之探討

肆、個案研究：加拿大財政暨債務

管理機制之探討

伍、結論與建議

Abstract

Many advanced countries have established debt management mechanisms. Among these, the OECD has implemented spending cuts, corporatized budget mechanisms, and other such fiscal reforms; while the EU has established mid-term and long-term warning mechanisms (stability programs) with good results in debt management.

This study identifies a positive correlation between economic growth and fiscal revenue and expenditure, and a negative relationship with accumulated debt balance. Also, empirical findings show that where the government long-term debt ratio is set at 67% in the short to medium term and adjusted to 60% in the long term, it has the greatest effect in stabilizing the debt structure.

From examination of Canadian local government fiscal operations, this study finds that the local governments actively increased property tax and fee revenue; met capital expenditures from public utility income and self-financing funds; and set ratios for debt principal to tax revenue and total expenditure, to serve as early-warning indicators for controlling the growth of debt.

* 民國92年度赴加拿大出國考察報告，提報93年7月5日行政院經建會第1180次委員會議；筆者對與會委員提示修正的寶貴意見，謹此致謝。另本文撰寫過程中，承黃處長肇熙費心指導，亦特此致謝。惟本文若仍有任何謬誤，當屬筆者之責。

**作者為行政院經濟建設委員會財務處專員。

壹、前 言

截至92年度，我國各級政府債務累計未償餘額預算數為36,566億元，其中，中央政府為32,086億元，地方政府合計為4,480億元，各縣市則為1,726億元，雖然均低於公共債務法規定之上限，政府仍積極改善財政狀況，減少債務負擔，如依據行政院92年4月核定之財政改革方案，陸續推動各項短、中、長期之財政改革措施。

鑑於OECD、歐盟各國陸續推動國家債務管理績效良好，本文擬探討先進國家債務管理機制及降低財政赤字之具體有效作法，供政府在未來制定控管債務及推動財政改革決策時參考。但在比較先進國家與台灣公共債務時，應注意定義上的差異，依OECD對公共債務之定義，係指國民會計帳(national account)中各級政府部門(包括：中央、地方政府、社會安全部門及類似我國作業基金等)內所有機構之長短期債務與義務；歐盟馬斯垂克條約則規範為一般政府(包括：中央、地方政府及社會安全基金)金融義務，不包括商業信用及會計上遲延。我國依公共債務法第三條規定，公共債務包括：中央及各地方政府之公債、國庫券、國內外借款及保證債務。換言之，先進國家公共債務涵蓋短期債務、社會安全部門或基金之相關債務；台灣則否。

本文架構除前言外，其次，介紹OECD各國財政狀況暨債務管理機制；第三，探討歐盟地區財政狀況暨債務管理機制；第四，分析加拿大政府財政狀況及其相關債務管理機制與具體措施；最後為結論與建議。

貳、OECD各國財政狀況暨債務管理機制之探討

一、近十年來財政及債務狀況分析

(一)財政狀況與總體經濟之關聯

觀察OECD國家財政收支與經濟成長率的變化，可以發現其財政赤字占GDP的比率在1994年尚達4.3%，而至2000年已達到財政收支平衡；同期間，景氣是呈現好轉的趨勢，經濟成長率由3.2%增至3.8%。整體而言，兩者之間存在正向關係；亦即景氣好轉，財政狀況可獲得較大程度的改善。加上OECD國家推動一連串減少赤字之財政政策與預算改革，更加速財政收支之改善；惟2003年經濟成長率劇降至1.9%，OECD國家財政赤字占GDP的比率再度擴大至3.6%。

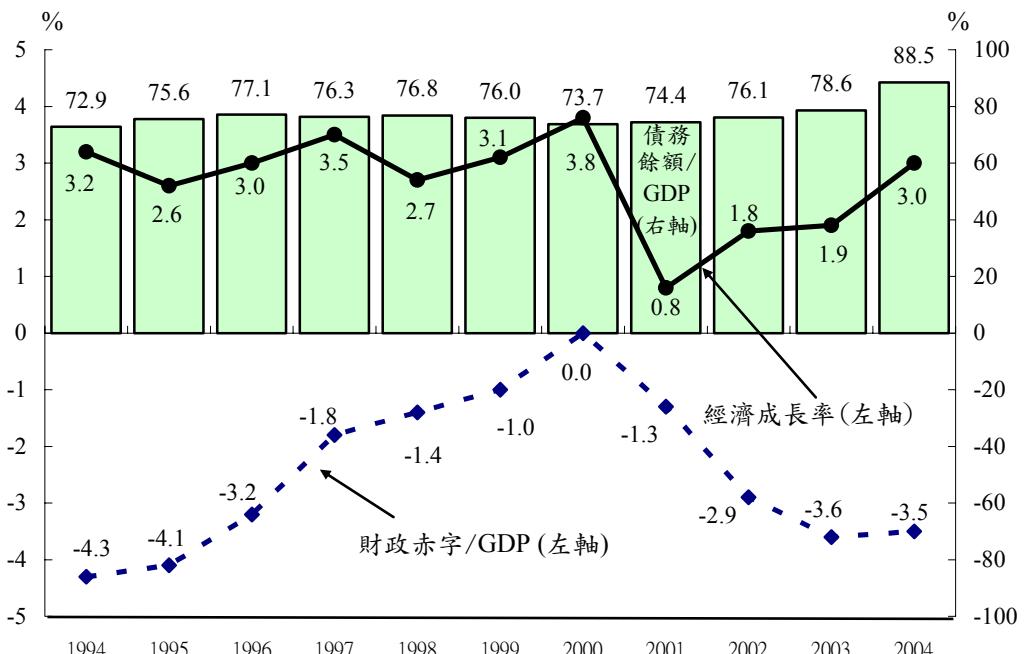

(二)債務狀況與總體經濟之關聯

OECD國家累積債務餘額占GDP比率由1996年77.1%的高點，持續降低至2000年73.7%的低點；同期間，經濟成長率亦由3%增加為3.8%(1997年略降為2.7%)，顯示政府債務與景氣具有反向關係。即景氣好轉，政府財政狀況較容易改善，債務累積速度亦會降低；至2003年財政赤字惡化，其債務比率又急速擴增至78.6%。

(三)財政與債務狀況之關聯

若從政府財政收支與債務餘額兩項變數的關係來觀察，可以清楚發現，1994至2000年，OECD國家財政收支大幅改善，債務累積亦從1996年的高點降到2000年的低點，可驗證兩者呈現反向關係。此符合一般財政理論的觀點，即改善財政收支是降低政府債務餘額有效、直接的方法。

圖1 OECD國家經濟成長率、財政盈餘(赤字)、債務餘額

資料來源：OECD, *Economic Outlook*, 74, 2003。

二、採行之財政政策與債務管理機制

(一)控制預算赤字

OECD各國面對預算赤字，所採取的財政政策，大致可歸納為下列數項：

1.總體目標

訂定減少預算赤字的目標，例如赤字、支出或收入占GDP比率，以及未償債務占GDP比率，如歐盟會員國家對進入歐洲貨幣聯盟(EMU)所訂的馬斯垂克條約(Maastricht Treaty)，即規定有嚴格的財政標準作為入會條件，以債務餘額占GDP的比率必須低於60%，每年度預算赤字占GDP的比率不得超過3%。

2.由上而下控制支出

主要在對各部會與機關的支出預算設置上限。如英國在預算籌編前，即由財政部訂定支出總額，各機關必須在額度內分配計畫與編列預算。其他較嚴格執行的國家，如丹麥、芬蘭、冰島、挪威等。

3.通盤或特定目標的支出刪減

由上而下控制支出，有時適用於通盤的支出刪減，有時則針對特定支出刪減。採通盤刪減的國家較少，如芬蘭、澳洲、丹麥等在1980年代的作法。大多數國家皆對特定支出計畫刪減，刪減社會移轉支出者，如德國對失業救助、日本對年金與醫療保險、美國對健保與社會安全；刪減教育與公共投資支出者，如比利時；刪減產業與農業補助者，如澳洲；凍結人事支出者，如義大利、西班牙、日本；執行減薪政策者，如德國與加拿大；凍結國防支出者，如比利時、英國、德國、法國。

4.民營化與出售政府資產

包括公營事業民營化及公有財產出售等。許多國家將這些出售股票與財產的收入，用於債務還本，如澳洲、奧地利、加拿大、法國、墨西哥、葡萄牙、與英國等。

5.市場型態機制

係指將公共財或服務外包民間經營提供。例如英國自1992年起進行大規模的政府服務計畫的市場化。

6.重建與次級政府關係以及移轉權責予下級政府

建立中央與地方財政新合作關係，共同提供服務。部分國家則將以往計畫型補助改為一般性補助，提升補助款的使用效率，如瑞士、芬蘭；少數國家將支出負擔移轉地方政府，如義大利；德國則重新劃分財政收支，強調財政公平；澳洲與加拿大則減少對地方補助，並促成地方的財政改革。

7.租稅改革

主要在於擴大稅基與提升租稅制度的效率。大多數國家皆檢討租稅減免項目，少數國家提高邊際稅率，如美國、德國等。部分國家基於環保因素提高汽油稅等環境相關租稅，如德國、英國、澳洲、丹麥與瑞士等。

(二)訂定支出規模總體目標

過去十餘年間，OECD各國均制訂支出規模的總體目標，據以籌編年度預算。而其目標包括：預算赤字占GDP比率、歲出成長、預算平衡目標年度、未償債務餘額占GDP比率等。

1.預算赤字占GDP比率

- (1)澳洲：1996-97年度預算赤字占GDP比率將小於1%。
- (2)奧地利：1998年度預算赤字占GDP比率將小於3%。
- (3)比利時：1992-96年預算赤字占GDP比率皆須小於3%。
- (4)加拿大：1996-97年度預算赤字占GDP比率降為3%
- (5)法國：1995年度起每年度預算赤字占GDP比率減少0.5%。
- (6)愛爾蘭：赤字占GDP比率低於3%。

2.歲出規模或成長率

- (1)加拿大：計畫支出占GDP比率由1994-95年度的16.2%降至1996-97年度的13.1%。
- (2)德國：歲出成長率必須明顯低於GDP成長率，並進行支出刪減。
- (3)冰島：1994年起每年度刪減經常實質支出5%、移轉支付6%。
- (4)紐西蘭：歲出占GDP比率1997-98年度降為30%；2003-04年度降為27%。

3. 平衡預算目標年度

(1) 澳洲：1997-98年度為預算平衡年。

(2) 冰島：1999年度為預算平衡年。

4. 未償債務餘額占GDP比率

(1) 比利時：1996年度未償債務餘額占GDP比率降為60%。

(2) 芬蘭：訂定債務上限為GDP的70%。

(3) 愛爾蘭：訂定債務上限為GDP的60%。

(4) 紐西蘭：1997-98年度未償債務淨額占GDP比率降至30%；2003-04
年度降至20%

(三) 赤字控制成效

以上國家實際執行後，財政獲得明顯改善。以預算赤字占GDP比率來看，澳洲於1997年為0.6%，1998年有歲計剩餘；奧地利於1998年為2.2%；比利時則自1997年後開始每年皆低於3%；加拿大中央政府1998年開始有歲計剩餘，占GDP的比率為0.4%，直至2003年，還能維持在0.6%的水準；法國自1995年起每年財政赤字占GDP的比率，減少幅度皆在0.5%上下；愛爾蘭、冰島自1997年起財政平衡；加拿大自1994年起各級政府支出占GDP比率逐年明顯下降，由49.7%降至2004年的40.1%(預估值)，減少幅度高達19%；德國則自1998年起逐年下降；冰島在1994年至1998年逐年下降；紐西蘭則有顯著成效。至於未償債務餘額占GDP比率，芬蘭、愛爾蘭與紐西蘭皆達成其預定目標。

各國預算赤字占GDP比率，1986年平均數為4.1%，1990年略降至3%，但1995年仍回升至4%；自1990年代後期推動一連串財政與債務改革措施後，赤字開始逐年減少，1999年降為1%，2000年已達預算平衡；惟近年來因各國經濟成長趨緩，財政收入大幅減少，2003年財政赤字再度升高為3.8%。又1995年OECD中高達23個國家發生財政赤

字，至2000年大幅減少為11個國家，惟2003年時則有17個國家出現財政赤字(詳表1)。

表1 OECD國家年度預算赤字占GDP比率之變化

	1986	1990	1995	1999	2000	2003
預算赤字國家數	18	17	23	13	11	17
預算盈餘國家數	4	6	4	14	16	10
赤字占 GDP 比率平均值(%)	4.1	3.0	4.0	1.0	0.0	3.8

資料來源：同圖 1。

(四)OECD國家實施減少赤字之財政政策與預算改革，其實證經驗歸納如下：

- 1.部分國家數據顯示財政漸趨穩定、未償債務餘額漸減。
- 2.總體目標可促使預算趨於平衡，惟執行時最好配合立法。
- 3.歐盟國家為進入貨幣聯盟，嚴格控制預算，產生財政紀律效果。
- 4.一旦某項政策被採行時，需要持續的政治承諾，因此多年度的財政規劃被視為是重要工具。
- 5.特定目標的支出刪減，依計畫的效率與效能評估，可提供最有效益的結果，特別是在移轉支付計畫方面。
- 6.執行緊縮預算政策時，經濟成長預估必須更確實、謹慎。
- 7.預算與預算過程高度透明，有利於對政府財政行為的外在監督，提升財政政策的信用，與強化刪減預算赤字的政治決心。
- 8.Barro(1997)的研究更指出：改善財政宜從減少支出而非加稅著手；換句話說，財政重整能否成功，取決於所採取的方式。他以二十個OECD國家的經驗發現，成功的國家，皆在於有效的減少支出，而非增加收入，至於支出的減少，大部分係刪減人事與移轉支出，只有少部分刪減公共投資。

(五)推動企業化預算制度

企業化預算制度亦稱為支出控制預算(expenditure control budgeting)，保留總體預算制度中預算規模採由上而下的控制作法，惟在預算編製與執行上採充分授權方式(Jones & McCaffery,1997)，盡量讓各機關擁有較大的財務預算自主權，依其專業判斷，決定資金的使用，而非如以往逐項控制支出。一般作法，係讓支出科目間的資金流用彈性化，年度結束未用完的經費亦得保留，移作其他更有效的使用。換言之，企業化預算制度旨在將公共管理者傳統的官僚行為，轉化為類似企業經理人的行為(Lynch & Lynch,1996)。

企業化預算制度亦承襲以往績效預算制度的基礎，如目標與任務的確定、績效的測量，以及資訊的回饋等，所以也稱為績效基礎預算制度。但更強調授權與課責，授權機關首長在資金使用上的自主與彈性，即資源運用的自由與分權化，以換取較高的生產力；同時，利用契約化的規範及財務資訊的加強，以績效作為課責的依據(Rubin,1996)。Lynch & Lynch(1996;1997)指出：只要有適當的績效指標與課責，即可以將預算的權力下放。

OECD各國採行企業化預算制度的共通作法，就是在支出規模控制方面有集權的趨勢，但在資金的使用方式上卻分權化(Schick, 1990)。在人事支出方面，由以往按編制員額決定的方式，改為與其他支出性質一樣，訂定支出預算額度，授權各機關首長彈性人事管理；除了對支出計畫與項目的彈性化以提升效率，以及支出結餘可以保留以避免消化預算外，更以績效為基礎作為編列預算的依據。

實務上，正確的績效測量必須依賴會計制度的改進，特別是由現金制(cash basis)改為應計制(accrual basis)，俾更能掌握各項計畫實際成本與效益，亦能與商業會計制度接軌。採行應計基礎編列合併報表的國家如表2所示。

表 2 部分 OECD 國家採行應計基礎編列合併報表情形

國名	時程
美國	自 1997-1998 會計年度起
澳洲	自 1997 年起
紐西蘭	自 1991-1992 會計年度起
瑞典	自 1994 年起
芬蘭	自 1998 年起
冰島	自 1992 年起

資料來源：徐仁輝（1999），「當代預算改革的制度性研究」。

1.依計畫產出或結果量化難易分

Willoughby & Melkers(2000)的問卷分析證實，欲成功的實施績效基礎預算制度，必須認清不同機關預算的獨特性；換句話說，並非政府所有機關預算皆適用企業化預算制度(Mascarenhas, 1996)。依學者Wilson(1989)的分類，機關可按產出與結果分為四大類：

- 第一類為產出與結果皆可測量、量化者，稱為生產組織(production organization)；第二類為產出可測量、量化者，而結果不可，稱為程序(procedural)組織；第三類為產出不易觀察或測量，但結果可以測量、量化者，稱為技術(craft)組織；第四種為產出與結果皆不易測量者，稱為覆蓋(coping)組織。
- 除覆蓋組織外，其他三類型組織如能建立績效測量指標，皆可考慮採行企業化預算制度，預算編列採取所謂的結果基礎預算；至於覆蓋組織的預算宜採取行為基礎契約，即仍宜採傳統細目預算，按投入成本編列預算(詳表3)。

2.依支出計畫績效測量難易分

績效的測量可依各機關提供公共服務與財貨的計畫特徵，訂定不同的方法。政府支出計畫性質不同，可按其產出與結果的測量程度難易予以分類為：對個人直接支付、國防支出、對地方政府補助款、利息支出，以及一般行政支出等；其中利息支出係法定必須支出，不需作績效測量。

- (1)對個人直接支付：如：社會安全、醫療照顧等，這類計畫對顧客提供服務，故績效測量可同時著重產出(服務品質)與結果(顧客滿意程度)，以社會安全支出為例，績效測量包括支票準時寄達、金額無誤、顧客滿意度調查等，故此類支出與結果皆明確，易於建立績效測量制度，故可採企業化預算制度。
- (2)國防支出：績效測量通常集中於軍隊的素質與備戰能力，假設訓練有素的軍隊能立即達成任何一種目標，亦即只著重其產出的測量，可採企業化預算制度。
- (3)對地方的補助款：這類補助款不僅結果與產出關係不明確，而且結果與產出的測量皆有其困難，應採細目預算。
- (4)一般行政支出：產出測量雖有困難，但可以對結果測量，可採企業化預算制度(詳表4)。

表3 機關分類與企業化預算制度的採行

結果	測量度	產 出	
		易	難
易	生產組織 (企業化預算)	技術組織 (企業化預算)	
	程序組織 (企業化預算)	覆蓋組織 (細目預算)	

資料來源：同表2。

表4 支出分類與企業化預算制度的採行

結果	測量度	產 出	
		易	難
易	對個人直接支付 (企業化預算)	部分行政支出，如管制、治安 (企業化預算)	
	國防支出 (企業化預算)	對地方補助款 (細目預算)	

