貳、文獻回顧

伍、結論

參、實證模型之設定

Abstract

This paper investigates the asymmetric effects of exchange rate volatility on the export volumes of two of Taiwan's export categories, the mechanical & electronic and textile industries, using monthly data over the period from January 1990 to December 2001. Methodologically, we use Engle's (1982) autoregressive conditional heteroskedastic (ARCH) process to measure the exchange rate volatility. In conformity with Granger and Teräsvirta (1993), we adopt the smooth transition autoregressive (STAR) model to examine whether there are asymmetric effects on export volumes in response to exchange rate fluctuations during both turbulent and smooth periods, and further compare whether the impact of exchange rate volatility on export volume is asymmetric in appreciation and depreciation periods. We also compare the difference of asymmetry between the mechanical & electronic and textile industries.

The results can be described in three perspectives: First, the mechanical & electronic industry is better able than the textile industry to solve the problem of exchange rate volatility temporarily through the pricing-to-market mechanism. Second, the mechanical & electronic industry has stronger export competitiveness than the textile industry. Finally, the export volume is not immediately affected by exchange rate volatility due to consumers' slow response and firms' ex-ante contractual commitment. The investigation not only contributes to the literature on asymmetries, but also provides some implications for the exchange rate channel of monetary transmission.

* 作者分別為國立暨南國際大學經濟系助理教授、副教授及研究生。

壹、前 言

自1973年3月布列頓森林協定(The Bretton Woods International Monetary System)全面瓦解後，世界各主要工業國家，如美國、英國、德國、日本等，紛紛放棄以美元為中心的固定匯率制度，改採浮動匯率制度。在浮動匯率制度下，各國匯率是根據外匯市場的外匯供需狀況，自行浮動和調整的結果，不再受限於匯率上下波動幅度之規定，央行也毋須擔負維持波動上下限的義務。

台灣為順應世界潮流及本身經濟發展的需要，中央銀行乃於1978年7月先放棄釘住匯率，宣布新台幣兌美元開始採行機動匯率制度。整體而言，自1981年以後，台灣便持續地維持貿易盈餘，其中主要來自於對美貿易；然而，自1985年起新台幣的大幅升值，似乎也沒有改善台灣對美國貿易嚴重順差之狀況，致使美國與台灣舉行多次貿易談判，要求台灣降低貿易障礙及避免匯率操縱。此外，台灣自1980年代中期起，推動貿易自由化政策，又為加入世界貿易組織(World Trade Organization，簡稱WTO)，持續大幅降低關稅；同時也讓新台幣兌美元逐漸大幅升值，並於1989年4月之後，解除新台幣兌美元之匯率限制，亦即讓新台幣兌美元之匯率變動，不再受限於 $\pm 2.25\%$ 幅度的管制。

台灣為一小型開放經濟，由於本身天然資源相當匱乏，加上國內市場狹小，為促進經濟成長及發揮規模經濟效益，出口導向的經濟型態便成為台灣經濟發展的主流，經濟成長對貿易的依存度極高。在台灣出口產品結構中，早期皆以輕工業技術密集度不高之產品為主，如紡織品、運動器材等；近年來，由於產業升級，則逐漸轉型以電子、資訊週邊製造品等技術密集性較高的產品為主。由於此類產品在國際市場上競爭激烈，任何可能影響其價格的因素，皆受到廠商的高度重視，而匯率波動會直接影響到廠商進出口報價，攸關廠商的利潤，故

匯率波動的幅度自然備受廠商的關切。然而，一國貨幣在升值與貶值期間，廠商對出口價格造成匯率轉嫁的情形，可能具有不對稱的現象，例如：當本國貨幣貶值時，為擴大市場占有率，廠商通常會採取出口報價維持不變的策略，此時以外幣表示之出口價格下降，進而刺激出口量；反之，當本國貨幣升值時，為維持既有的市場，廠商可能會調降出口報價，致使以外幣表示之出口價格保持穩定。因此，在升貶值不同狀態期間，廠商對出口品價格匯率轉嫁程度之差異，可能肇因於匯率波動對貿易量有不對稱性的影響。

綜合觀之，一般文獻僅探討匯率波動對貿易量的影響，本研究企圖對匯率波動的情形做進一步的細分，以台灣作為研究對象，探討1990年1月至2001年12月期間匯率波動，其升、貶值兩種不同狀態期間，對出口貿易量的影響幅度相等與否？亦即是否出現不對稱效果。此外，傳統文獻大多探討匯率波動對總出口量的影響，卻忽略匯率風險暴露程度各產業並不相同的問題，故本文亦嘗試在研究期間內，以台灣兩個代表性出口產業—機電類、紡織類—為實證對象¹，希望能透過實證上的分析，進一步觀察產業間不對稱性之差異。

研究方法上，先以Engle(1982)提出的自我迴歸條件變異模型(Auto-Regressive Conditional Heteroskedastic Model，簡稱ARCH模型)，估計新台幣實質有效匯率指數的波動幅度；進而藉由Granger and Teräsvirta(1993)所提出的非線性平滑轉換自我迴歸模型(Smooth Transition Auto-Regressive Model，簡稱STAR模型)，探討匯率走勢震盪及走勢平穩時對出口貿易量是否會造成不對稱的效果，並進一步比較匯率波動於升值和貶值這兩種不同狀態期間，對於不同產業之出口貿易量，是否亦存在不對稱性的影響。

¹ 此二產業分別為新興產業與傳統產業之代表，亦可歸類為資本密集產業(capital intensive industry)與勞力密集產業(labor intensive industry)之代表。

本研究實證結果發現：前述不對稱性的影響確實存在，並可推斷出三個結論：首先，機電類產業相對於紡織類產業，較能透過市場定價(pricing-to-market)來解決暫時性匯率波動的問題；其次，消費者反應延遲及廠商間事先簽訂的契約，會造成消費數量不能迅速反應匯率波動造成的結果；最後，機電類產業相對於紡織類產業，為出口競爭力較強的產業。本研究的結果，不僅使相關議題的不對稱性文獻更加豐富，亦可廣泛應用於貨幣傳遞機制的分析上，例如：貨幣政策如何經由匯率管道(exchange rate channel)影響整體經濟活動。

本研究之其他篇幅說明如下。第二節為文獻回顧，介紹與探討相關文獻，涵蓋：匯率波動對出口貿易量影響、匯率轉嫁及本文採用的非線性模型。第三節為實證模型之設定與估計方法，先介紹相關基本理論模型與非線性模型的設定，並說明平滑轉換自我迴歸模型的估計步驟，以建立本研究之實證模型。第四節為實證結果與分析，先說明本文資料之選取與處理，之後詳述實證結果並加以分析。最後為結論，以及期望未來的研究發展方向。

貳、文獻回顧

本節回顧之相關文獻可概分為三類，第一，匯率波動影響出口貿易量之相關文獻；其次，匯率轉嫁之相關文獻；第三，本文採用的非線性方法之相關文獻。

一、匯率波動影響出口貿易之相關文獻

自1973年布列頓森林協定全面瓦解，各國紛紛實施浮動匯率制度後，由於匯率波動的幅度擴大，其對貿易量的影響，受到許多學者的重視，亦引發各種爭論；但無論在理論或實證上的分析，均無法得到一致的定論。

(一)理論分析

在理論分析方面，Hooper and Kohlhagen(1978)以出口供給和進口需求建構完整的理論模型，其中假定對於報酬的支付，必須以未來兩國的即期匯率換算，因此，出口廠商必須承受未來不確定匯率的風險，其理論結果顯示，對於風險趨避的廠商而言，匯率波動對出口貿易量為負向影響。Sercu(1992)則認為匯率變動的程度增加，將會提高交易上的不確定性，故對於市場上風險趨避的廠商而言，在缺乏適當的避險管道下，將會使廠商減少從事貿易的意願，造成出口貿易量減少。

但有些學者則質疑這種匯率波動對貿易產生負面影響的看法，例如De Grauwe(1988)指出，當匯率波動產生的所得效果大於替代效果時，貿易與波動間的關係可能出現正相關，認為匯率波動對出口的影響由廠商風險趨避的程度決定；換言之，出口廠商愈是風險趨避，則匯率風險增加時，愈會擔心未來收入的減少，因而增加出口數量，以使收益下降的可能性減到最低。

又如Franke(1992)視國際貿易為一選擇權，並假定在國際貿易市場的廠商為風險中立者，進而推導一理論模型。作者認為廠商在出口產生損失的情況下，準備離開國際貿易市場時，會衡量本身的退出成本；同理，在出口產生收益的情況下，準備進入國際貿易市場時，亦會衡量本身的進入成本。因此，在面對匯率風險升高的情況，大多數廠商會因為選擇權價值的提高，而選擇快速的進入市場但緩慢的退出市場。如此一來，市場中的廠商平均家數將會提高，進而使國際貿易量增加。

(二)實證分析

實證分析方面，Cushman(1983)、Pozo(1992)、Chou(2000)等研究結果顯示，匯率波動擴大，將會減少從事貿易的意願，造成出口貿易

量的減少。但匯率波動對出口貿易量有不利影響的看法，亦受到Klein(1990)、McKenzie and Brooks(1997)等實證研究的質疑，認為匯率波動對出口貿易有正向影響。相對於以上兩種不同的見解，Hooper and Kohlhagen(1978)、Sukar and Hassan(2001)等研究則顯示：匯率波動對出口貿易量的影響不顯著。

貿易是開放經濟體系的重要經濟活動，而匯率則是影響貿易活動的重要因素。傳統上，匯率變動對貿易餘額的長短期效果，大都以馬婁條件(Marshall-Lerner condition)來解釋：當一國貨幣貶值時，短期下可能出現J曲線效果使貿易餘額惡化；但長期而言，以各國貨幣表示的價格及所得不變的情況下，將使該國貿易餘額改善。但自1985年起至1990年代初，美元雖在國際貨幣市場大幅貶值，卻仍持續出現貿易赤字，顯示匯率貶值未必會改善國際貿易餘額，此現象並不符合理論的預期²，主要係因馬婁條件隱含：匯率變動會完全反應在貿易財價格的假設。因此，學者轉而研究匯率轉嫁(exchange rate pass-through)的情形³。

二、匯率轉嫁之相關文獻

早期，探討匯率轉嫁的文獻，係將市場型態建立在完全競爭市場的結構下，探討匯率變動對以外幣表示的商品出口價格之影響程度。中期的研究，為符合實際市場的運作情況，學者開始以不完全競爭市場的角度，探討匯率轉嫁的現象。其中，Dornbusch(1987)主張，在購

² 傳統國際金融理論預期，在滿足馬婁條件下，匯率貶值會使貿易順差擴大或貿易逆差縮小，此即所謂的「調整迷思」(adjustment puzzle)問題。

³ 匯率轉嫁係指當匯率波動時，以目的地國貨幣表示之貿易財價格的反應程度。若貿易財價格可以完全反應匯率的波動，則稱為完全轉嫁(full pass-through)；若僅部分反應匯率的波動，則稱為不完全轉嫁(not full pass-through)。若為完全轉嫁時，傳統的馬婁條件則適用於解釋匯率波動對貿易餘額的長短期效果；若為不完全轉嫁時，則馬婁條件必須加以修正，例如當本國貨幣貶值時，若以外國貨幣表示的出口品價格無法等比率下降，則短期J曲線效果將增加，且貿易餘額惡化的時間會延長。

買力平價(Purchasing Power Parity，簡稱PPP)成立、市場需求為線性函數的假設下，運用部分均衡分析法，導出產品替代性、國內外廠商數量與市場結構三項因素。這三項因素攸關進口價格中匯率轉嫁的程度，自此開啟了匯率轉嫁程度與產業結構因素相關性之研究。

實證研究方法上，大多以成本加成定價法(mark-up pricing)探討廠商策略性定價行為，並據以建立實證估計式。Kim(1990)與Menon(1995, 1996)等認為：若成本加成數愈大，則廠商利潤空間會愈大，此時愈能自行調整邊際利潤來吸收因匯率波動所造成的衝擊，使得匯率轉嫁效果愈小；反之亦然。

近期，一些國外內學者乃擴展成本加成模型⁴，在其他條件不變下，透過生產成本與廠商市場競爭力這兩大概念，觀察廠商如何依照個別市場特性，採取不同的定價策略，調整以外幣表示的商品出口價格，不致因為匯率波動而蒙受損失，此稱之為市場定價(pricing-to-market)。

三、非線性模型之相關文獻

本研究利用非線性模型找出匯率波動，相關文獻說明如下。

(一) 非線性匯率調整過程之形成

經濟理論曾針對匯率的非線性及循環提出許多看法；其中，外匯市場的異質性，被視為非線性匯率調整過程的一個主要原因。例如：Peters(1994)及Guillaume et al.(1995)強調，在投資範圍及地理位置不同，以及風險投資組合多樣化與機構限制的情況下，投資人可能異質性，而這樣的異質性使其面對同類型的訊息做出不一樣的回應，此亦形成非線性匯率調整過程。

⁴ 國外學者如Hooper and Mann(1989)、Marston(1990)、Athukorala and Menon(1994)、Kikuchi and Sumner(2002)；國內研究者如吳中書及許良華(1996)、林美玲與林武郎(2000)、張銘仁(1999)、陳本盛(2001)等。

(二)非線性均衡之調整過程

Dumas(1992)、Uppal(1993)、Sercu et al.(1995)等學者則考慮國家交易及運輸成本因素的國際資本市場均衡模型，證實此模型產生內生的非線性實質匯率調整過程⁵。Michael et al.(1997)、Baum et al.(2001)等考慮到現實社會不僅存在單一商品，且透過整個經濟體個別決策行為的加總，應會使得匯率在不同區間的轉換具有平滑連續的趨勢；因此，以共整合關係取得的誤差項(error-correction term)，並利用STAR模型研究匯率偏離購買力平價時的調整過程。實證結果發現，在無套利區間時，誤差項不會出現調整行為；然而，在無套利區間之外時，誤差項會出現平均回復(mean reversion)的現象，亦即傾向均衡的調整速度與偏離購買力平價的範圍有關，因此不會以固定的速度調向其均值，證實了調整過程為非線性現象。加上實質匯率走勢受到決策者在不同時點、不同地域下，產生個別不同的決策，進而透過整個經濟體系加總過程的影響；因此，狀態間的改變應是平滑且連續的過程，而非具間斷性。有鑑於此，本文將利用STAR模型，描述實質匯率在不同狀態及狀態間的轉換，所具有平滑連續之非線性特性，對出口貿易量的影響。

參、實證模型之設定

一、理論模型

本研究之理論模型參照Krugman(1989)的做法⁶，假設出口供給彈性無窮大，完全由需求面來做分析，故本國的出口函數可表達如下：

⁵ 在分析實質匯率的動態過程中，若國際間貿易之交易成本大於不同國家間價格差異時，將不會有套利行為發生；只有當價格差異所形成的利潤大於交易成本時，才會發生套利行為。這個證實模型產生內生的非線性實質匯率過程，且實質匯率具有平均回復的性質；因此，當偏離購買力平價時，其調整過程呈現非線性現象。

⁶ Warner and Kreinin(1983), Sukar and Hassan(2001)等亦參照相同的作法。

$$Q = \tilde{Q}(Y^*, \frac{EP^*}{P}) \quad \tilde{Q}_{Y^*} > 0, \quad \tilde{Q}_{\frac{EP^*}{P}} > 0 \quad (1)$$

在設定中，被解釋變數為本國出口數量指數(Q)，解釋變數包括：外國所得(Y^*)及國內外相對價格($\frac{EP^*}{P}$)。若將匯率波動納入考量，模型將可重新表示為：

$$Q = \tilde{Q}(Y^*, \frac{EP^*}{P}, V) \quad (2)$$

其中 V 為匯率波動。

有關匯率波動的估計，由於匯率變動並非獨立發生，會受前幾期變動的影響，即當前期產生大幅度的變動時，將伴隨著下期也呈現大幅度的變動；而當前期產生小幅度的變動時，伴隨著下期也呈現小幅度的變動。但匯率會上升或下降無法正確預測，直至Engle在1982年提出的自我迴歸變異的概念(ARCH模型)，找出此種非獨立波動群聚(volatility clustering)的現象，故本研究將以ARCH模型估計匯率波動因子。其實際估計方法將於下節詳細說明。

