

TAIWAN'S ECONOMIC SITUATION AND OUTLOOK

Council for Economic Planning and Development
Executive Yuan

October 2007

CONTENTS

I. CURRENT DOMESTIC SITUATION

- Economic Growth
- Foreign Trade
- Domestic Investment
- Industrial Production
- Employment
- Prices
- Money and Interest Rates
- Business Cyclical Conditions

II. PROSPECTS

III. POLICY INITIATIVES

I. CURRENT DOMESTIC SITUATION

Economic Growth

The Taiwan economy grew 4.2% in the first quarter of 2007, with private investment expanding 3.3%. In the second quarter, private investment increased much faster than previously forecast, rising 12.5%, and helped boost the overall economy to achieve a growth of 5.1%.

Real GDP Growth (Change form a year ago)

	Economic growth	Domestic demand								Net foreign demand		
		Total	Consumption		Gross fixed capital formation			Increase in inventory	Total	Exports of goods & services	Less: Imports of goods & services

CURRENT DOMESTIC SITUATION

Foreign Trade

- ⇒ In the first eight months of year 2007, exports and imports expanded 8.0% and 6.0%, respectively.
- ⇒ Trade surplus increased US\$3.5 billion to US\$14.3 billion in January-August 2007 from a year ago.

Foreign Trade

US\$ billion; yoy %

	Trade		Exports		Imports		Balance
	Value	Growth	Value	Growth	Value	Growth	
2000	292.7	24.6	151.9	22.8	140.7	26.6	8.3
2001	234.3	-20.0	126.3	-16.9	108.0	-23.3	15.6
2002	248.6	6.1	135.3	7.1	113.2	4.9	22.1

CURRENT DOMESTIC SITUATION

Major trade partners

- ⇒ Hong Kong, China and ASEAN have become increasingly important trade partners to Taiwan since 2000, though trade with these two regions has grown more slowly in the last two years. Japan has remained Taiwan's largest supplier of imports, despite a narrowing share.
- ⇒ The trade shares of the United States, Europe and Japan have narrowed as those of Hong Kong, China and ASEAN have increased.

Changes in Two-way Trade with Major Trading Partners

	Exports					Imports					Yoy %

CURRENT DOMESTIC SITUATION

Domestic Investment

Private investment increased 12.5% in the second quarter of 2007, while government investment contracted 5.2% and investment by public enterprises expanded 0.9%. The substantial growth in the private sector was attributable to capital expansions in the semiconductor industry.

Gross Fixed Capital Formation: Real Growth and Current-price Value

CURRENT DOMESTIC SITUATION

Prices

In August 2007, wholesale prices increased 3.6% from a year ago, thanks to continued hikes in basic metal, chemicals, oil and coal products. Consumer prices rose 1.6%, with increases in gas, garments, imported tobaccos and Chinese medicines offsetting decrease in fruits. Core prices (excluding fresh food and energy prices) climbed 1.6%.

Source: Directorate General of Budget, Accounting, and Statistics.

CURRENT DOMESTIC SITUATION

Money Supply

In August 2007, M1B and M2 grew 8.6% and 4.2%, respectively, from a year ago. During the first seven months of 2006, M1B and M2 expanded 7.5% and 5.0%, respectively.

Source: Central Bank of China (Taiwan).

CURRENT DOMESTIC SITUATION

Short-term Interest Rates

Since late May 2007, both long-term and short-term market interest rates have trended up, as tight funding conditions prompted banks to adopt a cautious attitude towards funds operations. Commercial paper rate and interbank rate recorded 1.99% and 2.007%, respectively, in August. The rediscount rate has been raised thirteen times since October 2004 from 1.375% to 3.25%.

CURRENT DOMESTIC SITUATION

Monitoring Indicators

In August 2007, Taiwan's business indicators continued to show signs of gathering invigoration. The monitoring indicators signaled "green" for the third consecutive month. The positive signs suggest continued buoyancy of the economy.

II. PROSPECTS - 2007

2007

- ⇒ The economy is forecast to grow 4.58% in 2007, with GNP and per capita GNP reaching US\$390 billion and US\$17,077, respectively.
- ⇒ Despite the anticipation of a moderated pace of the U.S. economic expansion in the second half of 2007, the global economy will remain resilient and is expected to help boost Taiwan's foreign demand. Moreover, business globalization will add momentum to export expansion. Customs exports and imports are predicted to increase 6.9% and 6.3%, respectively, for the entire year of 2007.
- ⇒ Private consumption will see faster growth in the second half of 2007, thanks to continuing improvement in the job, real estate and stock markets, the departing of the consumer credit problem, and the rise in minimum wage. For the entire year, it is expected to grow 3.0%.
- ⇒ Private investment will continue to benefit from several developments in the semiconductor industry: plant expansions, lowered cost following production process upgrading, surging export orders for foundry, and climbing capacity utilization rates. The year 2007 will see a 5.7% growth in private investment.
- ⇒ The upward pressure on the wholesale price index is expected to wane in the second half of 2007, as the supply of important raw materials on the international market, including basic metals and chemicals, is increasing. Inflation as measured by the consumer price index in the first half of 2007 was restrained with the falls in vegetable and fruit prices due to good weather, recording only 0.6%. The second half of the year will see increasing pressure on the CPI from higher food commodity prices and negative impact of typhoon weather on vegetable and fruit supply. A 2.3% increase in the CPI is foreseen for the second half of 2007, and 1.5%, for the whole year.