資料來源：同表2。

(六)債務管理機制之探討

OECD各國債務管理的機構及方式皆不同(詳表5)，若債務毛額迅速縮減，政府決策者須面臨傳統政府債券市場低流動性的問題。對歐元區12國而言，雖然近年來在基本財政收支上已有改善，但公債餘額仍無法在短期內迅速下降。又1999年起歐元區12個會員國使用歐元(Euro)之後，彼此必須協調債務管理，俾建立規模較大且更有效率的歐洲金融市場。至於日本，債務餘額占GDP的比率迅速攀升，係OECD國家最高者，尤應提高債務管理效率，才可能縮減財政赤字。

表5 美日歐洲國家公共債務管理制度

國 別	債務主管 機構	債務管理 執行機構	目 標	績效評鑑	貨幣政策 考慮	央行予 政府融通
美國	財政部	聯邦準備理事會	提供政府融資，極小成本，維持平衡期限結構	是	否	無
日本	財政部	日本銀行 (央行)	低成本發行	是，但無正式評鑑報告	否	禁止購買新發行公債(除非到期公債再發行)
德國	政府	聯邦銀行	提供政府融資，極小成本	無正式評鑑報告	無制度上協調機制，需聯邦銀行同意發行公債	無(馬斯垂克條約104條)
法國	財政部國庫署	法國銀行 (央行)	長期借款成本極小	無系統性績效評鑑報告，審計院控管	無	無(馬斯垂克條約104條)
英國	財政部	英格蘭銀行 (央行)	成本極小，考慮風險，對市場干擾降至最低	是	避免通貨膨脹方式融通	無(馬斯垂克條約104條)
義大利	財政部	義大利銀行 (央行)	提供政府融資，中期成本極小	1996年起財政部提送公債管理半年年報	無制度上規定	無(馬斯垂克條約104條)
瑞典	瑞典公共債務局(代表政府)	瑞典公共債務局	在貨幣政策限制範圍內提供政府融資，長期借款及管理成本極小化	是，基本資產配置	是(公債局須與央行商議，央行及財政部協調委員會)	無(馬斯垂克條約104條)

資料來源：李顯峰(2002)，「合理規劃公債發行之研究」。

參、歐盟地區財政狀況暨債務管理機制之探討

一、近十年來的財政及債務狀況分析

(一)總體經濟與財政狀況之關聯性

觀察歐盟國家財政狀況，1994年財政赤字占GDP的比率為5.7%，至2000年達到財政盈餘占GDP的比率為0.7%；同期間，經濟成長率亦由2.8%增至3.5%，兩者存在正向關係。即景氣轉佳，財政狀況可獲得較大程度的改善；2003年經濟成長率大幅降至1.2%，歐盟國家又出現財政赤字，占GDP的比率為2.3%。

(二)總體經濟與債務狀況之關聯性

歐盟國家累積債務餘額占GDP比率，由1996年80%的高點，持續降低至2000年72.8%的低點，降幅為9%；同期間，經濟成長率亦由1.7%增至3.5%，顯示政府債務與景氣呈反向關係。即景氣轉好時，政府財政狀況較容易改善，債務累積的速度減緩；2003年經濟成長率大幅降至1.2%，歐盟國家的債務卻仍略降至72.4%，顯示債務控管之監督與干預機制發揮功效，可證明若能建立完善且周延的債務管理機制，即使景氣反轉，亦能控制債務餘額累積的速度不致增加。

(三)財政與債務狀況之關聯性

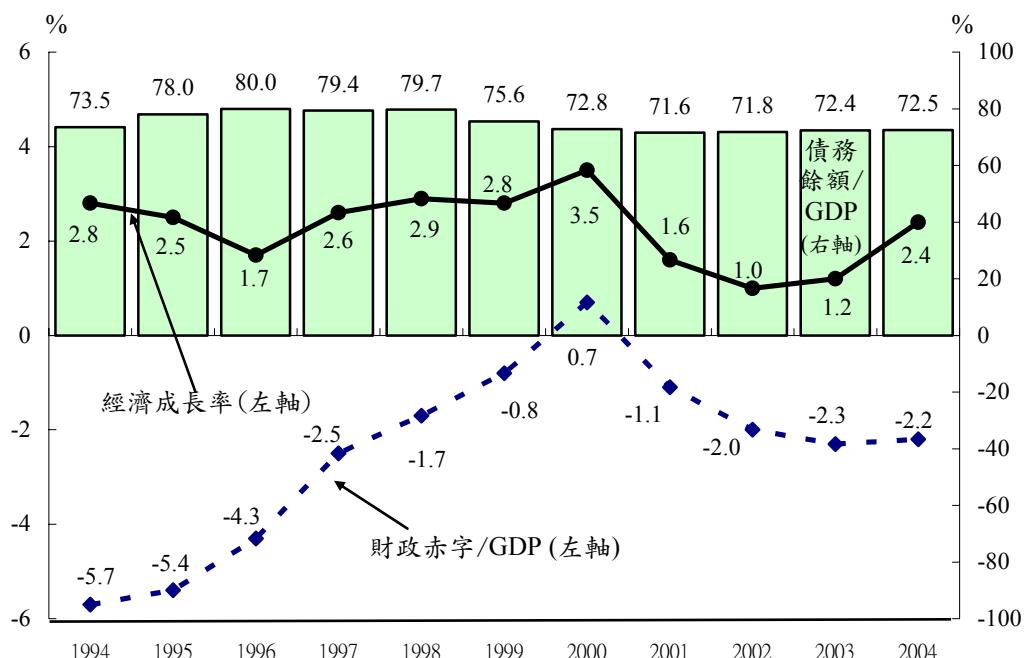

若一樣從政府財政收支與債務餘額兩項變數的關係來觀察，可以清楚發現，1994至2000年，歐盟國家財政收支大幅改善，甚至出現了財政盈餘；同期間，債務累積亦從1996年高點迭降至2001年的低點，兩者存在反向關係。

二、近年來採行之債務管理機制

(一)馬斯垂克條約及相關債務規範

1991年底，歐盟組織制定馬斯垂克條約，明定加入歐盟的門檻，會員國年度預算赤字占GDP的比率不得超過3%，債務未償餘額占GDP的比率不得超過60%。不僅對債務設限，也對年度預算赤字設限，直接有效地抑制會員國債務的擴增。

圖2 歐盟國家經濟成長率、財政(盈餘)赤字、債務餘額

資料來源：同圖1。

歐盟各國依馬斯垂克條約規定執行的結果，對政府赤字及債務確有所改善；繼歐元整合後，歐元地區債券市場亦朝向整合之路發展，歐盟各國的債券市場規模不一，其中以德國的債券市場規模最大，整合結果勢必擴大市場規模，但也可能影響各國財政政策的自主性。因此，各國紛紛設法使其所發行之債券，成為歐盟的標竿，增加各國債券競爭性。茲對英、德兩國在馬斯垂克條約之外，債務自我約束之規範說明如下：

1.英國

英國有關債務的規定，主要規定於國家借款法(the National Loan Act,1968)、國家儲蓄銀行法(the National Bank Act,1971)和國家債務法(the National Debt Act,1972)，該國對於舉債額度並沒有特別規定。而英國政府為平衡財政收支、償還已到期債務及干預匯率等目的，必須舉債籌措資金以為支應，其對每年所需舉債之額度稱為「公部門借款需求」(Public Sector Borrowing Requirement, PSBR)。

2.德國

德國公債主要特色是多為無記名債券，且政府公債為德國債券市場之主流，對德國債券市場影響重大。德國基本法第115條第1項第2款將公共債務(聯邦政府借貸總額)限制不得超過預算案中投資總數，至於「投資」的概念則由一般法律加以定義，與一般以具體數字嚴格限制公債上限的作法大不相同，故德國公債發行空間較具彈性(蕭文生，1999)。

表 6 1990-2000 年英國、德國政府未償債務餘額占 GDP 之比率

單位：%

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000
英國	35.0	35.1	41.1	47.8	49.8	52.0	52.6	50.8	48.4	46.0	42.4
德國	43.5	41.8	42.8	46.2	50.8	60.4	62.0	63.7	65.7	68.1	71.3

資料來源：趙揚清(2002)，「公共債務相關資訊揭露之研究」。

(二)債務控管之監督與干預機制

歐洲地區為有效支持歐洲中央銀行(the European Central Bank)的貨幣政策，於1997年簽訂施行「穩定和成長協定」(Stability and Growth Pact, 1997)，旨在降低財政赤字與控制歐洲各國的債務水準；並制定監督與干預機制，由歐洲委員會(the European Commission, EC)、經濟

財政委員會(the Economic and Financial Committee, EFC)，以及經濟財政事務協調會(the Council of Ministers of Economic and Financial Affairs, ECONFIN Council)三機構負責執行，由歐洲中央銀行針對穩定方案的最新發展，以及會員國預算執行的實際狀況提出分析。此一機制，主要有三個方向：(1)中長期的預警機制，稱「穩定方案」(Stability Programmes)；(2)履行穩定方案的短期監督制度；(3)「過高財政赤字的約束程序」(Excessive Deficit Procedure, EDP)。

1.預警機制

(1)穩定方案規定會員國每年須提出報告，內容包括：

- 根據「穩定和成長協定」的目標，要求會員國政府提出中長期的預算發展方案，須達成平衡或有賸餘。
- 各會員國針對該國境內情勢提出基本假設條件。
- 提出重要的預算政策與其他經濟政策。
- 針對不同的假設條件，評析所造成的影响。
- 至少在未來三年內達到財務槓桿平衡的目標。

(2)歐洲委員會與經濟財政委員會分別對上述穩定方案提出評估。

(3)經濟財政事務協調會在年報提出後二個月內，完成實地調查，包括：

- 會員國所提出的中長期財政目標與計畫，是否確有減緩嚴重財政赤字的功效？
- 會員國對該國的經濟預測是否合理？
- 會員國對該國的衡量方法是否妥適充足？

(4)如果財政經濟事務協調會認為：會員國所提方案計畫的內容與目標尚待加強者，則須邀請該會員國共同商議。

2.為履行穩定方案所採行的短期監督機制

- (1)會員國每半年需向歐洲委員會提出預算資訊報告。
- (2)歐洲委員會與經濟財政委員會就各會員國所提報告，檢查是否遵守以下預算原則：

—年度預算赤字占GDP的比率不得超過3%，以及債務未償餘額占GDP的比率不得超過60%；或者未償債務餘額所占的比率是否逐年降低。

—雖然年度預算赤字占GDP的比率超過3%，但如屬暫時性計畫，且債務餘額所占比率已逐漸降低至60%的標準值內，則其赤字比率得超過3%。

- (3)歐洲委員會如認其赤字比率過高，則進入「過高財政赤字的約束程序」處理之。

3.過高財政赤字的約束程序

- (1)如歐洲委員會與經濟財政委員會認為某會員國有預算赤字過高的風險，則將交由經濟財政事務協調會處理。
- (2)由經濟財政事務協調會(包括11個歐洲地區國家與4個非歐洲地區的國家組成，共計87票)以投票決定預算赤字是否偏高。
- (3)如協調會認為該會員國政府赤字過高，將對該國提出建議與修正。如會員國未改善或履行協調會所提出之建議與修正，則協調會將對該國採取國際制裁加以約束。

4.成效卓著

- (1)各會員國預算赤字逐年下降，且多數達到協約標準；有些國家甚出現預算盈餘，如芬蘭、愛爾蘭、盧森堡等。
- (2)各會員國年度預算赤字占GDP的比率均未超過3%，故EDP尚無執行經驗與成效。

(3)根據歐洲委員會的估計，比利時與義大利政府債務餘額占GDP的比率超過60%的上限，其餘會員國政府債務餘額均已明顯下降。

肆、個案研究：加拿大財政暨債務管理機制之探討

一、各級政府

(一)近十年來的財政狀況分析

1.總體經濟與財政狀況之關聯性

加拿大經濟成長率由1996年1.6%的低點，逐年成長至1999年5.4%的高點；同期間，由財政赤字占GDP比率1.8%的情況，扭轉為財政盈餘，占GDP的比率為1.4%。又經濟成長率由1999年的5.4%縮小為2001年的1.5%，財政盈餘占GDP的比率由2000年的2.4%逐年下降，兩者存在正向關係。

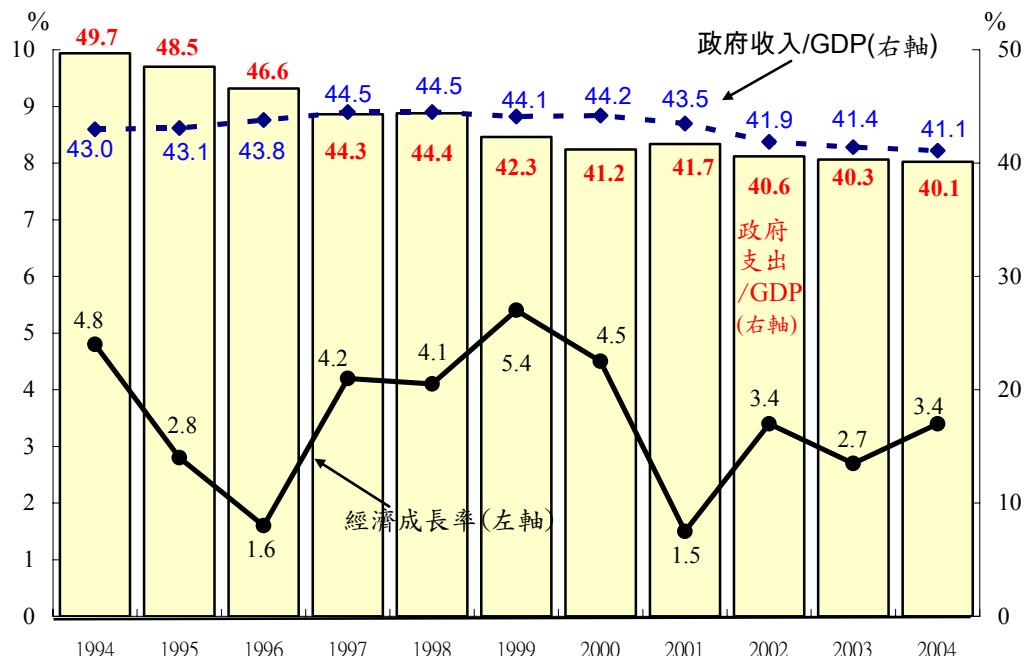

2.總體經濟與財政支出之關聯

加拿大在削減政府支出方面執行的非常澈底，此亦為財政改革成功不可或缺的重要因素之一，政府支出占GDP比率由1994年的49.7%逐年下降至2004年的40.1%(預估值)，降幅高達19%。同期間，經濟成長率由1994年的4.8%降至1996年的1.6%後，又上升至1999年的5.4%，之後逐年降至2004年的3.4%(預估值)，即使在經濟成長率提高之際，政府仍維持一貫削減支出的政策，更加速改善財政收支，足堪借鏡。

3.總體經濟與財政收入之關聯

加拿大經濟成長率由1996年的1.6%上升為1999年的5.4%，同期間，政府收入亦由43.8%微增至44.1%，增幅僅0.7%，顯示即使經濟成長率大幅提升，政府收入增加有限；而當經濟成長率由1999年的5.4%，明顯減緩至2003年的2.7%，政府收入則由44.1%降為41.4%，降幅達6%，顯示景氣趨緩之際，政府收入下降速度較快，此時應是政府財政容易惡化的時機。

圖3 加拿大經濟成長率、各級政府收支

資料來源：同圖1。

(二)近十年來的債務狀況分析

1.總體經濟與債務狀況之關聯

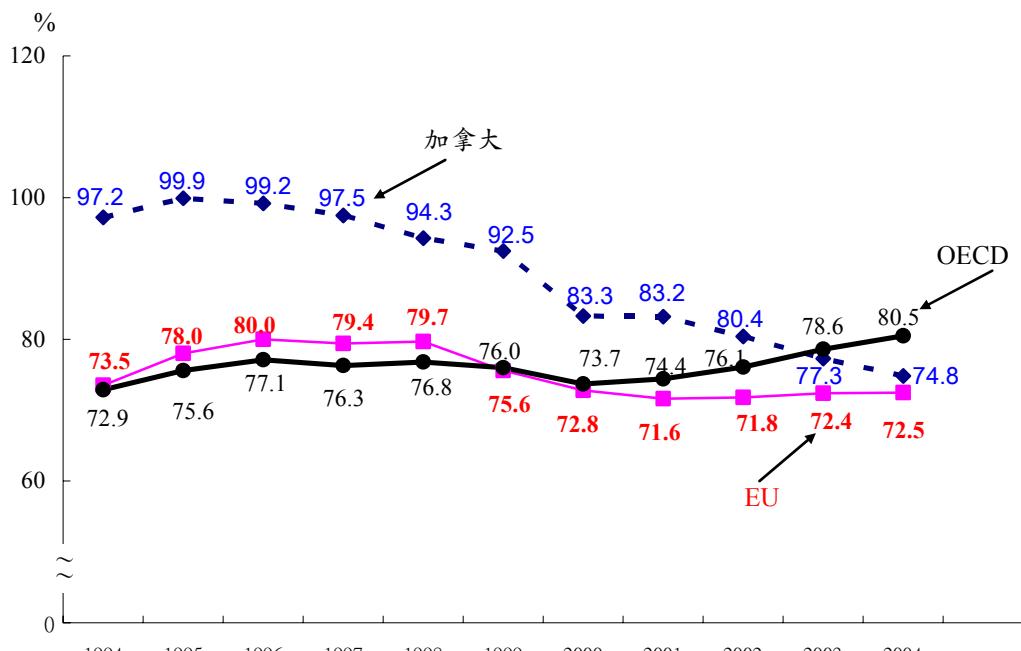

加拿大經濟成長率由1994年的4.8%下降至1996年的1.6%，政府債務餘額占GDP比率一度由97.2%上升至99.2%，顯示景氣不好會使債務擴增，但在政府持續推動削減支出政策，並實施一系列債務管理機制後，在1997-2003年間，經濟成長率雖曾一度由5.4%降至1.5%，惟債務餘額已呈逐年下降趨勢，2004年估計可減少為74.8%，此時景氣對債務累積的影響已大幅降低了。

2.債務餘額占GDP比率之國際比較

1994年，加拿大政府累積債務餘額占GDP的比率高達97.2%，遠

高於歐盟的73.5%及OECD的72.9%，但加拿大債務餘額比率逐年遞減，至2003年降至77.3%，已低於OECD的78.6%，2004年預估為74.8%，略高於歐盟的72.5%，遠低於OECD的80.5%。另值得注意的是，歐盟國家的債務餘額2001年起呈增加趨勢；OECD國家自2000年起呈增加趨勢。