二、平滑轉換自我迴歸模型之介紹

現實社會中常因突如其來的事件發生，導致財經變數呈現突發性大幅度的變動，例如：亞洲金融風暴期間，新台幣兌美元呈現巨幅貶值的情形，美國911恐怖攻擊事件導致台灣股市慘跌等。一般傳統的時間數列模型無法對此行為加以掌控，主要係因線性模型(如ARIMA等模型)的限制，其參數無法明確找出突發改變，以及彈性調整的過程。因此，經濟學家發展出一系列的非線性模型，希望能解決上述線性模型所面臨的問題。

本研究旨在探討匯率波動對出口貿易量之不對稱影響，所以需選定非線性模型找出經濟變數在不同區間的不同動態過程。在諸多非線

性模型中，本文引用Granger and Teräsvirta(1993)提出的平滑轉換自我迴歸模型⁷，此模型最初係由Teräsvirta and Anderson(1992)提出，用以描述景氣循環在擴張和緊縮兩種不同狀態下，可能呈現不同的動態走勢；其後，Granger and Teräsvirta(1993)與Teräsvirta(1994)說明STAR模型的統計特性及估計方法，自此STAR模型大致成形，利用非線性模型來探討的相關主題很多，如總體經濟指標、股價、期貨基差及匯率方面⁸。

(一)模型表示方式

根據Granger and Teräsvirta(1993)、Teräsvirta(1994)的假設，在模型參數變動對時間而言是連續的情況下，允許平滑調整而非間斷調整的非線性模型可表示如下：

$$\begin{aligned} q_t^i &= \alpha_0 + \sum_{j=1}^{4p} \alpha_j w_t + (\alpha_0^* + \sum_{j=1}^{4p} \alpha_j^* w_t) F(z_{t-d}) + u_t \\ &= \alpha_0 + \alpha_0^* F(z_{t-d}) + \sum_{j=1}^{4p} [\alpha_j + \alpha_j^* F(z_{t-d})] w_t + u_t \end{aligned} \quad (3)$$

其中 $w_t = (q_{t-1}^i, \dots, q_{t-p}^i, v_{t-1}, \dots, v_{t-p}, rp_{t-1}, \dots, rp_{t-p}, iip_{t-1}, \dots, iip_{t-p})'$ 為本文中之4個主要變數之落差項⁹， i 代表不同的產業類別， $u_t \sim iid(0, \sigma^2)$ 之白

⁷ 在經濟體系中，決策者因身處不同地域、背景及交易時點不同，會出現不同風險趨避程度，因此，實質有效匯率的調整走勢應為連續的過程；相對上，Hamilton(1989)提出的馬可夫轉換模型(Markov-switching model)及Tong(1990)提出的門檻模型(Threshold model)，係描述匯率走勢在不同區間為快速跳動。惟若考慮市場上並非單一商品，且透過不同決策者非同步的調整其行為時，平滑型函數顯然比間斷型函數更加適合。

⁸ Granger et al.(1993)用來分析國民生產毛額與領先指標間的非線性關係，Öcal and Osborn (1997)則用來研究英國的消費與工業生產的非線性關係，Leybourne and Mizen(1997)則將STAR模型應用在消費者物價。而在股價、期貨基差方面，相關研究有Monoyios and Sarno (2002)、王右邦(2001)、杜嘉仁(2002)、張瓊嬌(2003)等。至於匯率方面，相關研究則有Michael et al.(1997)、Nicholas(1999)、Baum et al.(2001)、鍾明宏(2001)、廖元宏(2002)、楊奕農(2002)等。

⁹ 研究資料詳見第肆章變數及資料來源說明。

噪音(white noise)， z_{t-d} 為轉換變數(transition variable)， $F(z_{t-d})$ 為轉換函數(transition function)， d 表延遲參數(delay parameter)。

模型中的轉換函數 $F(z_{t-d})$ 可分為兩種型態，一為邏輯式(logistic)函數，稱為邏輯式平滑轉換自我迴歸模型(Logistic STAR Model，簡稱LSTAR模型)；另一為指數型(exponential)函數，稱為指數型平滑轉換自我迴歸模型(Exponential STAR Model，簡稱ESTAR模型)¹⁰。

(二)轉換速度參數與位置參數說明

當模型的轉換函數為邏輯式函數時，其函數型態為：
 $F(z_{t-d}) = (1 + \exp\{-\gamma(z_{t-d} - k)\})^{-1}$ ，其中 $\gamma > 0$ 表示模型參數改變的速度，稱為轉換速度參數，決定在不同區間轉換的調整速度，而門檻值 k 係所謂的位置參數，即代表參數改變速度最快的點。轉換函數 $F(z_{t-d})$ 介於0與1之間，為單調遞增函數(monotonically increasing function)。當轉換變數趨近於正無窮大時($z_{t-d} \rightarrow +\infty$)，轉換函數 $F(z_{t-d}) = 1$ ；當轉換變數趨近於負無窮大時($z_{t-d} \rightarrow -\infty$)，轉換函數 $F(z_{t-d}) = 0$ ；當轉換變數 $z_{t-d} = k$ 時，轉換函數 $F(z_{t-d}) = 1/2$ 。

當模型的轉換函數為指數型函數時，其函數型態為
 $F(z_{t-d}) = 1 - \exp\{-\gamma(z_{t-d} - k)^2\}$ ，當轉換變數趨近於正、負無窮大($z_{t-d} \rightarrow \pm\infty$)時，轉換函數 $F(z_{t-d}) = 1$ ；而當轉換變數 $z_{t-d} = k$ 時，轉換函數 $F(z_{t-d}) = 0$ 。

(三)模型調整速度說明

這兩個模型在分析具非線性特質的時間序列資料時， γ 愈大，表示對衝擊事件做出調整的速度愈快；反之， γ 愈小，對衝擊事件做出調整的速度愈慢，亦即不易馬上做出反應，因此，會以較長的變動時間來反應衝擊效果。

¹⁰ 關於如何選取模型中之轉換函數，詳見下節。

另一方面，門檻值 k 愈高，表示對衝擊事件的容忍度較大，較不易做出不同結構之動態調整；門檻值 k 愈低，則表示對衝擊事件的容忍度較小，較容易做出不同結構之轉換調整。此外，這兩個模型最大的不同點在於ESTAR模型以 k 作對稱點，在兩個外區間為對稱的動態過程，中間區間係不同於外區間的動態過程，因此對於波動的峰谷型態近似，但峰谷間轉換過程變化較大的序列有較佳的解釋；而LSTAR模型則表示變數在區間走勢的調整具不對稱性，上區間與下區間具有不同的動態結構，因此對自一個狀態轉換至另一狀態時，呈現規律平滑轉換過程的序列之解釋能力較佳¹¹。

三、平滑轉換自我迴歸模型之建立與估計

本研究遵循 Granger and Teräsvirta(1993) 及 Teräsvirta(1994) 對 STAR模型所提出的估計三步驟，據以檢定模型的適切性。首先，根據先前提出的基本理論模型建立一線性模式，並利用 Akaike information criterion(AIC) 值為判斷標準，選擇最適落後期數 p ，此一線性模型可表示如下：

$$q_t^i = \alpha_0 + \sum_{j=1}^{4p} \alpha_j w_t + u_t \quad (4)$$

其中 $w_t = (q_{t-1}^i, \dots, q_{t-p}^i, v_{t-1}, \dots, v_{t-p}, r_{t-1}, \dots, r_{t-p}, iip_{t-1}, \dots, iip_{t-p})'$ ， i 為產業類別， p 為最適落後期數。

其次，在線性模型設立之後，繼而檢定該模型是否適用於線性模式的估計。本文採用 Granger and Teräsvirta(1993) 提出的三階泰勒展開

¹¹ Teräsvirta(1994, p.120)指出，在LSTAR模型中，若觀察值大多落在 k 的附近，且轉換函數增加的速度緩慢，此時LSTAR模型趨近於ESTAR模型。而在ESTAR模型中，若大多數觀察值大於 k ，係落在轉換函數的右尾，轉換函數為趨近於一單調遞增函數，則ESTAR模型趨近於LSTAR模型。

式之檢定方法(Third-Order Taylor Expansion Linearity Test)，先將式(4)擴展為式(5)：

$$q_t^i = \beta_0 + \sum_{j=1}^{4p} \beta_{0j} w_t + \sum_{j=1}^{4p} \beta_{1j} z_{t-d} w_t + \sum_{j=1}^{4p} \beta_{2j} z_{t-d}^2 w_t + \sum_{j=1}^{4p} \beta_{3j} z_{t-d}^3 w_t + u_t \quad (5)$$

其中轉換變數 z_{t-d} 可從任一與解釋變數相關之變數中選取¹²；並進而檢定虛無假設式(6)：

$$H_0 : \beta_{1j} = \beta_{2j} = \beta_{3j} = 0 \quad (j = 1, 2, \dots, 4p) \quad (6)$$

此檢定方法不僅可檢定線性模式的適切性，尚可在拒絕線性模式存在後，一併決定最適轉換變數 z_{t-d} 。即對不同變數、不同延遲期數 d 值重複做線性檢定，利用 F 分配作為檢定統計量，在拒絕虛無假設下，以 F 統計量之最小 $p-value$ 做為選擇最適轉換變數 z_{t-d} 之依據。

最後，在確定為非線性模型及決定最適轉換變數 z_{t-d} 後，接著根據式(5)，依序檢定虛無假設(6a)~(6c)，藉以進一步判別非線性模型為LSTAR或是ESTAR模型：

$$H_{0a} : \beta_{3j} = 0 \quad (j = 1, 2, \dots, 4p) \quad (6a)$$

$$H_{0b} : \beta_{2j} = 0 \mid \beta_{3j} = 0 \quad (j = 1, 2, \dots, 4p) \quad (6b)$$

$$H_{0c} : \beta_{1j} = 0 \mid \beta_{2j} = \beta_{3j} = 0 \quad (j = 1, 2, \dots, 4p) \quad (6c)$$

根據Granger and Teräsvirta(1993)模式的選擇準則如下：當檢定結果拒絕(6a)，則選擇LSTAR模型；若無法拒絕(6a)但拒絕(6b)，則選擇ESTAR模型；若無法拒絕(6a)與(6b)但拒絕(6c)，則選擇LSTAR模型。

¹² 亦即轉換函數 z_{t-d} 可為 q_{t-1}^i or... q_{t-4}^i or v_{t-1} or... v_{t-4} or rp_{t-1} or... rp_{t-4} or iip_{t-1} or... iip_{t-4} 之一變數。

肆、實證結果與分析

一、變數及資料來源說明

(一)變數說明

本研究使用的變數有：出口數量指數(Q^i)、實質有效匯率(RE)、相對價格(RP)及工業生產指數(IIP)，依序說明如下。

出口數量指數(Q^i)是根據《我國商品標準分類》，在出口商品21大類中，挑選於研究期間內占台灣出口貨品平均比重前兩大產業，做進一步的分析¹³。實質有效匯率指數(RE)旨在衡量新台幣變動後，對出口價格競爭力之實質影響，但必須同時考慮匯率變動後所引發的物價變動效果，兩者合計後的淨效果，才是真正影響出口價格競爭力的變動。相對價格(RP)= $\sum_{i=1}^9 [\ln(\frac{CPI_i}{CPI_{NT}})*a_i]$ ¹⁴，為考量多邊貿易，考慮台灣主要貿易國家的消費者物價指數，涵蓋：美國、日本、英國、德國、法國、新加坡、韓國、荷蘭、香港等9國，並依出口比率予以加權。工業生產指數(IIP)則仿照相對價格的計算方式，求得一加權工業生產指數，據以衡量各進口國之國內所得。

(二)資料來源說明

前述變數之資料來源主要有三：台灣之相關資料，除實質有效匯率指數取自台灣新報外，主要取自「AREMOS」經濟統計資料庫。其他國家之相關資料，則取自國際貨幣基金會(IMF)國際金融統計(IFS)資料庫。鑑於文獻上常有以下缺點：1. 使用低頻率的年資料或季資料，易流失掉相關變數的部分訊息，並使迴歸式的自由度受限；2. 資

¹³ 第一順位為第16類，包括：機器及機械用具、電機設備及其零件、錄音機及聲音重放機、電視影像、聲音記錄機及重放機，上述各物之零件及附件(之後簡稱為機電類產業，以 q_t^1 作為代表符號)。第二順位為第11類，包括：紡織品及紡織製品(之後簡稱為紡織類產業，以 q_t^2 作為代表符號)。

¹⁴ CPI_i 與 CPI_{NT} 分別代表各進口國消費者物價指數及台灣的消費者物價指數。

料選取期間，浮動匯率的觀察期間太短，無法真實反應匯率波動對貿易量的影響；3. 觀察期間包括不同的匯率制度，可能會造成樣本的非齊質性。因此，本研究選擇期間為1990年1月至2001年12月，共144筆月資料¹⁵。

二、實證步驟與分析

(一) 單根檢定

使用傳統迴歸方式之先決條件為：所探討的變數必須具備恆定性，俾避免發生假性迴歸(spurious regression)¹⁶，以及過度差分而扭曲變數間的關係等問題。故在進行實證分析之前，本文採用Augmented Dickey-Fuller(ADF)單根檢定法，檢驗資料是否具定態的屬性，檢定結果(見表1)顯示，取對數後之所有序列皆具有單根，所以皆取其差分以供估計。為簡化符號之表達，此後將以小寫字母表示為該變數之大寫字母的一階差分對數序列。

表 1 ADF 單根檢定

	水準值 (level)	一階差分 (first difference)	5%之臨界值	AIC 準則
$\log Q^1$	-2.739	-8.817	-3.442	4
$\log Q^2$	-2.944	-8.645	-3.443	8
$\log RP$	-2.214	-9.736	-3.442	2
$\log IIP$	-1.401	-3.854	-3.442	3
$\log RE$	-2.793	-6.008	-3.442	3

註：因出口數量指數、相對價格、工業生產指數及新台幣實質有效匯率指數均存在時間趨勢的現象，故設定檢定模型為 $\Delta Y_t = \alpha_0 + \alpha_1 t + \gamma Y_{t-1} + \sum_{j=1}^p \beta_j \Delta Y_{t-j} + \varepsilon_t$ 。檢定法則為 $H_0: \gamma = 0$ v.s. $H_1: \gamma < 0$ ，檢定結果若為無法拒絕虛無假設，表示具有單根的性質，須對變數取一階差分後再做一次檢定；若檢定結果為拒絕虛無假設，表示序列合於 I(1)。

¹⁵ 本研究利用較高頻率的月資料進行分析，資料選取期間並無制度不一致的問題。

¹⁶ Granger and Newbold(1974)發現，若變數為非定態序列，則即使變數間互相獨立，但迴歸分析的結果，仍可能出現很高的判定係數 R^2 和顯著的 t 值，此種情形稱為「假性迴歸」。

(二)衡量匯率波動

由於匯率波動為本研究之重要變數，故將其衡量獨立為一小節以便詳述之。透過1990年1月至2001年12月間實質有效匯率指數趨勢圖可發現，1995年之後大致呈現貶值的走勢，尤其1997年7月發生亞洲金融危機，更造成新台幣大幅度的貶值，其中更可明顯看出這段期間波動幅度較先前劇烈，且資料具波動群聚(volatility clustering)的特性。

一般而言，若峰態係數小於3為低闊峰，等於3為常態峰，大於3則為高狹峰。透過表2可發現實質有效匯率指數(re)具高狹峰(leptokurtic)的特性，顯示該變數可能存在異質性變異數的問題。若能進一步確認異質性變異數的存在，則可用以解釋匯率波動的現象。因此，本文採用Engle(1982)的LM test及Q test，對殘差項做異質性變異數的檢定(見表3)¹⁷；檢定結果發現：殘差平方項在較長時期仍有持續性的影響，表示有異質性的存在。根據判定結果，設立MA(2)-ARCH(1)模型估計匯率波動因子：

$$DLRE_t = -0.001 + \varepsilon_t + 0.050\varepsilon_{t-1} - 0.116\varepsilon_{t-2}$$