II. PROSPECTS - 2008

2008

- ⇒ The adverse effects following the disruptions in financial markets in the U.S. and other industrial countries and the historically high oil prices have increased the uncertainty surrounding the global economic outlook. Although direct impact of the recent financial turmoil on Taiwan's financial markets is very limited, the tightening effect is a source of threat to the overall economy.
- ⇒ The economy is forecast to grow 4.51% in 2008, with GNP and per capita GNP reaching US\$410 billion and US\$17,911, respectively.
- ⇒ With prospects for the global economy becoming less buoyant, foreign demand will expand steadily, but probably less rapidly than forecast earlier.
- ⇒ Several factors will continue to help encourage private consumption: the rise in minimum wage, the further improvement of the job market, the wealth effect from the booming stock market, and the entry of innovative consumer products on the marketplace.
- ⇒ Private investment is expected to increase, thanks to the stimulation from the government-led urban renovation and rural reform projects and the continued plant expansions and the upgrading of production process taking place in the semiconductor industry.
- ⇒ Limited growth is foreseen in government investment and government consumption.
- ⇒ Although world prices of oil and commodities will continue to rise, inflationary pressure could be restrained by factors that will lower production cost or check price increase, such as technological progress, productivity growth, and intensive competition on the marketplace. Both wholesale prices and consumer prices are expected to rise 1.5% in 2008.

Macroeconomic Targets for 2007

- ⇒ The economy is targeted to grow 4.6% in 2007, with CPI increasing no more than 2.0%. Unemployment rate will be kept around 3.8%, with employment increasing 1.5% and labor participation rate standing at 58.0%.
- ⇒ Sources of targeted growth mainly come from domestic demand.

	Target for 2007
GDP growth (%)	4.6
Per capita GDP (US\$)	16,886
Consumer price increase (%)	< 2.0
Unemployment rate (%)	3.8
Demand components (Percent of nominal GDP)	
National consumption	74.13
Private consumption	61.54
Government consumption	12.58
Domestic investment	20.51
Goods-and-services trade balance	5.36

III. POLICY INITIATIVES

- The socio-economic environments at home and abroad have changed rapidly in recent years, with globalization intensifying international competition, and the problems of population aging and a low birth rate emerging in Taiwan. To address these challenges and act upon the conclusions of the “Conference on Sustaining Taiwan’s Economic Development” (COSTED), the Executive Yuan has formulated the “Economic Development Vision for 2015” and mapped out its “First-Stage Three-Year Sprint Program” for 2007~2009.
- This initiative involves the re-examination and adjustment of socio-economic systems and development directions, with the aim of advancing toward a “prosperous, just, sustainable and beautiful Taiwan” in 2015 as the new vision and target of efforts for national development. It will be implemented in stages under three sequential “Three-Year Sprint Programs.”

Taiwan's Image for 2015: a Beautiful Land of Prosperity, Justice, and Sustainability

A Prosperous Economy

- **Leading-edge innovation ability**
- **Outstanding Taiwan image**
- **Top-notch manpower resources**
- **Booming emerging industries**

1996~2005

- ◆ Average annual GDP growth of 4.5%, derived from:
 - Labor input contribution 13.3%
 - Capital input contribution 53.3%
 - Technical progress contribution 33.4%

2006~2015

- ◆ Average annual GDP growth of 5.0%, derived from:
 - Labor input contribution 12.0%
 - Capital input contribution 36.0%
 - Technical progress contribution 52.0%

⇒ Innovation and value-added become the main driving forces of economic growth

Caring and Just Society

- ◆ Warm solicitude for welfare
- ◆ Dignified safeguards of life
- ◆ Sound child-raising environment
- ◆ Balanced urban-rural development

Expanding the winners' circle and bring more outsiders inside the circle

Reducing the gap between the inside and the outside of the circle

Income Gap	2003	2004	2005
Top quintile of income distribution as a multiple of the bottom quintile	6.07	6.03	6.04
Gini concentration coefficient	0.343	0.338	0.340

Targets and Outlook for 2015

Warm solicitude for welfare

- ◆ Under a sustainable, comprehensive social safety net, the elderly, poor, disabled, new immigrants, and other disadvantaged members of society will be warmly cared for by the government, and the gap between the income of the top and bottom quintiles will be reduced below a ratio of six.