圖4 加拿大各級政府債務餘額與OECD及歐盟國家之比較

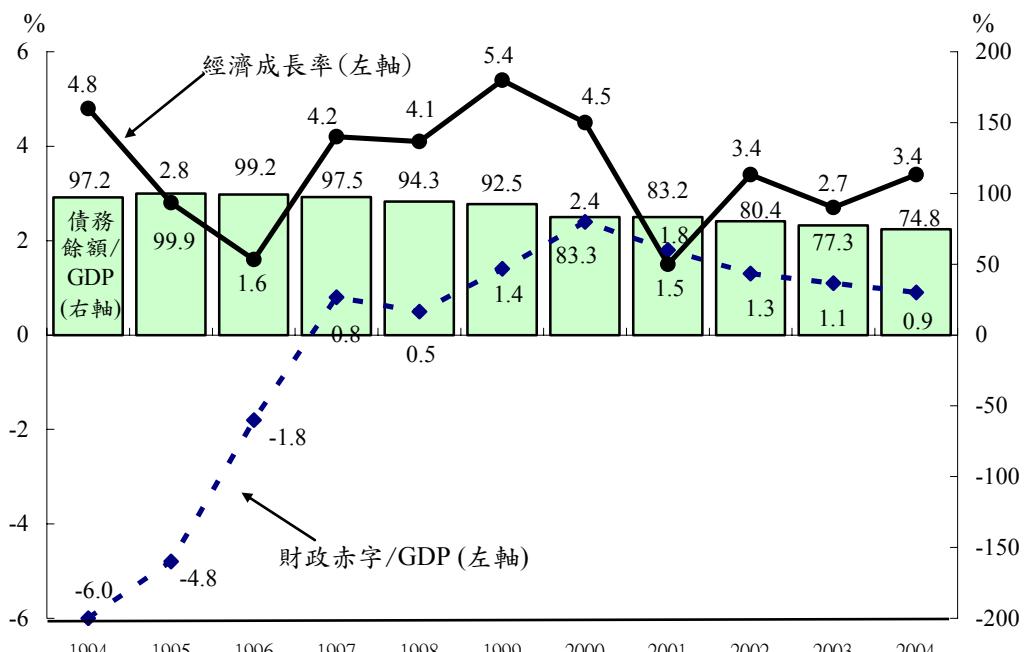

資料來源：同圖1。

(三)財政與債務狀況之關聯

1995年，加拿大債務餘額占GDP比率達到99.9%的高點，其後，持續降至2004年的74.8%；財政赤字占GDP的比率亦由1994年的6%，逐年轉為財政盈餘，2000年財政盈餘占GDP的比率達2.4%，兩者之間存在反向關係，反映改善財政收支，確可減少債務餘額，應可視為債務管理機制的一環。

圖5 加拿大經濟成長率、財政(盈餘)赤字、債務餘額

資料來源：同圖1。

二、中央政府

(一)近十年來的財政狀況分析

1.1998年以前，加拿大中央政府財政處於赤字狀態，1994年財政赤字高達420億美元，但逐年減少至1997年的89億美元，減少幅度高達79%，並於1998年首度出現財政盈餘210億美元，1999年，財政盈餘達到280億美元的高點。近幾年因經濟成長活力減弱，成長率由1999年的5.4%降至2001年的1.5%，致2002-03年財政盈餘僅70億美元，顯示財政盈餘與經濟成長率間呈反向關係。

2.若從財政赤字占GDP比率來看，1994年高達5.5%，1997年大幅降至1.1%；1998年出現財政盈餘，占GDP的比率為0.4%，至2001年達到1.6%的高點，惟2003年時降至0.6%，但仍是七大工業國中少數有財政盈餘者。

(二)近十年來的債務狀況分析

- 1.加拿大中央政府累積債務餘額於1994年的5,082億美元增加至1997年的5,832億美元，累積速度高達15%，惟自1998年起呈逐年減少趨勢，由1998年的5,797億美元減至2003年的5,106億美元，減幅為12%，主要係因1990年代後期財政狀況逐漸改善，以及債務管理機制不斷朝向降低債務成本及穩定債務結構等方向調整之努力奏效所致。
- 2.若從債務餘額占GDP比率來看，1994年為70.1%，1996年增至71.2%的高點；1997年起，由69.9%大幅降至2003年的44.2%，減少幅度高達37%，目前已遠低於馬斯垂克60%的上限。

(三)財政與債務狀況之關聯

1998年起，加拿大中央政府出現財政盈餘，債務餘額亦由1996年的高峰逐年遞減，顯示兩者之間呈現反向關係，財政狀況改善可減少政府債務餘額。

(四)債務管理目標

- 1.基本目標：提供政府穩定且低成本的籌資管道，降低舉債之流動性風險。
- 2.主要策略目標：為政府提供健全的證(債)券市場，降低籌資(舉債)成本。

(五)債務管理原則

- 1.穩健性(prudence)：充分管理債務結構，避免政府財政受到利率(無法預期)上升的影響，並在有效控管貨幣及利率風險的架構下管理外匯。
- 2.效率性(effectiveness)：提高國內債務管理計畫執行及設計上之透明度、流動性，以及定期公布機制，維持功能健全的國內市場。

- 3.多樣性(diversification)：分散籌資(舉債)管道及各項債務到期日，降低舉債成本。
- 4.市場完整性(market integrity)：透過市場參與者及管理者共同努力，提高政府證(債)券的吸引力及完整性。
- 5.協商性(consultations)：尋求市場參與者對於中央政府債務及現金管理計畫之支持。
- 6.最佳作法(best practices)：確認政府債務管理架構及作法，與市場上其他可比較之獨立借款者及私部門的最佳債務管理作法一致。

(六)債務管理原則之執行策略

1.國內市場

- (1)債務結構管理目標係以長期分析，而非以特定利率趨勢預測為基礎。
- (2)在長期利率走勢變動的前提下，政府應彈性調整債務組合的到期結構，俾在降低籌資(舉債)成本、維持債務成本穩定及舉新債還舊債風險之間，取得均衡點。
- (3)為提高市場運作功能，政府應以定期及預先公布的方式，在市場上籌資(舉債)，並建立舉債的基準點，以及維持政府證(債)券拍賣(auctions)參與者的規則。
- (4)政府在集中(wholesale)市場拍賣名目債券(nominal bonds)、實質報酬債券(real return bonds)及短期國庫券(treasury bills)，以及在零售市場銷售儲蓄型商品給一般人民，分散政府的債務管理組合。

2.外幣市場

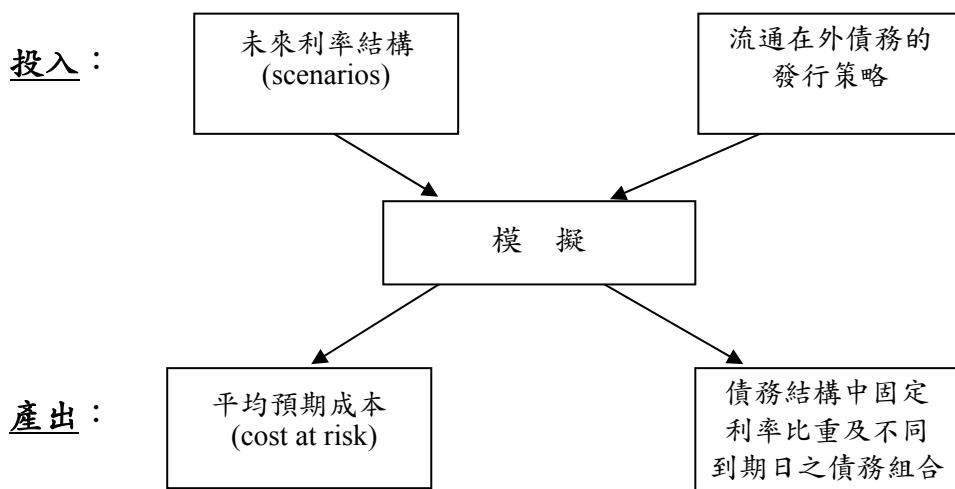

- (1)外債與準備資產搭配運用，避免貨幣及利率風險。
- (2)政府外匯交易準備的資產組成，依資產組合目的及市場狀況而定。

(3)政府經由不同管道籌措外匯交易準備，並調整各項債務的到期結構，降低舉新債還舊債(refinancing)的風險。

(4) CaR(Cost at Risk)分析架構之說明

- CaR是指當政府在作債務管理決策時，將潛在的債務成本風險量化，並評估是否在政府可接受的風險範圍內，分析方法主要包括：利用利率結構情境模擬，分析未來債務成本、債務結構、債務成本及風險之間的關係。
- 若利率上升衍生的債務成本，超過政府可接受範圍的機率很小時，債務結構才算穩健。根據模擬結果，合理的債務成本將決定債務結構中固定利率債務的適當比重及各項到期債務的組合。
- 依加拿大政府於2002年3月所作的CaR實證結果顯示，將債務結構中固定利率債務比重控制在67%，此時，利率變動對政府財政結構造成衝擊的機率較低。

圖 6 CaR(Cost at Risk) 分析架構

資料來源：Department of Finance, Canada, *Debt Management Report 2001-2002*.

3. 決定適當債務結構之作法：在成本及風險之間取得均衡點

(1) 在決定最適債務結構時，政府通常需要考量以下兩項因素的取捨：

一是降低舉債成本；另一是確保債務成本受利率(無法預期)的影響，是在可接受的風險範圍。通常長期債務(如：加拿大政府債券)的債務付息費用，較短期債務(國庫券)高；但因長期的利率固定，所以利率風險較低。

(2) 評估債務結構對利率的敏感度，加拿大政府使用五種方式，包括：

— 固定利率比重(fixed-rate share)、平均到期天數(average term to maturity)及持有期間(duration)三種方式，旨在評估債務組成及結構受利率變動影響的程度及頻率。

— 到期債務組合(maturity profile)的分配，則係評估即將到期的債務及其舉新債還舊債的風險。

— 依CaR模擬分析，將特定債務結構可能導致額外債務成本增加的風險，以及各種可能潛在的利率變動範圍，直接予以量化。

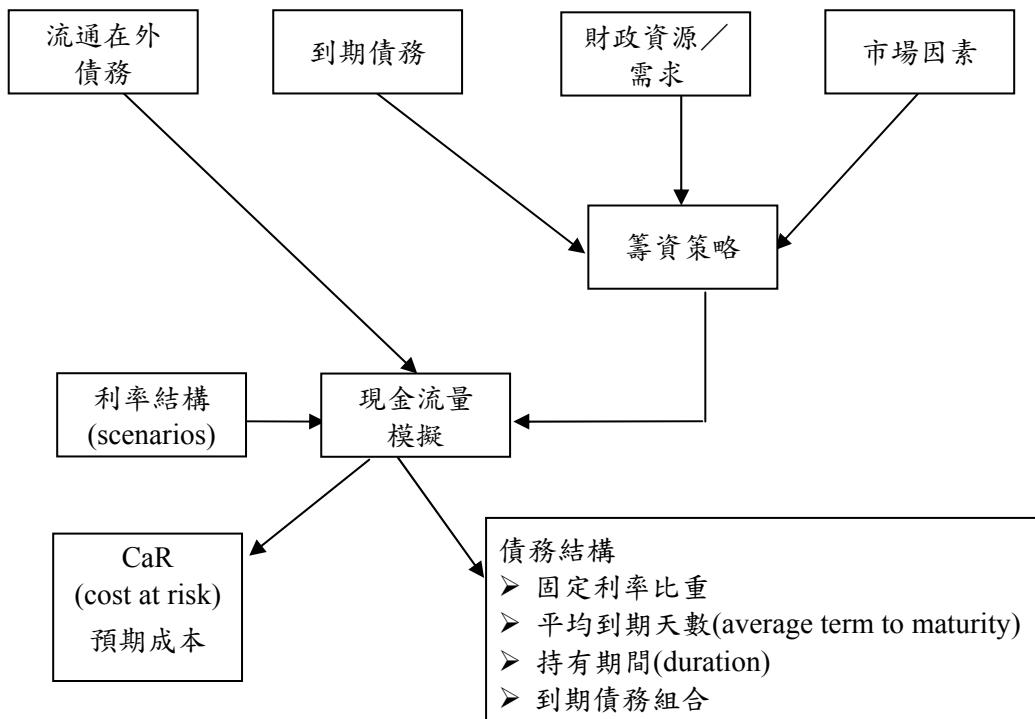

— 近年來，加拿大政府以固定利率比重分析法為主，以平均到期天數及到期債務組合兩項分析法為輔，評估最適債務結構。

(3) 債務結構應在降低籌資成本及債務成本穩定之間取得均衡點

— 維持債務結構的穩健性，可避免政府財政狀況受到無法預期的利率上升影響，並降低每年舉新債還舊債的需求，其中一項作法便是提高債務結構中固定利率債務，亦即債務組成中不需於一年內舉新債還舊債的部分。

— 1990年代，加拿大政府面對財政及經常帳赤字、利率大幅變動及高債務水準的環境，將中央政府債務結構中固定利率債務(即長期債務部分)，由50%提高至67%，提高債務成本的穩定性；隨著經濟成長率逐漸提高及財政赤字逐步改善，1998至2003年的5年間，中央政府債務減少約501億美元。

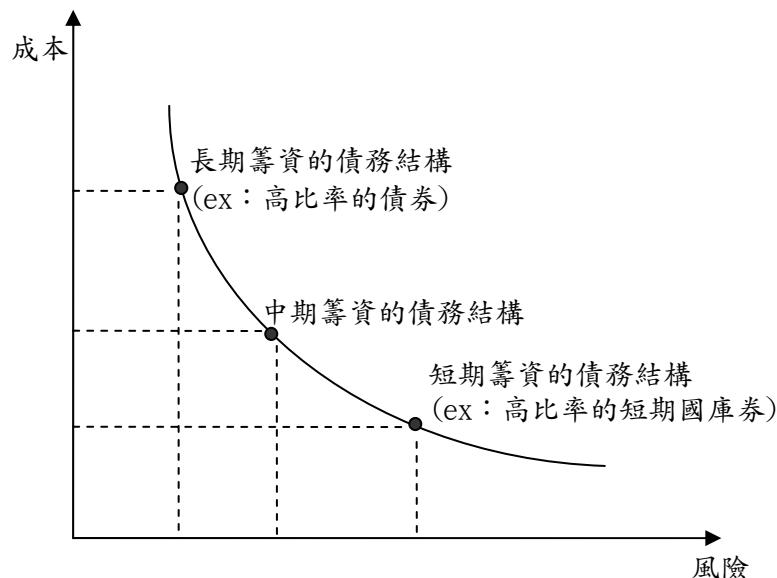

圖 7 加拿大政府債務及現金流量管理之模擬架構

- 註：1.加拿大政府市場性債務的平均到期天數(ATM)由1990年的4年增加至2002年的6.5年，已達到7大工業國家其他可比較同種類債務的上限。
- 2.平均到期天數(ATM)的增加，主要係因債務結構中固定利率債務比重增加、短期國庫券存量減少，以及持續發行30年期債券所致。
- 3.CaR主要係政府用來確認較高債務成本的風險是否在本身容忍的風險範圍內。
- 4.CaR代表債務成本最大值與特定期間內債務成本預估值的差異。
- 5.持有期間(duration)係衡量舉新債還舊債風險的方式，其與舉新債還舊債風險呈反向關係，除了衡量到期日舉新債還舊債之風險外，亦考量了債務工具持有期間與票券(coupon)或利息支付有關的舉新債還舊債風險。
- 6.由於持有期間(duration)考慮債務工具持有期間的現金流量，因此在相同的債務結構中會比平均到期天數(ATM)短，截至2002年3月止，加拿大政府市場性債務的持有期間已修正至4.4年，和上年相同。

資料來源：Department of Finance, Canada, *Debt Management Strategy 2003-2004*.

圖 8 成本及風險之取捨：政府債務結構

資料來源：同圖 6。

表 7 加拿大政府評估債務結構成本及風險之機制

評估方式	內 容	使用範圍
固定利率比重	以固定利率發行之債務所占的比率(超過 12 個月者)	債務存量的舉新債還舊債風險
到期債務組合	債務結構中每年到期債務的分配	隨著時間經過受舉新債還舊債的影響
平均到期天數	債務到期前的平均持有時間，只考慮本金償還部分	利率改變速度會影響債務成本
持有限期	債務存量對利率改變的價格敏感度	利率變動幅度影響債務成本
風險之成本	由利率所導致的潛在債務成本	債務結構與債務成本的關係

資料來源：同圖 6。

—由於政府債務餘額逐漸降低，使加拿大政府財政更加穩定，債信評等亦回復至AAA，為期降低未來的舉債成本，並使市場有時間適應政府債務存量的改變，加拿大政府預定於2004-09年以透明及漸進的方式，將債務結構中固定利率債務比重由67%降低至60%，預計此項債務結構的調整，可將政府的淨債務付息(debt-servicing)費用於5年調整期內減少7.5億美元，之後每年平均減少5億美元。

4.債務成本對利率變動之敏感性分析

隨時檢視利率結構情境分析的變化，在穩健的債務管理決策中扮演重要的角色，以下就加拿大政府債務結構中固定利率債務比重分別為60%及67%，進行利率變動之敏感度分析。

(1)固定利率債務比重為60%的債務結構，對於利率變動的敏感度較67%者為高。以1994年利率大幅上漲為例，前者中央政府的淨債務付息每年增加約32億美元；後者每年增加約26億美元。故就中、長期而言，債務結構中固定利率債務比重維持在60%的利益，將被較高債務付息負擔抵銷。

(2)若利率增加100個基準點(basis-point)時，固定利率債務比重為60%的債務結構，第一年(2001-02)債務付息將增加11億美元；比重為67%者，則增加8億美元。以1995年的預算為例，相同的利率變動固定利率債務比重為60%的債務結構，債務成本將提高18億美元。

5.近十年公共債務成本占GDP比率之變化

(1)加拿大政府每一元收入中必須用來支付利息的比重，已經由1995-96年0.36元的高峰，逐漸降至2000-01年的0.24元及2001-02年的0.22元，顯示控制債務餘額成長效果卓越。

(2)公共債務成本占GDP比率由1993-94年的5.1%，逐漸增至1995-96年

5.8%的高峰，其後逐漸降至2001-02年3.5%的低點，主要係因政府致力縮減財政赤字及債務餘額效果顯現所致。

(七)近年來健全市場功能之債務管理計畫(1997-2002年)

加拿大政府積極發展健全的證券市場，藉由提高流動性及效率性，以及提供市場上投資者需要的產品，降低中央政府籌資的成本；並以在國內市場建立定期、預先公告機制、債券基準(benchmarks)及提高政府證券拍賣參與法令之透明度等方式，執行政府舉債及買回證券的原則(透明度、流動性及規律性)。其中評估市場流動性及效率的指標有：政府證券拍賣結果、次級市場週轉率及交易成本；另為提高市場的功能及完整性，每半年於加拿大網站銀行(www.bankofcanada.ca)，提供市場參與者對政府債務管理策略及調整建議的機會，並公布於官方正式文件，提高政府證券對市場投資者的吸引力。