(0.09)* (0.059)* (0.078)*

$$h_t = 0.0001 + 0.332 \varepsilon_{t-1}^2$$

(0.000)** (0.026) **

其中 $DLRE$ 表實質有效匯率指數的一階差分對數序列； h_t 為一般化的條件變異數；又MA(2)-ARCH(1)模型的殘差檢定，整理於表4。上述模型估計的 h_t 為衡量匯率波動因子，惟為確保該變數具備恆定性，在

¹⁷ Engle(1982)以Lagrange Multiplier法則提供一套檢定ARCH的方法，過程如下：先建立適當的ARMA模型，據以估計該同質變異數的殘差項；再以所求得之殘差項平方對不同落後期的殘差項平方做迴歸得到 R^2 ，其中ARCH效果的檢定值，就是將 R^2 與觀察值的個數T相乘，即為 TR^2 ；當 TR^2 值愈大，愈能拒絕不具ARCH效果的虛無假設時，表示ARCH效果愈可能存在。

取其對數後，亦執行ADF檢定。由匯率波動序列圖(見圖1)發現，此變數並無存在時間趨勢及截距項，故於檢定時未考慮截距項及時間趨勢項，檢定結果如表5，該變數具有單根，故對該變數再取差分，使其具備恆定性。因此，本研究衡量匯率波動因子(v)，為 h_t 的一階差分對數序列。

理論上，匯率呈現劇烈波動的現象，可能肇因於匯率過度反應(over-shooting)的結果；又短期匯率的變動幅度，超過長期匯率的變動幅度，可能是產品市場和外匯市場對於經濟政策的反應速度不一致，造成短期匯率市場對政策過度反應的效果；必須在長期間，隨著產品市場的逐漸調整，才能促使匯率回歸穩定的水準¹⁸。

表 2 新台幣實質有效匯率指數基本統計量

	平均數	標準差	偏態係數	峰態係數	常態分配檢定
log RE	-0.001	0.015	-0.316	4.783	21.338 (0)

註：以 Jarque-Bera 值作為檢定常態分配的依據，括弧內為 $p - value$ 。

表 3 MA(2)模型的殘差項異質性變異數檢定

Ljung-Box Q test			ARCH LM test	
殘差項		殘差平方項	k	TR^2
$Q(6)$	2.787 (0.733)	$Q^2(6)$	11.426 ** (0.044)	1 4.047 ** (0.044)
$Q(12)$	10.790 (0.461)	$Q^2(12)$	18.185 * (0.077)	2 4.646 * (0.097)
$Q(17)$	15.535 (0.486)	$Q^2(17)$	23.848 * (0.093)	3 5.596 (0.132)
$Q(27)$	25.997 (0.463)	$Q^2(27)$	36.091 * (0.090)	4 5.745 (0.218)

註： $Q(p)$ 為殘差項落後 p 期的 Ljung-Box 自我相關檢定統計量； $Q^2(p)$ 為殘差平方項落後 p 期的 Ljung-Box 自我相關檢定統計量； $LM(k)$ 統計量為 TR^2 ，服從自由度為 k 的 χ^2 分配。**與*分別代表在 5% 及 10% 的顯著水準下，拒絕虛無假設。括弧內為 $p - value$ 。

¹⁸ 參照Dornbusch(1987)。

表 4 MA(2)-ARCH (1)模型的殘差檢定

殘差項		殘差平方項	
$Q(6)$	1.266 (0.867)	$Q^2(6)$	7.078 (0.132)
$Q(12)$	8.975 (0.534)	$Q^2(12)$	10.581 (0.391)
$Q(17)$	15.191 (0.438)	$Q^2(17)$	11.544 (0.713)
$Q(27)$	28.419 (0.289)	$Q^2(27)$	17.676 (0.856)

註： $Q(p)$ 為殘差項落後 p 期的 Ljung-Box 自我相關檢定統計量； $Q^2(p)$ 為殘差平方項落後 p 期的 Ljung-Box 自我相關檢定統計量。括弧內為 $p-value$ 。

圖 1 匯率波動序列($\log h$)分布圖

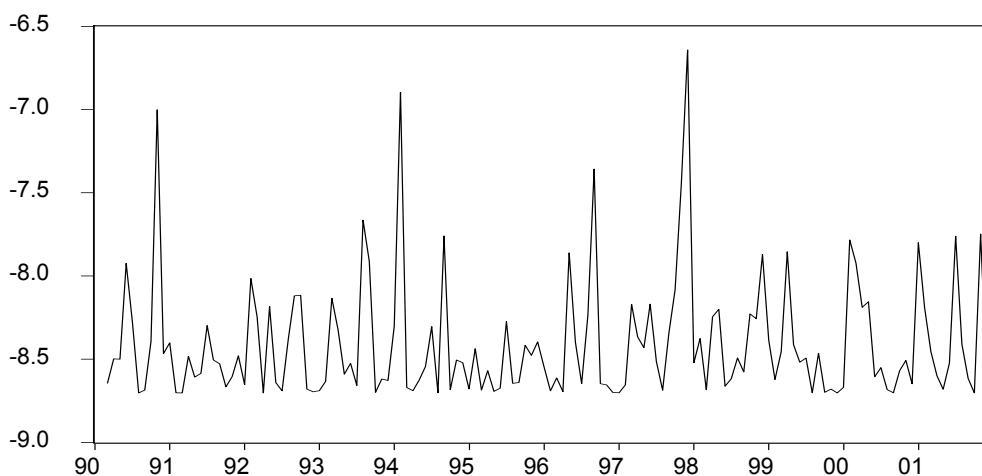

表 5 匯率波動因子($\log h$)之 ADF 單根檢定

	水準值 (level)	一階差分 (first difference)	5%之臨界值	AIC 準則
$\log h$	-0.011	-9.395	-1.942	4

註：檢定時不考慮截距項和時間趨勢項。

(三)選定最適落後期數

在進行線性檢定之前，先要建立適當的線性模型及選擇最適落後期數 p ，本研究依最小的AIC值選出最適落後期數，主要係考慮一般出口廠商合約簽訂多在3~6個月前。鑑於出口數量可能受到前期波動因子的影響，本文取較長的遞延期數做檢定，估計結果整理於表6。由表6可看出機電類產業與紡織類產業最適落後期數均為4期¹⁹。

表 6 不同落後期數下之 AIC 值

落後期數	機電類	紡織類
1	-1.407	-1.100
2	-1.471	-1.105
3	-1.501	-1.121
4	-1.540 *	-1.160 *
5	-1.534	-1.128
6	-1.514	-1.052

註：* 表示 AIC 值為最小。

(四)選擇線性檢定及轉換變數

最適落後期數決定之後，進行線性檢定。該檢定旨在找尋能拒絕線性假設之最適轉換變數，若可能的轉換變數 z_{t-d} 皆無法拒絕虛無假設，表示資料符合線性模型，無需採用非線性的STAR模型來配適，故進行模型線性檢定如表7所示。檢定結果發現：機電類產業與紡織

¹⁹ 本研究嘗試對各變數交叉配適，據以求其最適落後期數；此外，亦嘗試透過Log-likelihood Ratio檢定方法，從迴歸式中移除不顯著之解釋變數，估計結果並無太大差異。

類產業均挑選匯率波動前三期(v_{t-3})為最適轉換變數²⁰，顯著拒絕資料為線性之虛無假設。

表 7 模型之線性檢定

z_{t-d}	機電類		紡織類	
q_{t-1}	1.048	(0.422)	1.123	(0.323)
q_{t-2}	0.917	(0.620)	1.582 **	(0.038)
q_{t-3}	0.968	(0.541)	1.474 *	(0.066)
q_{t-4}	0.904	(0.640)	0.982	(0.518)
v_{t-1}	0.800	(0.793)	0.743	(0.862)
v_{t-2}	1.236	(0.204)	1.784 **	(0.012)
v_{t-3}	1.444 *	(0.077)	1.978 **	(0.004)
v_{t-4}	1.234	(0.206)	1.345	(0.125)
rp_{t-1}	1.054	(0.413)	1.836 **	(0.009)
rp_{t-2}	1.043	(0.429)	1.472 *	(0.067)
rp_{t-3}	1.609 **	(0.033)	2.035 **	(0.003)
rp_{t-4}	1.007	(0.481)	1.415 *	(0.089)
iip_{t-1}	0.606	(0.966)	0.943	(0.580)
iip_{t-2}	0.619	(0.960)	1.200	(0.237)
iip_{t-3}	0.700	(0.905)	0.742	(0.863)
iip_{t-4}	1.121	(0.324)	1.404 *	(0.094)

註：**與*分別表在5%及10%的顯著水準下，拒絕模型為線性之虛無假設。括弧內為 $p - value$ 。

(五)選取LSTAR或ESTAR模型

在STAR模型之下，依轉換函數的不同，可分為LSTAR和ESTAR兩種模型。故在確定資料符合非線性的STAR模型後，接下來要進行

²⁰ 機電類產業與紡織類產業中，雖然相對價格前三期(rp_{t-3})均較匯率波動前三期(v_{t-3})更為顯著的拒絕資料為線性之虛無假設，然而考量本文旨在探討匯率波動對出口貿易量之不對稱影響，故選取整個體系中次佳之轉換變數，但就匯率波動本身而言仍為最佳之轉換變數。

三個子檢定來決定體系為LSTAR或ESTAR模型。首先利用線性檢定確認最適轉換變數為 v_{t-3} ，透過檢定(6a)~(6c)式，根據拒絕三個虛無假設中 F 統計量之最小 $p-value$ 來選擇最適的模型，估計結果整理於表8。由表8可看出，在5%顯著水準下，機電類產業與紡織類產業均為ESTAR模型。

表8 非線性模型檢定

虛無假設	機電類	紡織類
$H_{0a} : \beta_{3j} = 0$	1.292 (0.225)	1.615 * (0.086)
$H_{0b} : \beta_{2j} = 0 \mid \beta_{3j} = 0$	1.747 * (0.042)	1.910 ** (0.044)
$H_{0c} : \beta_{1j} = 0 \mid \beta_{2j} = \beta_{3j} = 0$	1.020 (0.441)	1.726 * (0.052)

註：**與*分別表在5%及10%的顯著水準下，拒絕 H_{0a} 、 H_{0b} 、 H_{0c} 之虛無假設；括弧內為 $p-value$ 。

(六)建立及估計實證模型

最適落後期數 $p = 4$ 、轉換變數 $z_{t-d} = v_{t-3}$ ，以及轉換函數 $F(z_{t-d})$ 為指數型函數都已確定後，可估計最終設定之實證模型如下式：

$$q_t^i = \alpha_0 + \sum_{j=1}^{16} \alpha_j w_t + (\alpha_0^* + \sum_{j=1}^{16} \alpha_j^* w_t) * \{1 - \exp[-\gamma(v_{t-3} - k)^2]\} + u_t$$

本研究採用非線性最小平方法(Nonlinear Least Squares，簡稱NLS)來估計。根據Teräsvirta(1994)的建議，可先將轉換函數標準化，再採用格子搜尋(grid search)法找出初始值，以避免無法收斂或收斂緩慢的問題。此外，參數估計後要先檢驗是否合理，如門檻值 k 不能超出觀測樣本範圍之外， γ 不能為負值等。機電類產業與紡織類產業之ESTAR模型估計結果整理於表9。

表 9 ESTAR 模型估計結果(1)

變數	機電類 ($i = 1$)	紡織類 ($i = 2$)
c^i	-0.018 (0.351)	-0.009 (0.610)
q_{t-1}^i	-0.826 ** (0.000)	-0.573 ** (0.000)

v_{t-2}	0.041 (0.384)	0.059 (0.207)
v_{t-3}	-0.167 (0.308)	-0.011 (0.898)
v_{t-4}	0.075 * (0.052)	0.058 (0.101)
rp_{t-1}	0.712 (0.717)	1.954 (0.317)
rp_{t-2}	-3.414 * (0.093)	1.773 (0.393)
rp_{t-3}	5.734 ** (0.033)	9.181 ** (0.000)
rp_{t-4}	4.104 (0.101)	7.206 ** (0.001)
iip_{t-1}	3.973 (0.140)	0.359 (0.893)
iip_{t-2}	1.190 (0.642)	-0.991 (0.672)
iip_{t-3}	-4.729 (0.142)	-5.136 * (0.073)
iip_{t-4}	5.192 * (0.065)	5.346 * (0.079)
$c * F(v_{t-3})$	0.061 ** (0.033)	0.034 (0.590)
$q_{t-1}^i * F(v_{t-3})$	0.018 (0.932)	-0.294 (0.307)
$q_{t-2}^i * F(v_{t-3})$	-0.520 * (0.074)	-0.450 (0.270)
$q_{t-3}^i * F(v_{t-3})$	0.034 (0.907)	0.173 (0.681)
$q_{t-4}^i * F(v_{t-3})$	0.225 (0.355)	0.056 (0.864)
$v_{t-1} * F(v_{t-3})$	-0.054 (0.343)	-0.178 (0.139)
$v_{t-2} * F(v_{t-3})$	-0.078 (0.234)	-0.285 ** (0.033)
$v_{t-3} * F(v_{t-3})$	0.148 (0.402)	-0.114 (0.432)
$v_{t-4} * F(v_{t-3})$	-0.129 * (0.060)	-0.233 * (0.084)
$rp_{t-1} * F(v_{t-3})$	-3.689 (0.178)	-5.507 (0.286)
$rp_{t-2} * F(v_{t-3})$	1.587 (0.600)	-8.787 (0.112)
$rp_{t-3} * F(v_{t-3})$	-11.670 ** (0.000)	-20.585 ** (0.000)
$rp_{t-4} * F(v_{t-3})$	-8.075 ** (0.011)	-9.552 ** (0.015)
$iip_{t-1} * F(v_{t-3})$	-4.432 (0.291)	8.460 (0.292)
$iip_{t-2} * F(v_{t-3})$	6.683 (0.130)	14.019 * (0.057)
$iip_{t-3} * F(v_{t-3})$	6.552 (0.129)	1.846 (0.748)
$iip_{t-4} * F(v_{t-3})$	-6.151 (0.141)	-19.297 ** (0.026)
k	-0.041 (0.135)	-0.097 ** (0.032)
γ	18.521 ** (0.028)	3.230 ** (0.019)

表9 ESTAR 模型估計結果(1) (續)

變數	機電類 ($i = 1$)	紡織類 ($i = 2$)
R^2	0.644	0.552
LR	151.879	117.575

註:**與*分別表在 5% 及 10% 的顯著水準下，估計值顯著異於零。括弧內為 $p-value$ 。

表9顯示機電類產業 γ 為 18.521、 k 為 -0.041；紡織類產業 γ 為 3.230、 k 為 -0.097。由此可研判機電類產業相較紡織類產業對匯率波動更敏感；換言之，匯率波動對機電類產業出口貿易量的影響，較紡織類產業為快。根據表9之結果，可繪製其轉換函數之圖形(見圖2)。

(七) 實證結果分析

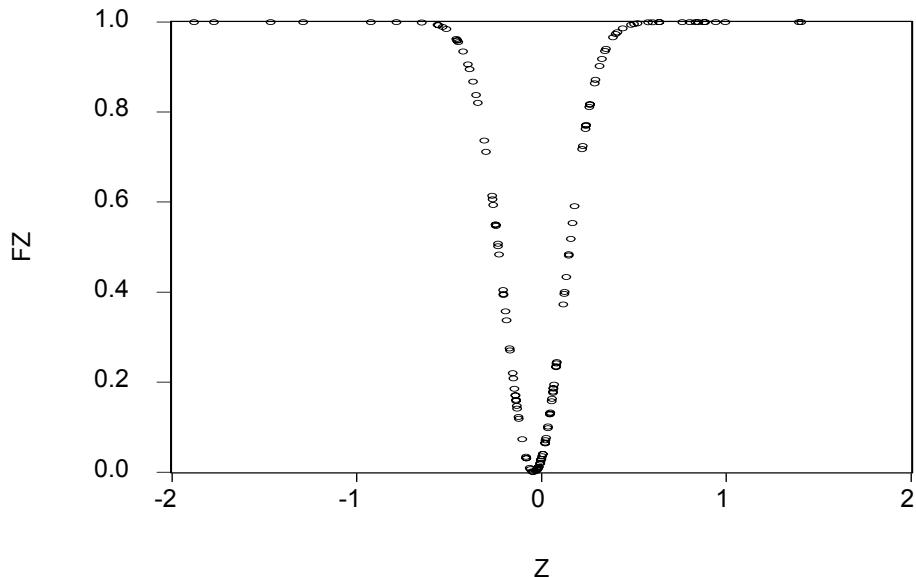

1. 轉換變數與轉換函數

由圖2中二產業之轉換函數圖形，可觀察到二者在匯率波動震盪期間與平穩期間之差異性，以及二者在匯率波動的升貶值轉換期間之差異性，分以下三點說明之。首先，當轉換函數 $F(v_{t-3})$ 為 0 時，機電類產業偏離轉換變數(v_{t-3})為 0 的幅度，小於紡織類產業；若以傳統虛擬變數的方法，探討匯率波動之不對稱性，會有偏差之虞。其次，機電類產業轉換函數的坡度較陡且其開口較小，表示機電類產業相較紡織類產業對匯率波動更敏感，故在狀態轉換過程中反應較快。最後，在轉換變數(v_{t-3})有效值域中配適出來的轉換函數 $F(v_{t-3})$ ，機電類產業較紡織類產業相對散布平均；然而，紡織類產業的 $F(v_{t-3})$ ，在匯率波動幅度的大小及升貶值轉換期間則皆有偏頗。