Dignified safeguards of life

- ◆ Under comprehensive national pension, medical protection, and long-term care systems, full safeguards will be provided for the people's dignity of life.

Sound child-raising environment

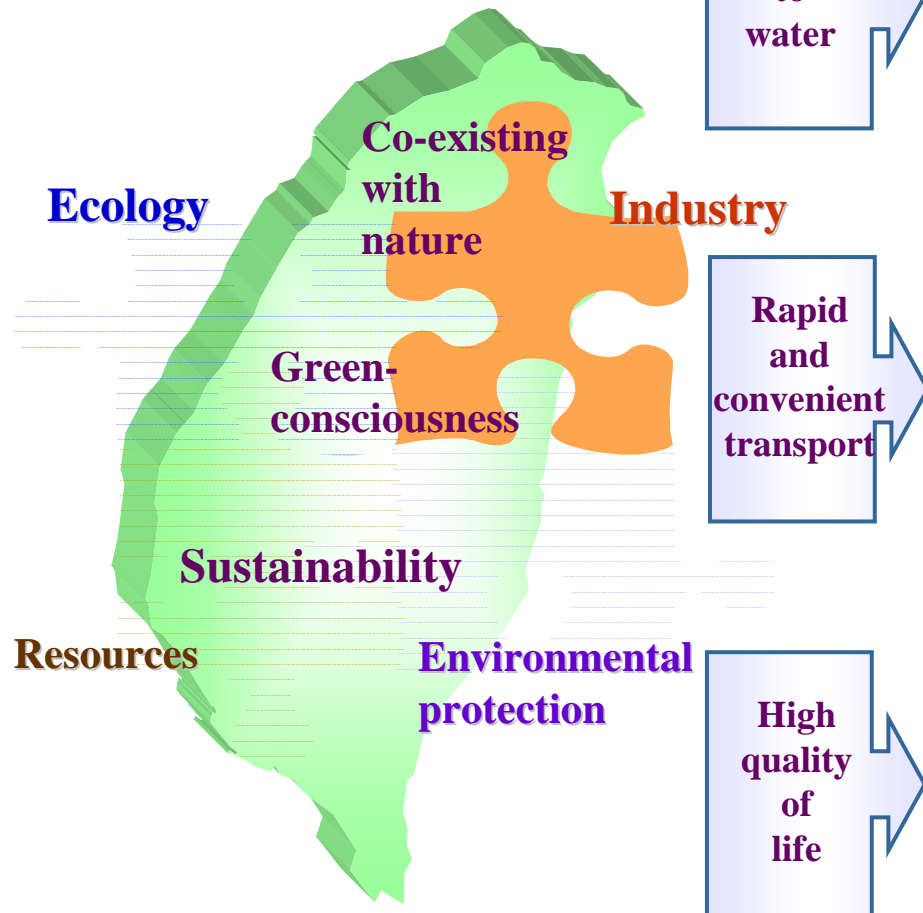

- ◆ With the provision of maternal and family protection, education benefits, employment promotion, and other such measures, the people's needs for having, raising and educating children will all be safeguarded; the unemployment rate will be kept below 4%, and the female labor-force participation rate will rise to over 50%.

Balanced urban-rural development

- ◆ The urban-rural divide will be narrowed, and cities and counties, main and offshore islands alike, will all be able to enjoy the same economic opportunities, educational resources, public services, and medical care.

Sustainable Green Environment

- ◆ Closeness to water
- ◆ Rapid and convenient transport
- ◆ High quality of life

Targets and Outlook for 2015

- ◆ Flood control measures will achieve conspicuous results in effectively protecting 600 square kilometers of flood-prone land.
- ◆ A safe water supply will be assured, homes and industry will have ample water to use, and the tap-water connection rate will be 94%, the same level as in advanced countries.
- ◆ Sewerage systems will be extensively in place, and the wastewater treatment rate will reach 50%.
- ◆ Green infrastructure will be prevalent, with the development of 47 river systems, and every county and city having at least two waterside living environments, to provide nearby residents with high-quality scenic ecological waterside space.

- ◆ Everyone will be able to enjoy fast and convenient transport services. The high-speed railway, MRT systems, and regional road networks will mean that all of Taiwan is just a day trip from home.
- ◆ International seaports and airports and major science parks will be just ten minutes away from expressways.
- ◆ Main cities will be just one to two and a half hours apart, and it will take only 30 to 60 minutes to reach regional centers from within metropolitan areas and country towns.