相關改進措施有：逐漸採用30年基準的半年發行模式、增加基準債券目標規模及擴大債券買回的使用等。政府債券的週轉率由2000-01年的11.7%提高為2001-02年的12.8%，若以市場流動性之國際比較來看，僅次於美國的28.5%。茲以下述之各項債務管理計畫說明加拿大政府近年來的債務管理策略：

1.債券計畫創新作法(Bond Program Initiatives)

(1)提高10年及30年期債券的基準目標：市場參與(投資)者建議政府以擴大基準(benchmark)債券目標規模的方式，來提高政府證券市場的流動性，並於2001-02年將10年期債券的目標規模由90億美元提高至120億美元，以及30年期債券的目標規模由120億美元提高至150億美元。

(2)政府證券拍賣的目標完成時間減少至15分鐘：為降低市場參與(投資)者的風險，政府證券拍賣結果公布及完成時間，自2001年3月起

由原來的30分鐘降為15分鐘，以提高其效率，與其他已開發國家債券市場相比已具競爭力。

(3) 執行債券買回計畫

- 為提高政府證券初級市場的流動性，加拿大於1998-99年開始實施現金基礎(cash basis)的債券買回計畫，讓政府能夠將市場上較不具流動性及流通期較長的債券買回，並藉由重新發行債券來籌資，改善政府證券次級市場的流動性。
- 為刺激並提高現存政府證券持有者在買回操作上的參與程度，自2002年2月起改採以轉換為基礎(switch basis)的債券買回計畫，將市場上流動性較低的債券，以持有期間不變的新債券替代，俾對債券持有者的資產組合結構影響程度最小，

表 8 債券買回計畫

單位：億美元

年度 買回方式	1998-1999	1999-2000	2000-2001	2001-2002
現金基礎(cash basis)	10	32.63	28.32	52.58
轉換基礎(switch basis)	—	—	—	3.87
合計	10	32.63	28.32	56.45

資料來源：同圖 6。

2. 試驗性的現金管理債券買回計畫(Pilot Cash Management Bond Buyback Program)

為有效管理政府現金需求，並降低政府在贖回大量到期債券時的現金餘額尖峰，自2001年初開始推動現金管理債券買回(CMBB)計畫，與上述債券買回計畫旨在支持一項全新的債券發行計畫不同，CMBB計畫包括了買回到期日少於12個月的債券，藉由降低累積大量現金餘額的需求，來緩和短期國庫券發行的季節性波動。並經由市場

參與(投資)者的建議，將政府可買回特定到期日債券的總金額下限由60億美元降至40億美元，來提高CMBB計畫的操作績效。

3.短期國庫券計畫(Treasury Bill Program)

1990年代後期起，加拿大政府開始將債務存量中的固定利率債務比重提高，短期國庫券存量亦在1995-98年間由1,660億美元大幅降低為1,120億美元，減少幅度達48%；短期國庫券的發行量則開始維持在800至950億美元的範圍，每年短期國庫券週轉率由1999-2000年的13.2%，降至2000-01年的12.3%，顯示其流動性大幅的降低，並連帶的使次級市場的週轉率降低。惟一般均認為，只要短期國庫券存量維持在750至950億美元之間即可。

4.市場透明度及電子交易(Market Transparency and Electronic Trading)

1999年起，市場交易者發明並建立一套即時螢幕資訊系統，提供市場投資者各類型固定收益證券之價格、交易量及最好的投標價，並在2001-02年提供交易報告標準(trade reporting standard)，使加拿大市場透明度標準與其他先進國家趨於一致。

另外，政府2001-02年亦規劃了許多私部門的電子交易系統，便於維持國內固定收益市場的透明度、流動性及效率，並由財政部(Department of Finance)及加拿大銀行(Bank of Canada)共同與市場參與者及加拿大證券管理者(regulators)，討論替代性交易系統(Alternative Trading Systems, ATS)的設計與執行的管理架構，於2001年底公布實行ATS Rules。

5.零售型債務(Retail Debt)

加拿大人民可購買的零售型債務包括：加拿大儲蓄債券(CSBs)及加拿大紅利債券(CPBs)兩種，前者為一年期的訂價(pricing)，本金隨

時可兌現；後者為長期的訂價，每年兌現一次，其占銷售比重亦較高。兩種投資工具旨在滿足加拿大人民的需求及促使政府籌資工具多樣化，並均能經由現金市場及薪資儲蓄管道取得。

又自2001年10月起嘗試提供線上申請購買，相關的訊息亦可以在加拿大投資及儲蓄網站上(www.csb.gc.ca)取得。

6.債券的切割及重新組合(Stripping and Reconstitution)

切割包括將債券分成利息及本金支付兩個部分；重新組合則是將個別的組成要素綜合成整體的債券，例如：如果兩種債券有相同的到期日，投資者可以將第二種債券的本金部分切割出來，然後將其重新組合至第一種債券，因此切割可以創造一種新的投資及風險管理的機會，便於充分利用市場價格差異性。1999年，政府證券重新組合的上限取消。

7.現金管理架構(Cash Management Framework)

中央政府現金管理操作，旨在促使政府有足夠的現金滿足流動性的需求，並以穩健及具成本效益的方式投資。

8.債務管理計畫的監督機制(Auditor General Review of the Debt Management Program)

每年出版債務管理策略(Debt Management Strategy)報告，作為債務管理計畫的監督與檢討機制，評估每年度的債務管理績效、預定達成的目標及相關決策等，其中2000-01年的債務管理策略報告，即分析了採用不同固定利率的債務結構所可能產生的成本及風險，供債務管理決策之參考。

9.共同行動條款(Collective Action Clauses)

2000年4月，加拿大政府宣布在外幣債券及本票上的發行採用共同行動條款，提供債權人與債務人一個有規則的架構，促使債券契約

更方便進行債務調整，亦可促進國際金融的穩定及降低全球金融危機的風險。

(八)未來擬推動之債務管理機制及其預期效益

1.債務結構方面

(1)目標：逐漸降低債務結構中固定利率債務比重

(2)作法及預期效益

—將債務結構中固定利率比重由現階段的67%調整至中期目標的60%；降低債務成本，並減輕其對預算結構所造成的風險。

—將短期國庫券計畫的發行規模，由2002-03年的1,050億美元調高至1,200億美元。

—發行約400億美元的債券，其規模與2002-03年相當，並且由於大量的債券到期及持續辦理現金管理債券買回計畫，債券的存量預期將減少100億美元。

—與2002-03年規模相當，持續執行債券買回計畫約130億美元，使市場更容易因應政府債券及短期國庫券存量的改變。

—維持穩定的到期債務組合，降低在特定時間內對於大量債務舉新債還舊債的需求。

2.國內債務計畫方面

(1)目標：維持多樣化的籌資管道及功能健全的市場

(2)作法及預期效益

—持續定期的發行4種到期日的市場性債券、3種到期日的短期國庫券，以及在集中市場發行指數型債券，並同時進行零售型債務計畫。經由多樣化的舉債工具、到期日及籌資市場，降低債務成本及籌資風險。

—持續以預先公告的方式舉債、尋求市場投資者對於政府債務管理計

畫的支持，以及提供即時的政府政策資訊，提高舉債資訊的透明度及效率。

- 維持現階段對於2年期、5年期及30年期債券的基準目標規模，持續保持市場的流動性，並建立其基準規模；降低10年期的基準規模，由120至150億美元降到100至140億美元，以便維持每年度的基準；並維持選擇權及其期貨市場(swap and futures)的流動性，提高國際投資者的需求；當基準可被大量的流通在外債券替代時，則降低2年期債券拍賣的規模至最低限度25億美元。
- 適度提高在可轉換基礎上的債券買回數量，以及降低在現金基礎上的債券買回數量。使新債券得以發行，並維持需要建立基準的時間；定期執行現金管理債券買回計畫(CMBB)。藉由降低清償即將到期債務所需的尖峰現金餘額，減輕現金的需求。
- 嘗試將短期國庫券的拍賣時間由12：30p.m移至10：30a.m，並將現金管理債券買回計畫排在短期國庫券拍賣之後。提升投標的過程及參與程度；進一步降低各項債務管理計畫執行所需完成的時間，降低市場參與(投資者)者的風險。

3.現金管理方面

- (1)目標：以穩健的方式投資政府現金餘額，並獲取合理的報酬率。
- (2)作法：在抵押性(collateralized)的現金管理操作上，擴大參與者的範圍。
- (3)預期效益：降低參與者間發生債信風險的機會，並在現金管理拍賣上鼓勵較具競爭性的投標。

4.外匯準備(Foreign Reserves)及債務計畫方面

- (1)目標：提高融資外匯準備資產(foreign reserve assets)的成本效益。
- (2)作法：持續使用不同貨幣交換(cross-currency swaps)，亦即訂立不同貨幣、本金及利息支出之間相關義務(obligation)交換的協議。
- (3)預期效益：降低持有準備資產的成本。

三、地方政府財政收支

(一)多倫多市財政改革成效卓著

以多倫多市為例，至2003年度止，雖擁有520億美元的實體資產(Physical Asset)，包括：運輸工具基礎設施95億美元、水利與廢水處理設施212億美元、公共運輸系統89億美元、建築物60億美元、住宅基礎設施60億美元，以及公園綠地4億美元，惟若與美國其他大城市比較，其主要收入來源還是在於財產稅(Property Taxes)收入與使用者付費(User Fees)兩項。1990年代初期遭逢經濟不景氣，使得稅率增加的幅度小於通貨膨脹率、社會福利支出需求增加，以及自1992至1997年這段期間來自於上級政府的補助大幅減少2.15億美元，衍生市政府財政狀況較不穩定。

1.推動開源節流措施效果顯著

有鑑於此，多倫多市政府於1998-2002年開始推動一連串的開源節流措施，主要有：聯合儲蓄(Amalgamation Savings)每年1.53億美元、持續改善並提高行政效率每年節餘0.36億美元、降低社會福利申請案件、減少社會住宅抵押貸款、處分公有資產、減少新的市政服務措施、限制債務增加(降低資本預算支出)、2000年起逐年將財產稅率累積增加數調整至與通貨膨脹率累積一致，以及增加使用者付費等。

上述改革措施的成效卓著，已成功的將使用者付費收入比重由1995年的20.1%提高至2000年的22.5%，使多倫多市政府與其他鄰近城市比較起來，使用者付費收入占總收入來源的比率最高；同時也將每一塊錢稅收用來支付債務成本的比率控制在預定目標10%以下。若以2003年的預算收入來源比例來看，使用者付費收入仍維持在22%，財產稅收入為41%，兩者合計高達6成，上級政府補助則降至22%，已大幅降低地方政府對上級政府補助款的依賴，有助財政自主性的提高。

2.研擬未來5年財政措施

惟依據多倫多市政府對於未來5年的財政及經濟預測(基本假設條件包括：以2003年為基期、維持2003年的服務水準及限制不必要的資本支出等)，收入的成長將遠低於支出的成長，預估未來5年內平均每年增加資金需求約2.1至2.7億美元。有鑑於此，多倫多市政府提出未來5年(2004-08年)的財政措施，包括：執行租稅競爭策略、確保實體及金融資產的長期穩定、定期公布金融負債、將財政計畫與經濟成長相配合、發展具可行性的長期資本籌資計畫、降低計畫型融資的不確定性，以及重新訂定各項收入、支出與各級政府間的分配比率，如：大眾運輸系統的資本預算由中央、省及城市各負擔1/3，或由省負擔75%，城市負擔25%；營業預算則由省及城市各分擔50%；收入方面多倫多市則可分配汽油稅(0.2億美元)、省銷售稅(0.7億美元)、中央銷售稅(0.5億美元)、汽車登記費(0.1億美元)及停車費(0.7億美元)等。據估計，每提高1%的使用者付費費率，可增加約0.1億美元的收入；每提高1%的財產稅稅率，約可增加0.29億美元的收入。

表9 目前服務水準的預測—營運預算

單位：億美元

	未來5年 平均每年 增加量		未來5年平均每年 增加量	
			最小值	最大值
薪資與社會福利	1.11	資本預算的籌資

		目前服務水準的預測	2	2
		資產及負債的潛在籌資需求	0.1	0.72
		合計	2.1	2.72

資料來源：多倫多市政府。

(二)溫哥華市

溫哥華市政府的財政狀況良好，其公共支出僅包括：街道、路燈、水利等實體項目，以及警察、消防、救援、圖書館、文化中心、社區中心等服務項目，由每年一次的營運預算(operating budget)計畫與每三年一次的資本預算計畫(www.city.vancouver.bc.ca/capitalplan)有效地控制，任何有計畫性的增加公共支出，包括：增加新的雇員、提高或增設目前市政服務項目等，均須獲得市議會通過，而所有市政府部門亦均須參與營運及資本預算審議過程，並立法限制營業預算一定要達成平衡，因此其舉債、一般收入及發展成本費用(development cost charges)係主要用來支應資本計畫支出。而溫哥華市政府所發行的短期債務(最長不超過10年)，大部分均屬於沈沒基金債務(sinking fund debt)，其基金收入來源為每年度的營業預算，最終都具有自償性。至於其收入來源則主要為穩定的財產稅收入。茲說明其2003年的營運平衡預算(總額約6.99億美元)結構如下：

1.預算收入(100%)

- (1)財產稅收入(65%)：包括一般性財產稅收入及罰款與利息收入。
- (2)使用者付費收入及其他收入(18%)：包括市政服務收費所得及上級政府收入分配(Provincial Revenue Sharing)。
- (3)公用事業收入(16%)：包括徵收水利、下水道及廢水處理等費用收入。
- (4)預備金及基金的移轉性收入(1%)：包括由內部市府資源所提供的基金。

2.預算支出(100%)

- (1)一般行政支出(7%)：指所有市府營運所需的行政成本，包括：市長及議會、市府經理辦公室及人力資源服務等。

(2)服務及計畫支出(82%)：指提供市政服務與計畫的成本，包括：社區服務(community services)、市民補助計畫(Civic Grant Programs)、電力服務(engineering services)、消防及救災服務(fire and rescue services)及溫哥華警察部門(Vancouver Police Department)等。

(3)債務、偶發性及移轉性支出(11%)：包括一般債券計畫成本(含本金及利息支出)；偶發性需求；移轉予內部基金，如資本計畫(capital program)、選舉預備金(election reserve)及債務保險預備金(liability insurance reserve)等。

3.若從溫哥華市政府2003-05年的資本預算(總額約2.82億美元)來看，其資本計畫支出與籌資來源有二：

(1)預算支出(100%)：包括電力計畫(24%)、水利工程(16%)、下水道(21%)、社區服務(5%)、公園及娛樂(13%)、成本分擔計畫(7%)、公共安全(4%)、補充性資本支出(1%)及其他(9%)。

(2)預算收入(100%)：包括由下水道公用事業收入融資債務(21%)、水利公用事業收入融資債務(16%)、營業預算融資債務(42%)、直接營業基金(16%)及DCL基金(5%)等。

綜上所述，由於溫哥華市政府採取立法強制營業預算平衡政策，近年來財政狀況良好，均有財政剩餘或平衡，且所須舉債付息的成本支出占總支出不到10%，大部分資本支出亦均可由營業預算、公用事業收入及具自償性基金支應，因此無須特別制定財政改革或債務控管計畫。

伍、結論與建議

綜合前述對於OECD、歐盟國家及加拿大之財政狀況暨債務管理

機制之分析與探討，可以初步驗證經濟成長率的高低(景氣循環波動)，確實與政府的債務累積與財政收支有著一定的關聯。即經濟成長率與財政收支呈正向變動關係；與債務累積餘額呈反向關係，均符合一般財政理論之觀點。若從加拿大財政改革的經驗來看，縱使景氣大幅好轉，財政收入增加亦有限，然而當景氣反轉時，財政收入下降速度較快，對財政收支惡化的影響較大。

反觀台灣各級政府合計之未償債務餘額預算數占前三年度GNP平均數之比率為37.2%，距離法定上限48%尚餘10.8%；若從債務累積速度來看，中央政府債務餘額占GDP比率由83年的12.3%大幅提高至92年的32.6%，各級政府亦由22.7%快速增至37.2%，債務累積速度值得注意。爰將各先進國家(含加拿大)之債務管理及財政改革經驗彙整如下，提供我國政府未來制定控管債務及推動財政改革時參考。

一、財政改革部分

(一)為達成我國未來預算平衡，宜研訂中長期的預算平衡或賸餘方案，包括年度收支之控制，債務之償還等，俾依行政院財政改革委員會既定時程達成財政平衡目標。

(二)為加速改善政府財政收支，宜對支出採行中長程控管措施，縱使在經濟成長率提高的時候，仍應澈底執行削減支出政策，並採行績效預算，對於消耗性之經常支出或公共投資之刪減，均須經過成本效益評估後決定。

(三)積極有效經營管理及開發公用財產，並處分、出租非公用財產，收入用於債務還本。

(四)加拿大地方政府財政改革經驗亦值得借鏡：如擴大財產稅稅基，大幅提高自有財源收入，降低對中央政府財政的依賴；並提出中長期財政及經濟預測，據以推估未來年度資金需求，擬定相關財政計畫。

二、債務控管部分

- (一)在決定最適債務結構方面，政府須在舉債成本及風險之間取得均衡點，建議主管機關可參考加拿大所採用之CaR分析架構，以固定利率比重分析法為主，平均到期天數及到期債務組合兩項分析法為輔，並以債務成本占稅收及債務成本占GDP兩項比率，作為債務提高時預警指標。
- (二)調整債務結構比重方面，在長期利率走勢變動的前提下，政府應彈性調整債務組合的到期結構，俾在降低舉債成本、維持債務成本穩定，以及降低舉新債還舊債風險間取得均衡點。
- 以加拿大實證經驗為例，短、中期內將政府的長期債務比重設定為67%，長期而言調整為60%，可維持動態平衡之債務結構，對於改善財政赤字與穩定債務結構上的效果最大。
- 觀察台灣近三年來公債發行分布情形，2001年均為十年期以上公債，約4,370億元；2002年發行二至五年期公債2,362億元、十年期以上公債為1,900億元，分別占當年度總發行量55%及45%；2003年發行二至五年期公債2,950億元、十年期以上公債為2,800億元，分別占當年度總發行量51%及49%。未來我國公債發行可參考加拿大經驗，增加考量債務結構的多樣性。
- (三)參考先進國家債務管理計畫，提高台灣公債市場流動性及健全：
- 1.提供市場參與者對政府債務管理策略及調整建議的機會與管道。
 - 2.執行債券買回計畫，提高政府債券週轉率，亦可適時降低舉債成本。
 - 3.定期提出債務管理策略報告，評估每年度的債務管理績效。
 - 4.政府籌資管道與工具多樣化，滿足市場參與者投資需求，以及擴大政府財務管理範圍，增加操作靈活性等。
- (四)地方政府應考量舉債風險與成本的原則，參酌我國債務狀況，訂定債務成本占稅收及總支出目標，作為控制債務之預警指標。

The Economic Consequences of Exclusion from Preferential Trading Agreements and Free Trade Agreements in East Asia

Dr. Honigmann Hong (洪財隆)*

1. Introduction
2. Economic Integration in East Asia
3. Anticipated Economic Impacts of Exclusion from PTAs
4. Empirical Evidence
5. Concluding Remarks

Abstract

This paper tries to identify the causes and forms of PTAs in general and subsequently describe features of regionalism in East Asia since the last decade in particular. We explore the possible influencing channels for the excluded economies, including mainly quantity (reduced exports) and price effects (worsened terms of trade) of PTAs/FTAs. Larger PTAs are likely to have greater effects on tradable goods' prices in general. However, smaller PTAs can still affect prices and terms of trade if markets are segmented.