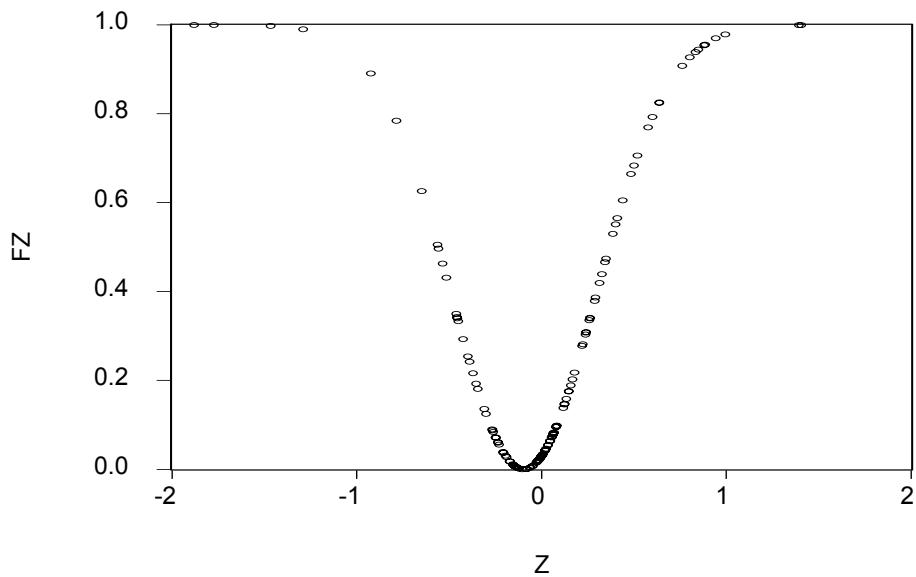

為排除消費者反應延遲及廠商事先簽訂契約，造成出口數量對匯率波動反應的落差，因此僅比較升值和貶值期間，甚或升值期間波動幅度大與貶值期間波動幅度大者，落後期間較長時對出口貿易量造成的影響。再者，當轉換函數為 0 時，透過係數可看出：匯率走勢平穩時，對出口貿易量造成的影響；同樣地，當轉換函數為 1 時，透過係

數可看出：匯率走勢震盪時，對出口貿易量造成的影响。因此，可將表9再做整理以便分析，其結果見表10。

圖 2 機電類產業轉換函數($F(v_{t-3})$)與紡織類產業轉換函數($F(v_{t-3})$)
(a)機電類產業轉換函數($F(v_{t-3})$)

(b)紡織類產業轉換函數($F(v_{t-3})$)

註：圖中 Z 表轉換變數， FZ 表轉換函數。

2. 匯率波動對各產業出口貿易量之長、短期效果

由表10中各期匯率波動的係數及係數之加總，可得知匯率波動對各產業之出口貿易量的長、短期效果。就短期而言，機電類產業在匯率走勢平穩時出口貿易量的增幅，相對高於匯率走勢震盪時出口貿易量的減幅(t-3期除外)；然而，紡織類產業情形則恰巧相反。

就長期而言，機電類產業於匯率走勢平穩時，出口貿易量的減幅，相對小於匯率走勢震盪時，出口貿易量的減幅($|-0.016| < |-0.129|$)；紡織類產業方面，匯率走勢平穩時出口貿易量的增幅，相對小於匯率走勢震盪時出口貿易量的減幅($0.121 < |-0.689|$)。由此可發現，無論機電類產業或紡織類產業，匯率走勢震盪及匯率走勢平穩時，對出口貿易量均會造成不對稱性的影響。

表 10 ESTAR 模型估計結果(2)

變數	機電類 ($i = 1$)		紡織類 ($i = 2$)	
	$F_z = 0$	$F_z = 1$	$F_z = 0$	$F_z = 1$
v_{t-1}	0.035	-0.019	0.015	-0.163
v_{t-2}	0.041	-0.037	0.059	-0.226
v_{t-3}	-0.167	-0.019	-0.011	-0.125
v_{t-4}	0.075	-0.054	0.058	-0.175
$\sum_{p=1}^4 v_{t-p}$	-0.016	-0.129	0.121	-0.689

註：1. 本文探討匯率波動對出口貿易量的影響，本表僅列出此一變數。

2. $F_z = 0$ 表匯率走勢平穩； $F_z = 1$ 表匯率走勢震盪。

此外，機電類產業於匯率走勢平穩時，就短期而言，出口貿易量的變動幅度，大致上高於紡織類產業(t-2期除外)；但就長期而言，出

口貿易量的變動幅度，大致上低於紡織類產業($|-0.016| < 0.121$)。然而，在匯率走勢震盪時，不論短期或長期，機電類產業出口貿易量的減幅，均小於紡織類產業(兩個產業長期效果之比較為 $|-0.129| < |-0.689|$)。再者，機電類產業在匯率走勢震盪期間，出口貿易量的減幅，與匯率走勢平穩期間出口貿易量的增幅比較，兩者差距為 $(|-0.129| - |-0.016| = |-0.113|)$ ；而紡織類產業的該項差距為 $(|-0.689| - 0.121 = |-0.810|)$ 。換言之，機電類產業不對稱性效果，小於紡織類產業。

三、匯率波動之不對稱影響分析

由上述實證結果顯示，匯率波動對出口貿易量確實存在不對稱影響，不僅匯率走勢震盪及匯率走勢平穩時，對出口貿易量存在不對稱性效果，匯率波動在升值和貶值這兩種不同狀態期間，對出口貿易量亦會有不對稱性效果；不同產業間也呈現不同的效果。至於匯率波動產生不對稱性效果的原因，文獻上不乏探討，茲彙整如下。

匯率係以本國貨幣單位表示的外國貨幣價格，它的變動將改變國內和國外財貨價格的相對關係，進而影響一國的貿易量。特別是當貿易財具有異質性(heterogeneous goods)時，其所面對的市場為非完全競爭，廠商對其產品價格具有某種程度的影響力，因而產生不完全轉嫁(not full pass-through)的情形。一般而言，若排除現實社會中關稅及限額的問題，單純考量本國出口廠商直接面臨匯率波動時，採取的市場定價反應，進而對出口貿易量造成影響的情形，大致可由本國出口廠商在國際市場的競爭力及廠商間的經營策略互動關係而定。又涉及廠商加入與退出市場速度不一致的滯延效果，亦是另一項重要的原因。

(一)市場定價反應

就出口廠商對其產品價格的控制方面來看，因為產品的價格需求

彈性與加成取價成數呈現反向變動²¹，所以當產品間的差異性愈小或競爭廠商數目愈多時，廠商面對的價格需求彈性愈大；亦即出口競爭力較弱的產業，當本國貨幣升值時，其加成取價成數增加的幅度，勢必較小，此時廠商可將匯率波動轉嫁到出口品外幣價格的增幅相應較小，反之亦然。因此，廠商出口數量受匯率波動的影響程度，隨價格需求彈性的不同而異。

(二)經營策略

廠商採取的經營策略方面，廠商若以市場占有率(market share)為目標，會考慮未來的利潤與現在的市場占有率，例如透過降低價格以增加其市場占有率，導致廠商控制其產品價格的空間受到緊縮。在這種情況下，當本國貨幣升值時，本國出口廠商為維持其在國外市場的占有率，將調降本身成本加成比率，使商品的外幣價格保持穩定，避免影響到銷售量；反之，當本國貨幣貶值時，則可能會犧牲匯兌產生的利潤，經由調降商品的外幣價格以刺激銷售量。

然而，Foster and Baldwin(1986)則認為，產品在國外市場銷售時，為在市場上占有一席之地，必須支付一固定比率的市場行銷技術，若廠商市場行銷能力(marketing capacity)的投資不足，僅透過價格下跌，不足以增加未來的銷售量，因此就剛進入出口市場的廠商而言，當本國貨幣貶值時，廠商傾向讓其商品的外幣價格維持穩定，將其匯兌產生的利潤投資於市場行銷上。

²¹ 一般價格公式為： $p = \frac{mc}{1 - (1/\varepsilon)}$ ，其中， p 為國內產品售價； mc 為邊際成本； ε 為產品

的價格需求彈性。若只考慮匯率因素，則出口商品的價格公式為： $p_f = \frac{1}{E} * \frac{mc}{1 - (1/\varepsilon)}$ ，

其中， p_f 為以外幣表示的商品出口價格。再根據 Mann(1986)的出口商品加成取價

公式： $p_f = \frac{(1 + \pi) * mc}{E}$ ，其中， π 為加成取價成數，可推得 $p_f * E = \frac{mc}{1 - (1/\varepsilon)} = (1 + \pi) * mc$ 。

(三)滯延現象

滯延(hysteresis)現象強調廠商加入與退出市場速度的不一致性²²，亦可解釋匯率波動對貿易數量不對稱的影響。在完全競爭市場中，廠商可自由地進入或退出市場，但是現實中涉及進入障礙或退出成本的問題，因此廠商一旦決定加入或退出市場後，往往無法輕易改變決策。由供給面來看，Dixit(1994)提出，廠商剛進入市場時，為建立其灘頭堡(beachhead)，必須投入相當大的成本，如：購買特殊設備、付出廣告費以建立品牌知名度與聲譽、設立行銷網路與售後服務據點、使產品符合該市場相關健康與安全規定等，因而產生極高的沉沒成本，導致廠商不易隨著匯率的變動而退出市場²³。

Baldwin(1988)則提出需求面的滯延(demand-side hysteresis)，當消費者對產品有品牌忠誠度(brand loyalty)時，即使目前因匯率升值迫使出口廠商需提高商品售價，但因國外進口商尋找其他替代品時，會產生搜尋成本，因此，價格上升不至於立刻影響其需求量；影響所及，國內出口廠商不會因利潤降幅過大而離開市場。

Krugman(1987)並指出，如果匯率波動幅度不大時，一般廠商會採取靜觀其變(wait and see)的策略，只要預期匯率在不久的將來能回復到正常水準，即使目前短期的虧損，廠商仍會選擇留在市場上。由此可知，在本國貨幣升值期間，由於沉沒成本與品牌忠誠效果的存在，退出出口市場的廠商將不會太多，因此，出口市場的競爭程度改變不明顯；然而，在本國貨幣貶值期間，進入出口市場的廠商將會增加，促使出口市場的競爭程度相應提高，進而改變匯率變動對出口價格的影響程度，此時匯率變動影響商品出口外幣價格的傳遞關係，將

²² 「滯延(hysteresis)」被引用至國際經濟理論係指：前一個持續性匯率波動引起實質改變之效果，是無法完全恢復至原始的水準。所謂的實質改變，係強調廠商加入市場與退出市場之不對稱情形。

²³ 此現象被稱為灘頭堡效果(beachhead effect)。

會產生結構性變化。因此，貿易上的滯延現象，亦是匯率波動對出口貿易量產生不對稱效果的原因之一。

伍、結論

鑑於台灣為出口貿易導向的經濟體，本文研究匯率波動對貿易量的影響，是否存在不對稱性。茲以1990年1月至2001年12月期間，台灣兩個較主要出口產業(機電類及紡織類)為分析對象，探討匯率波動幅度，對貿易量的影響是否不對稱。

研究方法上，先建立ARCH模型，據以找出匯率波動的現象，進而估計非線性ESTAR模型，探討匯率走勢震盪及走勢平穩期間，對出口貿易量是否會造成不對稱性的影響。此外，進一步比較匯率波動在升值和貶值這兩種不同狀態期間，對出口貿易量是否可能造成不對稱性的影響；並探討產業間是否有不對稱性之差異。

本研究實證結果發現，匯率波動對機電類及紡織類產業產品出口，確實存在不對稱性的影響：不對稱性不僅存在產業內，亦存在於二產業之間。根據二產業之特性可推斷出三個結論：

第一，機電類產業相較於紡織類產業，較能透過市場定價來解決暫時性匯率波動的問題；因此，機電類產業對匯率波動較為敏感。就短期而言，機電類產業在匯率走勢平穩時，出口貿易量的增幅，不僅相對大於匯率走勢震盪時，出口貿易量的減幅($t-3$ 期除外)；亦相對大於紡織類產業在匯率走勢平穩時，出口貿易量的增幅($t-2$ 期除外)。

第二，機電類產業相較於紡織類產業為出口競爭力較強的產業，故廠商將匯率變動轉嫁到出口商品外幣價格的能力較強；換言之，當波動幅度大時，機電類產業於升值期間，出口貿易量的減幅及貶值期間出口貿易量的增幅，均小於紡織類產業，亦即機電類產業不對稱差異，相對小於紡織類產業。

最後，出口商品為供應外國民眾所需，故語言隔閡及距離障礙，可能會拉長體認價格變化所需耗費的時間，另外，一般出口廠商合約的簽訂時間，多在3~6個月之前。因此，消費者反應延遲及廠商間事先簽訂契約，均會導致消費數量不能迅速反應匯率的波動。

本研究僅分析研究期間台灣出口貨品平均比重最高的前兩大產業，惟此研究結果畢竟為整個產業的加總情形；若針對不同產業，挑出具代表性的廠商進行研究與比較，相信可得到更顯著的結果，並更具說服力。此外，若能建立VAR模型，同時計算需求面與供給面的效果，再利用衝擊反應函數(impulse response function)進行分析，俾能更詳盡的觀察匯率波動變數對出口貿易量的影響。

本研究的結果，不僅使相關議題的不對稱性文獻更加豐富，亦可廣泛應用於貨幣傳遞機制的分析上，例如：貨幣政策如何經由匯率管道(exchange rate channel)的機制，進而影響整體經濟活動。

2. FTA versus GATT/WTO Rules
3. Reasons for Forming or Joining FTAs
4. Choosing FTA Partners
5. The Relationship between Taiwan and ASEAN
6. A Potential Taiwan-ASEAN FTA: Attractions and Challenges
7. Conclusion

Abstract

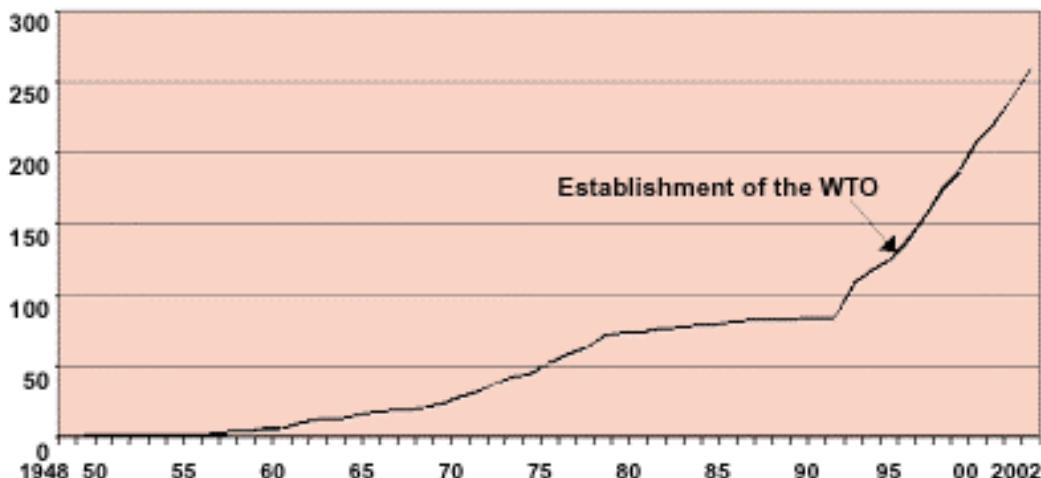

Despite the birth of the WTO in 1995, free trade agreements (FTAs) continue to mushroom around the world as one kind of preferential trade agreement. Up with the vanguard of this trend, ASEAN, as a regional grouping, has been making tremendous efforts to establish FTAs with its major economic partners. Given its close and historical economic relationship with ASEAN and as a new member of the WTO, Taiwan could be considered as a potential candidate for a kind of "ASEAN+1" FTA. To analyze the potential of a Taiwan-ASEAN FTA, this paper first explains why countries join or form FTAs and addresses how they choose their FTA partners. Then, the paper introduces its preliminarily findings that an FTA between Taiwan and ASEAN could expand intra-regional or intra-industry trade flows, create more direct investment, increase the efficiency of FDI, reduce the risk of over dependence or concentration of trade and investment in specific countries, facilitate economic and technical cooperation, and enhance and consolidate the overall relationship between Taiwan and ASEAN. Taiwan and ASEAN can thus regard each other as prospective FTA partners. However, obstruction and opposition from China mean that the chances of forming a Taiwan-ASEAN FTA in the near future are significantly reduced.