- ◆ There will be ample amenities such as cultural centers, sports stadiums, parks, green footpaths, and bicycle trails, and people will be able to fully enjoy the same level of high-quality living facilities as in advanced countries.
- ◆ International-standard performance venues and national games or competitive sports arenas will be built island-wide, with 90% of them reachable within one hour.
- ◆ The island-wide information super-highway will be complete, with broadband coverage reaching 90%. People will be able to enjoy economic and high-quality e-living.
- ◆ Successful land restoration will reduce deaths and injuries from landslides to almost zero.

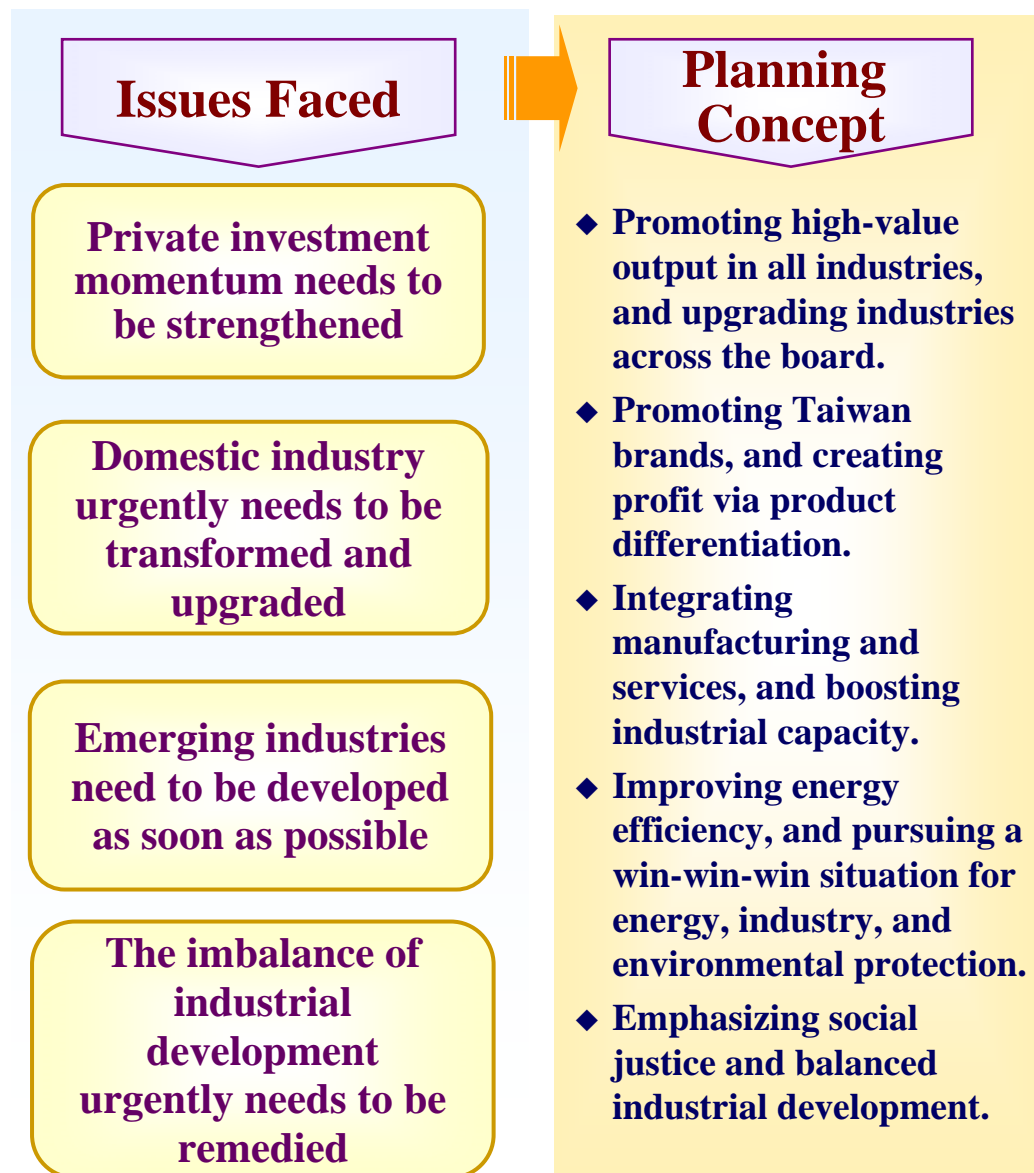

Targets up to 2015

To give concrete manifestation to the policy implementation theme of “big investment and big warmth” and realize the national development vision of “a prosperous economy, a just society and a sustainable environment,” after giving consideration to the external and internal conditions previously described, the government has set the following macro-development targets for 2015, which it will seek to forge into a broad public consensus and spare no effort to achieve:

- Taiwan to be a unitary “living circle” in which no place is more than **a day trip** away.
- The CPI to rise by no more than **2%** a year.
- Per capita GDP to reach **US\$30,000** (US\$20,000 in 2009).
