院自由貿易港區協調委員會第二次委員會議	同意高雄港、基隆港自由貿易港區申設案。
94.01.13	行政院自由貿易港區協調委員會第三次委員會議	1.「自由貿易港區設置管理條例」第7章罰則處分機關、第21條「供營運」貨物之適用性、自由貿易港區事業輸往國外貨物輸出文件通報作業規定之法源依據，請幕僚單位（經建會）進行函釋作業。 2.同意台中港自由貿易港區申設案。 3.請交通部辦理自由貿易港區貨況追蹤共通資訊平台規劃建置事宜。在未建置前，暫以海關現行「貨櫃動態查核系統」介接交通部正建置之「航港資訊系統(MTNet)」及配套之專用車隊制度作為自由貿易港區間之貨櫃（物）運送之控管機制。
94.05.05	行政院自由貿易港區協調委員會第四次委員會議	1.航商申請成為自由貿易港區事業從事轉口業務，其單純轉口運送業務應依「關稅法」相關規定辦理；而從事轉口貿易業務部分，則以自由貿易港區事業身分依自由貿易港區作業規定辦理。 2.依「就業服務法」、「臺灣地區與大陸地區人民關係條例」相關規定，經獲准在臺居留且具工作資格之外籍配偶及大陸地區配偶（包括長期居留及依親居留且申請獲准者），納入本條例第11條中所指「本國勞工」之範疇。 3.同意台北港及桃園航空自由貿易港區兩申設案。
94.08.23	行政院自由貿易港區協調委員會第五次委員會議	1.請原民會會同交通部建立就業人口登記資料庫，供廠商遙用，並請經建會會同原民會研訂「促進原住民就業

日期	會議名稱	重要決議摘要
		<p>方案」。經採行以上措施，如事實上不能僱足法定比例之人數，再行報行政院核定暫緩繳納差額補助費。</p> <p>2.勞委會設立「單一窗口」，以「專案解決」自由貿易港區產業缺工問題。</p> <p>3.自由貿易港區事業除加工製造業可申請從事區外委託加工外，從事物流之港區事業亦得申請委託簡易加工，另增列經行政院自由貿易港區協調委員會專案核准者亦得委託加工。</p> <p>4.同意自由貿易港區採行「按月彙報」之通關制度，請財政部進行本案「彙報系統」之建置工作，在系統完成前，請採行暫行措施。</p> <p>5.自由港區事業進儲未開放中國大陸物品，經加工製造為可輸入物品，得依據「自由貿易港區設置管理條例」及相關法制繳交相關稅費後，輸往課稅區。</p>
95.05.11	行政院自由貿易港區協調委員會第六次委員會議	<p>1.「自由貿易港區設置管理條例」第21條第1項規範之「供營運」貨物，係指自由港區事業為從事設管條例第3條第2款業務，自國外運入，以「自由港區事業名義」依同條例第17條第1項規定，向海關通報進儲之貨物。</p> <p>2.自由港區事業貨物輸往課稅區稅費課徵合理化：</p> <p>(1)本條例第22條第1項規定，自由港區事業之貨物輸往課稅區時，應依進口貨物或相關規定，課徵相關稅費。但在自由港區加工、產製之產品，按運出區時之型態，扣除自由港區內之附加價值後課徵關稅。</p> <p>(2)自由港區事業之貨物經加工、產製、重整或簡單加工後輸往課稅區，完稅價格之核估依自由貿易港區貨物通關管理辦法及財政部相關規定辦理。</p> <p>(3)有關「原形態貨物出區關稅課徵合理化」之函釋內容如下：</p> <p>a.自由港區事業自課稅區運入之進口已稅或國產非保稅貨物，因該貨物屬已課稅之貨物，如因故以原型態再運</p>

日期	會議名稱	重要決議摘要
		<p>回課稅區，課徵進口相關稅費，將造成重複課稅，故若於運入之翌日起3年內，輸往課稅區，應予免稅。</p> <p>b.該貨物輸往自由港區，已申請減徵、免徵或退稅貨物，再運返課稅區時，應按輸往課稅區時之價格及稅率，課徵關稅、貨物稅、菸酒稅及菸品健康福利捐。</p> <p>3.自由港區為「境內關外」之區域，爰此，課稅區輸往自由港區事業供營運之貨物、機器設備，視同出口貨物，得依相關法令規定，申請減徵、免徵或退還關稅、貨物稅、菸酒稅及菸品健康福利捐。</p> <p>4.同意修正「行政院自由貿易港區協調委員會辦理專案審核委託加工申請作業須知」第4點第3項之文字，明文規定委託加工之審查層級為工作小組，經審查確定後以行政院自由貿易港區協調委員會名義函復。</p>

台灣經濟統計
TAIWAN ECONOMIC STATISTICS

說明

Explanatory Notes

1. 本月刊各項統計係行政院經濟建設委員會綜合計劃處根據各政府機關統計報告彙編，國外資料則採自聯合國及其相關機構之統計資料。
2. 各項統計係依照時間先後排列。
3. 統計表中有關工業之分類，在可能範圍內，採用國際標準分類法。
4. 各表數字如有訂正時，除重大變動於該表附註說明外，另於修正數字前加*符號以資識別。
5. 各表所用之符號及單位簡寫，以及統計表所用各種度量衡（採用公制）換算表，分別見本期最後兩頁。
1. The statistics appearing in this monthly publication are compiled from statistical reports of government agencies by the Overall Planning Department of the Council for Economic Planning and Development, Republic of China. Data of foreign countries are taken from publications of the United Nations and its related agencies.
2. The statistics are presented in the form of time series.
3. Whenever possible, industries are classified according to the international standard classification.
4. All revised figures are marked with an asterisk(*). For significant revisions, an explanatory footnote is provided.
5. A list of symbols and abbreviations, and a table of equivalent units (the metric system of measurement is used) are presented on the last two pages.

目 錄