* Assistant Professor, Department of Political Science, Soochow University; Acting Director, Division of International Affairs, Taiwan Institute of Economic Research.

1. Introduction

Unilateral liberalization, multilateral liberalization, and regional (or preferential) liberalization are the three basic routes to trade liberalization. Despite the establishment of the official multilateral trading system under the World Trade Organization (WTO) in 1995, regional trading arrangements (RTAs) continue to mushroom across the globe. In the period 1948-1994, the General Agreement on Tariffs and Trade (GATT) received 124 notifications of RTAs; however, since the creation of the WTO in 1995, there have been over 130 additional arrangements covering trade in goods or services notified (as shown in Figure 1). By the end of 2005, the total number of RTAs in force might well approach 300 if those reportedly planned or already under negotiation are concluded.¹ It is particularly notable that the rise of free trade agreements (FTAs) is taking place alongside the forward movement of multilateral trade negotiations and has become a prominent feature of the WTO era. A marked effect of this has been to turn the Asia-Pacific region from a blank space on the regional map of FTAs to one with more than thirty signed FTAs and emerging FTA proposals (see Table 1).

ASEAN, as a regional grouping, has been especially active in pursuing the establishment of FTAs with its major economic partners, including China, Japan, Korea, Australia, New Zealand, and even India. In 2004, it concluded negotiations for goods liberalization with China. In 2005, it will be concluding an FTA with India and will begin official FTA negotiations with Japan. Also, ASEAN and Korea have conducted three rounds of official negotiations for the Korea-ASEAN FTA in 2005. Given its close and historical economic relationship with ASEAN and as a new member of the WTO, Taiwan could be considered as a potential candidate for a kind of “ASEAN+1” FTA. Therefore, the main purpose of this paper is to address the issue of a potential Taiwan-ASEAN FTA under the WTO architecture by analyzing its attractions and challenges. More specifically, the paper will first discuss the legitimacy of forming FTAs under the WTO legal framework, and explore the benefits of and incentives or reasons for joining or forming a FTA. Based on this, the paper will go on to examine the prospects and challenges for forming a Taiwan-ASEAN FTA under the WTO architecture. It is hoped that such analysis will help us understand the potential of a future Taiwan-ASEAN FTA.

2. FTA versus GATT/WTO Rules

As economic theory suggests, when each state exploits its distinctive features (comparative advantages) by freely trading with the rest of the world, it has the effect of maximizing global welfare (Lawrence 1996: 29). Consequently, multilateral trade liberalization with the principle of non-discrimination has been regarded as the best or ideal approach for trade liberalization. The principle then goes under the name of most-favored nation (MFN) policy or treatment, arguing that signatory governments shall extend unconditionally to all other contracting parties (members) any

advantage, favor, privilege, or immunity affecting trade. The principle of MFN finally was incorporated into the GATT in 1947 and became a multilateral obligation.

Contravening the MFN principle, FTAs by nature indeed are “preferential” free trade agreements, which provide discriminatory treatments or trade terms to specific target partners or groupings. Thus, in theory, FTAs, RTAs and PTAs violate the most fundamental principle of the GATT/WTO, the nondiscrimination or MFN principle enshrined in Article I of the GATT. However, mainly in consideration of the following factors, eventually they were embraced as legitimate under GATT/WTO rules. First, as Frankel, Stein, and Wei (1997: 1) argue, “as long as there have been nation-states with trade policies, they have discriminated in favor of some valued neighbors and against others.” RTAs thus have at times played major roles in political history. Second, achieving trade liberalization multilaterally in large negotiations that extend benefits unconditionally to all participating parties proved difficult. Finally and most importantly is that “the founders of GATT recognized...that economic integration between several countries had or can have an economic rationale analogous to the process of integration within a single sovereign state, which in turn means that regional integration agreements do not pose an inherent threat to efforts to promote continued integration on a whole-wide basis” (WTO 1995: 6).

For these reasons, the provisions for regional integration agreements have always coexisted with the principle of MFN in the GATT rules and continue to do so in the rules of the WTO. Thus far three main pegs—GATT Article XXIV, the Enabling Clause, and GATS Article V—in the GATT/WTO rules have been used to permit RTAs (including customs unions and FTA agreements) as an exception to the cardinal principle of nondiscrimination or MFN. Among others, GATT Article XXIV is the

principal one dealing with customs unions and FTAs. It provides a number of rules governing such agreements, including the “substantially-all-trade” requirement, and stipulates that members of a regional integration arrangement must have a trade policy with respect to third countries that is not on the whole higher or more restrictive than the individual policies prior to the agreement. Moreover, the Enabling Clause,² agreed in 1979 during the Tokyo Round of negotiations, offers a legal cover for preferential trade agreements between developing countries, subject to certain conditions. In regard to trade in services, Article V of GATS provides for a similar but not identical set of conditions that have to be fulfilled by regional agreements. But, similarly to Article XXIV, the advantages of closer economic integration are recognized by the GATS as well.

Therefore, although FTAs are by nature preferential and thus discriminatory, subject to certain conditions they are permitted as an exception to the principle of nondiscrimination under the legal architecture of the WTO. In other words, every member of the WTO may legitimately form or join FTAs with other members of the WTO as long as such agreements are consistent with WTO rules.

3. Reasons for Forming or Joining FTAs

The effects of RTAs or FTAs have been the subject of an important and growing body of work at both a theoretical and empirical level. Unfortunately, the results of various analyses are complex. The arguments for and against FTAs are of long standing and remain unresolved. In spite of this, FTAs are in fashion and still emerging. Why? There must be various

² Formally, the Decision on “Differential and More Favorable Treatment, Reciprocity and Fuller Participation of Developing Countries.”

reasons for countries to decide to form and join FTAs. In other words, countries have their specific purposes for seeking FTAs. As well, FTAs in general provide the following incentives, which could be static, dynamic, short-term, long-term, economic or non-economic (Frankel 1998; The Australian APEC Study Center 2001; Scollay 2003).

3.1. Traditional Trade Gains

According to Viner (1950), the earlier theorist on customs unions and free trade areas, a regional integration agreement which discriminates in favor of the members by reducing trade barriers or improving market access can lead to *trade creation* or to *trade diversion* on particular productions.³ Trade creation extends reliance on comparative advantage, whereas trade diversion does the opposite. Besides, the reduction in trade barriers, as subsequent studies have shown, may also increase competition in the area and thereby lead to an overall reduction in costs of production. On the whole, however, the extent of trade creation or diversion will really depend on individual circumstances and can only be assessed on a case-by-case basis. Therefore, improving market access through reciprocal exchanges of concessions on trade barriers is perhaps the most conventional incentive for countries to participate in FTAs.

3.2. Investment Gains

Apart from the incentive of gains in trade, FTAs provide preferences that may by and large alter the incentives for firms located both inside and

³ According to the WTO (1995: 43), “Trade creation is the substitution of a lower cost source of supply from a partner country for a higher cost domestic source in one or more of the participating countries. Trade diversion is the substitution of a higher cost source of supply from a partner country for a lower cost source of supply from third countries as a result of the elimination of the tariff with respect to partner countries.”

outside the preferential trade area, and hence the formation of a regional integration agreement is likely to influence direct investment flows. This will be true even if an FTA does not change the regulation of investments, because firms located in third countries have an incentive to locate new production facilities in a member country and serve the other members of the agreement through intra-area exports. In particular, with the growing inclusion of investment policies in FTAs, the effect of such pacts on direct investment flows is becoming more and more significant.

3.3. Guarantee of Access

Another attraction, particularly for small-scale economies, is to use FTAs to secure market access to a large country market such as the United States or China. In other words, regarding FTAs as insurance for future market access, countries with the fear of exclusion from major markets are willing to incur necessary side payments in the form of domestic policy discipline to participate in FTAs with this attraction. Many recent large-small country trade agreements, such as the US-Singapore FTA, offer this kind of incentive.

3.4. Faster and Easier

Compared with the multilateral negotiations among more than 140 members in the WTO, trade liberalization with a small group of major trading partners offers much higher possibilities of progressing further and faster. In the case of FTAs between two or several countries, there should be fewer difficulties in reaching a consensus. The implementation and gains should also be faster, easier, and more clear-cut, as partners in agreements are usually important/potential markets or having strategic interests for one another.

3.5. Binding and Reciprocal Commitments

In contrast to loose or non-binding integration such as APEC, FTAs in nature are binding commitments generated via the negotiation of reciprocal concessions. Due to its binding and reciprocal nature, the content of an FTA tends to be concrete, pragmatic, and feasible, rather than illusive.

3.6. Enhancing Domestic Policy Reforms

Another incentive for countries to seek FTAs would be the idea that a bilateral or regional trade agreement “can underpin domestic policy reform and make it more secure; that is, by binding the country to the masthead of an international trade treaty, any future reversal of domestic policy reform becomes more difficult to implement” (Whalley 1998: 71). In other words, FTAs would be a sound form of peer pressure to lock in domestic policies or structural reforms. For instance, this was ever a central preoccupation behind the Mexican negotiating position on NAFTA.

3.7. Training Grounds

Learning by doing can be seen as the better approach for trade liberalization. In this regard, FTAs can serve as “training grounds” for future regional and multilateral liberalization, where governments and business learn how to adapt to increased openness and competition resulting from liberalization (Scollay 2004: 51). FTAs can also set precedents and develop negotiation modalities that can be adopted later in multilateral negotiations.

3.8. Increasing Bargaining Power

To some extent, adopting FTAs could increase bargaining power with third countries. This idea was shared by countries involve in the formation of the European Economic Community in the late 1950s.

3.9. Strategic or Security Concern

Beyond economic concerns, the negotiation of FTAs can be linked to foreign policy and security objectives at the same time. Examples of this motivation are said to include the creation of the European Coal and Steel Community (ECSC 1951) and the European Economic Community (EEC 1957) to reduce the threat of war in Europe, ASEAN to reduce tensions between Indonesia and Malaysia, and MERCOSUR to reduce tensions between Argentina and Brazil. Even today, FTAs are also playing a significant role in the foreign and strategic policies of countries like the United States, China, or Japan. As a consequence, oftentimes trade liberalization could be just a minor factor propelling successful formation of FTAs, which may be stimulated primarily by political or strategic considerations.

3.10. FTAs as Diplomacy—Bringing Nations Together

Unlike conventional FTAs, modern bilateral or regional trade agreements extend well beyond traditional liberalization in goods and even services “to include a wide range of trade facilitation measures in areas such as customs procedures, standards and conformance, quarantine measures, government procurement and harmonization of business law and tax practices, as well as provision in areas such as competition policy, investment, intellectual property, digital commerce, labor and environmental measures” (Scollay 2003: 6). The term “Closer Economic Partnership (CEP)” thus has commonly come to be used to describe such wide-ranging agreements. In addition to enhancing economic cooperation, this kind of FTA or CEP, across economic, political, and social dimensions, could serve as an instrument to improve the comprehensive relationship and thereby increase the overall integration between participants in the agreement. In

short, today's FTAs can bring different countries together through increasing exchanges not only in the economic sphere, but also in the social and political spheres.

All of these attractions or advantages of forming or joining FTAs do not mean that FTAs are without cost. There are indeed some disadvantages to participating in FTAs. For instance, FTAs only confer economic advantages when they are negotiated with countries that are significant trading partners. Overgrowing FTAs could bring about the phenomenon of what Bhagwati (1995) called the "spaghetti bowl," which may increase the complexity of the international trading system and raise transaction costs for business. Also, negotiation of FTAs is resource intensive and there can be an opportunity cost in devoting resources to bilateral or regional, as opposed to multilateral negotiations. Thus there have been some worries that FTAs or RTAs will retard the progress of multilateral trade liberalization. Yet, whether FTAs or RTAs are "building blocs or stumbling blocks" (in Bhagwati's celebrated phase) to multilateral trade liberalization is still an endless debate (Panagariya 1999).

4. Choosing FTA Partners

As indicated above, there are considerable incentives for and benefits from participating in FTAs. Nevertheless, the overall welfare effect of forming or joining FTAs depends on the particular circumstances of each FTA. That is to say, the best balance of benefits and costs for participating in an FTA depends upon the choice of the partner. Given the highly complex constitution of FTAs, it would be a very daunting task for any country or economy to identify and quantify the costs and benefits of forming such a pact with a prospective partner. Nevertheless, there are some overriding principles governing the choice of partner that need to be applied.

4.1. Increasing Trade Flows

There seems to be a misunderstanding that the larger the market of the partner, the more favorable it is for an economy to engage in an FTA on the ground of enhanced market access. Indeed, the impact of FTAs is ambiguous and would have to depend on the net effect of the trade creation and diversion effects. In other words, one deals not only with individual goods/sectors, but the whole range of industries that partner countries possess. Thus the attraction of a partner will be evaluated on the extent to which the FTA can increase trade flows. Given the technical difficulties in determining the trade creation and trade diversion effects across all sectors of members of an FTA, an examination of a prospective partner's export structure provides an alternative methodology for evaluating the attraction of entering into an FTA partnership with it. Traditionally, comparative advantages in different areas of production allow partner countries to gain as a result of specialization (or labor division). Accordingly, trade flows are likely to increase when the partner's structure of exports is *complementary* with the structure of the home country.

However, with the increased specialization of modern production and the increased number of stages through which materials are transformed prior to reaching the final consumer, freeing up trade between countries with *similar economic profiles* actually can increase intra-industry trade and competitive pressures on suppliers, which would in turn improve the economic competitiveness and efficiency of the area.

4.2. Increasing Direct Investment

The second important principle for choosing FTA partners is to increase the flow of foreign direct investment (FDI) in the area. For countries waiting for FDI, an FTA needs to include partners that are able to bring in or increase FDI for them. For countries possessing plenty of capital,

their FTA partners need to be better able to diversify their FDI outward flows and improve the efficiency and return of the FDI.

4.3. Diversifying Risks

Without doubt, FTAs are established to increase trade and investment in one area. Yet, a better FTA should also serve as a channel for members to diversify trade, investment, or technology flows in order to reduce the risk of over dependence on or concentration in a specific country or region. Especially as the world becomes increasingly globalized, trade dependency on and investment concentration in one country or area is dangerous once such events as financial crises, wars, or diseases like SARS occur.

4.4. Economic and Technical Cooperation

In addition to trade liberalization, the choice of FTA partners needs to take into consideration the extent of mutual economic and technical cooperation. Particularly for developing countries or economies, economic and technical cooperation, which has a vital part to play in upgrading an economic structure, will be at least as important as increasing trade flows and direct investment.