This paper utilizes a simulation approach based on the GTAP (Global Trade Analysis Project, version 5.4) along a range of scenarios. The main concerns are the results and impacts of the ongoing ASEAN+China-centered PTAs/FTAs on Taiwan. We conclude that ASEAN+China-centered PTAs/FTAs definitely do harm to Taiwan's GDP and economic welfare but are ambiguous for terms of trade. Among these PTAs/FTAs, as an outsider Taiwan will lose most due to the inclusion of Japan and Korea.

* Associate Research Fellow, Taiwan Institute of Economic Research. (台灣經濟研究院)
The author wishes to thank the referee for his helpful opinions, Ms. Liu Yu-hsi (劉玉哲) for providing generous help in GTAP engineering, and Professor Kou, Nai-Fong (郭迺峰), advisor to GTAP, for his inspiration and valuable advice in the writing of this paper. Figures and statistics relating to GTAP are drawn from the research project "The Impacts of FTAs Between ASEAN and China on Taiwan," undertaken by TIER during 2003-2004. Any errors or inadequacies are solely the responsibility of the author.

1. Introduction

Since the 1990s, the number of bilateral or regional preferential trading agreements (PTAs)¹ has increased dramatically worldwide. Examples of these agreements in East Asia include the Agreement of Japan-Singapore for a New Age Economic Partnership (JSEPA, 2002), and the ASEAN-China Comprehensive Economic Co-operation Framework Agreement (2002) for a Free Trade Area by 2010.² Because the most popular form of PTA is the FTA, we will use the terms PTA and FTA interchangeably in this paper.

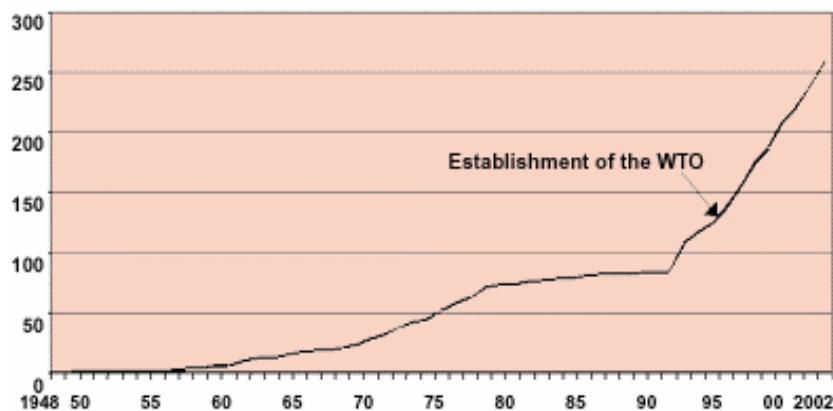

Many FTAs (Free Trade Agreements)³ have been proposed or are being negotiated in East Asia at present. Due to problems of diplomacy, especially the boycott enforced against Taiwan by the People's Republic of China, it is very likely that Taiwan will be excluded from the wave of economic integration taking place in the region. This form of Realpolitik will undoubtedly have economic welfare consequences for Taiwan, the most worrisome of which is so-called marginalization. Indeed, concerns about the serious political and economic implications arising from Taiwan's "economic isolation" are increasingly shared by many prominent scholars.

¹ PTAs differ according to their level of trade and economic integration. The most basic form of PTA involves preferential tariffs but not tariff elimination between two or more countries on certain goods. Free trade agreements (FTAs) are PTAs in which tariffs are eliminated entirely on the goods produced in member countries, which maintain their own tariff structures with nonmembers. Customs Unions are PTAs in which all members adopt a common external tariff structure. PTAs include regional trading arrangements (RTAs), which are PTAs whose signatories are located in the same geographic region. (See Appleyard and Field, 1998.)

² The Framework Agreement on Comprehensive Economic Co-operation Between the Association of South East Asian Nations and the People's Republic of China (2002) calls for expedited negotiations by China and ASEAN (Brunei, Indonesia, Malaysia, the Philippines, Thailand, and Singapore) to form an FTA by 2010, with membership to be extended to Cambodia, Burma, Vietnam, and Laos by 2015. (See <http://www.aseansec.org/13196.htm>.)

³ Because FTAs embodying protectionism are often mistaken for champions of free trade, Bhagwati and Panagariya advocate using the more precise "Preferential Trading Arrangement" (PTA) in its place. (See Bhagwati, Jagdish N. and Arvind Panagariya, 1996).

Chart 1.1: Evolution of Regional Trade Agreements Worldwide,
1948-2002 Number of PTAs

Findlay et al. (2003) raises concerns about the treatment of Chinese Taipei (Taiwan) in the application of an Asian PTA. A genuine multilateral approach to the design of trade policy should provide a formula for the inclusion of Chinese Taipei, for its own benefit as well as that of the entire region. However, since few countries in the region would be willing to sign a preferential trade agreement with Chinese Taipei, the PTA route involves a high risk of Chinese Taipei's economic isolation. What are the implications of this conundrum, and how would it affect the potential for conflict in the region?

Factors such as the future reunification of the Korean peninsula and the problematic relationship between China and Taiwan pose new economic, political, and security challenges for East Asia. As noted by Scollay and Gilbert (2001), "Whereas an understanding was reached within APEC to provide for the simultaneous participation of China and Taiwan (Chinese Taipei) as well as Hong Kong, this understanding may not necessarily carry over to the formation of an East Asian economic bloc. The possible exclusion of Taiwan from such a bloc carries serious political and economic implications."

This paper examines the conditions giving rise to PTAs, the structures

that such organizations normally take, and key features of the regionalization that has taken root in East Asia over the last decade. The implications of these developments for Taiwan also will be analyzed.

Unlike most articles about PTAs, which emphasize the benefits of integration for member countries, this paper focuses instead on the impacts of PTAs on nonmember countries (i.e., countries in the region that do not participate). A key question raised here is how excluded economies are affected, particularly their economic welfare.

The simulation approach utilized in this paper is based on a range of scenarios assessed by the Global Trade Analysis Project, Version 5.4 (GTAP). The main concern is the impacts that the ASEAN and China-centered PTAs are expected to have on Taiwan. The final section of the paper addresses some of the issues and implications that emerge from a consideration of these possibilities.

2. Economic Integration in East Asia

2.1 PTAs/FTAs: A Proliferating International Trend

Regionalization, broadly defined as a form of regional economic cooperation for the promotion of trade liberalization among a subset of nations, has enjoyed resurgence since the end of the Cold War in the 1990s.⁴

Because of its relatively low negotiation costs and modest impact on the domestic industries of participating parties, the Free Trade Agreement (FTA) has become the most widespread type of regionalization. Other, less common forms of regionalization include the Customs Union, the Common

⁴ The GATT/WTO had ratified some 250 regional trade agreements (RTAs) as of December 2003, of which 130 were concluded after January 1995. More than 170 RTAs are currently in force, and an additional 70 are estimated to be operational although they have not yet been ratified. If those reportedly planned or already under negotiation are concluded, the total number of RTAs in force might well approach 300 by 2005. http://www.wto.org/english/tratop_e/region_e/region_e.htm ; 3/04/2003.

Market, and the Economic Union. (See Table 2.1.) All of these regional trading arrangements (RTAs) exist within the framework of GATT/WTO.⁵ Of them, the PTA most effectively captures the “preferential” feature of discriminating trade agreements as explained in Part I.

As for the political economy of PTAs, the spillover effects/externalities arising from economic integration can have immense strategic and geopolitical implications. For this reason, the formation and organization of PTAs invariably require intergovernmental cooperation and coordination, and involve a long list of players ranging from multinational corporations to diplomatic institutions.

A number of factors explain why the popularity of PTAs, both domestically and internationally, exceeds the real economic advantages to be derived from them. Most critical is that PTAs are easier to sell at home than is multilateral liberalization, since they allow countries to protect sensitive sectors while avoiding strong competitive pressure for economic restructuring.

On the international front, PTAs can be a forum for improved diplomatic relations and the promotion of non-trade economic integration. Some argue that PTAs can also serve as a “commitment mechanism” for policy reform, particularly the reform of investment policies or regulations. They are often cited as mechanisms for bypassing the complicated multilateral negotiations required under the WTO (*Asian Development Outlook*, 2002). Even famous economists like Bhagwati and Panagariya (1996) who have always objected to regionalization, favor regional trade arrangements when multilateral negotiations under the WTO don’t work or when the goal is to reach a higher level of political integration.

On the one hand, the PTA could be regarded as a useful adjunct to the

⁵ The basic rule governing PTA trade in goods is GATT XXIV. Developing countries are additionally subject to an Enabling Clause (Tokyo Round, 1979), whose flexibility favors the formation of PTAs. Typical examples are MERCOSUR and AFTA. GATS V. is the only international rule covering PTA trade services.

WTO, allowing for bilateral negotiations between fewer participants and greater diversity of trade issues. On the other hand, the discriminatory and exclusionary features of bilateral PTAs might compromise the principle of free trade, threatening most-favored-nation (MFN) treatment and national treatment (NT), as well as transparency.

The increase in the formation of PTAs is closely tied to the economic strategies of the United States.⁶ Originally hostile to regionalism after the Second World War, the United States, facing new strategic and political considerations, signed a FTA with Israel in the mid-1980s. Acting as a “pivotal operator” in regional trade arrangements during the early 1990s, the U.S. has set up a “dual track” trade policy combining bilateral negotiations (such as NAFTA in 1994) with multilateral negotiations (the Uruguay Round), and has attempted to maintain a balance between the two. More recently, the current Bush administration has practiced a form of trade politics that upholds “competitive liberalization,” inducing many countries to climb aboard the PTA bandwagon.

The groundswell toward regionalization may also be ascribed to other reasons, including the following: 1) Trade with neighboring countries grows more quickly than that with more distant areas, contributing to an increase in demand for regional integration. 2) Small countries attempt to conclude “safe-haven” trade agreements to offset the effects of arbitrary trade barriers (anti-dumping measures, for example) that might be imposed by big countries in the region. In this sense, PTAs with large markets can be seen as a form of trade-security insurance. 3) Especially important, developing countries may seek to join regional trade agreements sponsored by developed countries, in order to overcome domestic protectionist pressures,

⁶ The EU was very active in FTA formation in the 1990s, by which time it had concluded 30 FTAs and special customs arrangements. Although the U.S. entered the game later, it had more than made up for its late start as the new century unfolded. (See “U.S. commitment to transparent global trade negotiations must be reciprocated by others,” *Financial Times*, October 3, 2003.)

initiate trade reforms (lock-in effect), attract more foreign direct investment (FDI), and enhance international competitiveness.

Additionally, slow progress in WTO multilateral negotiations since the Uruguay Round (1986-1993) has undoubtedly encouraged the surge in bilateral regionalization, especially among East Asian countries that used to think globally. Examples include the failure of the Seattle Meeting (1999) and the disappointing outcome of the Cancun ministerial meeting of the Doha Development Round (DDA).

Although PTAs offer fewer benefits than multilateral trade liberalization under the World Trade Organization, bilateralism is much more conducive to the production/provision of regional (local) public goods than is multilateralism, and is better able to accommodate participants' preferences. It can also more effectively address new issues such as trade services, standard recognition, and governmental procurement.

Table 2.1: Types of Regional Economic Integration⁷

	Free trade among member countries	Common external tariff policy	Free mobility of production factors	Coordination of all economic policies, including fiscal and monetary policy
Free Trade Area (FTA)	✓			
Customs Union	✓	✓		
Common Market	✓	✓	✓	
Economic Union	✓	✓	✓	✓

2.2 The Origins and Features of PTAs/FTAs in East Asia

Because of their outward-oriented strategy, most East Asian countries regard the whole world as their economic hinterland, and their exports are heavily concentrated in the U.S. and EU markets. This situation explains why the pace of their economic integration has been slower than that of the U.S.

⁷ See Gandolfo G. (1994).

and Western Europe, in spite of East Asia's intra-regional development. From another perspective, PTAs in East Asia can be seen as a defensive response to the regionalist policies of the United States and Europe, one prominent example of which is the North American Free Trade Agreement (NAFTA).

Trade and investment interdependence within East Asia has significantly increased since the 1980s. Most notably, intra-regional investment has contributed to the rapid expansion of intra-regional trade, reducing East Asia's export dependency on developed-country markets (C. Schive, 1995) and fueling a rapid rise in regional integration. Taking import/export dependence as one example, the East Asian share of Japan's total imports shot up from 24.8% in 1989 to 40.6% in 2001, while the intra-regional share of its exports climbed from 28.33% to 38.68%. For Taiwan during the same period, the corresponding increases were from 43.30% to 52.10%, and from 34.30% to 49.30%. These sharp gains in intra-regional two-way trade appear to correspond with a surge in East Asian integration observed at the end of the 1990s. The figures in Table 2.2: Intra-Regional Trade Ratios of Each Region offer further convincing evidence that integration in East Asia is proceeding more rapidly than in NAFTA and the EU.

Table 2.2: Intra-Regional Trade Ratios* of Each Region (%)

Year	East Asia				NAFTA	EU
	ASEAN	+NIES**	+ China	+ Japan		
1980	3.5	8.5	22.6	33.6	-	52.5
1985	4.9	9.5	26.3	36.2	36.6	53.8
1990	3.9	12.3	32.8	41.6	36.8	64.9
1995	5.2	14.0	38.4	50.1	41.9	64.1
2000	7.9	13.5	39.5	50.1	46.5	62.1
2001	7.9	13.2	41.0	50.8	46.3	61.9

* Intra-trade ratio expressed as a percentage of world trade.

** NIES include Singapore, Taiwan, Korea, and Hong Kong.

Source: IMF, *Direction of Trade Statistics Yearbook*, various issues.

Conceptually, there are two forms of regional integration: market-driven integration and institutional integration. Market-driven integration is based on economic expansion resulting from a reduction in transportation costs, industrial specialization, or changes in the comparative-advantage landscape of individual economies; while institutional integration focuses on the harmonization of trading regimes. Although opportunities for market-driven integration in East Asia have probably been exhausted, there is enormous potential for further institutional integration.

According to the disciples of the new institutional economics, the rise of uncertainty in international politics, economics, and finance will drive the demand for regional integration. In the absence of integration, the cost burden of negative externalities rises as trade and markets expand. We may assume that the harmonization of regional regimes, rules, and policies will help to reduce these costs, further advancing regional integration in East Asia. One example of this trend is the surge in the number of PTAs following the Asian financial crisis of 1997-98. Also driving East Asian integration is the widespread belief that many agreements concluded under the WTO (the Uruguay round is one example) are inherently unfair to Asian countries. In particular, disputes over intellectual property rights, one of the most contentious issues negotiated under the WTO, have greatly increased the incentive for regional cooperation. Meanwhile, the slowing of economic growth worldwide is expected to strengthen the resolve of politicians to improve economic efficiency at the expense of domestic distribution issues, leading to a deepening of integration. Hence, the impetus supply for regional integration is expected to be more bountiful in bad times than during economic booms.

There are a great many other arguments that support the continued growth of regional economic integration in East Asia, a number of which appear below:

(1) Economics

East Asia accounts for one-third of the world's population, one-fourth of its GDP, and two-fifths its foreign reserves; and the rise of China brings even greater economic dynamism to the region. In the face of globalization and increasing economic integration in the EU and North America, East Asia must strengthen intraregional cooperation.

(2) Politics

Since the end of the Cold War, the reality of economic interdependence has trumped ideology. An outstanding example is the inclusion of four formerly communist countries in ASEAN. Meanwhile, the historical enmity between Japan, China, and Korea in North East Asia is gradually vanishing.

(3) Security

Ongoing growth and prosperity are premised on the maintenance of regional security. East Asia needs to strengthen its channels of diplomatic dialogue via regional integration, and allay fears stemming from the lack of an effective regional security mechanism.

(4) Crises and emergencies

- The East Asian financial crisis in 1997-98 left most countries in East Asia feeling isolated and deeply disappointed with the attitude of America. The crisis is a reminder of the importance of regional integration, especially regional financial cooperation.
- Frustration is increasing over the slow pace of trade liberalization within the framework of APEC, including the demise of the Early Voluntary Sectoral Liberalization (EVSL) initiative in 1998.
- The multilateral negotiation process is encountering difficulties. Example: the failure of the Seattle meeting in 1999 and the Cancun meeting in 2003.

2.3 The Predicament of Taiwan in the Face of PTA/FTA Formation in East Asia

With the Closer Economic Partnership Arrangement (CEPA) between China and Hong Kong taking effect on January 1, and other East Asian countries about to sign an FTA, the question of whether Taiwan's economic and trade status will be marginalized has become a hot topic.

The concept of “marginalization,” which originated at the UN Conference on Trade and Development in 1997, is a complex phenomenon existing on two levels. It can be used to describe the conditions of disadvantaged organizations in any society. However, in the context of international politics and economics, it refers to dangers posed to a country's economic development by the process of globalization

But in Taiwan – where democracy is taking root, economic and trade activities are open, and a social safety net is in place – sound internal and external mechanisms exist to tackle the challenges of globalization. The newly arising regionalism, primarily in the form of FTAs, poses a more direct and specific threat to Taiwan. This is because nearly all the countries

involved are important economic neighbors. In this situation, Taiwan, if it were crowded out of regional trade agreements, could suffer serious political and economic damage.

Two different modes of regionalism are developing in East Asia. One mode is the “ASEAN plus three” (Japan, China, and South Korea), which revolves around ASEAN. The other is the “hub and spoke” mode, in which Japan, China, and the U.S. serve as the centers, and medium- and small-size countries make up the peripheries. It is still unknown which form of regionalism will prevail in the end.

The “ASEAN plus three” model, if it gains the upper hand, could push for the establishment of an East Asian free-trade area, and even the formation of a giant economic zone in East Asia. This zone would confront the Free Trade Area of the Americas (FTAA) across the Pacific Ocean in a so-called polarized Pacific system. This East Asian zone would then take its place beside the FTAA and the EU in a trilateral global trading system. If Taiwan is excluded from this form of economic integration, it could suffer grave political and economic consequences. However, because of the large number of participating countries, China’s influence is likely to be diluted and Taiwan would therefore stand a better chance of becoming a member.