4.5. Historical Relationship

Choosing FTA partners with existing historical relationships in economic, social, political, cultural, or geographical dimensions would more or less improve the effectiveness of the agreement. Also, an existing historical relationship could make negotiations less difficult due to mutual understanding in areas of economy, society, culture, or politics. At the same time, the FTA would in turn help advance or improve the existing historical relationship.

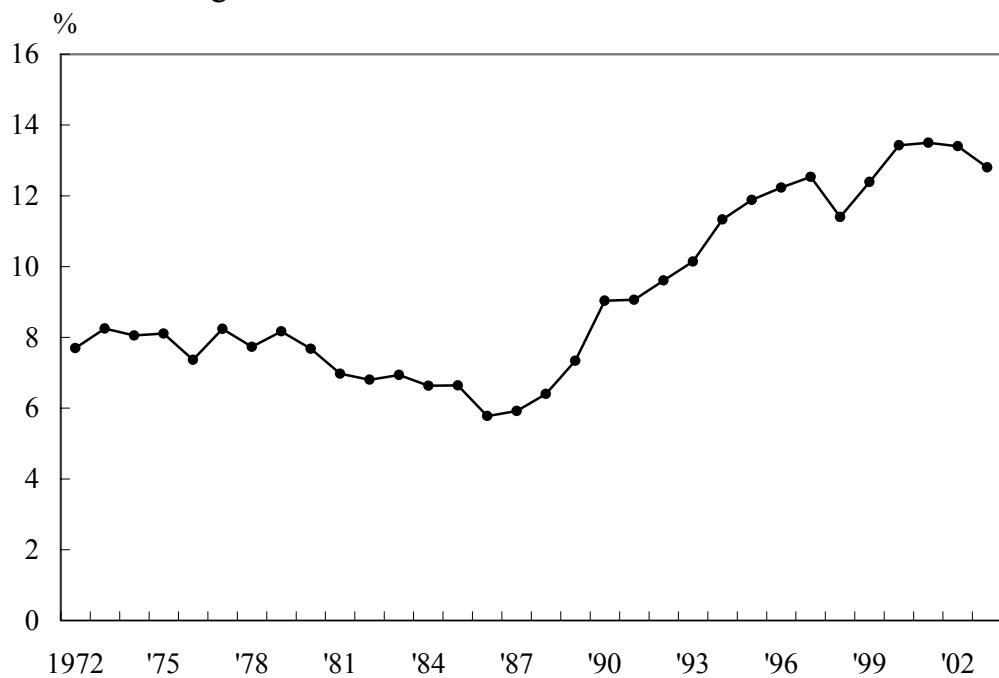

5. The Relationship between Taiwan and ASEAN

Geographically, Taiwan and the ASEAN countries are close neighbors, while historically and culturally they have all been influenced by their giant northern neighbor, China. The influence of southern China has been particularly strong, as manifested in the common Chinese dialects, religions and cuisines that are prevalent in Taiwan and across Southeast Asia. Economically, however, there was very little interaction between Taiwan and any of the ASEAN countries before 1970. The Taiwan-ASEAN economic relationship only really began to develop in the 1970s. In 1972, trade with ASEAN accounted for about 7.7% of Taiwan's total trade (see Figure 2). With the rapid economic growth and development of ASEAN countries and Taiwan's economic transformation,⁴ economic interactions between Taiwan and ASEAN countries have increased tremendously since the late 1980s. Especially after Taiwan launched its first "Southward" ("Go South") policy in 1993 to channel Taiwanese investment to Southeast Asia, as a way to reduce its economic reliance on China, the annual trade between Taiwan and ASEAN jumped from US\$11 billion in 1990 to US\$20.2 billion in 1994 (see Table 2). The 1997-98 Asian financial crisis was the only period when the trade between Taiwan and ASEAN experienced a slowdown throughout the 1990s. In 2004, the total trade between Taiwan and ASEAN shot up to a new record high of US\$43.45 billion, a rise of some 25% from the previous year.

⁴ Since the early 1980s, Taiwan's traditional comparative advantages have been gradually eroded under pressures on three main fronts: from *above* (rising protectionism in the developed countries whose markets had absorbed much of NICs' exports), from *below* (increasing challenges from second-tier NICs, such as Thailand, Malaysia and China, where labor costs are even lower), and from *within* (soaring real wages and rising environmental consciousness) (Wang 1995: 551).

Another important development in the Taiwan-ASEAN economic relationship is Taiwan's growing direct investment in ASEAN countries. Since the late 1980s, Taiwan's FDI in ASEAN countries has increased in terms of both the number of cases and the amount of the investment (see Table 3). As of September 2004, the number of cases of FDI flowing from Taiwan to the main ASEAN countries had reached 7,400, with the cumulative amount of investment adding up to nearly US\$45 billion, second only to Taiwan's direct investment in China (more than US\$70 billion). Taiwan thus has become ASEAN's largest FDI provider among the four Asian tiger economies, and is the second or third largest of all FDI providers for Thailand, Malaysia, Vietnam, and Cambodia.

Figure 2: ASEAN's Share of Taiwan's Total Trade

Note: ASEAN data after 2000 includes the current ASEAN 10 countries. ASEAN data between 1997 and 1999 includes the ASEAN 6 plus Vietnam. ASEAN data before 1997 includes only the ASEAN 6.

Despite their growing economic interactions, today Taiwan has no official or political relationship with any of the ASEAN countries. In the past two decades, Taiwan has tried very hard to establish or improve official relations with ASEAN countries. But, due to the effect of the “one-China principle,” the official or institutionalized communication between Taiwan and ASEAN has been very little. The channels for initiating dialogue between Taiwan and ASEAN are also very limited. International governmental organizations such as ADB and APEC have thus become the

main venues for official interaction between Taiwan and the ASEAN countries.

Under these circumstances, economic cooperation and integration between Taiwan and ASEAN has been proceeding almost solely through the private sector, and has thus been significantly constrained. The lack of political support has meant they have lost many opportunities to further develop their overall relationship, enhance business cooperation, and increase economic integration.

6. A Potential Taiwan-ASEAN FTA: Attractions and Challenges

As mentioned in the preceding section, in the past two decades, Taiwan and ASEAN have enjoyed increasing trade, investment, and cultural interactions, despite the political constraints imposed by China. Taking into account the overriding principles of choosing FTA partners identified above, this section attempts to explore the main attractions for forming a Taiwan-ASEAN FTA, and to identify the major barriers against its realization.

6.1 Attractions

First of all, could a Taiwan-ASEAN FTA *increase trade flows* between Taiwan and ASEAN countries? As Figure 2 and Table 2 indicate, trade flows between Taiwan and ASEAN countries have been growing significantly since the late 1980s. Many ASEAN countries have become Taiwan's major trading partners. Table 4 shows that, on average, Singapore, Malaysia, the Philippines, Thailand, Indonesia, and Vietnam were all among Taiwan's top 20 trading partners between 2000 and 2004. This development may be partly attributed to the economic transformations and structural changes occurring in both Taiwan and ASEAN in the past two decades,⁵ which have made Taiwan's export structure largely complementary to ASEAN's. The RCA index in Table 5 shows that, in general, Taiwan's comparative advantage does not conflict with those of major ASEAN countries.

Other factors that have probably contributed to expansion of Taiwan-ASEAN trade are the Taiwan government's policy of encouraging investment in Southeast Asia, and the effect of economic and market globalization in intensifying the labor division and economic

⁵ For instance, in the late 1980s and early 1990s, driven by currency appreciation, rising wage costs, scarcity of land and environmental protection, Taiwan began to relocate labor-intensive industries abroad.

interdependence between Taiwan and ASEAN. However, this development of increasing economic integration between Taiwan and ASEAN is not supported by any preferential agreements like FTAs. Based on the existing tendency and potential of trade between Taiwan and ASEAN, an FTA that features trade-barrier reduction, trade facilitation, and other preferential treatments will definitely create more trade flows between Taiwan and ASEAN.

Source: Adapted from Taiwan Institute of Economic Research based on the GTAP 6.0.

In addition to the growth of total trade flow, the pattern of trade between Taiwan and ASEAN has been marked by an increasing slant toward intra-industry trade. According to theory, the higher the level of intra-industry trade between countries, the more effective their economic integration. This is because the extent of intra-industry trade reflects the extent of industrial complementarity. In other words, a higher index of intra-industry trade between two countries means a higher degree of economic integration between them. According to Table 6, Taiwan and most of the ASEAN countries have enjoyed rising intra-industry trade since 1989. Also, in terms of export composition, 68.8% of Taiwan's exports to ASEAN consist of intermediate goods (CEPD 2005), which means that Taiwan is for ASEAN a significant production-chain partner rather than provider of final goods. Hence, an FTA between Taiwan and ASEAN would facilitate this tendency and thereby improve the economic competitiveness and efficiency of the area.

Secondly, investment creation can be another important criterion in determining FTA partners, particularly for developing countries. For ASEAN countries, FDI, which serves to promote not only investment but also international trade and technology transfer, has played a very critical role in accelerating economic growth in the past two decades. Although Taiwan began to invest greatly in ASEAN countries in the early 1990s, its recent FDI outflow has been overwhelmingly sucked in by China. This tendency of growing FDI from Taiwan to China has started to undermine Taiwan's outward FDI toward ASEAN countries and at the same time caused economic dependency of Taiwan on China. Under the circumstances, an FTA between Taiwan and ASEAN should be able to redirect Taiwan's outward FDI toward ASEAN and generate investment creation for ASEAN, which may in turn facilitate the intra-industry trade between Taiwan and ASEAN as well as bring about technology transfer for ASEAN. This would help Taiwan diversify its FDI outflows and improve the efficiency of its FDI.

Table 6: Intra-Industry Trade Index between Taiwan and ASEAN, 1989-2000

Year	PHIL	THAI	MAL	INDO	SING	MYAN	VIET	ASEAN	TWN
1989	20.68	18.73	16.73	19.21	28.49	75.04	—	21.38	33.25
1990	19.71	15.60	20.40	10.06	26.81	71.73	5.08	21.22	34.75
1991	19.20	22.48	18.19	10.74	30.96	85.85	7.01	23.73	34.26

Third, as aforementioned, an ideal FTA should be able to reduce the risk of over dependence on or concentration in a specific country or region. A Taiwan-ASEAN FTA will certainly diversify Taiwan's foreign trade and direct investment and thus help Taiwan reduce its risk of economic overdependency on China, a potential threat to Taiwan's national security. The FTA will also help ASEAN diversify its foreign trade and reduce the risk of overdependence on certain resources of FDI and technology transfer.

Fourth, the choice of FTA partners should go beyond the traditional

focus on trade gains to consider the extent of mutual economic and technical cooperation, particularly for developing countries. In the past few years, Taiwan has initiated several economic cooperation projects with ASEAN countries, including the establishment of Subic Bay Industrial Park in the Philippines, Medan Industrial Estate in Indonesia, and Hanoi Industrial Park in Vietnam. Based on these experiences of economic cooperation, a Taiwan-ASEAN FTA with political support would further facilitate as well as increase the scope and level of cooperation, which would certainly add value to the FTA itself.

Last but not least, apart from economic interests, historically Taiwan and ASEAN countries have shared many cultural, family, religious, and social values. On the basis of this historical relationship, a Taiwan-ASEAN FTA would further strengthen their interactions beyond the economic realm, as well as improve mutual understanding across economic, political, social, and cultural areas. In particular, today there are more than 300,000 guest workers from such ASEAN countries as Indonesia, Malaysia, the Philippines, Thailand, and Vietnam in Taiwan (see Table 7), while more than 85,000 brides from ASEAN countries have been absorbed into Taiwanese society. This development has given Taiwan more need to better understand its Southeast Asian neighbors and improve its relationship with ASEAN. An FTA between Taiwan and ASEAN would thus provide a more official and stable channel for improving mutual understanding and communication, addressing common problems and pursuing common interests without having to contend with constant interference and obstruction from China.

6.2 Challenges

The preliminary analysis above, identifying the main attractions of a Taiwan-ASEAN FTA by application of the underlying principles for

choosing FTA partners, indicates that Taiwan ranks alongside Japan and Korea as a key FTA partner for ASEAN, and that a Taiwan-ASEAN FTA may even create better economic welfare than some other ASEAN+1 FTAs. However, there is one major challenge that still keeps the two sides from discussing such a pact, namely the interference of China or the impact of the “one-China principle.” To contain Taiwan’s economy and marginalize Taiwan’s international status, since Taiwan joined the WTO in 2002 under the name of “the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu,” China has been arguing that it is not a country or sovereign state, and therefore cannot sign an FTA with any other WTO member. Such a stance is manifestly inconsistent with the rules and spirit of the WTO. The Agreement Establishing the World Trade Organization states very clearly that “the terms ‘country’ or ‘countries’ as used in this Agreement and Multilateral Trade Agreements are to be understood to include any separate customs territory Member of the WTO.”⁶ Moreover, the use of “contracting party” was replaced by “member” at the establishment of the WTO.⁷ Thus, it is conclusively evident that both countries and separate customs territories are equally treated as “members” and enjoy the same legal status with the same rights and obligations under the architecture of the WTO. As a member of the WTO, therefore, Taiwan surely has the right to form FTAs with other members under the legal framework of the WTO.

However, under political pressure from China (including the threat of downgrading diplomatic or economic ties), ASEAN has desisted from taking a firm stance on the issue of initiating an ASEAN-Taiwan FTA. It is thus very clear that China’s political pressure rather than WTO rules has become the major obstacle and challenge to initiating an FTA that would benefit both Taiwan and ASEAN as a whole.

⁶ Please refer to the Explanatory Notes of the Agreement Establishing the World Trade Organization.

7. Conclusion

Despite the birth of the WTO in 1995, preferential trade agreements in the form of FTAs have continued to mushroom around the world. ASEAN, as a regional grouping, has followed this trend by making tremendous efforts to establish FTAs with its major economic partners. Taiwan, as a new

member of the WTO, is equally enthusiastic about doing likewise, and has been trying very hard to form or join FTAs with its major trading partners, including ASEAN. In this context, could Taiwan be a potential candidate for a kind of “ASEAN+1” FTA?

In the past two decades, economic interactions between Taiwan and ASEAN members have increased significantly. However, owing to the lack of political support, their economic cooperation and integration has been proceeding almost solely through the private sector, and thus has been often limited in both scope and effectiveness. Based on the attractions of forming or joining FTAs, the primary principles of choosing FTA partners, and the rules of the WTO, this paper reaches the preliminary finding that there is a strong case in favor of establishing a Taiwan-ASEAN FTA. Such a pact would be likely to boost intra-regional or intra-industry trade flows, create more direct investment, increase the efficiency of FDI, reduce the risk of over dependence or concentration of trade and investment in specific countries, facilitate economic and technical cooperation, and enhance and consolidate the overall relationship between Taiwan and ASEAN. This paper also finds that Taiwan and ASEAN are complementary to each other in many realms and share numerous common interests. Taiwan and ASEAN can thus regard each other as prospective FTA partners.

Under these circumstances, there seems to be no good reason for denying such a promising match. Nevertheless, while ASEAN is emerging as a hub of FTA activity, contemplating and negotiating many “ASEAN plus” FTAs, it seems thus far to have purposely overlooked Taiwan for consideration as an FTA partner. Though there could be various factors behind this, it is obviously due to pressure exerted by China more than anything else. China’s objective is clearly transparent and purely political: to

prevent Taiwan from expanding its international connections via FTAs. In other words, without China's politicization of the issue, Taiwan would be a prime candidate for another ASEAN+1 FTA. But as China forms ever stronger links with ASEAN, having already in the recent past reached agreement with it on the formation of an ASEAN-China FTA, issuance of the Declaration on the Conduct of Parties in the South China Sea, and signing of the Treaty of Amity and Cooperation, the prospects of forming a Taiwan-ASEAN FTA have been substantially diminished in the near future.

Even so, this does not mean that a Taiwan-ASEAN FTA is beyond any prospect of materialization. While the China factor is certainly a big obstacle and challenge, there are several factors that favor the establishment of such an FTA in the longer perspective. First, under the architecture of the WTO, it is legal for Taiwan to form or join FTAs that are consistent with WTO rules. Second, in terms of trade and investment creation, Taiwan is an ideal FTA partner for ASEAN. Third, Taiwan and ASEAN countries thus far have lacked official channels for communication. A Taiwan-ASEAN FTA will provide a more official (or at least a legal) channel to improve mutual understanding and address common problems. Finally, the existing high degree of economic interdependence and social interactions, and the lack of political support for further economic integration, may provide stronger incentives for forging an FTA between Taiwan and ASEAN.

In spite of the difficulties created by China and its insistence on the "one-China principle," there are practical steps that Taiwan can take now to safeguard its economic ties with ASEAN and boost the long-term prospects for establishing a Taiwan-ASEAN FTA. It can pursue talks, with ASEAN collectively or its member countries individually, focusing on such specific issues as tariff reduction, market access, investment facilitation, dispute

settlement, and technical cooperation. Instead of negotiating FTAs, Taiwan and ASEAN countries could do this through framework agreements or economic arrangements to reach the goal of trade liberalization. For its future interests in ASEAN, Taiwan could even unilaterally provide market access to ASEAN countries in some sectors or industries in which it enjoys comparative advantage. Such an approach could yield substantive effects in the form of preferential trading agreements (PTAs) while bolstering the economic ties between Taiwan and the members of ASEAN.

■ Executive Yuan Approves Tax Exemption for Retirement Fund Payments

In line with the implementation of the new retirement fund system, the Executive Yuan approved a revision of the Income Tax Law on Oct. 19 to exempt voluntary payments by workers into individual retirement accounts or annuity insurance accounts, up to a maximum of 6% of monthly salary, from income tax. The revision is expected to help insurance companies develop the annuity insurance market under the new retirement system.

The main aim of the new revision is to bring the new annuity insurance system and individual retirement account system into consistency. Under the revised provisions of paragraph 1 of Article 14 of the Income Tax Law, voluntary payments into annuity insurance will be treated the same as those deposited in individual retirement accounts and will not be included in annual taxable income. The total tax-exempt amount of deposits under both systems may not exceed 6% of salary. After a worker retires, his or her annuity insurance payments will be considered as retirement income. To encourage profit-seeking enterprises to allocate retirement fund or annuity insurance premiums, such allocations may be listed as expenses

up to a maximum of 15% of total annual salary payments.

Under the current law, workers are allowed to deposit money into individual retirement accounts or annuity insurance. Funds deposited into individual retirement accounts can be deducted from the amount of annual taxable income up to 6% of monthly salary. However, funds deposited into annuity insurance are included in the maximum of NT\$24,000 in insurance premiums that are considered as itemized deduction.

Once the Legislative Yuan passes the new revision, the inclusion of annuity insurance premiums in the amount that may be exempted from annual taxable income will be implemented retroactively to July 1 this year.

Policy Updates

■ Portability for Mobile Phone Numbers Takes Off

Number portability, which is seen as a revolutionary policy in the liberalization of the telecommunications industry, was formally inaugurated in Taiwan on Oct. 15. Now, mobile phone subscribers who apply

for number portability are able to switch their telecoms company without having to change their number. This liberalization is expected to bring even more intense competition to the island's telecoms market and force operators to provide better services to their customers.

Consumers who want number portability can apply for it to their prospective new telecoms operator. The operator will then check with the management system of the databank established by the Telecom Technology Center to find out if the applicant has any restrictive contracts, accumulated unpaid telephone fees, or contract violations; if none of these exist, the application will be approved within four working days. The operator originally used by the applicant can collect a transfer fee of no more than NT\$240. Both 2G and 3G numbers can be transferred; PHS, however, is not included in this new system. For further information, please go online and consult this website: <http://www.dgt.gov.tw/Chinese/News-press/94/press-dgtnews-941013.htm>.

■ Renminbi Trading Inaugurated in Kinmen and Matsu

Trading in the Renminbi (RMB) cash, the currency of mainland China, was inau-

gurated on the offshore islands of Kinmen and Matsu on Oct. 3. The Central Bank recently announced that financial institutions there can apply to engage in this new business.

Under the Regulations Governing the Operation of Transportation Links Between Kinmen/Matsu and the Mainland Area, trading in the RMB on Kinmen and Matsu is limited to people of the two islands and the mainland who travel back and forth to mainland China. The amount of each RMB trade may not exceed the maximum amount, as stipulated by the competent authority, that can be carried when entering or departing Kinmen or Matsu. The rate of exchange for the RMB is determined by each of the financial institutions concerned. For further related information, please visit this website: http://gazette.nat.gov.tw/EG_FileManager//eguploanpub/eg011178/ch04/type2/gov32/num1/Eg.htm.

Legislative Updates

■ Government Institutes Major Relaxation of Business Registration

The Ministry of Economic Affairs has drafted a revision of the Business Registration Law that will allow companies to operate their businesses with greater flexibility

and nimbleness. In the future, companies will be allowed to operate not only the businesses for which they have permits, but also any other business that is not forbidden or restricted by law. The revision has been approved by the Executive Yuan, and was sent to the Legislative Yuan for deliberation on Oct. 3.

The revision deletes the original provision in the Business Registration Law that prohibits companies from operating outside the scope of their registered business, allowing them to engage in other businesses as well. At the same time, since the responsible person or partner of a business bears unlimited responsibilities for the business, the revision deletes the stipulation that the company's capital must be audited and certified by a CPA; instead, this work will devolve upon the competent agency in the area where the business is located. This will reduce the cost of operation.

In addition, the revision moves to boost the development of the tourism industry by exempting home-stay facilities from the necessity of applying for business registration. Under the Statute for the Development of Tourism, home stays make use of empty rooms in the home of the proprietor to provide tourists with accommodation in a country setting where they can enjoy the local

culture, natural scenery, ecology, environmental resources, and farming, forestry, and fishery activities. The operation of a home stay is considered a family sideline business that, because of its small scale, does not need to carry out business registration.

To facilitate administration, the revision also stipulates that when business operations violate the laws or regulations of the target industry, the competent authority of the industry can punish the offending business by ordering its closure. After the closure order is confirmed, the punishing agency should notify its own authority in charge to annul the violator's business registration or some of the items on the registration. To keep companies that have not carried out business registration from affecting business order, the revision adds a provision requiring persons who engage in such behavior to carry out business registration before a set deadline. The agencies in charge will be required to make matters regarding business registration public, and to publish those matters on their information websites. For more information, please go online and visit this website: <http://www.moea.gov.tw/~meco/doc/ndoc/941012.doc>.

■ No Duty for Processing by Bonded IC Testing and Packaging Plants

On Sept. 20, the Ministry of Finance (MOF) approved a measure designed to make the island's IC packaging and testing companies more competitive. In the future, bonded factories that engage in IC packaging and testing will be able to carry out those operations on commission from firms in tariff-liable areas without being required to pay customs duties on the processed products when they are returned to those firms. In addition, they can submit monthly reports on such processing. This is a major improvement over the past procedure, which required testing and packaging operators engaging in such operations to submit an application to customs authorities for each batch of work and to pay customs tariffs on the non-bonded materials used in processing.

The MOF indicates that to simplify administrative operations, facilitate customs-clearance procedures, and reduce the tariff burden on operators, it will, in the future, handle such operations in accordance with the Regulations Governing Bonded Factories, the main points of which are as follows: 1. Since the customs tariff on finished IC products is zero, bonded factories receiving commissions for packaging and testing from companies in tax-liable areas will not have

to pay customs duties on the use of materials from bonded areas. 2. There will be no need to submit an application for each case of processing; instead, monthly reports will be submitted. 3. For cases that involve domestic sale and therefore require the payment of customs duties, the dutiable value need not include the value of the chips. The resulting products will be taxed according to their invoice price. For more related information, please visit this website: <http://www.mof.gov.tw/content/asp?CuItem=25363&baseDSD=5&CtUnit=11>.

■ Government Formulates Mailing Invoice Exemption Rules for Internet Sales Items

To reduce the cost of issuing invoices by Internet operators while protecting the interests of consumers, the Ministry of Finance (MOF) has promulgated Operating Rules for the Issuance of Unified Invoices for Internet Purchases to Non-business Persons. Internet operators who sell goods over the Internet and who conform to the relevant conditions can first post the contents of a computer unified invoice on their web page for the customer to retrieve, and then notify the customer via simple message or e-mail without having to mail a separate invoice.

The MOF explains that under the new rules, Internet operators who make use of the exemption from mailing invoices will be able to save an average of NT\$20 on the cost of handling invoices for each Internet transaction. The rules require the operators to be companies limited by shares; they must have been approved to use computer unified invoices; their operating revenue for the previous fiscal year must have reached at least NT\$500 million; their profit-seeking-enterprise income tax for the most recent two years must have been audited and certified by a CPA, or they must have been approved to use the blue report form, or their annual accounts must have been examined by the Ministry of Audit; and they must have put up a guarantee bond of NT\$5 million. Companies that meet these conditions may apply to the national tax bureau at the location of their business registration to apply the new operating rules; the scope of application, however, is limited to the online sale of goods or services to non-business entities.

To protect the interests of consumers, the Internet operators are required to mail printed unified invoices to those buyers who so request. In addition, the Internet operators must mail winning invoices by registered

post to the winning buyers within 10 days of the drawing of the winning numbers.

The MOF indicates that the current operating rules are transitional. An integrated electronic invoice service platform is expected to be completed by the end of 2006, and when the related systems are installed and the relevant laws and regulations revised, it will switch to the use of that platform and the relevant rules. For more information, please visit <http://www.dot.gov.tw/ch/display/show.asp?id=1461>.

■ **Cross-area Customs Declaration for Free Trade Zones Scheduled for Next Year**

To build a barrier-free customs environment and simplify customs-clearance procedures, the Directorate General of Customs announced Rules for Cross-Area Customs Declaration by Customs Brokers on Sept 16. Customs brokers that apply to make cross-area customs declarations and are commissioned to handle customs clearance for goods can carry out customs declaration in different areas to achieve the goal of "Declaring of customs in a single place for clearance nation-wide." This new measure will be implemented on Jan. 1 next year (2006), and will initially be limited to use in free trade zones.

The Directorate General of Customs indicates that this simplification will facilitate the long-term development of the customs brokerage industry, and will benefit importers and exporters as well by allowing them to commission a single broker to carry out customs clearance in different areas, thereby saving not only traveling time but also postal delivery costs. In addition, the guarantee fund that companies must put up in order to take advantage of the release of shipments before customs duties are paid can be applied to all customs areas, allowing the companies to use their funds more flexibly and alleviating capital pressure on them. For more related information, please go online and consult this website: <http://web.customs.gov.tw/ct.asp?xItem=23215&ctNode=4298>.

Deregulation Progress

■ Rules Eased for the Display of Mainland Chinese Printed Materials and Broadcast Programs in Taiwan

In consideration of the present state of development of the film and TV industries on the two sides of the Taiwan Strait, on Sept. 26, the Mainland Affairs Council (MAC) approved a revision of Articles 2 and 25 of the Guidelines for Permitting Mainland Publications, Movie Films, Video,

Radio and Television Programs to Enter, or to Issue, Sell, Produce, Broadcast, Exhibit, and Emulate in Taiwan Region. Under the revision, mainland Chinese magazines, books, publications, and movie programs that receive permission will be allowed into Taiwan for display, and the authorization of their intellectual property rights, their sale, and other transactions will be allowed. Applications must be made a month in advance.

The MAC indicates that this relaxation is being taken in response to the practical needs attendant upon such display activities, and to conform to the practice in other countries in regard to such activities. For more related information, please visit this website: <http://www.mac.gov.tw>.

■ Jewelry Stores and Handicraft Shops Allowed to Engage in Money Exchange

Following the approval in March this year of convenience stores, railway stations, and national scenic area administrations to serve as currency exchange locations, on Oct. 6, the Central Bank again promulgated a revision of the Regulations Governing the Establishment and Administration of Foreign Exchange Bureaus to include handicraft shops, jewelry stores in the scope of operations that are allowed to apply for establishment as currency exchange points.

Tourist Hotels, travel agencies, department stores, and now handicraft and jewelry shops are allowed, after receiving permission from the Bank of Taiwan, to exchange foreign cash and traveler's checks held by foreign tourists into New Taiwan dollars, up to a maximum of US\$10,000 or its equivalent for each transaction. For more information, please go to this website: http://gazette.nat.gov.tw/EG_FileMnager/eguploadpub/eg011190/ch04/type1/gov32/num1/Eg.htm.

■ Mainland Chinese Business People Entering Taiwan Exempted from Cross-Guarantee

The Ministry of the Interior (MOI) reiterated recently that to enliven trade relations across the Taiwan Strait, under the Regulations Governing Permission for People from the Area of Mainland China to Travel to Taiwan for Commercial Activities that were promulgated on Feb. 1, 2005, mainland Chinese citizens coming to Taiwan for such purposes are no longer required to provide cross-guarantee documentation.

The MOI believes that this liberalization will facilitate travel to Taiwan for business people from mainland China. For the contents of the regulations, please visit this

website: <http://www.mac.gov.tw/big5/law/economy/103161.htm>.

■ Website and Hotline Set Up for Foreign Residents

In response to calls from foreign chambers of commerce for more English-language information, the Research, Development and Evaluation Commission and the National Police Administration jointly carried out planning for a foreign residents' service network and hotline, and put them into operation in August this year. These new facilities provide a diverse range of bilingual information services aimed at creating a friendly English-language living environment and helping foreigners fit comfortably into the local community.

The website offers a broad range of services designed to make life easier for long-term foreign residents of Taiwan and to alleviate inconveniences caused by language and cultural differences. These services encompass matters regarding visas, residency, entry and exit, work, education, taxation, medical care, health insurance, children, safety, residence, transportation, public utilities, religion, life, and emergency communication. For questions that cannot be resolved completely online or that involve other issues and so cannot be answered immediately,

or for such communications as suggestions and complaints, the customer service center personnel will notify the relevant agency in charge to provide an answer within three working days.

Since the time it began operating, the Information for Foreigners website has been visited more than 72,000 times. Foreigners and local citizens alike are welcome to visit <http://iff.npa.gov.tw> with their inquiries, or to call the 24-hour International Community Service Hotline at 0800-024-111.

Statistics

■ Taiwan's Competitiveness Ranks the 5th in the World, the 1st in Asia

According to the *Global Competitiveness Report 2005-2006* published by the World Economic Forum (WEF) on Sept. 28, Taiwan ranks the fifth in the world among the 177 countries covered in world competitiveness, after Finland, the United States, Sweden, and Denmark. Among Asian countries, Taiwan again takes the first place, ahead of Singapore in the sixth place, Japan in the 12th, and South Korea in the 17th, among others.

The WEF's "World Competitiveness"

index is made up of three component indexes: technology, public institutions, and macroeconomic environment. Taiwan ranks the third in the world in the technology index; the WEF points out that the island's performance in technology and innovation is outstanding, especially in corporate potential for and absorption of innovation, cooperation between industry and academic in research, and use of the latest mobile phone, personal computer, and Internet services technology.

With the exception of South Korea, whose growth competitiveness ranking advanced from the 29th place in 2004 to the 17th this year, most of the countries of Asia slipped in the most recent report. Hong Kong dropped from the seventh to the 26th place, and both Japan and mainland China retreated three spaces.

The report also uses the Business Competitiveness Index (BCI) developed by Prof. Michael E. Porter of Harvard University, which measures a country's current productivity and economic capability, as a supplement to growth competitiveness. In this index Taiwan ranks the 14th among the

110 countries covered, an advance of three steps compared with last year. Among Asian countries, Taiwan ranks the third.

Table 1 2005 World Competitiveness Rankings

Country	Rank	Country	Rank
Finland	1 (1)	The Netherlands	11 (12)
United States	2 (2)	Japan	12 (9)
Sweden	3 (3)	United Kingdom	13 (11)
Denmark	4 (5)	Canada	14 (15)

■ Taiwan Ranks the 4th in Asia in Clean Government

In the 2005 clean government index published by Transparency International (TI), Taiwan ranks the fourth in Asia behind only Singapore, Hong Kong, and Japan. Mainland China is in the 78th place.