Key to whether this model of integration will succeed is the attitude of the United States, whose strategic interests in East Asia would undoubtedly be damaged by it. Another important consideration is whether the political determination of major East Asian nations (China and Japan) to pursue economic integration is strong enough to overcome their historical animosity and economic protectionism.

The great bulk of East Asia’s finished products (although not its intermediate goods) are still exported to the U.S. and Europe, and this pattern of production and trade will limit the extent of economic integration

taking place in the region. However, the expansion of consumer markets in East Asia, especially those in high-income economies, has slowly but steadily weakened this countervailing influence.

If Taiwan is excluded from FTAs being formed by ASEAN and China, or by Japan and Singapore, it should suffer less economic loss than if it were shut out of a bloc-centered economic body. However, individual nations would remain under pressure from China, which would continue to frustrate Taiwan in its pursuit of FTA partners.

Riding the current wave of regionalization, China can be expected to push for PTAs with its neighbors while preventing Taiwan from doing the same. Then, following the Hong Kong model, it could offer a CEPA to Taiwan, thereby limiting its options in the region. One bright spot in this scenario is the rapid growth of global trade, which reduces the risk of marginalization faced by a country that is shut out of regional PTAs. Fortunately, Taiwan is already a member of the WTO. And if global trade is further liberalized under the multilateral negotiation structure, then the more-harmful effects of bilateral trade agreements based on “preferential treatment” may perhaps be contained.

3. Anticipated Economic Impacts of Exclusion from PTAs

3.1 Economic Welfare Effects

PTAs combine free trade for participants with discrimination (protectionism) for non-participants. Participants basically enjoy preferential or zero tariff rates, while non-participants are accorded MFN treatment only if they are WTO members. The difference between these two statuses boils down to the degree of protection afforded. Discrimination results in higher market access costs for non-participants, who may suffer deterioration in economic welfare.

There are no definite criteria for measuring the benefit of PTA integration through economic welfare analysis.⁸ The traditional view before Viner (1950)⁹ optimistically held that regional economic integration is beneficial to participants' welfare, and that such integration leads to an increase in welfare for the world as a whole. Viner uses a form of static analysis that does not take into consideration time-related competition and market-size effects.

Under the influence of Viner, considerable research has focused on the balance between welfare loss from trade diversion and loss in government tariff revenue, as well as the welfare gain from additional trade creation among member countries. Overall, research suggests that the welfare consequences of PTAs tend to be positive for members, although at the expense of the rest of the world (third countries).

Empirical simulations generally find quantifiable dynamic efficiency gains (and the transfer of technology due to PTAs) associated with trade from PTA-induced liberalization, but it is unclear whether these potential effects are ultimately realized.

Some primitive but useful criteria provided by standard economic analysis of preferences include the following:

3.2 Trade Flows and Scale Effects

- (1) The general consensus of theoretical work in economics is that PTAs — when evaluated in purely economic terms related only to changes in trade flows — are welfare-reducing for the world as a whole (Bhagwati and Panagariya, 1996).

⁸ Actually, there is the Kemp-Wan theorem. According to this theorem, the volume of trade between members will increase after the formation of an FTA or Customs Union, and their economic welfare also will grow. As for non-members, their economic welfare will increase only if their trade with members does not decrease. (See Kemp, M. and H. Wan, 1976, "An Elementary Proposition Concerning the Formation of Customs Unions," *International Economic Review*, No. 6, pp. 95-97.

⁹ J. Viner (1950), *The Customs Union Issue*, London, Stevens & Sons.

- (2) Participating countries trading intensively with each other will enjoy substantial benefits from membership. There are two important implications for would-be members with regard to shares of trade. First, the smaller the share of trade of non-participating countries, the smaller the trade-diversion effects will be after the formation of a PTA. Second, an individual country gains most if it joins a PTA in which its comparative advantage relative to the other members is similar to its comparative advantage relative to the rest of the world. One proxy often used as a measure of the economic efficiency of specialization within a given PTA is the proportion of world GDP accounted for by the sum of the PTA members' GDPs.
- (3) The higher the elasticity of supply for traded commodities, the greater is the benefit of membership, since a reduction of import barriers facilitates the expansion of trade. Moreover, other conditions being equal, the higher the elasticity of demand for the commodities of participants, and the smaller the demand elasticity for the commodities of non-participants, the greater the benefits to participants from trade-creation effects. Thus the extent of the effects arising from tariff reduction after PTA formation depends crucially on the sensitivity of response (elasticity) to changes in tariff rates.
- (4) The higher the tariff rate before the creation of a PTA, the bigger the trade-creation effect will be. And the lower the tariff rate faced by non-participating countries after a PTA is formed, the smaller the trade-diversion effect will be.
- (5) “Scale and competition” effects: PTA formation helps to accelerate dynamic competition and enhance scale economies, leading to bigger markets for members. The larger the number of participants in the PTA, the greater will be the increase in specialization; and the more competitive member-country businesses and their products will become in third-country markets (non-members).

- (6) Institutional features, such as the rules for determining the origin of goods traded among members (rules of origin, or ROOS), also are important determinants of specialization patterns and thus a potential source of distortion. One complication is that, since manufacturers increasingly carry out different stages of production in different countries, efforts to follow these rules can affect firms' decisions regarding production and location. The administration of rules of origin can also create incentives for rent-seeking and corruption. (*Asian Development Outlook*, 2002)

3.3 Investment and Location Effects

Although trade and investment are often thought of as two distinctly different activities, they are actually functional substitutes for each other. As protectionism against cross-border trade declines, investment flows can stimulate new forms of trade, generating feed-back effects that strengthen the original investment patterns. In other words, trade and investment are complementary by nature.

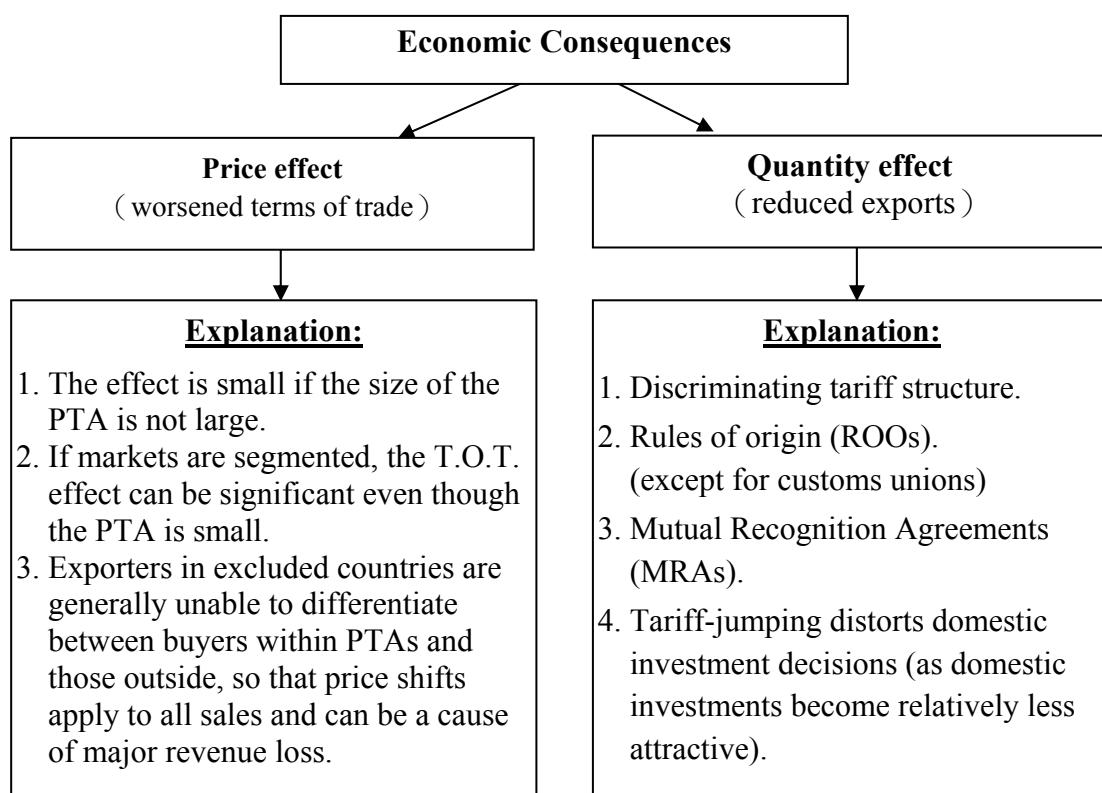

- (1) Investment creation: PTAs enhance investment opportunities. After reciprocal tariff reduction occurs, the commodities of participants receive more-preferential tariff treatment, reducing production costs and the prices of exported intermediate goods, and thus encouraging enterprises to step up investment. Furthermore, changes in trade flows may induce PTA members to change the locations of their production sites.
- (2) Investment diversion (tariff-jumping effect): PTA formation can change the direction of investment flows. For instance, discriminatory treatment of non-member C's goods as a result of preferential tariffs following the formation of a PTA by A and B, may force C's industries to increase their investment and level of production in target market A or B. In addition, the reduction of investment barriers between participants can lead to a more intricate division of production and greater industrial diversification, resulting in more foreign direct investment for member

countries. However, one should be aware that this increase in the value of foreign direct investment may be harmful to economic welfare, if such investment is concentrated in inefficient or protected sectors or otherwise distorts the flow of trade.

3.4 Economic Impacts on Non-Participants

An important distributional concern for countries that remain outside a PTA is the losses that they may suffer in the form of reduced exports or worsened terms of trade (Chang and Winters 2002). A country's welfare loss from reduced exports depends on the difference between the income it can generate from its resources with the tariff structure that exists under the PTA, and the income under a tariff structure with no PTA.

Chart 3.1: Economic Consequences for Countries Excluded from a PTA

Source: Diagram constructed by the author.

The terms-of-trade effect varies with the size of the PTA. The formation of large PTAs is likely to have significant effects on the prices of tradable goods; however, small PTAs also can affect prices if markets are segmented.¹⁰ This is because, under pressure in international markets, non-participants have to lower export prices to maintain their competitiveness, and their terms of trade are therefore worsened. Additionally, exporters in excluded countries are generally unable to differentiate between buyers within and those outside PTAs. With price shifts applying to all sales, a major revenue loss can result (*Asian Development Outlook*, 2002). On the other hand, terms of trade for participants will be improved. One possible explanation of these price and quantity effects is presented below:

- (1) The principle of comparative advantage in international trade will be violated, and the relative prices of goods and services that non-members face after PTA formation will be disadvantageous. This means that the original, undistorted pattern and flow of trade cannot be restored.
- (2) But if the scale of the PTA is not large, the terms-of-trade effect is small, unless product markets are segmented and there is market power. Such market power can arise if:
 - Supply is geographically concentrated.
 - Tastes differ.
 - There is product differentiation (e.g., differences in quality).
 - Transport costs are high.
 - The principal importing countries impose quantitative restrictions.
 - There is hysteresis because of irreversible costs (Gupta and Schiff, 1997).
- (3) WTO negotiations that have dramatically reduced average tariff rates

¹⁰ Formation of the Andean Community (a customs union), which comprises Bolivia, Colombia, Ecuador, and Venezuela, affected cattle prices throughout Latin America, with excluded Argentine producers being forced to lower their prices to access the Andean market (Gupta and Schiff, 1997).

would suggest a narrowing of the scope of discrimination by PTAs. However, because of the spread of bilateralism, trade volume is becoming more heavily concentrated within PTAs. This implies greater harm to the economic welfare of non-participants.

- (4) Trade volume between participants is expected to increase after PTA formation. One reason for this is the diversion of trade from non-participants. Hence, the higher the price elasticity of goods exported by non-participants (the greater the availability of substitutes) or the greater the similarity between the trade structures of participants and non-participants, the more negative the ultimate impact will be. On the brighter side, if there are no ready substitutes for the goods of non-participants, the negative impact will be smaller.
- (5) The strictness with which rules of origin (ROOS) are enforced will determine the scale of the trade diversion effect. Preferential trade agreements create a “spaghetti bowl effect” (Bhagwati) of overlapping rules of origin, which is certain to distort decisions on production and location.
- (6) As mentioned above, one of the most important changes in regional trade agreements since the 1990s is that negotiations are no longer limited to traditional tariffs. Instead, they have been expanded to include trade services, intellectual property rights, standard mutual recognition agreements (MRAs), FDI, and E-commerce. All of these inevitably involve domestic regulatory structures, leading to an increase in demand for the harmonization of laws and regulations; that is, an increase in demand for so-called deep integration. For non-participants, regional or bilateral agreements such as MRAs could result in the erection of non-tariff or technical trade barriers, and give rise to trade distortion.

Nevertheless, it should be noted that those countries that are excluded from a PTA do not face only negative prospects. For instance, participating

countries could experience higher economic growth as a result of increased integration, thereby creating greater demand for imports from non-member countries. In addition, there is the argument that, as long as PTAs are “dirty”—that is, they exclude sensitive sectors (in the political, social, or economic sense)—such agreements will generate neither substantial economic gains (trade creation) for the participants nor substantial losses (trade diversion) for the non-participants.

4. Empirical Evidence

This section will utilize a simulation approach based on the GTAP (Global Trade Analysis Project, version 5.4) along a range of scenarios.¹¹ The main concern is the prospective impacts of ASEAN+China FTAs on Taiwan.

Given the ambiguities that remain in the predictions of general equilibrium (trade) theory, CGE models are a natural vehicle for exploring the economic effects of PTAs. Additional technical information can be found in Hertel (1997), and Hertel et al (2004) gives a critical assessment of the GTAP/CGE methodology. As for applications in East Asia, Roland-Host (2002) and Urata & Kiyota (2003) provide some insightful analysis. In Taiwan, Shih-Hsun Hsu and Ching-Cheng Chang (2001) and Shih-Hsun Hsu and Tsai (2001), as well as Ji Chou, Kun-Ming Chen, Shiu-Tung Wang, and Nai-Fong Kuo (2003), are all pioneers that have made fruitful contributions to this field.

Simulation for this paper was undertaken using the same basic GTAP model, allowing us a consistent framework for analysis.¹² Because of data

¹¹ See R. Scollay and John P. Gilbert (2001), New Regional Trading Arrangements in the Asia Pacific, Institute for International Economics.

¹² The model is a perfectly competitive Armington trade model. The “perfect competition” assumption is important. Among other things, it rules out the inclusion of effects such as the exploitation of economies of scale.

limitations, the treatment of services in the model is relatively crude. Thus, although the simulation can indicate in broad terms the impact on the service sector of liberalization of goods trade, liberalization of the service sector itself cannot be satisfactorily modeled unless additional penetration information is acquired.

4.1 Data and Trade Policy Design

The standard GTAP database is based on 1997 data (GTAP-5.4, 2003), including trade flows, trade barriers, and other data for that year.¹³ For reasons of computational efficiency, the dimensions of the model are restricted to 66 regions and 57 commodities. We have combined these into 19 regions and 22 commodities (sectors), which are listed in Table 4.1.

In the GTAP database, trade barriers, which include tariff- and non-tariff measures, are described as the differences between domestic market prices and world market prices.¹⁴

Furthermore, based on GTAP 5.4, we have adjusted tariff reductions to reflect the commitments of countries for entry into the WTO. Tariffication, which converts barriers to trade services into tariff equivalents, is based on “Assessing the General Agreement on Trade in Services.”¹⁵ The next step in this approach is to define the policy experiment, or the shock, that would reflect the formation of the hypothetical trade arrangement (see Table 4.2) – in our case, the FTA between ASEAN and China by 2010. The model ignores the impact of rules of origin by implicitly assuming that one country’s imports are not re-exported to another economy.

¹³ Data for Southeast Asian countries have been revised against GTAP-5.

¹⁴ For more details about the standard GTAP model, see

<http://www.gtap.agecon.purdue.edu/products/models/current.asp>.

Table 4.2: Trade Policy Experiments

Base Case	Shocks
1. 19 regions and 22 commodities	1. 100% tariff reductions for ASEAN and China. All products included.
2. Tariff reductions for all regions accord with their “memorandum” for access to the WTO.	

Other features of this model include:

- (1) Coverage not only of goods but also of trade services (trade, transport, finance, and other services).
- (2) Consideration of customs automation (typical trade facilitation effect).
- (3) Consideration of the capital accumulation effect due to formation of the FTA.
- (4) The scale of elasticity of substitution between domestic and foreign goods is three times the value of build-in GTAP.¹⁶

4.2 Simulation Results

- (1) This section presents the estimated general equilibrium effects of various ASEAN+China-centered FTAs on Taiwan. The three endogenous variables of greatest interest are national income (GDP), the terms-of-trade, and welfare¹⁷ for each member country (ASEAN and China) and non-member countries (with a focus on Taiwan). Additionally, some selective economic aggregates, such as the volume of trade in goods and services (changes in trade flows), and sectoral output, are singled out for their importance.

We analyze and present here some important simulated impacts resulting from the formation of FTAs — in particular, the ASEAN +China-centered FTA — on Taiwan.

- (2) First of all, the ASEAN countries and China will benefit, with additional FTA-induced increases in GDP ranging from 1.54% to 5.73%. Singapore and Thailand are the two greatest winners, with increases in GDP of over 4%. China enjoys a relatively smaller increment of 0.57%, due to the

¹⁶ The standard GTAP Armington elasticities—the choices common (parameterized) to GTAP among domestic and foreign locations—are CES elasticities of substitution of about 2.5. The imports of each commodity for the economy as a whole are then chosen from among foreign locations with a CES elasticity of substitution of about 5. Thus far, this is the standard GTAP nesting of domestic/foreign choice. Higher elasticities accord better with notions of firm level.

¹⁷ Economic welfare is measured by equivalent variations that consist mainly of two components: gains due to improvements in allocative efficiency and gains due to improved terms of trade. See U.S.-Taiwan FTA (2002), U.S. International Trade Commission, Washington, D.C.

larger size of its economy Like GDP, terms-of-trade and welfare improve for all participants. (See Table 4.4, Scenario 2; and Tables 4.5 and 4.6.)