In the “Corruption Perceptions Index” issued by TI Taiwan on Oct. 18, among the 159 countries throughout the world that were evaluated during the survey the place of honor for cleanest government is taken by Iceland while the second through fifth places are by Finland, New Zealand, Denmark, and Singapore. Taiwan is in the 32nd place worldwide, an improvement of three places over last year.

Transparency International was established in 1993 as a non-governmental organization devoted to the fight against corruption. It is headquartered in Berlin and has branches in 90 countries, and the Taiwan branch was set up in 2002.

■ 行政院勞退年金保險免稅草案付委

因應勞工退休金新制施行，為促進勞退金有效運用，行政院院會於10月19日審查通過所得稅法部分條文修正案，勞工依個人帳戶制或年金保險制自願提繳退休金及年金保險費，合計不超過每月薪資總額6%，在自提階段不計入薪資所得課稅。預期本項修法將有助保險業者拓展勞退新制年金保險市場。

此次部分修法之主要目的，係促使勞退新制之「年金保險制」與「個人帳戶制」課稅原則趨於一致。依據「所得稅法」第14條第一項修正規定，勞退條例之自願提繳年金保險費，將比照個人帳戶制，不計入年度薪資所得課稅，二制合計免稅金額以工資6%為上限。勞工退休時，年金保險給付視為退職所得，應併同雇主提撥部分，適用退職所得定額免稅規定。另為鼓勵營利事業為勞工提繳退休金或年金保險費，增列營利事業提繳之勞退金或年金保險費，得以費用列支，惟其提繳之限額，不得超過當年度已付薪資總額之15%。

目前所得稅法的規定則是，勞工退休金自願提繳部分可撥入「個人退休金專戶」或「年金保險」，而選擇提撥「個人退休金專戶」部分，在其每月工資6%範圍內，得自當年度個人綜合所得淨額中全數扣除，但提撥年金保險部

分，則被歸於列舉式扣除額中個人每年保費2.4萬元免稅範圍計算。

為配合「勞工退休金條例」自今(94)年7月1日施行，有關年金保險納入薪資所得免稅之修正草案，待立法院審議通過後，將追溯自今年7月1日起實施。

最新政策

■ 行動電話號碼可攜式服務起跑

被視為電信自由化中革命性政策的行動電話號碼可攜式（Number Portability）服務於10月15日正式開辦，未來申辦門號可攜式服務的行動電話用戶，更換電信公司將不需轉換電話號碼，此項新開放措施預計將使電信市場競爭更為激烈，並促使業者提供消費者更佳服務。

消費者申辦可攜式行動電話門號，可向欲移入之新電信業者提出申請，經業者透過財團法人電信技術中心建置完成之資料庫管理系統告知原電信業者，清查申請人是否有綁約、積欠電話費或違反契約情形，清查無誤後，4個工作天可完成申請。用戶移出之原電信公司可收取最高240元之系統移轉費，2G、3G門號都可以轉移，但PHS並沒有納入此一系統。查詢相關資訊請至<http://www.dgt.gov.tw/Chinese/News-press/94/press-dgtnews-941013.shtml>。

九十四年十一月

■ 金馬開辦人民幣買賣業務

金門及馬祖地區於10月3日起，將可從事人民幣現鈔買賣。中央銀行日前公告，金融機構可依規定向中央銀行申請試辦人民幣現鈔買賣業務。

此項業務之交易對象，以符合「金門馬祖與大陸地區通航實施辦法」中所訂定往來大陸地區與金門馬祖之台灣與大陸地區人民為限。每筆人民幣現鈔買賣金額，不得超過主管機關所訂攜帶人民幣入出境之限額。至於人民幣現鈔買賣交易匯率，由各金融機構自行決定。查詢相關資料請至 http://gazette.nat.gov.tw/EG_FileManager//eguploadpub/eg011187/ch04/type2/gov32/num1/Eg.htm。

立法動態

■ 商業登記制度將大幅鬆綁

因應快速變遷之經濟環境，為便利業者彈性靈活經營，經濟部參考公司法立法體例，擬具完成「商業登記法」修正草案，未來商業經營業務，除許可業務外，其餘法規非禁止或限制之業務，均得以經營。修正草案業經行政院院會通過，並於10月3日函送立法院審議。

商業登記法此次修正，刪除原條文規定商業不得經營其登記範圍以外之業務，亦即除許可業務外，其餘法規非禁止或限制之業務，均得以經營。同時，因商業負責人或合夥人本身

就商業負無限責任，刪除現行資本額應委託會計師查核簽證之規定，將由會計師查核簽證之工作，回歸商業所在地主管機關自行審查，以降低商業經營成本。

此外，為促進觀光產業發展，民宿經營者可免除商業申請登記。依據發展觀光條例，民宿為利用自用住宅空閒房間，結合當地人文、自然景觀、生態、環境資源及農林漁牧生產活動，提供旅客鄉野生活之住宿處所，以家庭副業方式經營，因屬小規模營業範疇，免辦商業登記。

為利於管理，草案亦明定商業經營違反目的事業主管機關之法律或法規命令時，由各該目的事業主管機關進行勒令歇業處分；勒令歇業之處分確定後，始由處分機關通知主管機關廢止其商業登記或部分登記事項。而為避免未經設立登記之違規業者影響商業秩序，條文增訂相關行為人應限期辦妥商業登記。為便利民眾查詢，主管機關需公開商業登記事項，並公示於資訊網站上。有關本則內容相關資訊查詢請至 <http://www.moea.gov.tw/~meco/doc/ndoc/941012.doc>

■ 半導體測試封裝保稅工廠受託加工零關稅

為提升IC封裝、測試業競爭力，財政部於9月20日對保稅工廠之半導體測封業者釋出大利多。未來從事半導體封裝、測試之保稅工廠，接受課稅區廠商委託，對非保稅晶圓進行

封裝、測試，再回貨給課稅區廠商時，將不需補課關稅，並可以按月彙報方式申請辦理。

以往半導體封裝、測試業之保稅工廠，受課稅區廠商委託，對非保稅晶圓進行封裝、測試，被認定為受託加工業務，需逐批向海關提出申請，而作業中添加之保稅原料，需依規定辦理補稅。

財政部表示，為簡化行政作業、便捷通關程序並減輕業者租稅負擔，未來將依「海關管理保稅工廠辦法」相關規定辦理，重點包括：

1、由於IC成品之關稅稅率為零，保稅工廠受課稅區廠商委託辦理封裝、測試業務，如有添加保稅原料，不再補繳關稅。2、不需逐案申請，得以按月彙報方式辦理。3、涉及內銷需補稅者，營業稅之完稅價格不加計晶圓價值，依其所開立之發票價格課稅。查詢相關資訊請至 <http://www.mof.gov.tw/content.asp?CuItem=25363&baseDSD=5&CtUnit=11>。

■ 網路銷貨免寄發票辦法出爐

為了節省網路業者寄送發票成本，在兼顧消費者權益考量下，財政部發布「網路購物開立統一發票交付非營業人作業規定」，符合相關條件之網路業者於網路上銷售貨物，可將電子計算機統一發票內容先置於網頁供買受人查詢，再以簡訊或電子郵件通知顧客，不需另行寄送發票。

財政部表示，適用銷貨免寄送發票之網路

業者，進行每筆網路交易，將可省下每張平均約新台幣20元的統一發票處理成本。而此項新規定之相關條件包括，業者須為股份有限公司組織，且經核准使用電子計算機統一發票，前一年度之年營業額達新臺幣5億元，最近2年度之營利事業所得稅係委託會計師查核簽證或經核准使用藍色申報書或年度決算係經審計部審定，並提供新臺幣5百萬元保證金。符合條件之業者可向營業登記所在地國稅局申請適用該作業規定，但適用範圍僅限於網路上銷售貨物或勞務予非營業人。

兼顧消費者權益，買受人如要求交付統一發票紙本時，網路業者仍應將統一發票收執聯寄送買受人。另每期統一發票開獎後10日內，網路業者應將當期中獎統一發票之收執聯以掛號郵遞方式寄送買受人，以供兌獎。

財政部表示，目前之作業規定為過渡性做法，電子發票整合服務平台預計於95年底完成，待相關系統建置及法規修正完成後，將改依該平台作業及相關規定辦理。查詢相關資訊請至 <http://www.dot.gov.tw/ch/display/show.asp?id=1461>。

■ 自貿港跨關區報關明年啟動

為建構無障礙通關環境，並簡化通關程序，財政部關稅總局9月16日公告「報關業跨關區報關應配合辦理事項」，申請跨關區報關之報關業者，受託辦理貨物通關，可進行不同

九十四年十一月

關區報關，達到「一處申報全國通關」。新措施將於明(95)年1月1日起開辦，初期實施限於由自由貿易港區。

關稅總局表示，這項新措施有助於報關業者長期發展，對進出口廠商而言，所有之進出口貨物可委由同一家報關業申報，不僅節省往來聯繫時間，又可減少郵遞費用。而為適用貨物先放後課廠商所繳納之「擔保額度」，各關區可共同使用，企業資金更能靈活運用，並紓解資金壓力。查詢相關資訊請至<http://web.customs.gov.tw/ct.asp?xItem=23215&ctNode=4298>

開放進度

■ 放寬大陸出版品廣電節目來台展覽觀摩

考量兩岸影視產業發展現況，行政院大陸委員會於9月26日委員會議通過「大陸地區出版品電影片錄影節目廣播電視節目進入臺灣地區或在臺灣地區發行銷售製作播映展覽觀摩許可辦法」第2及第25條修正草案，未來大陸地區雜誌、圖書、出版品、電影節目經許可後可來台展覽，可進行著作財產權授權及讓與等交易，並放寬申請時間為一個月前。

陸委會表示，因應相關展覽活動實務上需要，並參照各國影視展覽活動之慣例。查詢相關資訊請至<http://www.mac.gov.tw>。

■ 大陸商務人士來台免對保手續

為活絡兩岸經貿往來及需求，內政部日前重申，企業依據該部94年2月1日訂定發布的「大陸地區人民來臺從事商務活動許可辦法」，辦理大陸商務人士來台從事商務相關活動，其檢據之保證書免辦理對保手續。

內政部預期，本項放寬措施將有助促進商務人士往來便捷性。查詢「大陸地區人民來臺從事商務活動許可辦法」內容請上網<http://www.mac.gov.tw/big5/law/economy/103161.htm>。

■ 開放銀樓手工藝品業設置外幣收兌處

繼今(94)年3月放寬便利商店、火車站及國家風景區管理處等為外幣收兌處，中央銀行於10月6日再度修正發布「外幣收兌處設置及管理辦法」，將手工藝品業、金銀及珠寶業(俗稱銀樓業)納入可申請設置成為外幣收兌處之行業範圍。

包括觀光旅館、旅行社、百貨公司及銀樓業等，經向臺灣銀行申請核可後，可提供持有外國護照之外國旅客及來臺觀光之華僑，外幣現鈔或旅行支票兌換新臺幣之服務，每筆收兌金額以等值美金一萬美元為限。查詢相關資訊請至http://gazette.nat.gov.tw/EG_FileManager/eguploadpub/eg011190/ch04/type1/gov32/num1/Eg.htm。

■ 外人生活服務「網站」與「熱線」

回應外國商會對公共及生活英語資訊的需求呼籲，由研考會與內政部警政署共同規劃之外國人生活服務網站與熱線已於今年8月啟用營運，提供多元化之雙語資訊服務，以營造友善之英語生活環境，協助外籍人士融入本地生活。

為使在台長期居留與工作外籍人士，減輕因語言、文化等隔閡所造成之生活不便，網站提供生活化之廣泛服務，包括簽證、居留、入出境、工作、教育、稅務、醫療、健保、育兒、安全、住宅、交通、公共事業、宗教、生活、緊急聯絡等相關資訊。對於線上無法提供完整內容或涉及其他問題無法立即回覆，或屬建議、訴願等事項，則透過「後送作業」，由客服中心人員通知各權責機關在3個工作天內回覆。

「外國人在台生活諮詢服務網」開站至今，已有7萬2千多瀏覽人次，外國友人或國人如有生活上的服務需求，歡迎至<http://iff.npa.gov.tw>查詢，或撥打24小時全年無休0800-024-111服務熱線。

統計資料

■ 世界競爭力 台灣全球第5 亞洲第1

根據世界經濟論壇（World Economic Forum, WEF）於9月28日公布之「2005-2006全球競爭力報告」（The Global Competitiveness Report 2005-2006），在受評比的117個國家中，我國競爭力排名全球第5，僅次於芬蘭、美國、瑞典和丹麥。在亞洲地區，我國再度蟬聯第1，超越新加坡(第6名)、日本(第12名)及南韓(第17名)等各國。

世界經濟論壇之「成長競爭力」總指標下包含總體經濟環境、公共體制及技術三大指標。我國在技術指標方面表現優異，居全球第3，WEF指出，台灣在科技與創新表現優異，尤其是企業在創新的潛力與吸收、產學在研究上的合作，以及在行動電話、個人電腦、網路服務運用最新技術方面，更為突出。

此次全球競爭力評比，亞洲國家除南韓由2004年第29名晉升至今年的第17名，特別受到矚目外，其他國家多呈現名次退步狀況，香港由第7名退至第26名、日本及中國均退步3名。

報告也同時呈現由哈佛大學商學院教授Michael E. Porter提出的「商業競爭力」（Business Competitiveness Index, BCI）（衡量一國當前生產力和當前經濟表現的能力）評比，作為成長競爭力的補述，在受評比的110個國家中，我國排名第14，較去年進步3名，在亞洲國家中則排名第3。

表 1 2005 年世界成長競爭力排名

國家	排名	國家	排名
芬蘭	1(1)	荷蘭	11(12)
美國	2(2)	日本	12(9)
瑞典	3(3)	英國	13(11)
丹麥	4(5)	加拿大	14(15)
台灣	5(4)	德國	15(13)
新加坡	6(7)	紐西蘭	16(18)
冰島	7(10)	韓國	17(29)
瑞士	8(8)	阿拉伯聯合大公國	18(16)
挪威	9(6)	卡達	19(-)
澳大利亞	10(14)	愛沙尼亞	20(20)

■ 我國家清廉程度亞洲第 4

由「透明國際」組織（Transparency International）調查之2005年國家清廉指數排行，我國在亞洲國家中排名第4，僅次於新加坡、香港及日本，而中國大陸則名列第78名。

依據國際透明台灣分會(TI Taiwan)於10月18日公布之「貪污印象指數」(Corruption Perceptions Index)報告指出，全球159個受評國家中，清廉度最佳之國家為冰島，第2至5名依序是芬蘭、紐西蘭、丹麥、新加坡。而台灣之清廉度全球排名第32，較去年進步3名。

這項調查報告是由國際透明組織，選取世界經濟論壇全球競爭力報告、瑞士洛桑管理學院世界競爭力年報、政治與風險評估顧問公司亞洲商情研究等分項指標，針對全球國家的貪污印象進行評比，以十分為滿分，分數越高代表清廉程度越高。

國際透明組織於1993年成立，為致力於抑制貪污腐敗國際性非政府組織，總部設於德國柏林，於全球90個國家設有分支機構，台灣分會則於2002年成立。

符 號 SYMBOLS

- =表示數字不及一單位 Less than one unit
…=表示數字不明 Not available
—=表示無數字 No figure
*=表示數字已予修正 Revised figure

度量衡單位簡寫 ABBREVIATIONS OF WEIGHTS AND MEASURES

bbl	美桶	barrel
cu. ft	立方英尺	cubic foot or feet
cu. yd	立方英碼	cubic yard
ft	英尺	foot or feet
g t	總噸	gross ton
hg	公兩	hectogram
hl	公石	hectoliter
Imp. gal	英加侖	Imperial gallon
kg	公斤	kilogram
kl	公秉	kiloliter
km	公里	kilometer
kwh	度	kilowatt-hour
l	公升	liter
lb	磅	pound
t	長噸	long ton
m	公尺	meter
mi	英里	mile
m^3 (cu.m)	立方公尺	cubic meter
m t	公噸	metric ton
p-km	延人公里	passenger-kilometer
sq. ft	平方英尺	square foot or feet
sq. yd	平方碼	square yard
s. t.	短噸	short ton
t-km	延噸公里	ton-kilometer
U.S. gal	美加侖	United States gallon
yd	碼	yard