- (3) By contrast, formation of an FTA between ASEAN and China will result in a 0.04 % decline in Taiwan's GDP. Taiwan's economic welfare also suffers after its exclusion from the PTA. Though seemingly minor, the disadvantage is obvious. The effect on terms of trade is not as apparent as that on GDP or economic welfare (which includes both the terms-of-trade effect and allocative efficiency). Basically, after a PTA is formed, member economies demand more of each other's goods and reduce their supply of goods to third economies, thus raising the price of these goods and improving member countries' terms-of-trade. Theoretically, this effect should vary with the size of PTAs. Nevertheless, in our model it is irregular and negligible. (See Table 4.3 and 4.5.)
- (4) Taiwan loses most — a reduction of 0.19% in GDP — from PTA exclusion if Japan and Korea become members. (See Table 4.3, Scenario 2 and Scenario 4.) On the other hand, Taiwan would benefit significantly if it had access to the East Asia trade bloc. (See Table 4.3, Scenario 5.)
- (5) Industries in Taiwan that would be disadvantaged by PTA formation include textiles, leather, petroleum, coal products, chemicals, rubber, plastics, and lumber & paper, most of which are labor-intensive. Industries that would benefit from exclusion are electronic equipment, and motor and transportation equipment, whose sales would actually decline if Taiwan joined the East Asian PTAs. (See Table 4.9.)
- (6) Taiwan's electronic equipment, textiles, and leather industries enjoy comparative advantages relative to other domestic industries, while tobacco & beverages, minerals, and water & electricity suffer comparative disadvantages.
- (7) Changes in the exports, imports, and Taiwan-based production of the industries cited below merit particular attention:
 - Electronic Equipment: Exports, imports, and production expand in all

PTA-formation cases, except PTAs that include Japan and Korea (Scenario 4). This interesting finding could have two implications: First, Japan and Korea become competitors in electronic equipment. Second, given a fixed amount of resources available to one economy, an increase in exports to another economy would, other things equal, mean a decrease in either domestic sales or in exports to third economies. The trade diversion effect here is best evaluated by focusing on specific industries.

- By contrast, exports of textiles increase unless Hong Kong becomes a member, and increase even more if Japan and Korea are participants. Production and exports of the leather industry decline, accompanied by a consistent increase in imports.

(8) Other domestic industries, including tobacco & beverages, minerals, and water & electricity, suffer comparative disadvantages.

- For tobacco & beverages, production decreases while exports increase, regardless of the situation. However, imports increase in the case of a bigger PTA (Taiwan included). Thus it is clear that the tobacco & beverages sector is inefficient in Taiwan compared with other industries.
- The pattern for minerals, and water & electricity (which are non-tradable goods) is ambiguous. If Taiwan is not excluded from East Asian PTAs, the production of water & electricity could expand, although the specific reasons for this outcome are yet to be determined.

5. Concluding Remarks

The most conspicuous new trend at present is the proliferation of proposals for bilateral and regional Preferential Trading Agreement (PTAs) worldwide, particularly in East Asia since the 1990s. And due to their much lower negotiation costs and smaller impact on the domestic industries of participating countries, Free Trade Agreements (FTAs) have become the most widespread vehicle for regionalization.

We have observed that the popularity of FTAs is due mainly to a shift in U.S. trade politics. By emphasizing a “dual track” trade policy combining bilateral negotiations with multilateral negotiations under the WTO, the U.S. has induced a bandwagon effect worldwide. As part of this effect, developing countries have sought to join regional trade agreements centered on developed countries, hoping to overcome domestic protectionist pressures, initiate the reform of trade regimes, attract more foreign direct investment, and enhance international competitiveness.

The formation of PTAs in East Asia can be seen as a defensive response to regionalization in Europe and North America. In addition, the 1997/98 Asian financial crisis strengthened the belief that East Asia needs some form of trade and economic cooperation. The rise of China has undoubtedly contributed to rapid growth in intraregional trade and intensified demand for deeper integration. These changes in the economic and political landscape have created a need for commensurate changes in the institutional structure and trade policies of the region.

The formation of regional economic alliances tends to put Taiwan at a disadvantage. Since the signing of PTAs requires political interaction between governments, Taiwan could likely fall victim to ill-intentioned boycotts and, as a result, will fail to seal these agreements.

There are no specific criteria for using economic welfare analysis to measure the benefits of integration through the formation of PTAs. Overall, research suggests that the welfare consequences of PTA formation tend to be

positive for members, although at the expense of the rest of the world. Channels of negative influence include the quantity effect (the diverted exports of excluded countries) and the price effect (worsened terms-of-trade).

GTAP simulation shows that textiles, leather, petroleum, coal products, chemicals, rubber, plastics, and lumber & paper are the industries in Taiwan that will be most disadvantaged by PTA formation. On the other hand, the electronic equipment, and motor and transportation equipment industries are expected to benefit except in the case of a PTA with Japan and Korea excluding Taiwan.

Formation of an FTA joining ASEAN and China will result in a decline of 0.04 % in Taiwan's GDP, in addition to losses in economic welfare. The terms-of-trade effect is not as clear or unambiguous as the pattern shown by GDP or economic welfare. As a PTA is formed, member economies demand more of each other's goods and reduce their supply of goods to third economies, thus raising the prices of those goods and improving member countries' terms of trade. This effect should vary with the size of PTAs, although in Taiwan's case it is irregular and negligible.

It should be noted that Taiwan has the most to lose from the creation of a PTA including Japan and Korea, which would result in a reduction of 0.19% in its GDP. However, Taiwan would benefit significantly from membership in an East Asian trade bloc.

Evaluating the trade diversion effect for specific industries provides a promising avenue for research. Given the importance of the electronic equipment industry in Taiwan, it is encouraging that the exports, the imports, and the production level of this industry expand in all PTA formation scenarios except those that include Japan and Korea. This interesting finding points to a need for employing more industry-specific methodology to model the impacts expected from future preferential trading agreements from which Taiwan might be excluded.

■行政院成立專案小組加速國際策略聯盟

為擴展台灣全球經濟發展空間，行政院游院長於6月7日宣布成立專案小組，並親自擔任總召集人，加速推動與各國策略聯盟。

這個命名為「策略聯盟布局」的專案小組，將下設自由貿易協定(FTA)小組與非FTA小組，分別由經建會胡主委勝正與林政務委員義夫擔任小組召集人。FTA小組首要任務在加速推動我與美國等重要國家洽簽FTA，非FTA小組推動重點包括市場開放、科技創新、引進人才、及強化經濟風險管理等。

游院長指出，台灣無法自絕於國際經濟體系之外，必須從戰略布局上有所調整。游揆以台灣與巴拿馬簽訂FTA後，雙方貿易額大幅成長為例，強調為避免台灣在全球經濟整合的趨勢中被邊緣化，必須更積極展開策略聯盟布局，與各國簽訂FTA。

根據經濟部何部長美畊日前公開表示，經濟部在完成與巴拿馬簽署FTA後，下個目標國為巴拉圭，預定1年內完成簽署。其他設定的目標分別為美國、日本、紐西蘭、新加坡、菲律賓、及中美洲邦交國。其中與美國簽署FTA由於能夠產生示範效果，經濟部將會儘速排除相關障礙，以期早日完成。

■游院長會見美國商會重申推動簽署FTA決心

行政院游院長於6月11日會見台北美國商

會代表時強調，台灣與美國簽署自由貿易協定(FTA)有利加強台美間之經貿關係，也有利美國全球戰略布局。他希望台北美國商會能擔任我國與美國自由貿易協定談判推手，以利兩國共同開展國際經濟契機。

台北美國商會代表一行10人，由會長吳王小珍及執行長魏理庭率領，拜會行政院游院長。台北美國商會代表對我國在智慧財產權保護及金融改革所創造成果深表贊許，認為過去4年的改革成果，遠較過去40年豐碩。台北美國商會未來願意繼續與我國政府合作，創造台灣更好投資環境。

游院長指出，行政部門一向重視台北美國商會白皮書所提出各項建議，並認為有助提升我國家競爭力。有關外商所關切的兩岸直航問題，行政部門已儘可能加強與大陸經濟整合，例如推動兩岸間接貨運包機(詳本刊第33期)，及放寬「境外航運中心」營運範圍等(詳本刊第41期)。直航是政府既定政策，我方願意在不預設任何政治前提下，不限時間，不限地點，早日與大陸展開協商。

針對司法執行相關建議，游院長裁示由經建會安排，邀請相關部會首長陪同台北美國商會代表前往拜會司法院翁院長岳生。另針對法律修正建議，游院長指示也由經建會安排，在立法院新會期開議之前，邀請相關部會首長陪同台北美國商會代表前往拜會立法院王院長金平，以建構台北美國商會與司法院、立法院間溝通平台。

九十三年七月

有關製藥資料專屬權保護問題，游院長指出，目前我國相關法令都已符合世界貿易組織的規定，只是相關法令規定中無「資料專屬權」一詞。他指示衛生署積極進行與國內製藥協會溝通，針對製藥保護時間長短與範圍進一步協商，儘快提出外商與國內製藥業均可接受的相關修法草案送行政院審議。

在活化企業人力資源運用方面，游院長指出，政府一年來兩度針對台北美國商會工作經歷與學歷限制予以放寬，目前科技產業與研發機構聘僱學士以上外籍員工已無工作經驗限制，並可引進大學畢業以上實習生來台。此外，政府也考量跨國公司駐台人員家庭成員團聚需求，特別全面開放外商負責人及經理人大學子女來台實習(詳本期報導)。有關美方所提公共工程招標問題，游院長指示公共工程委員會郭主任委員瑤琪儘速與台北美國商會代表進行溝通。

立法動態

■ 中央行政機關總數將精簡以提升行政效率

為提升政府行政效率，立法院於6月11日三讀通過「中央行政機關組織基準法」，並經總統於6月23日公布施行。未來中央行政組織數將採總量管制，以13個部會、4個委員會、5個獨立機關為限，總數22個機關，比現行35個部會署局精簡13個。預計最快於95年1月正式實施。

根據新法，未來一級機關稱「院」；二級

機關包括「部」、「委員會」及獨立機關；三級機關包括「署」、「局」；四級機關包括「分署」、「分局」。一、二、三級及獨立機關組織以法律訂定，其餘機關組織以命令訂定。在總量管制原則下，部會下設的三級機關也將大幅縮減。未來各部業務單位以6到8司為原則，各委員會業務單位以4到6處為原則，較現制精簡1/3以上。

行政院將依規定，在基準法公布後的3個月內，重新檢討調整「行政院組織法」修正草案及「行政院功能業務與組織調整暫行條例」草案，送立法院審議，並將在「行政院組織法」三讀通過後的1年內檢討修正其他機關組織法，送立法院審議。查詢「中央行政機關組織基準法」全文請上網：<http://law.moj.gov.tw/fn/fn4.asp?id=21841>。

■ 立院三讀特別條例推動新10大公共建設

立法院於6月11日三讀通過「擴大公共建設投資特別條例」，並經總統於6月23日公布，同意以特別預算方式，於5年內籌措新台幣5,000億元經費，推動文化、教育、交通、科技及水資源等10項重要公共建設，加速國家經濟建設與升級轉型(10項重要公共建設內容請上網：<http://210.200.236.10/index.htm>)。經建會將成立專案辦公室，專責專人負責推動。

行政院預估，計畫推動期間，每年平均將增加64,000個就業機會，及每年提高實質GDP達1.0至1.03個百分點。推估5年間，可增加稅收約700億至1,500億元；保守推估25年間，可

增加稅收約2,400億元。查詢「擴大公共建設投資特別條例」請上網：<http://law.moj.gov.tw/fn/fn4.asp?id=21842>。

■立院通過放寬投信、證券投資範圍

立法院於6月11日三讀通過「證券投資信託及顧問法」，並經總統於6月30日公布，將現行多項管理法規作有效整合，提升至法律位階，並以專法管理，以強化我證券市場的國際化和效率化。新法重點包括：

1. 授權主管機關開放證券投資信託公司得募集或私募基金種類，使基金產品更多樣化。
2. 明定證券投資信託所從事的投資或交易的標的，得包括證券相關衍生性商品及其他經主管機關核准項目，使證券投資信託事業及證券投資顧問事業在投資組合的操作及管理上，更加靈活。
3. 引進私募制度，使投信公司得應特定投資人個別需求，購買私募型證券投資信託基金，以迅速達到籌措資金功能。
4. 放寬國外優良資產管理機構發行的境外基金，在國內從事募集、私募、銷售、代理或推介顧問等行為納入合理管理，使國內投資人權益受到合理保護，並使國內基金與境外基金得以公平競爭。
5. 開放證券投資信託事業、證券投資顧問事業得互相兼營或兼營其他事業，並開放證券商等相關事業得兼營投信、投顧事業，以利擴大業務範圍。

查詢「證券投資信託及顧問法」請上網：
<http://lis.ly.gov.tw/npl/fast/01652/930611.htm>。

■立院修正金控法保護股東權益

為保護金融控股公司股東權益，立法院於6月11日三讀修正「金融控股公司法」第31條，並於6月30日經總統公布。未來擁有母公司股權的金控公司子公司，除分派盈餘、法定盈餘公積或資本公積撥充資本外，不得出席母公司股東會、表決股東會議案、被選舉權、及委託書徵求權等，以免成為母公司掌控經營權的工具。查詢金控法修正內容請上網：<http://lis.ly.gov.tw/npl/fast/01638/930611.htm>。

■勞退條例三讀制定創造勞資雙贏

立法院於6月11日三讀制定「勞工退休金條例」，並經總統於6月30日公布，預定自94年7月正式實施。新制將進一步保障800萬名勞工權益，提高勞工工作意願及競爭力；企業也因此可以確定勞工成本，降低勞資爭議。新制重點包括：

1. 雇主應為適用勞退條例勞工按月提繳退休金，提繳率不得低於勞工每月工資6%。勞工得在每月工資6%範圍內，自願另行提繳退休金。
2. 勞工年滿60歲，工作年資滿15年以上者，得請領月退休金。但工作年資未滿15年者，應請領一次退休金。
3. 雇主違反規定未辦理申報提繳，處新台幣10萬元以下罰鍰，並按月連續處罰至改正為止。
4. 參照英、日兩國法例，規定事業單位得經工會同意，事業單位無工會者，經勞工同意後，

提繳保險費，為勞工投保符合保險法規定之年金保險，不須為勞工設立退休金專戶。

查詢條例內容請上網：<http://lis.ly.gov.tw/npl/fast/03623/930611.htm>。

開放進度

■外籍專業人士大陸配偶來台免旅外4年證明

內政部於3月1日公布增訂「大陸地區人民進入台灣地區許可辦法」第14條第1項第3款，明定依「就業服務法」第46條第1項第1款至第6款規定來台工作之外籍專業人士，其大陸籍配偶得依該辦法申請來台，且依同辦法第20條第1項第10款規定，其停留期間得與外籍配偶在台受聘工作期間相同，預期將有助提高外籍專業人士來台工作意願。

內政部進一步解釋，該辦法修訂之後，凡外籍專業人士的大陸籍配偶，無論持何種護照，均得依這項規定申請入境，應不再有持外國護照須提出旅居海外4年證明的問題。

依據「就業服務法」第46條第1項第1款至第6款規定，受聘僱或許可在台灣地區工作之外籍專業人士，可從事工作包括專門性或技術性之工作；華僑或外國人經政府核准投資或設立事業之主管；符合規定之學校教師；依補習教育法立案之短期補習班之專任外國語文教師；運動教練及運動員；及宗教、藝術及演藝工作。查詢「大陸地區人民進入台灣地區許可辦法」增訂條文請上網：<http://www.immigration.gov.tw/aspcode/SearchMenu.asp?DirectoryID=767>。

www.immigration.gov.tw/aspcode/SearchMenu.asp?DirectoryID=767。

另為進一步放寬外籍人士大陸籍配偶來台限制，經建會葉副主委明峯於6月8日主動邀集陸委會、內政部等部會舉行協調會，決議請境管局研議修正「大陸地區人民進入台灣地區許可辦法」第17條規定，針對依同辦法第14條第1項第3款申請入境之大陸籍配偶，放寬得由外籍專業人士任職公司之負責人或主管（得為外籍人士）擔任保證人；及「大陸地區人民進入台灣地區許可辦法」第27條規定，放寬依同辦法第14條第1項第3款申請來台之大陸籍配偶，不再於入境時保管其護照。

會議也達成共識，請境管局就來台外籍專業人士之大陸籍配偶，於3月1日修法公布前持單次之旅行證入境者，得准予就地換發逐次加簽之旅行證。此外，請境管局考量，未來就已取得外國國籍且已領用合法有效外國護照之大陸籍配偶，其隨外籍專業人士入境後，比照外籍人士方式給予外僑居留(現為停留)。

葉副主委在會後表示，配合國家經濟發展轉型需要，政府將持續推動吸引外籍專業人士來台，經建會將扮演協調窗口，主動檢討相關出入境規定。

■外籍經理人大學以上子女來台實習放行

為加強外籍經理人在台任職穩定性，經濟部於5月24日宣布開放外籍經理人大學以上子女來台實習。

根據經濟部新修正「科技產業與研發機構申請外國籍研究生來華實習要點」，符合一定條件之僑外投資事業，其經核准投資居留之董事或受聘相當於經理人以上職位之外籍人士，得申請其就讀大學以上子女來台實習，且不受產業限制。詳情請洽經濟部投資審議委員會(<http://www.moeaic.gov.tw/9/91.asp>)，第315項。

■外籍學生來華實習門檻降低

經濟部於5月24日再度降低外國籍學生來華實習門檻，允許科技產業及研發機構申請外國籍大學以上學生(原規定為外國籍碩、博士研究生)來我國實習，預期將有助國內企業延攬科技人才。

根據規定，所謂科技產業或研發機構應為企業最近1年營業額達新台幣1,000萬元以上；財團法人最近1年目的事業業務費用達新台幣500萬元以上；或社團法人其社員人數在50人以上。但情況特殊，經專案同意者，不在此限。符合一定條件的科技產業相關產業，也可以申請外國籍學生來我國實習。所謂一定條件包括研究發展支出占該產業公司實收資本額10%或全年營業額3%以上，且至少應有大專相關科系畢業研發人力10人以上。

根據規定，外國籍學生來我國實習，學、碩士最長為3個月，博士最長為6個月。期滿有繼續實習之需要，得申請展延一次，其展延期間不得超過原核准期間，並以一次為限。查詢最新「科技產業與研發機構申請外國籍研究生

來華實習要點」請上網：[\(http://www.moeaic.gov.tw/9/91.asp\)](http://www.moeaic.gov.tw/9/91.asp)，第315項。

■匯銀開辦衍生性商品改採事後報備

中央銀行於5月26日公布修正「銀行業辦理外匯業務管理辦法」，即日起開放外匯指定銀行辦理未涉新台幣匯率的衍生性外匯商品業務，由事前許可制放寬為事後報備制，將有助提升業者營運彈性及效率。

央行指出，匯銀可採事後報備方式辦理的衍生性商品包括：

(1) 單項產品：

1. 遠期利率協議、商品遠期契約、股價遠期契約。
2. 匯率選擇權、利率選擇權、商品選擇權、股價選擇權等契約。
3. 換匯換利、利率交換、商品價格交換、股價交換等契約。

(2) 組合式產品：

前述(1)所列單項產品的任一項與外匯定期存款或新台幣定期存款組合而成的產品。

央行同時取消每筆交易（非現鈔）在1萬美元以下買賣差價不得大於新台幣1角的規定，改由指定銀行自行訂定買賣匯率，並於營業場所揭示。查詢修正內容請上網：[\(http://law.moj.gov.tw/fn/fn4.asp?id=21337\)](http://law.moj.gov.tw/fn/fn4.asp?id=21337)。

■國內金融機構提供外資臨時台幣資金融通開跑

為吸引外資投入我資本市場，金融監督管

理委員會銀行局(原財政部金融局)於5月21日修正規定，開放國內金融機構得依徵授信相關規定，對外資辦理買入證券交割款項新台幣墊款。這項措施實行之後，投資國內證券的境外華僑及外國人，因時差問題所產生融通交割款項需求，國內金融機構得依徵授信相關規定辦理新台幣墊款，投資人僅須依各項規定，向金融機構洽辦即可，惟金額以不超過不足支應交割款項部分為限。這項開放措施將有助外資先買股票，再由全球調度資金，補足金額，大幅降低外資違約交割風險，並使外資投資台股資金能更靈活運用。查詢開放內容請上網：

<http://www.boma.gov.tw/modules/law/article.php?lawid=973>。

■證期會放寬外資參與期貨市場範圍強化避險功能

為吸引外資參與我期貨市場，財政部證券暨期貨管理委員會於5月21日宣布放寬外資參與期貨市場範圍，除空頭避險外，增加選擇權買進買權及賣出賣權兩種交易，此舉將可使外資投資操作策略更靈活。查詢開放內容請上網：<http://www.mof.gov.tw/content.asp?CuItem=17195&baseDSD=5&CtUnit=11>。

■ **New EY Task Force to Boost International Strategic Alliances**

To give Taiwan more room to develop in the global economy, on June 7 Premier Yu Shyi-kun announced the formation of a new task force aimed at speeding up of strategic alliances with countries all over the world. The premier himself is heading up the new group.

This new task force will organize Free Trade Agreement and Non-Free Trade Agreement committees, which will be headed up by Sheng-Cheng Hu, chairman of the Council for Economic Planning and Development, and Minister Without Portfolio Lin Yi-fu, respectively. The primary mission of the FTA Committee will be to promote the signing of FTAs with the United States and other major countries, while the main tasks of the Non-FTA Committee will include market opening, technological innovation, the introduction of talent, and the reinforcement of economic risk management.

Premier Yu noted that it is impossible for Taiwan to keep itself cut off from the international economic system, and so must readjust its strategic deployment. Citing the large increase in bilateral trade following the signing of a free trade agreement between Taiwan and Panama, the premier emphasized

that Taiwan must avoid being marginalized in the trend toward global economic integration through vigorous efforts toward the deployment of strategic alliances and the signing of FTAs with different countries.

Ms. Mei-Yueh Ho, minister of economic affairs, said that the next FTA target following Panama is Paraguay and that Taiwan expects to sign an agreement with that country within one year. Future FTA targets include the United States, Japan, New Zealand, Singapore, the Philippines, and diplomatic allies in Central America. Since an FTA agreement with the U.S. can serve as a powerful example, the Ministry of Economic Affairs will do its utmost to eliminate all obstacles and sign such an agreement as soon as possible.

■ **Premier Yu Restates Determination to Sign FTA with U.S. in AmCham Meeting**

During a meeting with representatives of the American Chamber of Commerce in Taipei on June 11, Premier Yu Shyi-kun emphasized that the signing of a Free Trade Agreement between Taiwan and the U.S. would strengthen trade and economic relations between the two sides and facilitate America's global deployment. He expressed the hope that AmCham would assist in the promotion FTA talks in order to help both

countries develop international economic opportunities.

The 10-person AmCham delegation was led by President Andrea Wu and Executive Director Richard Vuylsteke. The members praised Taiwan's efforts in the areas of intellectual property rights and financial reform, saying that the reforms of the past four years far surpassed those of the previous 40. The delegation expressed its desire to continue cooperating with the Taiwan government in creating an even better investment environment.

Premier Yu noted that Taiwan's executive branch has always respected the suggestions contained in AmCham's white papers, which have been helpful in reinforcing the island's competitiveness. In regard to direct transportation links across the Taiwan Straits, which is an issue of deep concern to foreign enterprises, the premier claimed that the executive branch had done everything possible to strengthen economic integration with mainland China; for example, he said, it had implemented indirect charter flights (see issue 33 of this publication for details) and had expanded the scope of operations of the offshore transshipment centers (see issue 41). The opening of direct transportation links is established government policy, he said, and Taiwan is willing to open negotiations on the

issue at any time and any place, without any political preconditions.

In response to suggestions about judicial enforcement, the premier instructed the Council for Economic Planning and Development (CEPD) to arrange for the heads of related ministries and commissions to go with AmCham representatives to call on President Yueh-sheng Weng of the Judicial Yuan. About suggestions regarding the revision of laws, the premier again instructed the CEPD to arrange a similar visit to President Jin-pyng Wang of the Legislative Yuan. These visits were designed to establish channels of communication between AmCham and the two government organs.

Addressing the protection of pharmaceutical data exclusivity, the premier pointed out that Taiwan's related laws all conform to World Trade Organization (WTO) regulations, even though the relevant laws do not contain the term "data exclusivity." He instructed the Department of Health to communicate with domestic pharmaceutical associations and carry out further negotiations about the period and scope of protection, and to propose law revisions acceptable to both foreign enterprises and domestic pharmaceutical manufacturers as quickly as possible.

To enliven the utilization of human resources, the premier pointed out that the

government had relaxed experience and academic restrictions on the use of foreign personnel twice during the past year, and that there are now no experience requirements for the hiring of foreign personnel with bachelor's degrees or higher by technology companies and research institutions. In addition, foreign university graduates are now allowed to come to Taiwan as interns. In consideration of the need for the Taiwan-based families of multinational corporate personnel to be together, college-student children of the responsible persons and managers of multinationals are now allowed to enter Taiwan for training (see related reports in this issue).

In regard to the issue of construction bidding which was raised by the Americans, the premier instructed Chairperson Yao-chi Kuo of the Public Construction Commission to communicate with the AmCham representatives as soon as possible.

Legislative Updates

■ Legislature Approves Streamlining of Government Agencies

On June 11 the Legislative Yuan passed the Basic Law Governing Central Administrative Agency Organizations, and was promulgated by the President on June 23. The Law was designed to upgrade the gov-

ernment's administrative efficiency. In the future the central administrative organization will be limited to a total of 22:13 ministries, four commissions, and five autonomous agencies—13 fewer than the current 35. The new organizational makeup will be implemented in January 2006 at the earliest.

According to the new act, grade one agencies will be termed yuan; grade two agencies will be called ministries, commissions, or autonomous agencies; grade three agencies will be administrations and bureaus; and grade four agencies will be known as branch administrations and branch bureaus. The organizations of grade one, two, and three agencies will be established by law, and the remainder by administrative order. Under the principle of total quantity control, the number of grade three agencies under the ministries and commissions will also be greatly reduced. In principle, ministries will be limited to between six and eight business units, and commissions to between four and six, requiring a reduction of at least one-third compared with the existing system.

The new act requires the Executive Yuan to submit a draft amendment of the Executive Yuan Organizational Law and a draft Temporary Regulations for Restructuring the Functions, Responsibilities, and Organization of the Executive Yuan to the Leg-

islative Yuan for deliberation within three months after the new act is promulgated. In addition, revisions of the organizational acts of other agencies will be sent to the Legislative Yuan within one year after the Executive Yuan Organizational Law is passed. For the full text of the Basic Law Governing Central Administrative Agency Organizations, please consult this website: <http://lis.ly.gov.tw/npl/fast/01050/930611.htm>.

■ Special Act Approved to Get New Ten Projects Go Ahead

The Legislative Yuan passed a special act on June 11, calling for a special budget of NT\$500 billion to be spent over five years on 10 major construction projects encompassing culture, education, transportation, technology, and water resources. The measure is designed to accelerate economic development, upgrading, and transition. (For details of the 10 projects, check <http://210.200.236.10/index.htm>.) The Council for Economic Planning and Development will set up a project office to take charge of the new program. The special act was promulgated by the President on June 23.

The Executive Yuan estimates that the 10 projects will generate an average of 64,000 jobs and add 1.0~1.03 percentage points to real GDP growth per year during their period of implementation. The projects

are also projected to increase tax revenues by NT\$70 billion to NT\$150 billion over the five-year period; over the coming 25 years, the tax boost is conservatively projected at NT\$240 billion. For further information on the special act, please visit this website: <http://lis.ly.gov.tw/npl/fast/01651/930611.htm>.

■ Scope of Trust and Securities Investment Expanded

On June 11 the Legislative Yuan enacted a Securities Investment Trust and Consulting Act, which was promulgated by the President on June 30. The new act integrates a number of existing regulations and upgrading them to the status of a law that will reinforce the internationalization and efficiency of Taiwan's securities market. The key points of the new act are as follows:

1. The competent authority is authorized to open up new types of funds that securities investment trust companies can raise in Taiwan, either publicly or privately.
2. The act stipulates that the objects of investment or dealing by investment trust firms may include securities-related derivative products and other items approved by the competent authority, allowing securities investment trust and consulting companies to be more flexible in their operation and management of investment portfolios.

3. The private subscription system is introduced, so that investment firms may respond to special requests from individual investors by purchasing privately issued securities investment trust funds.
4. The sale in Taiwan of overseas funds issued by outstanding foreign asset management institutions, through public or private subscription or by means of agency or consultancy services, is taken under reasonable management so that the interests of domestic investors are protected and domestic and overseas funds are able to compete on an equal basis.
5. Securities investment trust companies are allowed to operate securities investment consulting companies, and vice versa; the two types of companies are allowed to operate other enterprises as well. Securities houses and related enterprises are also permitted to operate securities investment trust and securities investment consulting companies.

For more information on the Securities Investment Trust and Consulting Act, please visit this website: <http://lis.ly.gov.tw/npl/fast/01652/930611.htm>.

■ Revision of Financial Holding Company Law Protects Rights of Shareholders

The Legislative Yuan passed a revision of Article 31 of the Financial Holding Com-

pany Law on June 11 in a move designed to protect the interests of those who own shares in financial holding companies. The revision was promulgated by the President on June 30. In the future, representatives of financial holding company subsidiaries that hold shares in the parent companies will not be allowed to attend the parent companies' shareholders meetings, vote on resolutions at such meetings, or be elected to office, or to assign proxies for such activities. This will prevent subsidiaries from becoming tools that the holding companies use to control operating rights. For detailed contents of the revision, please consult <http://lis.ly.gov.tw/npl/fast/01638/930611.htm>.

■ Legislative Yuan Passes Labor Retirement Pension Act

The Legislative Yuan on June 11 ratified the landmark Labor Retirement Pension Act, which was promulgated by the President on June 30. The new act transforms the current old-age payment for retirees to an annuity system. The new act will protect the interests of 8 million laborers, and is expected to strengthen their willingness to work and their competitiveness as well. It will also help companies to determine their labor costs, and will reduce labor-management disputes. The new act will be implemented in July next year.

The main points of the new system are noted below:

1. The employer is required to make monthly retirement fund contributions of at least 6% of the salaries of workers covered by the law. The workers may also voluntarily contribute up to 6% of their salaries into the fund.
2. A worker who reaches the age of 60 and has been working at least 15 years may receive a monthly pension. Those who have been working less than 15 years may draw a lump-sum payment.
3. An employer who violates the regulations by not reporting retirement fund contributions will be subject to a fine of up to NT\$100,000 per month until the situation is rectified.
4. In reference to the law in England and Japan, an enterprise unit may, with the approval of its labor union, or with the approval of its workers if no labor union exists, contribute insurance premiums on behalf of its workers into annuity insurance that conforms to insurance laws and regulations instead of setting up a special retirement fund for its workers.

To see the contents of the new act, please check this website: <http://lis.ly.gov.tw/npl/fast/03623/930611.htm>.

Deregulation Progress

■ Taiwan Entry Eased for Mainland Chinese Spouses of Foreign Professionals

The Ministry of the Interior (MOI) on March 1 promulgated a revision of Paragraph 1, Subparagraph 3 of Article 14 of the Regulations Governing Entry of People from Mainland China into Taiwan, which stipulates that the mainland Chinese spouses of foreign professionals working in Taiwan may spend on the island to the same length as the professionals are hired to work in Taiwan. The mainland Chinese spouses of foreign professionals are no longer required to provide proof that they have obtained citizenship in their husband's or wife's country, or have resided abroad for at least four years.

The MOI points out that the "foreign professionals" referred to those who are employed in Taiwan under the provisions of Paragraph 1, Subparagraph 1 through Subparagraph 6 of Article 46 of the Employment Services Act, and whose work encompasses professional and technical tasks; officials in charge of enterprises invested by overseas Chinese or foreign nationals; schoolteachers who conform the stipulated conditions; full-time foreign-language teachers in short-term educational programs of legally

established supplementary schools; sports coaches and sportsmen; and religious, art, and performance workers. For details of the new provisions, please check this website: <http://www.immigration.gov.tw/aspcode/SearchMenu.asp?DirectoryID=767>.

The MOI discloses that it will further relax restrictions on the entry into Taiwan of the mainland Chinese spouses of foreign professionals soon. The new relaxation measures will include allowing foreign managers to serve as guarantors for mainland Chinese spouses, and cancellation of the collection of the passports of such spouses upon entry into Taiwan.

■ College-student Children of Foreign Managers May Enter Taiwan as Interns

To strengthen the stability of the posting of foreign managers in Taiwan, on May 24 the Ministry of Economic Affairs (MOEA) announced that foreign managers' children who are studying in university will be allowed to come to Taiwan as interns.

According to MOEA revision, the foreign directors, supervisors, and managers of foreign-invested enterprises that meet the relevant conditions may apply for their university-student children to come to Taiwan for internship training. For details, please consult the website of the Investment

Commission, MOEA at this address: www.moeaic.gov.tw/9/91.asp; click on item 315.

■ Threshold Lowered for Foreign Students to Intern in Taiwan

On May 24 the Ministry of Economic Affairs again lowered the threshold for foreign students coming to Taiwan for internship training. Under the relaxed rules, technology enterprises and research institutions may apply for foreign university students to come to Taiwan for internship training. This measure, which was originally limited to master's and Ph.D. candidates, is expected to help domestic enterprises recruit technological personnel.

Technology enterprises and institutions submitting such applications are required to have operating revenues of at least NT\$10 million in the most recent year, and for foundations the requirement is NT\$5 million. Associations applying for students must have at least 50 members. Applicants with special conditions may be approved on a case-by-case basis. Technology enterprises meeting other conditions may also apply; for example, if their R&D spending reaches 10% of their paid-in capital or 3% of their annual revenues, and if they have at least 10 R&D personnel who are junior college graduates or above.

Internships in Taiwan are limited to three months for undergraduates and master's degree candidates, and six months for Ph.D. candidates. In cases of need, application may be submitted for a single extension amounting to the term of the original internship. To read the latest Guidelines for Application by Technology Enterprises and Research Institutions for Foreign Students to Intern in Taiwan, please visit www.moeaic.gov.tw/9/91.asp and click on item 315.

■ CBC Eased Rules on Banks' Trading of Forex Derivatives

The Central Bank of China (CBC) on May 26 announced to ease rules governing trading by banks of forex derivative products that are not related to the Taiwan currency. According to the new rules, banks will no longer need to seek CBC's approval before conducting such trades.

The derivative products concerned include:

(1) Single products:

1. Forward contracts on interest rate, forward contracts on commodities, and forward contracts on stocks,
2. Forex options, interest rate options, commodity options, and stock options.
3. Forex rate swap, interest rate swap, commodity price swap, and stock price swap.

(2) Package products:

Package products that combine any one of the items given in (1) above with foreign-currency time deposits or New Taiwan Dollar time deposits

At the same time, the CBC abolished the stipulation that the price differential in each (non-cash) transaction of up to US\$10,000 may not be greater than NT\$0.10. From now on the forex banks will set their own exchange rates for buying and selling, and post them at their place of business. For detailed contents of the revision, please visit <http://law.moj.gov.tw/fn/fn4.asp?id=21337>.

■ Domestic Financial Institutions Provide NT Financing for Overseas Buyers of Taiwan Securities

To attract more foreign investment in Taiwan's capital market, the Bureau of Monetary Affairs, Financial Supervisory Commission revised its rules on May 21 to allow domestic financial institutions to advance NT Dollar payments to make up the cash position needed for the settlement of payments for the purchase of domestic securities by foreigners outside of Taiwan. After the new rules are implemented, overseas Chinese and foreign nationals overseas who invest in domestic securities and face problems settling their payment because of the time gap will be able to have domestic financial institutions make advance NT Dollar

settlement payments for them in accordance with relevant regulations. The amount of such payments, however, may not exceed the amount needed to make up for the insufficiency of settlement payment. This liberalization will allow foreign investors to purchase stocks first and then arrange to make up their payments by deploying funds from elsewhere, thus greatly reducing the risk of settlement violations and allowing for greater flexibility in the use of foreign capital to invest in the Taiwan stock market. For the content of this liberalization, please visit <http://www.boma.gov.tw/modules/law/article/php?lawid=973>.

■ SFC Granted Foreign Investors Broader Access to Local Futures Market

Foreign investors will be granted broader access to Taiwan's futures market as the Securities and Futures Commission of the Ministry of Finance on May 21 announced the opening of more hedging instruments. In addition to short selling, two new types of transactions were added to expand the list of instruments available to foreigners: buy call options and sell put options. For more information on this relaxation, please consult this website: <http://www.mof.gov.tw/content.asp?CuItem=17195&baseDSD=5&CtUnit=11>.

符 號 SYMBOLS

- =表示數字不及一單位 Less than one unit
…=表示數字不明 Not available
—=表示無數字 No figure
*=表示數字已予修正 Revised figure

度量衡單位簡寫 ABBREVIATIONS OF WEIGHTS AND MEASURES

bbl	美桶	barrel
cu. ft	立方英尺	cubic foot or feet
cu. yd	立方英碼	cubic yard
ft	英尺	foot or feet
g t	總噸	gross ton
hg	公兩	hectogram
hl	公石	hectoliter
Imp. gal	英加侖	Imperial gallon
kg	公斤	kilogram
kl	公秉	kiloliter
km	公里	kilometer
kwh	度	kilowatt-hour
l	公升	liter
lb	磅	pound
t	長噸	long ton
m	公尺	meter
mi	英里	mile
m^2 (sq.m)	平方公尺	square meter
m^3 (cu.m)	立方公尺	cubic meter
m t	公噸	metric ton
p-km	延人公里	passenger-kilometer
sq. ft	平方英尺	square foot or feet
sq. yd	平方碼	square yard
s. t.	短噸	short ton
t-km	延噸公里	ton-kilometer
U.S. gal	美加侖	United States gallon
yd	碼	yard
